AMERICAN SEED TRADE ASSOCIATION

Officers—President, Chas. C. Massie, Minneapolis, Minn.; 1st vice-president, J. M. Lupton, Mattituck, N. Y.; 2nd vice-president, W. F. Therkildson, Painesville, O.; secretary, C. E. Kendel; assistant secretary, S. F. Willard, Jr., both of Cleveland, O.

Seed Potatoes in Maine.

In accordance with the action of the Maine Seed Improvement Association, the Department of Agriculture of Maine will co-operate with the Seed Association the coming year, in assisting the members to grow better seed stock, especially of potatoes. The growing of potatoes for seed is an important branch of the potato business and should increase with proper arrangement.

There is much complaint on the part of the southern growers using Maine seed that a great loss is suffered from impurities of variety and from diseased stock. The situation is such that unless there is immediate improvement in the quality of seed stock sent out from the state, the southern growers will seek other potato centres for their seed.

To improve the seed stock of the Maine grower, a rigid inspection system will be established by the Seed Improvement Association with the assistance of the Department of Agriculture. This system will include a careful inspection of the seed before planting, by men who are familiar with the diseases which infect Maine potatoes, and further inspection at blossoming time and before harvest.

Rules will be made covering the handling of the seed and of the crop tending toward elimination of disease and varietial impurities.

Potatoes which reach a standard of purity and of freedom from disease will be certified and recommended by the state agricultural department and the Seed Improvement Association.

A portion of the cost of this inspection work must be borne by the grower who will be repaid in the higher prices received for his seed stock. Careful growers who realize the need and desire to improve the standard of the potato crop of Maine are invited to write the State Department of Agriculture or the secretary of the Seed Association at an early date.

Onion Seed Shipments From Canary Islands.

(Consul Homer Brett, Teneriffe.)

During the year 1913 the quantity of Bermuda onion seed declared at this consulate for shipment to the United States was 93,378 pounds, valued at $84,645, both quantity and value exceeding those of any previous year. Because of the exceedingly high prices offered in 1912 there was a large overproduction in 1913, and several thousand pounds of this season's crop remain here unsold. The temptation to dispose of this seed next year will be great, and unless American importers are careful to buy only from growers or dealers of known integrity they will run the risk of receiving old seed.

Local shippers complain that the lack of uniformity in the trade names for onions leads to frequent misunderstandings and difficulties. They say that in the trade the term "white onion" is used to designate an onion which is in reality yellow, and that those onions which are actually white are known as "crystal wax." Some American importers have ordered "white onions," and when their product turned out to be of the yellow variety have expressed dissatisfaction and threatened legal action. It is hoped that a proper understanding of the trade names may save future trouble.

Another Unreasonable Seed Bill.

Another seed bill was filed in the Maryland House on March 4th. (H. R. No. 611.) It is drawn on the lines of the old type of seed bill discarded by recent legislation. It is conflicting in its provisions, ambiguous, in parts unconstitutional and unreasonable.

It provides that every bushel of seeds and cereals sold for seeding purposes in Maryland shall pay an inspection fee of two cents. This would create a great deal of trouble and supply too much money.

Chicago Seed Notes.

Supply of peas in most varieties is equal to the demand. Beans are scarce.

Onion sets are getting scarce and there are still many weeks of the selling season left. At present the Leonard Seed Co. quotes as follows, on lots of one hundred bushels: Red $1.75 to $2.00; White $2.25; Yellow $2.50. Stock was in excellent condition when harvested and has kept exceptionally well.

There is a strong probability amounting almost to certainty that quotations on lawn grass seed will be higher than those of last year. The sections of the country that suffered from drouth last summer included some of the districts that produce the fancy red top and limited the amount produced. New varieties in general will be limited. Prices on clover seed, on the contrary are somewhat lower than usual.

The amount of Asparagus plumosus seed used in this vicinity is said by local seedsmen to be increasing each year. Just now is the time for the market to be active in the sale of seeds of this green, and in lots of ten thousand seeds, sold this week for $2.35 per thousand. Northern-grown greenhouse seed is much preferred to southern or western stock, the northern having a higher percentage of germination.

Omaha, Neb.—W. De Vaughn has opened a new seed store on Harney street, near 16th.

I consider HORTICULTURE the best trade paper published.

"John Baer" Tomato

A MARVELOUS INTRODUCTION

"John Baer" Tomato is the most-talked-of Novelty in both America and Europe for 1914. ITS WONDERFUL MERITS and intrinsic worth have attracted attention all over the world.

PERFECT FRUIT IN 30 DAYS

"John Baer" Tomato produces Perfect, Solid, High Crown, Beautiful, Brilliant Red Tomatoes in 30 days. IT IS THE RESULT of Fifteen Generations of Improvement and Selection. ORIGINATOR'S SEED ONLY.

The Earliest Tomato On Earth

Perfect Fruit In 30 Days

"John Baer" Tomato

1st—"John Baer" Tomato produces large, beautiful, solid shipping Tomatoes in 30 days from plants grown in Veneer or Paper bands, with roots undisturbed.

2nd—"John Baer" Tomato produces the most perfect High Crown Tomatoes ever grown.

3rd—"John Baer" Tomato produces an enormous crop of Tomatoes, 50 to 100 fruit to each plant.

4th—Every "John Baer" Tomato ripens evenly, right up to the stem.

5th—No cripples, no scalds, no blight, no cracked, no wrinkled, no one-sided, uneven, scarred fruit. When dead ripe "John Baer" Tomato will not burst.

6th—"John Baer" Tomato has a wonderful glistening bright red color.

7th—"John Baer" Tomato has a mild deliciously sweet flavor.

8th—In shape and form exactly like its photograph.

9th—"John Baer" Tomato is almost seedless, a marvelous Stem Setter, often ten fruit in first cluster, solid and meaty.

10th—"John Baer" Tomato has just enough foliage—will stand plenty of manuring without going to vine. Set plants 2½x3 feet.

11th—"John Baer" Tomato is the most perfect shipping Tomato ever grown—24 fruit exactly fill a six carrier basket.

12th—Each beautiful "John Baer" Tomato weighs about 6½ ounces.

13th—"John Baer" Tomato Seed was saved only by John Baer, the originator, who personally selected and picked every Tomato from which he saved this seed, selecting only the most beautiful perfect fruit of the early Stem Set Clusters.

14th—"John Baer" Tomato is the offspring of two marvelous Tomatoes—One Great Specialist having devoted 10 years in selecting and improving one parent and Another Expert devoted five years in selecting and improving the other parent. The "John Baer" Tomato is therefore the result of Fifteen Generations of Improvement and Selection for earliness, quality, shape, fruit, color and shipping quality.

"John Baer" Tomato

HOW TO JUDGE NOVELTI

An Unriv

The great advance in Horticulture of the last half century has been c
main features. We have ventured to lay claim to having contributed
with it as it has done increasing attractions to the garden, and additi
up a list in chronological order of the new varieties of flowers of intri
since the year 1857, most of which have been absolutely produced in o
selection.

It is true that some of the varieties which figure in this list are
appearance, but they have done their duty as stepping stones in the d
seded them.

We present this list as our credentials when we ask the public to
that no history on the development of Horticulture would be complete

A 57 Years' List of Flower Seed No

BOSTON'S NEW PARK CHIEF.

As mentioned in our notes last week on the shake-up in Boston's Park Department, John H. Dillon succeeds D. Harry Sullivan as chairman of the Park Board. Mr. Dillon's appointment by the Mayor has now been duly ratified by the Civil Service Board and he assumed his new duties on March 11.

John H. Dillon has been brought up from boyhood in horticultural work, and those who have been accustomed to clamor for the appointment on park boards of men with a practical gardeners' training will no doubt, see in

JOHN H. DILLON

this unexpected development, the fruition of their hopes. Mr. Dillon got his first lessons from his father who was gardener for Hon. Marshall P. Wilder. When but a lad he had employment in a flower store in Boston and later on with various prominent growers. He has been for many years employed in the Department of Public Grounds of Boston, latterly as foreman in charge of the Public Garden. He has a wide circle of acquaintances in the profession, all of whom will wish to see him succeed in the new and trying responsibilities now given him.

BUFFALO NOTES.

Edw. Slattery, well known to the trade throughout the country, has severed his connection with the firm of Slattery & Bryer. A. Kolawski, formerly of Lenox, has taken a position with above firm.

The Lenox Flower Shop, Buffalo, has changed hands and Edw. Altman, former proprietor, has retired from the florist business. Felix Albert, formerly of Rochester and well known to the trade, has taken over the management of the Lenox store.

Sad news came to the Buffalo florists in the sudden death of Mrs. Wm. Ehman, of Corfu, N. Y. Mr. Ehman is well known to the Buffalo trade in being a shipper to the wholesale market. The heartfelt sympathy goes out to the bereaved husband and children in this hour of their sorrow. Many Buffalo florists attended the funeral in Corfu on Friday last.

CHICAGO NOTES

Quite a number from Chicago are attending the Illinois and Indiana State Convention at Danville, Ill.

Miss Douglass, formerly with Schiller, florist, will open a retail store about March 15th, at 3954 W. Harrison street.

Allie Zech has received word from his sister, who is in a hospital in Milwaukee, that she is much better and will return home in another week.

The Easter lily plant is the subject of much anxious thought just now. Various and conflicting reports from growers are heard, but they sift down to the fact that the chances are not especially good for a large supply of plants of just the right size.

Poehlmann Bros. are well represented this week at the Danville, Ill., convention. C. J. Anderson, in charge of the plant range, has a large exhibit of decorative and blooming plants and accompanied them to the joint convention, while T. Waters, who presides over the department of florists' supplies, left with his exhibit of baskets, ribbons, chiffons, etc.

The Chicago papers are giving considerable space to the arrest of C. M. Dickinson, in Stony Butte, Montana. It was well known to the trade here that Mr. Dickinson's settlement with his creditors would not cover all his financial difficulties which were pending when he left Chicago a year ago. Clifford Pruner who was traveling salesman for the firm of E. H. Hunt, of which C. M. Dickinson was manager has begun the suit and Mr. Dickinson is expected in Chicago at any hour. There are possibilities of other suits following.

Wm. Allen, now in charge of the Schiller conservatories, will become private gardener for J. E. Tilt, 742 Brompton avenue, Chicago, assuming his new duties March 17. This is a comparatively new place and Mr. Tilt, who will make it one of the finest in the city, has secured a most capable young man, rapidly rising in his profession. Wm. Allen is a born lover of his work, his father being a private gardener of high repute in England, and during the eight years spent in this country Mr. Allen has "made good," advancing rapidly from one position to another.

Work of saving the Chicago trees is again under way, and spraying for the destruction of the cotton scale that attacks the soft maples, the walnut scale, the elm scale, the oyster shell bark and the scurvy scale, and probably others, is now being done on the mild days. J. E. Prost, whose official title is Superintendent of Small Parks and City Forester for the Special Parks Commission, has his men out after the enemies of the trees. They use a Triplex power spray, run by a gasoline engine. In his estimation there are a very small per cent. of perfect trees in Chicago and among the legion of enemies there are none worse than the tussock moth.

The city of Chicago has of its own and under the care of its Special Parks Commission 100 acres of nurseries, now growing trees, shrubs and perennials for its public places.

PHILADELPHIA NOTES.

Berger Bros., have sold their lease on North 13th street and will move on the 20th inst. to 1225 Race street, a fine big store, well lighted.

F. X. Millman has opened a retail flower store at State and Montgomery, Trenton, N. J. Mr. Millman was recently with Ribsam and previously located at Cumberland, Md.

Mr. Pettitt, Advertising Manager at Michells, is busy getting up a new perennial catalog. The Andalusia collection is very large and select and has to be dignified with a "special."

"The Food Value of Fresh Vegetables," is the title of a sixteen-page pamphlet by Dr. Henry Leffmann. A timely story well-told. Burpee has a few free copies, maybe you could get one if you ask nicely.

"The Fra" for March has a fine picture of W. Atlee Burpee for its front piece, and an excellent article on the history of gardening by Elbert Hubbard. Very interesting. Every reader of HORTICULTURE should buy this number.

Roland H. Patch, an instructor in the New York State College of Agriculture, has been granted a three months' leave of absence and has taken up practice work in floriculture at Dreer's, Riverton. Professor Edward A. White of the Department of Floriculture at Cornell, asks that distinguished consideration be accorded Mr. Patch by local members of the craft on whom he may call.

Thomas A. Hobson & Co., is the title of a new firm in the landscaping business located at Radnor, Pa. Mr. Hobson is a son of the well known grower and exhibitor of crotons, John Hobson gardener for Edward A. Schmidt of Radnor, which reminds us to mention that Mr. Hobson, senior, has been having a hard time of it this winter. His many friends will regret to hear of the death of his daughter and of the very serious illness of himself and wife. We extend our sincere sympathy.

Two trolleys on the Allentown, Phila., line were stalled during the blizzard Sunday and Monday at Center square. Forty poor unfortunates had to be fed and housed by the Cumming family whose home was fortunately nearby. The Marine hotel is not so rare but we don't so often hear of the "Maroon Hotel," which one guest facetiously named the Cumming homestead. Some damage was done by the gales to the Cumming greenhouses. About fourteen boxes of glass were needed to make repairs.

The North Wales mammoth structure suffered more damage in the second blizzard. The other side went down this time. Bad wreck.

BUSINESS TROUBLES.

Cincinnati, O.—Wm. J. Niehaus made an assignment on February 19.

Pittsburgh, Pa.—A petition in insolvency has been filed against A. T. Lorch & Co. and S. W. Church has been appointed receiver.

Yakima, Wash.—J. D. Graham, is mourning the sudden departure of Erbe & Wetzel, the two young men who recently bought out his floral establishment on North Second street. The store is closed and the young men have left the city. Mr. Graham is the principal creditor of the company, being still about $200 behind on the deal. The young men came from Seattle and have been in business here since the middle of December. They purchased stock from Seattle and California and supplied their trade. They owe rent to H. Cahalan and have other unpaid bills in the city.

A CORDIAL INVITATION

Is extended to the trade to visit and inspect our new establishment, Fifth Avenue at 46th Street, New York City.

Obituary

A. C. Canfield.

Arthur C. Canfield, for many years a leading flower grower of Springfield, Ill., died on February 20, of heart disease.

William M. Carr.

Wm. M. Carr, a well-known nurseryman of western Massachusetts, died in Springfield, Mass., on March 3, aged 83 years. He was noted as a skilful budder and an expert in forestry work.

S. B. Beale.

Samuel B. Beale, traveling representative for L. L. May & Co., of St. Paul, Minn., died suddenly on February 17, while visiting a customer in St. Paul. He was widely known and as widely beloved and the news of his death will be received with profound sorrow by a large circle of friends in the trade.

J. J. Comont.

We learn of the death, at the age of 71 years, of James J. Comont, representative of James Carter, Dunnett & Beale, which took place on February 13. Mr. Comont was many years travelling for this well-known firm, making an annual trip to America where he was widely known and universally liked among the seed trade.

George W. Vanderbilt.

All the world knows, through the daily press, of the death of this widely known philanthropist and patron of horticulture. We merely wish to record our realization of the irreparable loss sustained by those industries which HORTICULTURE strives to serve, in the death of the owner of Biltmore. He was a man of retiring disposition, rural in his tastes and found his greatest delight in the garden and the wilderness, where the greater part of his time was spent.

Paul Volquardsen.

Paul Volquardsen, a well known and highly respected gardener of Newport, R. I., died at his home on March 9, following an illness of about eight months. Mr. Volquardsen was about 55 years of age, a native of Germany, and came to this country when a young man. Previous to going to Newport, he was for several years gardener to Mr. J. Arthur Beebe at Falmouth, Mass., and the past sixteen years was in charge of the Mrs. W. G. Weld place, where he died. He was a skilful gardener; a frequent exhibitor at the shows of the Newport Horticultural Society, and his exhibits of gloxinia and tuberous begonia plants will long be remembered for their superior quality. Besides a widow, he leaves a son and daughter, who are both grown up. J. R.

SPRING SHOW IN BOSTON.

As we go to press the Annual Spring Show of the Massachusetts Horticultural Society has just opened at Horticultural Hall, Boston and will continue until Sunday evening, March 15. Always a gorgeous spectacle and dazzling riot of bright color, this year's exhibition is even more brilliant and spectacular than ever. The local growers, commercial and private have put up a superb demonstration of their abilities in plant and flower culture, filling all the halls to repletion. Full account next week.

PERSONAL.

A. Schmidt, Lake Geneva, Wis., is on a vacation trip in California.

Charles Reardon, formerly of Hinsdale, Ill., has taken the position of superintendent for E. C. Crosette at Davenport, Ia.

John Noyes, formerly of Boston, and Amherst, Mass., has been appointed horticulturist in the Missouri Botanical Garden.

Isadore Jacobs, who conducts a flower store at 18 North King street, Camden, N. J., slipped and fell on the icy pavement near his store Feb. 25, and fractured three ribs.

Arthur E. Thatcher of Mt. Desert Nurseries, Bar Harbor, Me., has accepted an invitation to serve as a judge in the Flower Show at Grand Central Palace, New York.

John Westcott of Philadelphia who has been luxuriating at Pine Island, together with John Walker, of Youngstown and Adam Graham of Cleveland, Ohio, writes that he will arrive in New York on the steamer due March 17-18.

George Waldbart of St. Louis, Mo., has been confined to his bed the past ten days with sickness. Mr. Waldbart has been on the sick list, more or less, since the first of the year. From last reports he was somewhat improved.

Cincinnati—Mr. and Mrs. P. J Olinger are entertaining Mrs. Olinger's mother and sister, Mrs. Weiland and Miss Didier of Evanston, Ill. J. T. Conger has been very ill at home with Grippe. The roof of Wm. Rutenschwer's home burned a few days ago.

Flower Market Reports

BOSTON Trade seems a wee bit brighter as we go to press. Carnations have gone up a point and roses also show a slight improvement in demand. Violets are in great abundance and are sold by the thousand as a rule, few caring to bother with a hundred or two. Sweet peas are also very abundant but there are many of low grade. Spencers are not so much in evidence as they were. Orchids continue to drag. The utter stagnation on cattleyas seems unaccountable. Lily of the valley and, in fact, all bulbous material are received in enormous quantities. There are some very poor tulips and even the extra good ones find difficulty in getting moved. Daffodils are also badly congested. Lilium speciosum is offered for the first time this season by Welch Bros.

BUFFALO Market conditions have changed but little during the past week. Stock is plentiful and the outlet blocked. It was very quiet the early part of last week, but the ending was much more satisfactory than looked for. There was plenty of everything and prices were at a low ebb. Roses and carnation crops are on, as well as lilies and other stock, and the days have been such that a bargain sign during the week amongst the merchants was not noticeable. Social affairs have practically ceased. Violets have moved slowly, even at the very low prices asked. Lilies had no demand until Saturday, when good sales were reported.

CHICAGO Shipping trade seems to be rather ahead of local trade. The falling off of a large proportion of the run of business, which had kept up steadily from the holidays till Lent began, shows no signs of diminishing so far as local demand is concerned. Counters and ice boxes show an amount of stock that would have delighted salesmen a few weeks ago and the quality in most lines is excellent. American Beauties are reversing earlier conditions, as they near the end of a crop, for now the shortage is on the long-stemmed flowers and there are plenty of shorts. Roses are in good supply and sales hardly brisk enough to use them to advantage. Violets are a proposition now. Hudson River doubles are arriving in various conditions, mostly bad, and there is a big supply of locals, both double and single. Sales are confined almost exclusively this week to singles. Some very fine carnations are seen in the market, but there are quantities of a poorer quality also. Bulbous stock contains much that is poor and much also that is excellent. Some fine sprays of orange flowers from Florida were seen at Zech & Mann's, Tuesday.

CINCINNATI The general supply has increased to such an extent that the market is easy in every line except American Beauties. The demand for stock, while fair, is not quite all it might be and this fact coupled with the large supply gives the buyers a chance to get their blooms at low prices. Roses have shown very large increases in the receipts. The carnation supply is large but most all good ones have been able to find a market. With heavy receipts the sweet pea prices have gradually fallen, until now they have reached the lowest point at which they have sold this season. A good many of the smaller blooms find no market at all. About the only persons from whom there is an active demand for violets are the street fakirs. Very many fine single blooms are offered. Lily of the valley; orchids and primroses all sell slowly. The Giganteum lily supply is decreased considerably. Callas are in good supply. Some very fine bulbous stock is offered, but the sales are not overly large.

NEW YORK There is little of interest or value to anyone that can be said about the flower market at the present time. Every flower known to the spring season is in evidence in quantity—all the well known roses and some not so well known, all the carnations famous or obscure, tulips and daffodils in generous assortment, violets, cattleyas, lilies and lilacs — all these and more, but they are far in excess of the demand, which is very light, and naturally interest lags when any stock accumulates and becomes unsalable. There are now some forty or more wholesale flower concerns, but no more goods are sold than would be if there were only one-fourth as many. It makes a lot of people among which to divide the limited gross profits and, of course, the situation is unsatisfactory to all. Next year we shall probably have fifty wholesalers if present rate of multiplication continues. Eventually one for each grower? Each with the most spacious and well equipped store, of course.

PHILADELPHIA Medium to bad is the verdict for last week. First, they couldn't get the flowers in, and then they couldn't get them out. It was some blizzard all right. Communication was pretty well blocked up except to points south. When stocks did come they came with a rush and

Flower Market Reports

(Continued from page 385)

swamped the market. Everything too plentiful all along the line. The number of "dull sickening thuds" in quotations too painful to talk about. Let us forget it.

ST. LOUIS

Trade and the market have not gone well together the past week, trade being slow and the supply large and prices are at low ebb. Plenty of good roses are coming in now as these have been off crop for some time. Violets are coming in great quantities and sold as low as $1.50 per 1,000. Sweet peas, too, are cheap and most plentiful; all fancy goods hold up well in price but the common varieties are very low. Bulb stock plenty and selling cheap. The leading retailers say that trade since Lent has been slow. Funeral work alone has kept them alive the last week.

WASHINGTON

The local florists last week suffered considerable additional competition at the hands of the street vendors who offered large quantities of violets, sweet peas and Richmond roses at very low prices while the store men were hunting high and low for the latter, although there was a vast difference between the quality of the two types. A good sized bunch of storage violets could be had at as low as fifteen cents while the dealers were paying $7.50 per thousand, but were getting good quality. The same could be said of sweet peas. Carnations dropped down again to $2 and $3 per hundred. Gardenias were far more plentiful than they have been and many were sent to other cities. The only real shortage was on orchids of which there were not enough good ones to fill the demand. Red roses have been quite scarce during the week and were subject to quite a heavy call. Lilacs and other spring flowers met with but a fair sale.

CLUB AND SOCIETY NOTES.

The St. Louis County Growers' Association held its regular monthly meeting on Wednesday night, March 4. There was a good attendance of members.

The St. Louis Retail Florists' Association will meet Monday night, March 16. They have changed their meeting place from Beers' Hotel to The Washington Hotel, where the next meeting takes place.

The first spring exhibition of the Worcester County (Mass.) Horticultural Society was held on the afternoon and evening of March 5, at Horticultural Hall. At 2.30 o'clock in the library room, a special lecture was given on "Insect Pests and Insecticides" by E. D. Baker of Cornell University.

At Cincinnati Florists' Society meeting last Monday evening, R. Witterstaetter, chairman of the taxation committee, gave a report of the work of that committee in getting funds to aid in fighting the recent tax decision in this state. S. S. Skidelsky of Philadelphia was present and gave a little talk. J. A. Peterson and Roger Peterson showed some colored plates of some of their new begonias.

The regular monthly meeting of the Lenox Horticultural Society was held in the Town Hall, Lenox, Mass., on Saturday evening, March 7, and was the largest for some time. A letter was read from J. Everitt of Glen Cove, N. Y., offering $5 for the largest chrysanthemum bloom at the fall show. Thos. Proctor exhibited a beautiful pink seedling carnation, which was awarded a certificate of merit and received a certificate of cultural commendation each for a vase of White Wonder and Mrs. C. W. Ward. S. H. Reed of Brookfield, gave a very interesting lecture on ensilage. He dealt with the best crops to grow for ensilage and the best kinds of silo pits, etc.

JOHN MAIR, Ass't. Sec'y.

BOSTON'S NEW FLOWER MART.

The Boston Co-operative Growers' Market moved into its spacious new quarters in Winthrop Square on March 9, and thus another great wholesale mart has been added to Boston's rapidly growing commercial flower business. Simultaneously with this removal, the Boston Rose Company, which handles the Montgomery Bros.' product moved from Somerset street to quarters in the Boston Flower Exchange. This leaves practically only two wholesale places in the old-time neighborhood—Waban Conservatories and W. H. Elliott—and it is probable that they, too, will on the expiration of their leases locate in the new centre of activity.

VISITORS' REGISTER.

Boston—Louis J. Reuter, Westerly, R. I.; William Currie, Milwaukee, Wis.

St. Louis, Mo.: Guy Reyburn, of A. Henderson Co., Chicago; Bert Chadwick, New York City; Frank Farney, representing Rice Co., Phila.; M. Le Vine, New York.

Philadelphia: R. T. Brown, Cottage Gardens Co., Queens, N. Y.; Alexander Cumming, Center Square, Pa..; Edward H. Flood, Atco, N. J.; Stephen Mortensen, Southampton, Pa.; E. G. Hill, Richmond, Indiana.

Chicago: Roy Wilcox, Council Bluffs, Ia.; Wm. Desmond, Minneapolis, Minn.; Ralph Latham, Minneapolis; Jos. E. Rolker, New York; Miss Beth Youreman, Aberdeen, S. D.; A. C. Roth, Joliet, Ill.; Elof Holm of Holm & Olsen, St. Paul, Minn.; O. H. Carlson, Minneapolis, Minn.; Frank Stuppe, St. Joseph, Mo.; Mr. and Mrs. Shotwell, Fargo, N. D.

New York City—The Yokohama Nursery Company have removed from 51 Barclay street to the Woolworth Building where they have taken offices on the eighth floor, rooms 856 and 858. They will be pleased to have their friends call.

Last Friday a frightened deer smashed its way into the Forest Hill greenhouse of Philip A. Arzberger at Pleasantville, N. Y., and smashed out again, breaking thirty big panes of glass. Game Warden Sutton, of Mount Kisco, found its carcass in the possession of a gang of laborers. It had died from its cuts.

CYCLAMENS
200,000 GIANT FLOWERING CYCLAMEN. For the last 16 years we have selected three-fourths of our seed-bearing cyclamen stock before Xmas, to assure early blooming plants, and claim the finest commercial strain in this country; no fizzle of many so-called English varieties. Our aim is strong growers that don't have to be petted to be grown into a choice salable plant—a well built, five-petaled flower (many of them at one time), with well marked foliage; every plant an ideal, a prize winner. Received first prize at the Cleveland show and first and second at Toledo, early November, when blooming cyclamen were scarce.

STRONG AUGUST SOWN SEEDLINGS, once transplanted, $3.50 per 100; $30.00 per 1000. Cash with order. Cultural directions with all orders. C. WINTERICH, Cyclamen Specialist, Defiance, O.

Thomas Roland, Nahant, Mass.

WATCHING FOR THE INSECT PESTS.

In the report submitted by C. L. Marlatt, chairman of the Federal Horticultural Board, on the pests collected during the month of January, 1914, attention is called to the fact that one egg mass of the Gypsy Moth was detected on cedar from Japan, and a single Brown Tail nest (?) has been taken on Mahaleb stock from France. The European Tussock Moth (Notolophus antiqua Linn.) has been intercepted on two shipments of Holland rose stock, and the Oriental Moth (Cnidocampa flavescens Walk.), which has an extensive distribution in the Orient, has been detected on plants from Japan. The European pear scale (Epidiaspis piricola Del G.), a coccid, which has in recent years become established in certain sections of California, has been reported on pear seedlings from France.

STORM DAMAGE IN MARYLAND.

The great storm of March 1 did considerable damage to florists. James Glass had two greenhouses destroyed, which contained sweet peas and dahlias which were all ruined, the loss running into thousands. John A. Nuth's chimney stack was blown down; Walter Richmond had an end of a big greenhouse blown down entirely; John G. Killian's boiler set a fire which destroyed two buildings—loss over $2,000. All these were on Erdman avenue. A score of other florists suffered minor trouble, such as broken panes and destroyed hotbed sash. It is reported that in the peach growing countries in western Maryland fully half the fruit buds in the orchards are frozen.

Washington, D. C.—A heavy wind storm which visited Washington last week did a great deal of damage. At Garrett Park, Md., it ruined a house of violets that had been brought to perfection by David Bissett for the Easter trade. In Anacostia, a building on the grounds of Fred H. Kramer was unroofed and considerable glass broken; Gude Bros., M. J. McCabe and others lost glass. The wind was particularly destructive in the grounds of the Department of Agriculture where the large banana house was ruined. The large display window at the store of F. H. Kramer, 916 F street, was blown in.

Madison, N. J.—Among the many losses in this section from the heavy snow and ice and falling trees in the blizzard of last week, was the wrecking of one of the greenhouses on the D. Willis James estate by a falling tree.

Short Hills, N. J.—The side-hill range of greenhouses originally erected by Pitcher & Manda, and occupied in recent years by J. J. Wilson, were crushed in and practically ruined by the weight of snow on the night of March 1.

Auburn, N. Y.—A rose house belonging to Dobbs & Son was broken down with weight of snow on the night of Sunday, March 1, causing heavy loss to building and contents.

SPECIAL GREENHOUSE FERTILIZERS
FOR FLORISTS AND GARDENERS
Formulated and Manufactured by men who have made a life study of
FLOWERS—FRUITS—VEGETABLES
UNDER GLASS
In this Country and Abroad
Proper fertilization under glass is more important than fertilization out of doors—and
Fertilization is Our Specialty
Why pay ocean freight and dealers' commissions on Imported General Fertilizers when you can buy Fertilizer Direct from the Manufacturer especially prepared to meet *your individual requirements.*
We are also manufacturers of MAK-GRO Odorless Plant Food put up in one pound tins and five pound bags—a splendid side line for Florists operating their own stores.
We are at your service on all matters relating to Greenhouse Fertilization. Write us for farther particulars

Scotch Soot
Where there is a house that is just full of buds almost ready to show color, nothing will turn better color into the flowers than a little soot, that can be scattered over the benches before watering. The amount applied should not be excessive, as the soot is very strong and may damage some of the foliage somewhat. Apply just enough to blacken the surface of the soil in the benches, and let it go at that. Better a little oftener than too much all at once.
We offer the genuine in original cwt. Sacks, at:
$2.75 per 112 lbs.; $12.50 per 560 lbs.
Stumpp & Walter Co.
30-32 Barclay Street, NEW YORK

Cocoanut Fibre Soil
This is the Real Nature's Humus. Put it on your lawn this spring. Don't let it burn up, or stand all summer hose in hand.

RHODODENDRONS

One Vital Care Point

RHODODENDRONS in their natural environment, are found growing in the rich, moist soil produced by centuries of falling leaves—a soil that is more than half humus. The roots of Rhododendrons being shallow, they will only thrive in just such a rich moisture holding top soil. These roots don't incline to "go down into the ground for water."

If you would have your Rhododendrons hold their beautiful dark green, waxy foliage, and give you freely of their wondrous blooms; you must furnish them with soil made rich with humus. You must also mulch them heavily with rotted leaves, manure or humus. Alphano Humus when mixed with soil, produces an ideal root home for Rhododendrons. It furnishes a perfect, balanced ration, and holds just the amount of moisture to make the roots happy. As a mulch it surpasses manure or leaves, because it lasts longer, is not unsightly, has no odor, and being in powdered form, can be evenly distributed over the soil.

Down at Sag Harbor, Mrs. Russell Sage's place, there are beautiful Rhododendrons growing on Alphano Humus treated soil, that previously would scarcely grow wire grass.

For your lawns—gardens, shrubs and trees, Alphano Humus is highly desirable. Being so reasonable in price, you can use it freely.

Send for the Humus Booklet. It tells about Humus in general, and Alphano Humus in particular.

5 BAGS for $5

$12 a ton—$8 by the carload.

Aphine

The Insecticide that kills plant Lice of every species

The Recognized Standard Insecticide.

W. N. Craig writes in Florists' Review (March 5th, 1914): "Scale on greenhouse plants is not easy to get rid of, as doses which are sufficiently strong to kill the scale will usually disfigure the plants at the same time. I have found APHINE a first-class remedy for scale, and if you will apply it according to directions you will kill and loosen the scales, although they will not fall off, as will some other pests."

It will only require the hose to wash off dead scale.

A remedy that is efficient in destroying scale, will destroy green, black, white fly, red spider, thrips and mealy bug.

$1.00 per quart—$2.50 per gallon.

FUNGINE will destroy mildew, rust and bench fungi.

75c per quart—$2.00 per gallon.

VERMINE will destroy root maggots, eel, wire and cut worms in the soil.

$1.00 per quart—$3.00 per gallon.

SCALINE will destroy San Jose and all hard scale and red spider on fruit and ornamental trees and bushes.

$1.50 per Gal—10 Gals. $10.—50 Gals. $37.50

NIKOTIANA—a 12% nicotine for fumigating over small lamps or by painting on steam pipes.

$1.50 per quart—$4.50 per gallon.

For Sale by Seedsmen.

FIRES.

Pittsburgh, Pa.—The Neff Floral Company sustained a loss of about $1,000 from fire in their store last week.

Minneapolis, Ind.—Charles Schill lost his greenhouse and adjoining buildings by an incendiary fire, causing a damage of $5,000.

Newport, R. I.—A fire in the green houses at Swanhurst, Mr. Geo. L. Rives' estate, did a small amount of damage on Tuesday, March 10, having been discovered by the coachman before it got much headway.

Tulsa, Okla.—The greenhouse belonging to W. A. Chastain and Charles Evans was completely destroyed by fire February 20. The fire broke out in the underground subway of the plant when paper close to the gas engine caught fire. Loss $500. Uninsured.

Gardenville, Md.—Fire broke out in the boiler room of John G. Killian on Furley avenue and Bowley lane, on Sunday night, March 1. The fire, fanned by the high wind, destroyed the entire end of four of the largest houses and caused a loss of about $2,000. Many plants were lost.

New York—On Tuesday afternoon, March 10, the seed store and plant auction establishment of William Elliott & Sons at 42 Vesey street was badly damaged by fire which gutted the basement floors. The loss on the upper floors was caused mostly by water and smoke. Amount of damage cannot yet be correctly estimated.

For particulars address
John G. Esler, Sec'y Saddle River, N.J.

St. Louis, Mo.—The St. Louis Seed Co. had a big loss on Monday, March 9th, by fire and water. The fire started in the Boatman's Bank next door. The firemen were directing streams of water into the building and it looked very much as though their stock of seeds will be a total loss. They carried a heavy stock and all preparation had been made for the spring sales. The Bentzen Floral Co., around the corner, also suffered considerable loss from water.

PEIRCE PAPER FLOWER POT
Superior to ANY OTHER pot for shipping purposes.
Saves weight and space for the shipper.
Best of protection against damage by frost.

An Incorrect Statement

IN a recent issue of one of the trade papers, it was mistakenly stated that the N. F. McCarthy house at Montrose, Mass. was erected by one of our competitors.

You will be glad to learn that Mr. McCarthy gave us the order last fall for this iron frame house 250' x 60'.

Without any heat in the house, it satisfactorily stood the snow and wind preasure of the storm that proved so destructive to so many houses.

In a near future issue, we will tell you all about this house.

Gutter, Plates and Roof Bar Clasps
Being a Plain Statement of Plain Facts

GUTTERS

Cast iron resists rust many times better than steel. No one contradicts that. Cast iron gutters then, are better than steel channel iron gutters. Better, simply because they have better stuff in them. Channel iron is rolled only in stock sizes by the mills. You have to take what sizes suits them; not what best suits your greenhouse requirements.

Our cast iron gutters are made to best meet greenhouse requirements in the best and most economical way. They do exactly what they were made to do.

EAVE PLATES

Our galvanized angle iron eave plate is the only plate that is light enough and still strong enough. It is the one that makes the neatest job and that effectually clears itself of ice.

If all this were not true, so many other concerns would not, in spite of our patent, be continually trying to use it. We keenly appreciate such hearty endorsement of our plate by them. It's just the best kind of advertising for it.

BAR CLASPS

The purpose of bar clasps is to securely and enduringly fasten the bar to the plate. It is plain to be seen that any form of clasp that can be pushed on the plate at any point, can be pushed off at any time. If it has no fixed position it's not a good fix. Any so-called clasp that simply forms a bracket or resting point and fails to come up it's side to form a clasp—is not a clasp at all. It's just a shelf. Any clasp then that is bolted to a certain fixed place on the plate and that forms both a rest and a clasp for the bar, is beyond all argument, the best.

Just such a clasp is our clasp. It's a guarantee against end bar rot. It has ample drip openings to prevent condensation clogging.

IN CONCLUSION

The courts have sustained our patents on an angle iron eave plate. No one else has a right to sell it. It has cost a lot of money to perfect and defend this article. If we hadn't had the endorsement of thousands who have used it, we should never have considered it worth while to defend. We have told you of its many good points. Try it along with some of our other materials. They are all shown and described in our Handy Hand Book.

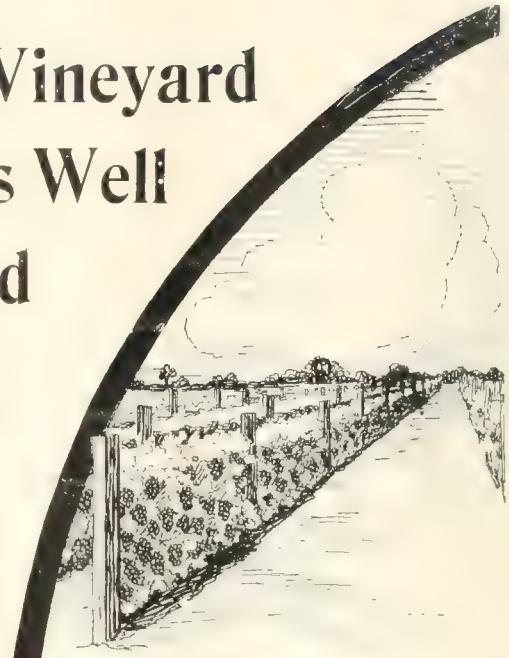
Spring Trade

HORTICULTURE



Vol. XIX MARCH 21, 1914 No. 12

FLOWER SHOW NUMBER

The Orchard and Vineyard Must Be Fed as Well as Sprayed

Money in fruit-raising comes from the production of steady crops of first grades

Do not expect either orchard or vineyard to produce its best if you depend entirely on the natural sources of plant food in the soil. Especially must you keep up the supply of

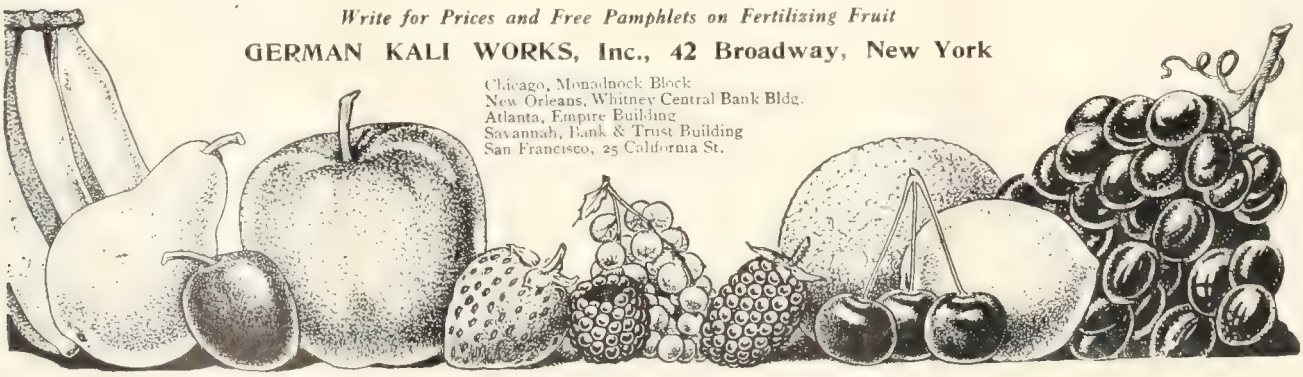
POTASH

for on it depend in greatest measure the quantity, size, color, flavor and shipping quality that give fruit its market value. In fruit-raising, as in all farming, it is easily demonstrated that **Potash Pays.**

Peaches and small fruits that have received the right amounts of potash and phosphoric acid ship better, taste better and are better. At the time of the first cultivation, broadcast 300 pounds acid phosphate and 100 pounds muriate of potash per acre in the apple and pear orchard (150 pounds muriate in the peach orchard).

On citrus fruits or pineapples use sulfate of potash or 200 pounds double manure salt.

Some of the finest flavored strawberries and peaches are poor shippers, especially when barnyard manure is used as a fertilizer. Correct mineral fertilization will often make them firm enough to ship.



The nitrogen needs of the fruit can be learned by observing the amount of wood or vine growth. Manure alone is not the best or cheapest fruit fertilizer.

We sell potash in any quantity from one 200-pound bag up.

A Story of Roses!

American growers will no doubt be interested to learn that I have made a contract with Hugh Dickson, Ltd., of Belfast, Ireland, by which, as sole agent, I will distribute to American growers his varieties at the same time and price every year, as they are distributed in Europe. This stock is now growing in my establishment and the buyer will have no vexatious customs delay or charges to pay. The name "DICKSON" is one to conjure with in Roses, and Messrs. Hugh Dickson claim the finest strain of Rose seedlings in the world, as they were awarded a Gold Medal last year by the National Rose Society for each of the 1914 varieties which are as follows:

Mrs. James Lyans **William Cooper**
Brilliant **Mrs. A. Grey**
Countess Clanwilliam

Price $2.50 each per plant; 4" pot plants in full growth

Very liberal discount to trade growers

Mrs. Andrew Carnegie

The new Scotch Gold Medal Druschki seedling. This is an Improved Druschki in form, just as large in size, and in addition is deliciously fragrant.

Grafted or Own Root Plants; $1.00 each, $9.00 doz.

OTHER ROSE NOVELTIES NOW READY
(OUR OWN GRAFTING)

Killarney Brilliant — King of Killarneys

Ophelia — Light salmon pink with golden shadings

Prince D'Arenberg — Brilliant scarlet

CHRYSANTHEMUMS

New Pompons

GOLDEN CLIMAX. On the order of Quinola, but with foliage that is hard and which will not be subject to mildew. Exhibited at Chicago under the name "Climax." Blooms November 10th to 20th. Extra fine variety for cutting in sprays.

GOLDEN HARVEST. A medium-sized variety of the button type. Deep golden yellow, with a tinge of bronze; a color which when finished is similar to Souvenir d'Or when half developed. A color that is very pleasing.

GOLDEN WEST. A trifle larger than Baby, but of similar formation. Rather compact in growth, but an excellent variety for pot plants. When bench grown will produce excellent sprays for cutting.
From 2¼-inch pots: 30c. each, $3.00 per doz.
3 of a variety at the dozen rate.

CELCO. Bright yellow, shading to orange; similar to color of Quinola, but the sprays are not so compact and are ready to cut two weeks earlier, or about November 1st, when dark yellow Pompons are scarce. Medium height. C. S. A. Certificate.
Plants from 2¼-inch pots: 30c. each, $3.00 per doz.

LEOTA. Delicate pink with bright rose reverse, which gives the effective bright center in each bloom if cut a few days before fully developed. Dwarf habit; fine for pot plants. In season October 25th to November 5th. C. S. A. Certificate.
Plants from 2¼-inch pots: 30c. each, $3.00 per doz.

NESCO. Beautiful shade of old rose, flowers about the size of Iva, La Purite and Lodi. Medium height, maturing first week of November.
Plants from 2¼-inch pots: 30c. each, $3.00 per doz

New Pompon Anemones

AZELDA. (E. D. Smith & Co.) Light pink, with a slight trace of lavender. Ray and disc floret same color, with the exception of the center of the cushion, which is cream color. Single row of lavender ray florets; produces exquisite sprays suitable for any sort of artistic arrangement.
Plants from 2¼-inch pots: 30c. each, $3.00 per doz.

DIANTHA. (E. D. Smith & Co., 1913.) A dwarf compact growing variety that is of the type so desirable for pot plants. It is also an excellent variety to grow for cutting in sprays. The guard petals are white and the center cream color.
Plants from 2¼-inch pots: 20c. each, $2.00 per doz.

LAURITA. (E. D. Smith & Co., 1913.) Bright yellow in color; of a compact dwarf habit. A valuable variety for pot plant culture as a small specimen.
Plants from 2¼-inch pots: 20c. each, $2.00 per doz.

PRINCESS. A seedling from Garza. Pure white, with ray petals, evenly spaced around a large Anemone center of quill petals, slightly touched with the pollen. In our observation, covering three seasons of bloom, it has never failed to show the Anemone center. The flower has good substance, giving a lasting quality as a cut flower. The habit of the plant is good, growing to a medium height and covered with flowers; it is thus an ideal pot plant. For effect in cutting it must be grown without disbudding when a single spray will produce from five to a dozen flowers. It is a midseason, blooming November 1st to 10th.
Plants from 2¼-inch pots: 25c. each, $2.50 per doz., $15.00 per 100.

NOTES ON CULTURE OF FLORISTS' STOCK

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

Azaleas

Although Easter is now near at hand a deal of pushing or retarding azaleas may still be practiced with satisfactory results. Whether an azalea indica at present is ahead of time or backward for Easter is now plainly indicated by the appearance of the buds. An azalea just beginning to show color, or one with buds now quite fluffy and ready to open will in a cool but well lighted house be just about right for Easter; or, to be more definite, will be in full bloom in from ten to fifteen days. Now, any that are not in this condition will need special attention, if they are to be good stock for Easter. There will be little need of hastening azaleas for the great spring holiday, but should there be some plants showing merely a swelling of buds, then an increase in fire heat and an exposure to the brightest sunshine will likely bring them out in time. A very cool and shaded place, on the other hand, must be found for those too far advanced. It will be a better place for some of the most forward plants than the coolest part of a fire heated house or shed. To hold the most forward ones back, place in darkened and very cool quarters, but the roots of azaleas must have water in sufficiency, which may mean somewhat less for those in a cool place than those under regular forcing but always enough to prevent any drying out at the roots.

Cannas

It is now time to start a portion of the canna roots into growth, the object being to provide sufficient stock for a trade demanding well-advanced pot-grown plants. Large quantities of cannas are disposed of at retail every spring and at prices which leave no doubt as to their being handled with profit. Wintered-over canna roots, firm and sound but not as yet showing appreciable growth, are in a condition most to be desired at this time of year. They should now be lifted into light, laid on a few inches of sand, soil or dampened moss over bottom heat, until every crown is more distinctly developed. They are then cut into pieces, one shoot to each, and these pieces potted into two sizes, three and four-inch pots, out of which they are sold later on. Or the clumps may first be cut up, then immersed in soil, moss or sand and, when grown out into shoots, be potted up, any way that proves most convenient and economical in dividing the old clumps. Since bench space is scarce with every good grower and 3-inch cannas bring about as much as bedding stock as do those in 4 or 5-inch pots, it is policy to use as small a size of pots as possible for the ordinary grade of bedding cannas. Fancy stock, or sorts especially adapted for pot culture, of course, are treated as such, requiring a repotting and given a favored position in a warm house.

Care of Carnations

With the advent of spring it is absolutely necessary to give air freely in order to keep the foliage from becoming soft and to encourage hard growth. As the days get longer our old enemy, red spider, will begin to get busy if not looked after sharply, but as we can now use water more freely we can by the exercise of a little energy and careful observation keep them in check. Thrips and greenfly will also multiply rapidly if left undisturbed for even a short period and it is well to have them in strict subjection at all times. Carnations develop the healthiest growth in a night temperature between 50 and 54 degrees, according to variety. Much below 50 degrees causes a standstill in growth, which is not at all desirable and in most cases is harmful. With the longer days they will now need more water at the roots.

Smilax

To keep smilax in good growth and vigor look well to the watering at the roots from this out. The beds will dry out more now. Make it a point to keep the soil nice and moist and give them a mulch of cow manure and soil about an inch deep every now and again. Go over your beds often and place new strings so they start to climb before they become entangled. Give ventilation on all favorable occasions and a good syringing on bright days, getting well under the foliage so as to keep them free of red spider which generally becomes quite troublesome from this out. As a crop is cut down hold up on the water until they have made a new start. They like a night temperature of about 60 degrees.

Orchids

Newly potted cattleyas will want very careful watering until they push their new roots into the compost. One point to remember is that it is better to underwater than to overwater. As the season advances they will want a more abundant supply. Do all watering in the morning and give a good syringe so they will have time to become dry before nightfall. They will need some shade, but do not put it on too heavy. All that is necessary is to give sufficient to break the direct rays of the sun. Once in a while give them a sponging with Aphine or Imp soap. Keep temperature near 58 to 60 degrees at night and 10 to 15 degrees higher with sun heat. During damp and dark days do not use much water around the house.

Pansies

Keep the pansies nice and moist at the roots. As the days become warmer you can pull the glass off them, replacing it at night, as we are liable to have some very cool nights for some little time yet.

Stevia

This plant so highly valued from [illegible] after the New Year will want attention now. Place the stock plants well up to the glass so they will produce sturdy cuttings. At about 50 degrees at night, in a short time they show plenty of cuttings, which can be placed in a cool propagating bed and [illegible] without any trouble.

Mr. Farrell's next notes will be on the following: Carnation Ground; Plants for Vases and Boxes; Preparing [illegible]; Starting Achimenes; Transplanting Seedlings; Salvia Cuttings.

MAR 25 1914

ANEMONES OR WIND FLOWERS

Southern gales are sweeping over the land, breaking the last links of the icy chain of winter. The snow has scarcely melted away in forest recesses when it is succeeded by white sheets of Anemone nemorosa and A. sylvestris, nestling along the sunny outskirts of the woods. True harbingers of spring they bend their heads down low to escape the violent tossing of occasional rainstorms, ready to rise again at the first interval. A few weeks later, when visiting our previous fall plantings of Anemone vernalis, alpina, narcissiflora and ranunculoides along a path through thinly wooded sections, we behold light-winged flowers gently swaying in the radiant bright spring day. With the advent of May our garden begins to shower its floral treasures upon us. Statelier forms and brighter colors, however, do not lessen our admiration of the beauty of the more tender bulbous anemone-species from southern Europe. Planted early in fall on sheltered spaces, under sufficient leaf-covering to keep the ground absolutely free from frost, they have survived the winter. The cover gradually removed during the previous weeks, they now form their tufts of ground foliage and are ready to unfold their buds. The attractive flowers of the red, white and blue A. coronaria varieties, measuring about 2 inches across, are borne on long erect stems. Those of A. fulgens appear in bright scarlet, their large petals surrounding the nearly black center.

ANEMONE VERNALIS

Single varieties are preferable to the double ones, being a very choice material for filling vases. Both the coronaria and fulgens anemones will be also found well adapted to pot-culture in a sunny and well ventilated greenhouse, with 50 degrees average temperature. The same is to be said of the very handsome Irish St. Brigid anemones, which, like the coronaria or poppy windflowers, prove charming border plants, when associated together in clumps. The latest of the vernal class to flower is our native Anemone pennsylvanica, a very effective species for naturalization throughout thinly wooded sections of parks. In the north I found its flowers snow-white, while in the middle Atlantic states they sometimes lack purity.

ANEMONE JAPONICA QUEEN CHARLOTTE

Not until after the last hot midsummer waves are past may we enjoy the incomparable charm of the Japanese windflowers. The heavy dew of cool nights and the clear sunlight of September days noticeably influence the perfectness, size and color of the flowers. Grouped together in sufficient numbers we again witness the enhancing spectacle of light-winged masses of flowers gently swaying under the touch of the wandering breeze. Of the standard varieties of Anemone Japonica in pure white Japonica alba (Honorine Jobert), Whirlwind and Geante Blanche are the best. Desirable tall growing pink sorts both for bedding as well as the border are Queen Charlotte, Kriemhilde, Alice, Loreley and rosea-superba, with the lower growing semi-double lavender pink Rosa Zwerg as outer edge. Carmine and magenta shades predominate in the flowers of Prinz Heinrich, Diademe.

Brilliant and Purpurine, while for bright and gaily mixed effects the white variously-suffused French varieties Aureole, Beaute Parfaite, Coupe de Argent, Couronne Virginale, Elegantissima and Couronnement will prove of special value. The treatment of anemones differs according to our latitude and mode of employment. As a rule all prefer a rather light soil, rich in moisture retaining humus, but otherwise well drained. Vernal species naturalized need little care, save that we prevent grass and other native ground vegetation from smothering them and see that the ground is from time to time enriched to insure a thrifty growth. The requirements of the poppy St. Brigid and fulgens anemones were outlined before. The Japanese class is particularly responsive to richly manured ground, surface mulching and a half shady position, in the middle Atlantic states. For the north the open sunny exposure is preferable. Windflowers may be raised from seed sown in spring in cold frames or propagated by divisions; the Japanese species also by rootcuttings.

Richard Rothe

Riverton, N. J.

Yellow Marguerites

At one time botanists classed these plants under "Pyrethrum," but now we find them under the heading of "Chrysanthemum frutescens." Botany, like human beings, is somewhat changeable; however, it is a fine study for stimulating thought, and training the powers of observation, two attributes of humanity, that in these strenuous days are somewhat neglected.

There are several varieties of these yellow daisies in cultivation. I have at least seen four, often two being seen on the same plant, showing that they are of a sporty nature. There is a great difference in floriferousness, and to get a free flowering batch one must use vigilance in selecting cuttings from that part of the plant which flowers most freely.

In Europe they seem to have very little difficulty in getting flowers during the winter months from plants raised from spring cuttings, provided they are pot-bound in their flowering pots, which are generally eight or nine inches in diameter in the fall of the year. Here around Boston, growth during the hot months is slow, and we are very much troubled with the points of the shoots getting stunted, or, I believe, stung by some insect. I have found no cure for it, except cutting out the affected part, and trusting to a break starting lower down the branch. This, however, does not always happen, and thereby many plants are lost, which is rather discouraging to a commercial man.

To get flowers during the dark months of winter is the aim to be attained, as Mr. Welch stated at a recent meeting of the G. & F. Club of Boston. He has more orders than he can fill, even though willing to pay a good price for them. Cuttings may be rooted any time during the spring months. I believe better success can be had, by pot-growing the plants intended for early winter flowering, using a strong rich loam for potting, adding plenty of bone meal, and lime. No stimulating food should be given until the flower buds show up well all over the plant, and then we find that bone meal, lime, and soot are beneficial. A little may be applied twice a week and at no time should the plants be allowed to wilt, as the result will be short-stemmed flowers.

I have known good success being obtained from old plants kept over from year to year, reducing the ball every year after a slight drying off. There is need of an exchange of ideas from different sections of the country as regards the cultivation of these plants for early winter flowering, as they are among the most popular cut flowers we have, and I hope others will give their experiences.

George F. Stewart.

Medford, Mass.

"GET BUSY"

Mr. L. W. C. Tuthill, the well-known advertising agent, speaks very optimistically about the spring business outlook. In a recent conversation, he said that he based his views on the following conditions as he finds them:

"It has been a noticeable fact that with preceding business depressions—that the time just in advance of a return of prosperity, we have always had an additional amount of printed matter in hand to do for our customers. This condition exists now more than ever in our history. In fact we have three times more than we have ever had before.

"We attribute this condition to two reasons—business when a bit quiet, advertisers have more time to consider the various breaches in their walls, and they turn their attention to endeavors to close them up. With their eyes turned toward their competitors, they at once proceed to get in shape belated catalogs, or put into execution ideas on printed matter, which have been long laying dormant.

"Another reason is, we think; that in the anticipation of the return of prosperity, advertisers are getting ready to handle the business. In talking the matter over with a number of large advertising agency heads, they invariably state that with few exceptions their customers have increased their appropriation for 1914.

"None of them, however, expect a spectacular return of prosperity, but do believe the roots are good and strong, and that the top growth will be a healthy one. Already they claim that the American Beauty of business has some good husky breaks and the flowers are coming strong and of splendid color.

"There is plenty of business to get. It's up to you and me to get busy and get the business. Yes, 'get busy'—that's the right prescription."

The wearing of the green

Our friends of Emerald Isle lineage have always been credited with a considerable inherent love for nature. We sometimes wonder what some of their romantic poets of other days would think if they could come back to life again and see the grotesque adornments known as "green carnations" which in these enlightened times seem to gratify in the fullest degree the patriotic yearning to indulge in the "wearing of the green." The dyeing of carnations is a barbarous practice for which no justification exists. Why a florist with any pretensions to refinement and good taste should expose the vulgar things as central features of his show windows is beyond comprehension. "What fools we mortals be."

Practical "co-operation"

In this issue HORTICULTURE's advertisers fire the first gun in the active campaign for spring trade. After a long and, in some respects, disheartening winter, we greet the opening spring and see in the outlook much to awaken new hope and confidence. At the time, years ago, when the resumption of specie payments by the government was a proposition approached with some doubt and timidity, it was said "the way to resume is to resume." In like manner it may be said that the way to make good business this spring is to go ahead and make it. That is the spirit which inspires the advertisers whose offers appear in these pages and if you want to help toward the resumption of activity all around you cannot do better than back up these advertisers with a prompt and generous response. This is the sort of co-operation that co-operates.

Spring exhibitions

March has done very well as to flower shows. Last week the florists of Indiana and Illinois had quite lively innings at Danville, the Massachusetts Horticultural Society has just closed a four days' exhibition at Boston of exceptional quality and beauty, and now comes the big show at New York, to wind up the month, not to mention the several minor local affairs in various places. The Spring Exhibition is a time-honored institution in Boston and few are alive now who can remember when the Boston spring shows were not. New York, with its myriad diversions, has not until recently taken very seriously to flower shows, but, should the ambitious enterprise now opening prove the popular success which we all hope for, then we may look for a regular annual recurrence of flower week in the great metropolis and thence will radiate a mighty influence for the advancement of horticulture.

An event in Boston

The Executive Board of the Society of American Florists and Ornamental Horticulturists has been in session most of this week in Boston. HORTICULTURE takes much satisfaction in the knowledge that its home town is honored by the presence of a body of men so distinguished in their calling and so thoroughly representative of the most progressive elements in horticultural industry. That every member of the Board was present, which rarely happens, shows a realization of the importance of this year's affairs and is of itself a direct compliment to Boston. It is not our province to make any comment at the present time on the work of the Board while in Boston. The secretary will in due time give publicity to all details which are of general interest. We are privileged to say, however, that the Board found on arrival in Boston that all necessary preliminary steps to assure a grand outdoor garden exhibition in connection with the Convention next August had been happily consummated by the local officials of the Society and that, with the enthusiastic co-operation of the City Government and the Park Department, the absolute success of this magnificent project is now beyond any possibility of doubt.

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur Ruzicka

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to the office of HORTICULTURE.

Lime

It is a fact that there are several grades of lime, and it is advisable for growers to see what kind they are getting when they buy lime, already slacked, and named Agricultural Lime. Find out whether this is burned lime, or whether it is just the ground limestone. The latter may be all right to use on fields where its action does not have to be immediate, but for the greenhouse where it is desired that the lime act at once, we must have good burned lime, and thoroughly air slacked, or, better still, hydrated, as it will then be slacked very evenly. Where this lime cannot be had, and it is not used to an extent to warrant getting it by the car, the best way is to get good barrel lime, and make a box for it in the cellar, and then slack it in the box by sprinkling a little water over it. Not too much water, so that the lime will not remain wet after it has slacked. It may appear quite damp for a little while but it will dry out very fast as it cools. The ground limestone is too slow in action for the greenhouse and should not be used unless in vine borders or such, where it is wanted to act slowly for a very long time.

Mulching

With the coming of April, the days will begin to be warm, and as a result the houses will be aired very freely, and will consequently dry out a good deal. Too much of this drying out is not good for the plants, and in order not to waste too much time watering it is well to mulch the houses quite freely with manure. A little soil may be added, but let it be coarse chunks of sod that will keep the surface of the benches rough, and will keep the water from running all over the benches when the plants are being watered. Where good manure is not to be had, use the coarse sod alone, and then give the plants an extra dose of liquid manure. A little sheep manure or bonemeal may be added to the soil giving preference to the bonemeal. See that it is well mixed in so that it is evenly distributed when the soil, or rather the coarse sod, is applied to the benches.

Tying

Do not for a day neglect this very important part of the work, for if this is let go the plants will go back very rapidly, this being especially true with Beauties. The houses will do a great deal toward paying the coal bill, and if they are given half a chance they will produce enough flowers to make up for all the extra trouble that we may have taken with them. It will not take long to keep the plants tied if this is done regularly, and the labor will be well spent.

Blind Wood on Beauties

There is no need of much blind wood on the Beauties now, and where there is too much of it some of it can be removed without any harm whatever. Of course it would not do to cut too much of it away. Plants can be cut down now and if well cared for will make excellent houses for the early summer months. To do this we would cut them right down to the soil, and then let them come along as fast as they want to. Needless to say, plants that are treated in this way will have to be kept a little dry and it will not do to water them well until after the growth starts to come. Some growers will apply a coat of manure as soon as the plants are cut down but we find it better to wait until the plants are well started and then let them have all the feed that they can take. A little lime scattered among the plants after these are cut down will help dry them out a little bit, and also sweeten the soil that remains in the benches. We always remove all the loose soil, and washed out manure that lies on the surface of the benches, as soon as the plants are cut off. This not only removes all the loose dirt and rubbish but it will take a large number of such things as sow bugs, wire worms and thrips. This refreshes the plants, as the old manure around them often causes a little harm, and the little new rootlets will soon find their way into the new soil that is applied afterward. As soon as the plants start after being cut down watering can commence, but only in the way that young plants are watered, and that is only around the ball, gradually increasing this circle until the whole bench is covered as is the case with the young plants. Liquid manure will help these plants along a good deal, too. It should be made very strong and applied as often as possible, or rather as often as the plants will take it. Make sure that the plants are not too dry when it is applied as it will then singe off the roots a little bit and may even hurt the foliage.

Cutting

The warmer weather being here to stay now, more attention will have to be given so as to make sure that the buds are cut when they are at the right stage, and that they are not allowed to become too open, and again not cut so tight that they will never open up. Cut them just a little tighter as the spring advances, and get them into the icebox as soon as possible afterward. It is not advisable to run the icebox too cold, for then the buds are checked. By this we mean that if the buds are stored in a cool but not an ice-cold box they will go on growing larger, even though they do not open out much more. Buds are sometimes drawn in this way for exhibition purposes but they generally lose color if they are allowed to remain in the box too long, so we would much rather leave them right on the plants to develop to their full size and then cut them, cool, and they are ready to be put up at the show.

Cracked Ice

Now the weather will be quite warm during the day, even though the nights are cold and frosty. A little cracked ice can be used with safety now, and the roses will benefit by it a good deal as they will arrive in the market as fresh as if they were just cut. Do not let the ice come in contact with the flowers as that would harm the petals, and would no doubt bleach them to some extent. Cover the ice well with paper, or, when packing the longer grades of roses, put the ice at the foot of the stems.

SPRING SHOW IN BOSTON

The Spring Flower Show of the Massachusetts Horticultural Society, which was held in Horticultural Hall, Boston, from Thursday, March 12, to Sunday, March 15, was one of the best given in years and with a number of features which were exceptional in cultural excellence and sensational in effect. The three exhibition halls were filled to repletion.

The main hall, a partial view of which is here given, was brilliant with groups of flowering shrubs, orchids, forced bulbs, etc. One of the most extensive groups was placed by R. and J. Farquhar & Co., and, as shown in the accompanying picture was composed of rhododendrons, lilacs, wistaria and other brilliant blossoming shrubs backed by a group of bay trees. Among the side exhibits by this firm were a group of Calla Elliottiana and a plant in flower of a new rhododendron from the Wilson Chinese collections. This bears diminutive pale flowers in clusters and is known as No. 1324. It received honorable mention as did also the large group.

THOMAS ROLAND'S ACACIAS AND ERICAS.
Spring Exhibition in Boston.

Of the larger groups in this hall W. W. Edgar Co. and Duncan Finlayson were the principal exhibitors. Edgar's display of Rambler and Polyantha roses won first prize and a silver medal and their azaleas and other Eastern flowering plants were splendid examples of cultural ability. Palms, acacias, schizanthus and primulas were splendidly shown in the Finlayson central group. Other notable groups were by Miss C. Warren, who received a bronze medal for group of roses in pots, Thos. E. Proctor and Mrs. J. L. Gardner.

The orchids, which occupied quite a section in this hall were uncommonly good. Duncan Finlayson got a silver medal for his group, which was especially rich in dendrobiums and cymbidiums. F. J. Dolansky and E. MacMulkin held up the reputation of the commercial orchid growers with two splendid displays in which cattleyas of great vigor predominated, MacMulkin being awarded a bronze medal. Wheeler & Co. got a certificate of merit for Phalaenopsis leucorhoda (Schilleriana amabilis) and a similar honor went to E. B. Dane for Cattleya intermedia alba. In the farther section of this hall the cyclamen, cinerarias, schizanthus, etc., were shown in size and perfection unknown outside of Boston.

PARTIAL VIEW IN MAIN HALL.
Spring Exhibition in Boston.

The lecture hall presented a rare picture. The stage end was occupied by a group of acacias, ericas, epacrises, chorizemas and other Cape and Australian subjects staged by that invincible grower, Thomas Roland. Our illustration conveys a very imperfect idea of the glory of this wonderful plant group. It was recognized with a special diploma and a gold medal was given Mr. Roland for three specimen plants of Erica melanthera which averaged 8 ft. high and 5 ft. through and made a rare spectacle for the lover of such subjects.

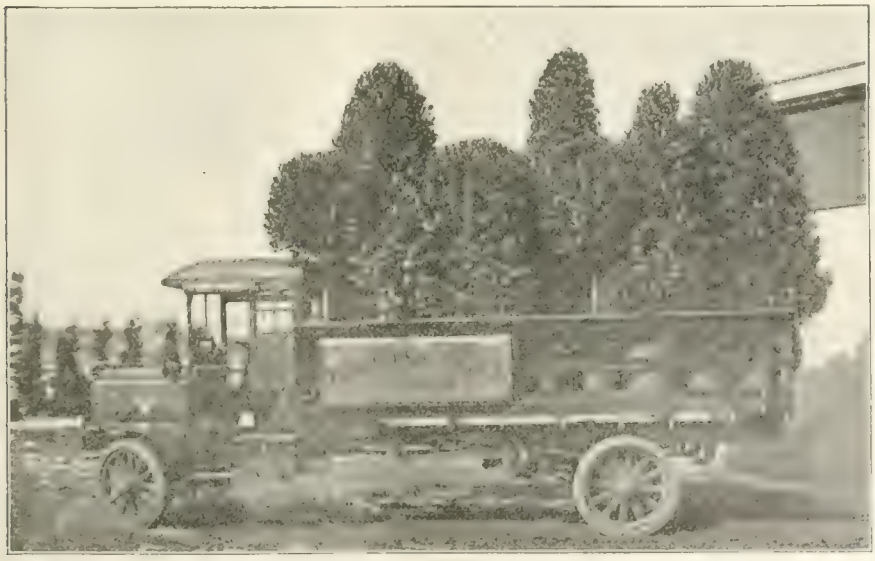
The main floor space in this hall was given over to the dinner table decorations by retail florists, of which there were twelve entries. These were judged by three society ladies. First prize went to Fred. E. Palmer for a lovely arrangement of daffodils and acacia flowers, the corsages of violets and acacia; 2nd to Sidney Hoffman, his arrangement consisting of mollis azaleas and Mrs. Aaron Ward roses; 3rd to Edw. MacMulkin, who used double flowering almond and pale pink azaleas. Other combinations were pink sweet peas in crystal holders by Mrs. Gustav Peterson, Red Killarney roses and sweet peas by Mrs. D. Finlayson, Killarney and cornflowers by Wax Bros., sweet peas and Adiantum Farleyense by Wax Bros., calendulas by Henry Quint, azalea centre and

gardenia corsages by Boston Cut Flower Co., pink and white azaleas by H. R. Comley, Irish Fire Flame roses by Boston Cut Flower Co., and Hadley roses, gardenias and lilacs by Penn, the Florist. The desirability of having the flower stems in water in this table work was well-demonstrated a few hours after staging for all those not so provided were soon wilted and disreputable looking.

On side tables in this hall the carnations were staged. A silver medal to Cottage Gardens Co. for a vase of Matchless, was the special prize award in this section. S. J. Goddard was represented by a collection of superb flowers not for competition. Beautiful Rosette was here seen in perfection. A. A. Pembroke also made a fine showing of skilful carnation culture. Patten & Co. showed Princess Dagmar in gigantic blooms, A. Roper had Alice Coombs and a seedling No. 109, and Pink Supreme from J. H. Leach & Son, was stunning. Snapdragons were shown by Geo. E. Buxton and W. C. Rust, the latter showing "Weld Pink," which is a particularly pure tint of light pink and will surely become popular.

Among the sterling sensations were the vases of new roses by Waban Rose Conservatories and Montgomery Bros. The latter won a silver medal with a magnificent vase of Hadley. Waban Rose Conservatories was awarded a special silver medal for their sensational seedling Mrs. Moorfield Storey. This is a silvery pink flower, very double, deeper tint in the heart, enormous heavy bloom with delicious fragrance and the same thick shining foliage which is found on Hadley. The above mentioned as well as Killarney Queen and Mrs. Charles Russell were shown with stems 4 to 6 feet tall!

William Sim again came to the front with wonderful sweet peas, pansies and violets. F. J. Dolansky showed gardenias the equal of which have never been seen here. In the small hall most of the bulb exhibits were placed. There were long ranks of tulips, daffodils and hyacinths in great variety, William Whitman being the largest exhibitor in these classes. In this hall a most remarkable exhibit of fine vegetables was made by the Boston Market Gardeners' Association. The vegetables were packed in bushel boxes and there were 100 bushels of them.



R. & J. Farquhar & Co.'s Plant Group.

Spring Exhibition in Boston.

Below is the complete list of awards:

Azalea Indica—Four plants: W. W. Edgar Co.; three plants, private growers only, Wm. Whitman. Specimen plant: 1st, Miss C. Warren; 2d, A. W. Preston. Palms—Pair: 1st, Wm. Whitman; 2d, Wm. Whitman. Specimen plant: Wm. Whitman. Acacia—Specimen plant in bloom: 1st, Weld Garden; 2d, Mrs. C. G. Weld; 3d, Weld Garden. Hard-wooded Greenhouse Plants—Six specimens, other than Acacias, Azaleas, and Ericas: 1st, Weld Garden; 2d, W. W. Edgar Co. Specimen plant: 1st, W. W. Edgar Co. Rambler Roses—Three plants: 2d, W. W. Edgar Co. Group of Roses—1st, W. W. Edgar Co.; 2d, Miss C. Warren. Cyclamens—Twelve plants in not over seven-inch pots: 1st, Weld Garden; 2d, Mrs. Lester Leland; 3d, Mrs. J. L. Gardner. Six plants in not over ten-inch pots: 1st, Mrs. Lester Leland; 2d, Weld Garden; 3d, Mrs. J. L. Gardner. Specimen plant: Mrs. Lester Leland. Cinerarias—Grandiflora type, six plants: Mrs. J. L. Gardner. Specimen plant: Mrs. J. L. Gardner. Schizanthus—1st, Mrs. J. L. Gardner; 2d, Miss C. Warren; 3d, Weld Garden. Hyacinths—Six pans of six bulbs, one variety in each: 1st, Wm. Whitman; 2d, E. A. Clark. Single pan, ten bulbs of one variety: 1st, E. A. Clark; 2d, Francis Skinner; 3d, E. A. Clark. Single pan, six bulbs: 1st, Wm. Whitman; 2d, Francis Skinner. Single Early Tulips—Six pans: 1st, Wm. Whitman; 2d, Wm. Whitman; 3d, A. W. Preston. Joost van Vondel—Three pans: 1st, Wm. Whitman. Any other white variety: 1st, Wm. Whitman; 2d, A. W. Preston. Mon Tresor: Wm. Whitman. Any other yellow variety: 1st, Wm. Whitman; 2d, A. W. Preston. Vermilion Brilliant: A. W. Preston. Any other red variety: A. W. Preston. Keizerkroon: Wm. Whitman. Pink Beauty: Wm. Whitman. Any other pink variety: 1st, Wm. Whitman; 2d, A. W. Preston. Duchess of Parma: Wm. Whitman. Double Tulips—Six pans: 1st, Wm. Whitman; 2d, A. W. Preston; 3d, Francis Skinner. Narcissuses—Collection of Large Trumpet Varieties, four pots: 1st, Wm. Whitman; 2d, A. W. Preston; 3d, Wm. Whitman. Collection of Short Trumpet Varieties—Wm. Whitman; 2d, A. W. Preston; 3d, Wm. Whitman. Crocus: Mrs. J. L. Gardner. Lily of the Valley—Wm. Whitman. Amaryllis—1st, Mrs. J. L. Gardner. Lilium longiflorum—1st, W. W. Edgar Co.; 2d, Francis Skinner. General display of Spring Bulbous Plants, arranged with foliage plants: 1st, Mrs. J. L. Gardner. Orchids—Group of plants arranged for effect with ferns or other foliage plants: 1st, Weld Garden; 2d, Edward MacMulkin. Specimen plant: 1st, Miss C. Warren; 2d, Joshua Lawson; 3d, F. J. Dolansky. Roses—Twenty-five blooms of Killarney or any of its pink sports: Waban Rose Conservatories. Twenty-five of Mrs. Charles Russell: Waban Rose Conservatories. Twenty-five of any new named variety not in commerce: Montgomery Co. Carnations—Vase of one hundred: 1st, Albert Roper; 2d, A. A. Pembroke. Fifty light pink: A. A. Pembroke. Fifty dark pink: A. A. Pembroke. Fifty scarlet: A. A. Pembroke. Fifty white variegated: A. A. Pembroke; 2d, James Wheeler. Fifty white: 1st, A. A. Pembroke; 2d, A. A. Pembroke. Violets—1st, Esty Bros.; 2d, Esty Bros. Marguerites Yellow: 1st, James Wheeler. Antirrhinums—1st, G. E. Buxton; 2d, G. E. Buxton. Camellias—Walter Angus. Gardenias—F. J. Dolansky. For the best table decoration laid for eight covers: 1st, Fred E. Palmer; 2d, Sidney Hoffman; 3d Edward MacMulkin.

Gratuities—Thomas T. Watt, Azaleas; A. W. Preston, Azaleas and bulbous plants; Edward MacMulkin, [illegible]; Lester Leland, trained plants; Mrs. J. L. Gardner, "Reading Gem" Azaleas; W. W. Edgar Co., display of flowering plants; Miss Cornelia Warren, display of flowering plants; Weld Garden, [illegible] flowering plants; Wm. Whitman, [illegible]

Auto Truck with Load of Bays for the Farquhar Exhibit

THREE BUSY MEN AT NEW YORK SHOW

WILLIAM H. DUCKHAM,
President New York Florists' Club.

JOSEPH A. MANDA,
Superintendent of Exhibition.

JOHN YOUNG,
Secretary.

of bulbous plants; Francis Skinner, display of bulbous plants; S. J. Goddard, carnations; Patten & Co., Carnation Princess Dagmar; Richard Kimball, carnations; J. H. Leach & Son, carnations; Walter Angus, Cherokee Roses and Camellia blooms; Edward MacMulkin, Annual Chrysanthemums; Thomas T. Watt, Camellias, Statice Holfordi, and Streelitzia Reginae; G. W. Page, Cypripedium acaule; Mrs. E. M. Gill, cut flowers.

Gold Medal—Thomas Roland, three specimen Erica melanthera.

Silver Medals—Waban Rose Conservatories, new rose Mrs. Moorfield Storey; Cottage Gardens, carnation Matchless.

Special Diploma—Thomas Roland, group of Australian plants—Acacias.

First-class Certificates of Merit—E. B. Dane, Cattleya intermedia alba; Wheeler & Co., Phalaenopsis leucorhoda (Schilleriana amabilis).

Honorable Mention—R. & J. Farquhar & Co., Chinese Rhododendron, No. 1324 Wilson; Thomas E. Proctor, flowering plants; Fottler, Fiske, Rawson Co., Cyclamens; R. & J. Farquhar & Co., flowering plants; Mrs. C. G. Weld, Antirrhinum Weld Pink; Wm. Sim, Pansies.

Vote of Thanks—Walter Hunnewell, Ericas; R. & J. Farquhar & Co., Bay trees and palms, dwarf hybrid Cinerarias; Wm. Sim, Sweet Peas; Walter Hunnewell, collection of Camellias.

BRITISH EXHIBITS AT THE PANAMA-PACIFIC EXPOSITION.

Several of the leading British horticulturists, it is expected, will be represented at the Panama-Pacific International Exposition, at San Francisco, although this important event is not to have official recognition by this country. Amongst them will be Sander & Son of St. Albans and Belgium, who will make a magnificent display of begonias and orchids. Louis L. Sander has paid a special visit to the Exposition grounds, where he was the guest of Geo. A. Dennison, chief of the Exposition Department of Horticulture. Mr. Sander stated to an interviewer: "The Department of Horticulture scheme is alone worthy of a visit from Europe to see. No exposition that I have ever attended, and I have seen them all during more than a decade, has ever approached your present undertaking either in magnitude of original conception, comprehensiveness of scheme, or grandeur of its natural and artificial setting. This is the biggest Exposition that has ever been attempted."

W. H. ADSETT.

GARDENERS' REUNION.

The Gardeners' Reunion, which for the past few years has been held in New York during the fall, but which was postponed last year until the International Flower Show this spring, will occur on Tuesday, March 24th, at Thum's Bowling Alleys, Broadway and 31st street, New York.

JAMES STUART,
Chairman Committee of Arrangements Gardeners' Reunion.

This reunion, which is not under the auspices of any one organization, but is conducted by a committee composed of members of various local societies, will consist of a bowling tournament throughout the day, to be followed by a dinner in the evening.

The chairman of the arrangements committee is James Stuart, of Mamaroneck, N. Y. He reports that he has already secured many prizes and that the indications are that there will be a good attendance.

The gardeners and their friends are invited to participate in this reunion. Tickets, which will include the bowling and dinner, may be purchased by addressing James Stuart, Mamaroneck, N. Y., or by applying to him during the flower show.

PUBLICATION RECEIVED.

The Annual Proceedings and Bulletin of the American Rose Society for the year 1913 has been issued. It contains a full report of the Rose Section of the International Flower Show, and other society transactions and some interesting and practical original articles. Particularly useful are the lists of rose introductions from 1898 to 1913 which fill eight pages of the Report. Secretary Hammond has turned out a very creditable publication.

The second annual School for Tree Wardens and City Foresters will take place at Mass. Agricultural College, Amherst, on March 24, 25 and 26. There will be instructive lectures and an interesting exhibition of spray materials, implements and accessories, as well as appliances for tree moving, and a collection of fungi which affect trees.

CLUBS AND SOCIETIES

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

The March meeting of this club was well attended. The speaker of the evening was Roy C. Pierce of the Department of Agriculture, Washington, and his topic was the Chestnut Tree Blight. His remarks showed full familiarity with his subject and were listened to with close attention. He had samples of diseased bark and wood and other exhibits appertaining to the work in which he is actively engaged.

Among the interested visitors were several members of the Executive Board of the S. A. F. who were holding their anuual meeting in Boston at the time. President Theodore Wirth, being introduced expressed his pleasure at meeting so many gardener and florist friends and paid an appreciative compliment to Boston's horticultural pre-eminence. He spoke feelingly regarding the late J. A. Pettigrew, whom he regarded as a gardener of the highest type and made some pertinent remarks regarding club membership and the duty of loyalty to organization. C. H. Totty was next called upon and responded with a nice talk in which he told of the preparations being made in New York for the approaching spring show. Next came W. F. Gude who made a spirited address full of optimism and glorying in the honor of being a flower grower. He closed with a few words about the proposed rose test garden in Washington and the plans to erect an everlasting memorial for the late William R. Smith.

The display on the exhibition platform was not as large as customary but it was all of high merit. A certificate of cultural merit was given to W. N. Craig for some splendid white antirrhinums. Wm. Sim received reports of merit for four sweet pea novelties, Bohemian Girl, Orange Orchid, No. 4 A and No. 12. Votes of thanks were accorded Mt. Auburn Cemetery for Strelitzia, Robert Duncan for cold-frame lettuce, Wm. Sim for sweet peas and pansies and W. N. Craig for cinerarias.

The banquet committee made a most pleasing report of the recent successful affair and turned in a surplus for the reserve entertainment fund. T. H. Westwood was commissioned to act as representative of the club in cooperation with city officials and others in the work for home and school garden education.

S. A. F. EXECUTIVE BOARD IN BOSTON.

The Executive Board of the national society has been holding its annual session in Boston this week and many details for the big August convention have been worked out with the help and advice of the local members and of the city officials through the Park Department. It is worthy of note that every member of the Board was present, viz.: President Theodore Wirth, Minneapolis, Minn.; Vice-President P. Welch, Boston; Secretary John Young, New York; Treasurer W. F. Kasting, Buffalo, N. Y.; J. J. Hess, Omaha, Neb.; John A. Evans, Richmond, Ind.; August Poehlmann, Chicago; J. A. Peterson, Cincinnati, O.; Chas. H. Totty, Madison, N. J.; Thos. Roland, Nahant, Mass.; J. K. M. L. Farquhar, ex-officio, Boston. All the visitors with the exception of Messrs. Young and Totty, who were obliged to leave Wednesday night, were participants in an auto ride through the park system on Thursday forenoon, under the guidance of Deputy Commissioner J. B. Shea. As we go to press a banquet is being prepared at the Parker House, for Thursday evening, a full account of which will appear in our next issue.

LANCASTER COUNTY FLORISTS' CLUB.

Thursday, March 12th, twenty-one of us left Lancaster at 4.45 A. M. to visit our brothers in Delaware and Chester counties. At Coatsville we were joined by Jas. Brown of that city, and when we arrived at our first stop S. S. Pennock of Philadelphia, having gotten wind of this trip and appreciating the company, also joined us.

Our first stop was at Brandywine Summit, where E. A. Harvey met us with bob sleighs and gave us a delightful trip through drifts five and six feet in depth on both sides of the road, to his greenhouses. The big new Lord & Burnham house was of course the first attraction, and this house filled with sweet peas of the Spencer type was certainly the finest sight to be seen anywhere right now. They are eight feet high and over, and the cut is averaging 12,000 a day from half the house. They cut half one day and the other the next, so that as we reached there just as they commenced cutting we had 25,000 or over to look at. Beside sweet peas they grow carnations, mignonette, mushrooms and tomatoes. The storm of March 1st froze up a whole lot of carnations. By the 12th the glass had all been replaced and a house of tomatoes started.

At Wm. Swayne's, Kennet Square, we found houses of lupins, larkspurs and ten-week stocks, as well as carnations and snapdragons. I noticed that a great many mental notes were made here by those who sometimes are just a bit undecided as to what to plant. At Mr. Palmer's we found carnations very good, with tomatoes ready to follow them up; the hillside construction here was quite an attraction.

At Willowdale, E. C. Marshall showed us the finest carnations of the section; in fact, they would be hard to surpass in any section. If we could all have flowers and plants as good as they are here, there would be less complaint as to trade, etc. What Chas. B. Herr is to Lancaster Co. that E. C. Marshall is to Chester Co. May their tribe increase.

7.30 P. M. found us back in Lancaster a bit tired, but chuck full of wisdom and pity for the fellow who was not with us.

ALBERT M. HERR.

TEXAS STATE HORTICULTURAL SOCIETY.

The eighth mid-winter meeting of the Texas State Horticultural Society was held in Dallas, Texas, February 19 and 20, in the rooms of the Dallas Chamber of Commerce. This meeting was a very successful one, although the attendance was small, but those present showed that they were greatly interested in the horticultural work in Texas. Thanks are due the Dallas Chamber of Commerce for the many courtesies shown the members while they were in Dallas. The auditorium was turned over to the society for the meeting place.

The members spent the afternoon of February 19th at the Corn Show, they being furnished passes by the Dallas Chamber of Commerce. All of these courtesies were greatly appreciated and in order to show their appreciation, the society sent the secretary of the Chamber of Commerce a vote of thanks.

After the invocation by Mr. John S. Kerr, and the address of welcome by J. R. Babcock, secretary of the Chamber of Commerce, the Society took up the discussion of the subjects on the program. The first was a discussion of plant disease, by Dr. F. H. Blodgett, Plant Pathologist of the Experiment Station. This was a very interesting and instructive talk, dealing with disease of both nursery and orchard trees.

Mr. J. B. Baker of Fort Worth, Texas, discussed the growing of roses for the home. He brought out very clearly the position that roses should occupy in the beautifying of the home grounds. He showed that it was possible to grow roses most any place, provided the soil has been properly prepared.

A very interesting paper was one on Farm Terracing, by Mr. R. B. Pearce, with special reference to the growing of horticultural crops. In this paper the writer showed some very interesting facts. It was evident that by terracing, it is possible to grow horticultural crops on land that otherwise would wash so badly that it would lose large quantities of plant food as well as being cut by the water.

In the absence of Mr. L. N. Dalmont, his paper on "Horticultural Conditions on the Plains," was read by his daughter, Miss Mary Dalmont. This paper showed that the Plains Country has not been lagging in the developing of the horticultural side of agriculture. He showed that the horticultural conditions are much better than they were some time ago.

The grape industry was very ably discussed by Mr. Will B. Munson, of Denison. He stated that viticulture seemed to have taken a new hold in Texas during the past few years. He spoke of varieties for various sections of the state, and also dealt with grape insects. In speaking of insects, he recommended Farmers' Bulletin No. 19, from the Department of Agriculture at Washington, on the Grape Leaf Hopper. Another speaker on viticulture was Prof. Flossfoder, of

Davis, California, on grape growing in that state.

Mr. McGinnis discussed the care of shade trees, and spoke of planting young trees that were well formed instead of planting just any kind of a tree, whether large or small, that may be in most any shape, depending on the way it has been cut. He also warned the owners of trees against the fake tree doctors, that had been doing some work. He spoke of the work that should be done, but said that it should be performed by someone who understood the business.

Prof. Newell told of the life history of the codlin moth, and how it can be controlled. It was brought out in this paper that this insect is very important to the apple growers of Texas. It was stated that the codlin moth probably damages the apple crop of Texas at least one hundred thousand dollars annually. Prof. Newell spoke of the little work that has been done on the codlin moth in this state, which is due to the small funds that the Department of Entomology has.

Mr. D. A. Frank of Dallas, delivered a very interesting paper on the "Value of the Home Garden to the Farm Home." This subject was handled from the standpoint of cutting down the expenses of living on the farm.

After the discussion of these subjects, and the transaction of business, the society adjourned.

STATE FLORISTS OF ILLINOIS AND INDIANA.

The joint meeting of the Illinois State Florists' Association and the Indiana State Florists' Association at Danville, Ill., was a gratifying success in all respects. The exhibition hall was handsomely decorated and there were nearly fifty exhibitors in the various departments. Among the prominent firms represented were the following:

Poehlmann Bros. Co., Chicago: plants, supplies, flowers, etc., general display; highly commended. Frank B. Smith's Sons, Danville: Easter plants, roses, carnations, etc.; highly commended. National Soldiers' Home: palms and decorative plants; highly commended. A. N. Pierson Co., Cromwell, Conn.: new rose Hadley; certificate of merit. E. C. Amling Co., Chicago: sweet peas and other flowers; highly commended. Inland Supply Co., Danville: irrigation machinery, pumps, etc.; highly commended. F. Dorner & Sons Co., Lafayette, Ind.: splendid showing of seedling carnations; certificate of merit to Pink Sensation. Bassett & Washburn: roses and seedling carnations; certificate of merit for Belle Washburn carnation. Wendland & Keimel, Elmhurst: display of roses; highly commended. Mt. Greenwood Cemetery, Chicago: carnation Rosette; highly commended. A. Roper, Tewksbury, Mass.: carnation Alice Coombs. Other carnation exhibitors were W. J. Vesey, Fort Wayne, Ind., Chicago Carnation Co., S. S. Skidelsky & Co., Phila., carnation Philadelphia Pink; Chas. Loveridge, Peoria, also roses and violets; J. F. Ammann Co., Edwardsville, Ill., also roses; A. C. Brown, Springfield, Ill.; Henry Baer, Peoria; W. Anker, Danville, also bulb flowers; C. C. Walker, Danville; Baur & Steinkamp, Indianapolis; Hartje & Elder, Indianapolis; Andrew Peterson, Hoopeston; A. G. Fehr, Belleville. Other rose exhibitors were F. F. Benthey & Co., New Castle, Ind.; W. L. Leiker, Fairmount; E. G. Hill Co., Richmond, Ind. Other exhibitors of various specialties were W. A. Manda, So. Orange, N. J., George Reinberg, Chicago, P. Britz, Danville, Pleasant View Greenhouses, E. Osborne, Vaughan's Seed Store, Chas. Arnold, Des Plaines, A. Washburn & Sons, Bloomington, A. J. Pettit, Indianapolis, M. Rice Co., Philadelphia, Pa., A. A. Arnold Co., Chicago, Detroit Flower Pot Co., H. N. Bruns, Chicago, Carnation Support Co., Wertheimer Bros., Danville Floral Co., Pyfer & Olsen, G. Swenson and Kroeschell Bros.

At the business meeting the following officers were elected by the Illinois Association: President, H. C. Smith, Danville; vice-president, C. W. Johnson, Morgan Park; secretary, J. F. Ammann, Edwardsville; treasurer, F. L. Washburn, Bloomington.

On Wednesday a visit was made to Champaign on invitation of the Danville Florists' Club and the visitors were hospitably entertained. The banquet took place on Tuesday evening, there being about 150 ladies and gentlemen present. A. C. Kohlbrand of Chicago was toastmaster and among the guests was "Uncle" Joe Cannon, who made a most entertaining speech.

WESTCHESTER AND FAIRFIELD HORTICULTURAL SOCIETY.

On account of the illness of Alex Cumming, Jr., the Talk on Roses which he was to have given before the Westchester and Fairfield Horticultural Society at Stamford, Conn., on March 13, had to be postponed. Henry F. Michell Co. of Philadelphia have offered their silver and bronze medals for table centrepieces of outdoor flowers and foliage, by assistant gardeners, at the June meeting, probably, which is to be held in association with the Board of Managers of the Portchester Hospital. The fall exhibition will be held in New Rochelle, N. Y.

A long list of offers of cash, cups, etc., was read from various seed houses, nursery firms, and others interested in the welfare of the Society, thus assuring a fine premium list for the fall show. It was decided to let the matter rest until the Executive Committee of the N. A. G. meet early in April, when a more comprehensive proposition will be appreciated by the Society.

There was a beautiful display on the exhibition tables and awards were as follows:

Cultural certificate to Geo. Allen for Darwin tulips, Louis Whitman for Shawyer roses, and W. J. Sealey for Primula obconica; honorable mention to L. Whitman for Ward carnations, A. Bieschke for hybrid freesias, and Carl Hankensen for winter-flowering sweet peas. The following were highly commended: Carl Hankensen for carnations, A. L. Marshall for Cattleya luminosa, and P. W. Popp for Mahernia odorata. Vote of thanks to Paul Dwenger for violets, A. L. Marshall for carnations, and Louis Whitman for Telegraph cucumber.

Next meeting will be held on April 10.

P. W. Popp.

ST. LOUIS FLORIST CLUB.

The St. Louis Florist Club held its regular monthly meeting March 12th in Odd Fellows' Hall, with 25 members in attendance and Vice-president Jaenicke in the chair. Mr. Jaenicke, as chairman of the pageant committee, made a report, and after a discussion it was decided to withdraw this committee and the support of the club in pageant matters. The trustees reported that the club banquet would be held some time in June at the Jefferson Hotel. After full discussion it was voted that as the local trade showed so little interest regarding the fall show, the club drop this matter at least for this year.

Mr. Jaenicke was down for a lecture on City Gardens, and he thought the attendance should be larger for a lecture of this kind, but consented to give it, and the lecture was full of interest to those present and at the finish was given a hearty vote of thanks. The next meeting will take place April 9th.

A NEW SOCIETY PROJECTED.

A new horticultural society for Hampden county to include the Hampden County Horticultural Society and the Springfield Amateur Horticultural Society and to be affiliated with the Hampden County Improvement League will be formed in a meeting to be held in the mahogany room of the Auditorium at 8 o'clock Wednesday evening, March 25, and it is expected that a thriving organization will be perfected at that time. Since the Hampden Horticultural Society has been practically lifeless for some years and the Springfield Amateur Horticultural Society, which has held some very fine displays of flowers in the Science Museum for two years, needs help and the Hampden County Improvement League is ready to come to their assistance, it was decided last evening in the meeting of the Amateur Horticultural Society to be best to join with the proposed new society and it was voted to do so.

The objects of the new society as stated in the preamble of the constitution are to interest fruit growers, florists, market gardeners and others interested in general horticulture in the exhibition of their products, as such exhibitions tend to encourage the horticultural industry in Hampden county, and to co-operate with and render all possible assistance to the Hampden County Improvement League in its endeavor to disseminate information along horticultural lines.

CLUB AND SOCIETY NOTES.

The Northampton and Holyoke (Mass.) Gardeners' and Florists' Association has appointed a committee, comprising E. J. Canning, John Brown and A. B. Butler, to consider the advisability of holding a flower show.

President Kleinheinz of the Chrysanthemum Society of America announces a meeting of the Chrysanthemum Society of America to be held at the Grand Central Palace, New York, on March 25th at three o'clock P. M. All members attending the show are invited to be present.

Chas. W. Johnson, Secy.

The Southampton (N. Y.) Horti-

cultural Society has selected July 22 and 23 as the dates for their annual flower show. One-half of the net proceeds will be given to the Southampton Hospital. The show committee this year consists of Martin McLoughlin, chairman; William Fitzpatrick, secretary; Frank H. Smith, financial secretary; William McLeod, treasurer; Ulysses G. Ager, James Guilfoyle, Charles E. Frankenback, Charles A. Jaggar and Joseph G. Cassidy.

The fall shows of the American Institute of the City of New York will be held as follows: Dahlia, Sept. 22 to 24; Chrysanthemum, Nov. 4 to 6, 1914. Knight & Struck Co. offer the following special prizes for the Dahlia Show.

For the best single specimen blooms, one each of the following: Mrs. Francis King, Mrs. Thomas W. Barlow, Mrs. Grosvenor, Mrs. Wm. R. Warner, Jr., Mrs. D. C. Blair, Chieftain; 1st prize, $6.00; 2nd, $4.00. For twelve long-stemmed flowers of the Heatherhome Midsummer Giant Cosmos, assorted colors; 1st, $3.00; 2nd, $2.00.

WM. A. EAGLESON,
Secretary, Board of Managers.

At the March meeting of the Connecticut Horticultural Society President Huss announced that the Society would be favored with a lecture, accompanied by stereopticon views, by Theodore Wirth, on the Park System of Minneapolis. This lecture is to be given at Saengerbund Hall, 76 Wells street, at 8 o'clock on the evening of March 20th. President Huss exhibited six handsome cinerarias, also primroses and stocks. Alfred Cebelius exhibited three plants of Ceneraria stellata. Hugo Kuehl showed a vase of snapdragon, the product of seed sown last May, making the plants ten months' old. President Huss requested the secretary to read an article on "The Whys in Plant Disease Control," by J. J. Taubenhaus.

ALFRED DIXON, Secy.

The March meeting of the Nassau County (N. Y.) Horticultural Society was held on Wednesday, the 11th. Mr. Redstone of Hitchings & Co. was a visitor and addressed the meeting. F. Honeyman received 1st prizes for antirrhinums and violets.

At the April meeting Mr. Wilkinson of the New York State Department of Agriculture, will deliver an address on "Home Gardens," after which there will be a "smoker" or social evening. This being the first to be held, it is hoped the members will help the committee of arrangements in every possible manner. The meeting is called for 6 P. M., instead of 7 P. M. as usual. (Members please note.) Exhibits for next meeting will be: 12 narcissus, large trumpet type; 12 early flowering tulips, 1 pot or pan of hyacinths. Next meeting will be held at Pembroke Hall, Glen Cove, on Wednesday evening, April 8th, at 6 P. M.

HARRY JONES, Cor. Secy.

Salesman Fred Lautenschlager reports the sale of one Kroeschell boiler each to Charlie Meier, Henry Meier and A. S. Cerny, of St. Louis, each boiler having a capacity to heat 30,000 square feet of glass.

STOREHOUSE FOR AZALEAS AND IVIES AT BOBBINK & ATKINS.

No plant growing place of any extent can get along today without a serviceable cool storage house such as is shown in the accompanying picture. In fact, we doubt if there is any structure of the kind in any establishment which the owner finds sufficiently large for his needs, especially during busy season. The cool sheds of the Easter plant growers are a fascinating sight just at present with their ranks and tiers of blooming material which has been brought to the exact state of finish and will spend the rest of the days till shipping time in the cool refreshing atmosphere of the retarding house.

FLORISTS AND UNIONS

Editor of HORTICULTURE:

Dear Sir:—In your issue of March 7 you commented editorially on unionizing the florists and expressed the opinion that the union organizers will hardly be welcomed by the profession. I quite agree with you, Mr. Editor; they were never welcomed by any profession. I would like to ask, however, are there not reasons, even among florists, for the employee trying to protect himself from unreasonable conditions? I may here state that, personally, I am opposed to organizations, believing that they are a menace to personal liberty and individuality. Some argue that idealism is an idle dream, and they throw up their hands and fall in with the crowd. I believe we should not give up the fight, but should at least make an attempt at our ideals, even though we may be considered singular for so doing.

But, to return to our subject, I have had some experience of the tyranny of the florist. I was employed by one for a short time, who worked his help from five in the morning until seven and eight at night and, in addition to that, to save the expense of a night man, sat up with fires until 2 o'clock in the morning, there being hardly power enough to keep out frost. I found in conversation with my fellow craftsmen that it was quite a common thing among the trade. The magnificent wages we received was twenty dollars a month and board. Greenhorns and foreigners were in great demand, others being considered too wise. But that, it may be argued, was years ago. Here is a conversation I listened to several months ago: A florist asked another if he knew of a good man he could hire. "What kind of a man do you want?" "Oh, a Dago that I could get for 15 or 20 dollars a month and board." That was in enlightened Boston in the twentieth century. Now, Mr. Editor, an Italian is a man, and if he is not treated as such, do you blame him for organizing to protect himself?

GEORGE F. STEWART.

Medford, Mass.

MASSACHUSETTS AGRICULTURAL COLLEGE.

Professor A. H. Nehrling of the Floricultural Department has made plans for a general enlargement of the work of his department. For some time past it has been found that because of the increased enrollment and the progress that has been made in consequence, the present equipment is entirely inadequate. When the addition to French Hall is completed, it is expected that the original part of the building will be given up entirely to floriculture. A reading room devoted to floricultural subjects will be installed; a room for storage purposes and a work room fitted up with modern equipment will also be provided. Prof. Nehrling is also planning a complete reorganization of the courses, making them more specialized and professional in order to fit the men for practical work. This is in accordance with the example set by the University of Illinois which at its last commencement, granted the first college degree in floriculture ever given in this country.

A seminar for the members of the Senior class has been introduced for the discussion of special problems in advance work. A number of men are intending to take up graduate work if the necessary facilities are provided. It is hoped that more greenhouses will be added in the near future; with the increasing number of regular and short course students, it is essential that the department should have more space for practical work for these students.

CARNATIONS UNDER TWO-YEAR CULTURE

(A Paper by A. L. Dorward, Before the Newport Horticultural Society.)

Mr. President and Gentlemen:

In reading this paper before you tonight, let me state that what I have to say is not founded entirely upon practice, much as I would like to give you real practical information if I had the space at command to experiment. However, I feel very confident in advocating a method which I am sure would be particularly suited to local growers and which might indeed be equally beneficial to inland growers of carnations as well. Although it may be nothing new, yet its rare practice makes it good food for discussion as well as a splendid field for experimental work, and where expense has to be taken into consideration its importance certainly warrants a fair trial.

It is evident that our troubles by present methods of growing are many and varied as well as expensive, all of which are familiar to you. It is my belief that about half the expense is unnecessary, providing the plants are in competent hands and grown in a way I will describe later on.

Faulty Present Methods.

The present method seems to me ill-balanced, inasmuch as the plants are taxed unfairly to produce when in a state of being unestablished. All of you, no doubt, are well aware of the fact that before forcing can or should take place a plant must be well established to obtain the very best results. Can we, I ask you, say this of the carnation at present? I will venture to say that in the majority of cases the plant is only becoming properly established when it begins to get neglected before being thrown out; not until then has the plant found its equilibrium. At this stage it will have little objection to feeding, a practice certainly overdone before this period has been reached, when evil results are in evidence aplenty.

The method I present is not by any means new. I am simply tempted to bring up the matter, as I believe we are approaching a new era in the cultivation of the carnation. The trend of the times at least seems to point this way, but experiments in this direction, namely, in carrying over the plants a second year or more—are few and incomplete. Trusting that you will bear in mind that mistaken notions and unsound theories are often useful, I will proceed to unfold my ideas.

Prerequisites.

As I have already mentioned, I consider a thoroughly established plant to be one of the most important factors in procuring the best results and, with this in view, let us consider first of all the right sort of environment the plants ought to have for a period of two years or more. It is well that the houses should be situated in a good, airy spot; the larger the houses the better, well provided with top and side ventilation. The walls should not be more than 12 to 18 inches high so as to admit plenty of light; solid benches made of cement deep enough to hold 10 to 12 inches of soil and thoroughly drained.

Have good thrifty plants transferred to these benches by the middle of April and proceed to cultivate as you would in the field. So situated, there does seem a possibility of the plants, being able to withstand the summer heat, providing the hose and ventilation are in capable hands. A too humid atmosphere must be guarded against and the soil kept a little on the dry side; in fact, anything conducive to producing a soft growth should be avoided.

Cutting Back.

As to the time the plants ought to be cut back the following spring or early summer, is a matter for the grower to decide, much depending on the plants' condition and his own requirements. For retail or private work, I would prefer a gradual cutting back to that point just between hard and soft wood. Where a full crop is wanted the plants can all be cut back at the same time, leaving sufficient foliage to help root action in starting up again; in fact, general treatment of the carnation would, under this method, be along similar lines to those on which roses are grown today.

When all the plants are cut back to the right length, as much of the top soil as can comfortably be removed without injury to roots should be taken away and new soil added. In using fertilizers in this compost, care should be taken not to overdo it, as a rank soft growth will be the result. Let the soil at all times be evenly and well firmed. Pinching the second year will not be so necessary beyond keeping the plants in shape.

Responsive Varieties.

Some varieties seemingly are better suited to this purpose than others. A. T. Pyfer, of the Chicago Carnation Company, finds the Enchantress family does exceptionally well, as does White Wonder and Gloriosa; Pink Delight he carried over three years with good results, and the best Beacon he ever grew was from two-year-old stock. He reports experiments along this line as being very satisfactory, but he does not mention whether raised or solid benches were used. This question must necessarily be the main factor if this method is to be adopted, and only such beds and houses as I have spoken of would I recommend for this purpose.

It's just possible that the method spoken of can be carried out to a certain degree under a variety of circumstances, all depending on the ability of the grower to cope with the intricacies of environment. Some advantages over the system in vogue might be claimed, aside from the great expense involved in transplanting to and from the field and the refilling of the benches every year. I have found that plants are less liable to the attacks of rust the second year. Split calyxes, I should imagine, would be materially less, fragrance more pronounced, and who knows but what seedlings born from these would produce colors of a more retentive nature, flowers of a better color with longer lasting qualities, longer stems and healthier foliage? My belief is founded on the principle or theory that a certain age is necessary to bring forth the best results.

Stem Rot.

Admitting that a well-established plant is of vital importance, inasmuch as it is rendered less susceptible to disease, and that it is then in condition to give the best results, and notwithstanding all that has been written regarding stem-rot being caused by some disease, I am inclined to think that the trouble is caused in the first place by the check the plant receives in being transferred from the field to the benches. This is admitted to be the most critical time of the plant's life; certain number of cells being deformed give way to decay during some later period of excitement in the plant's growth. In other words, a plant would not succumb to disease if there wasn't some fertile ground for the disease to work upon.

I have found in handling seedlings that the calyxes of some flowers have from five to seven sepals each; ordinarily five is the number. I have found six sepals to hold, without the slightest sign of a split, more petals than are to be found on Enchantress. If this variety had six sepals, it would be hard to beat. So far I have also found the calyx having six sepals constructed similar to the calyx of Rosette. Calyxes like those of Beacon and Enchantress I consider weak-formed and very liable to split.

There are many beautiful shades of color so far produced and there are still many more that are plainly visible in seedlings that are waiting to be fixed to the standard of a commercial type. Private gardeners might take this up and aim to produce a variety which from its delicate color or other peculiarity would appeal more to the personal taste of the employer than to the commercial growers, who are naturally anxious to procure only those colors which they know will be popular with the general flower-buying public.

In conclusion, let me quote Herbert Kaufman, who says that, "Nature's richest treasures are for her most ardent wooer. She lavishes largest on the daring experimenter who surprises her secrets. Brains are the most efficient of all fertilizers. It takes sand plus imagination to succeed to accomplish anything worth while."

ABOUT HYBRID TEA ROSES

George H. Peterson, the rose and peony specialist of Fair Lawn, N. J., spoke before the Massachusetts Horticultural Society on the afternoon of January 17, on "The Hybrid Tea Rose of Today." He began by saying that this is the golden age for the rose lover, a happy condition brought about chiefly by a certain class of roses, the hybrid tea.

Popularity of the Rose.

"From time immemorial," said Mr. Peterson, "the rose has been the favored flower of mankind, and today its hold upon our hearts is stronger than ever. It was not so very long ago that the hybrid tea rose was practically unknown, and in those days, in this country, we could enjoy roses out-or-doors practically only in June, with the exception of the more or less tender teas, which needed much care. With the advent of the hybrid tea, outdoor rose-growing has greatly changed, and now one may have an abundance from June to October. Fortunately, the rose-bug or rose-chafer is not with us after June, and in autumn one can have hybrid tea roses of even finer quality than in June.

"Strictly speaking, the hybrid tea made its advent nearly a half century ago, but of the efforts at that time practically only one variety is left us, viz., La France, a rose which is still favored because of its almost unequalled fragrance. At first, this variety was generally classed as a hybrid perpetual, and some of the Holland growers class it as such even to this day, but there is no question as to the proper class in which it should be placed.

Advent of the Hybrid Tea.

"There seems to have been little done in that way until about twenty years later, when Bennett sent out some varieties, two of which, both blush varieties, Grace Darling and Viscountess Folkestone, are still quite largely grown. In 1891 Lambert & Reiter sent out Kaiserin Augusta Victoria, which to this day in its color has not been surpassed. About fifteen to twenty years ago two European growers took up the development of the hybrid tea in earnest; I refer to Alexander Dickson & Sons in Ireland and J. Pernet-Ducher in France, and up to this time these two firms have probably sent out more new, fine varieties of hybrid teas than all other raisers combined. During the past five or six years, however, McGredy & Son of Ireland have been sending out some uncommonly fine sorts. The hybrid tea rose is particularly strong in the various shades of pink, and of recent years various shades of yellow and red have become abundant, but in white we are less fortunate.

"In any given list there must be some varieties omitted, which succeed in some soils and climates, and in the following abbreviated list I shall endeavor to give only such as are most generally successful under the most varying conditions and covering a wide extent of country.

Pink—Belle Siebrecht, Dean Hole, Jonkheer, J. L. Mock, Killarney, Lady Alice Stanley, Lady Ashtown, La France, Lyon-Rose, Madame Caroline Testout, Madame Jules Grolez, Madame Segond Weber, Marquise de Ganay, My Maryland, Radiance.

Red - Chateau de Clos Vougeot, Etoile de France, General McArthur, Gruss an Teplitz, Laurent Carle, Richmond.

Yellow—Duchess of Wellington, Madame Ravary, Marquise de Sinety, Mrs. Aaron Ward, Mrs. A. R. Waddell, Sunburst.

White and Blush Bessie Brown, Florence Pemberton, Kaiserin Augusta Victoria, Pharisaer, Souvenir du President Carnot, White Killarney.

"In addition to the above, several of the newer varieties will no doubt be found equally desirable as soon as they are thoroughly tested out.

The Forcing Industry.

"We have so far been considering the hybrid tea from an outdoor-growing standpoint, but there is another phase of rosegrowing which, while it appeals to few directly, interests us all more or less, since in this country the commercial growing of roses under glass has become an important industry. While we are considering the Hybrid Tea rose it is at least interesting to know that practically all roses grown commercially under glass today are Hybrid Teas.

The Hybridizers.

"While on this side of the Atlantic less attention has been paid to the raising of new varieties, yet a few very good ones have originated here, and as a rule the hybridizer in America strives for a forcing rose. In this way we have Richmond, originated by Hill of Indiana, who has also given us General McArthur, probably the best all-around red, for outdoor purposes, grown today. Cook of Baltimore must be given credit for sending out both Radiance and My Maryland, both splendid forcing varieties and outdoor roses as well. In fact, I consider Radiance, weighing all its points, one of the very best hybrid teas for the amateur to plant.

Cultural Facts.

"Now the question arises, what shall we do to enjoy the hybrid tea rose continuously during the summer and fall? In the first place, a site for the planting should be selected well away from trees or shrubbery and at least a few feet away from buildings. The bed, for best results, should be well in the open where it will get sun for at least half the day, and yet be somewhat sheltered from the wind of fiercest storms. The bed or beds should have at least fifteen to eighteen inches of good rich soil, well manured, including an application of bone, all of which should be thoroughly mixed through the soil, and not left in layers. Any good garden soil can be made to grow very fine hybrid tea roses, but remember that the rose delights in a rich, moist soil, so if there is some clay in it, so much the better. The careful grower may plant his roses in the fall, but the average planter in New England will find early spring, before deciduous growth begins, the best time; and the earlier this planting is done, the better will be the first crop of blooms which should follow in about two months from time of planting. In order to receive one's plants on time and to get the best, the order should be placed with your grower weeks or even months in advance. In handling the plants after arrival care should be taken to expose the roots to the air as little as possible, i. e., in case of dry, clear weather. Do not crowd and double up the roots into a small hole, but spread them out naturally, and when the roots are covered, tread the ground firmly about each plant with the foot. After setting, the plant should be pruned severely, leaving the canes only from three to six inches long, according to strength, the weaker shoots being pruned closest. If planting is done early, while the ground is stil moist, little or no watering will be required until the plants begin to leaf out. From that time on, however, frequent waterings should

PARTIAL VIEW OF A. N. PIERSON ESTABLISHMENT, CROMWELL, CONN.

Showing Two Rose Houses on South Side. These Houses are 82x600 feet

be given during dry spells of weather, since the rose, as mentioned before, delights in moisture.

"Each new strong shoot will produce usually three or four buds, all of which, except the terminal one, should be pinched off as soon as they can be taken hold of; and if this is done, one can have glorious roses beginning the first June after planting."

Speaking of insects and diseases, Mr. Peterson recommended tobacco water or dust for aphis, white hellebore powder for worms on foliage, hand-picking into a pan of kerosene for rose chafer, sulphide of potassium and Bordeaux mixture for mildew and blackspot and, as a general proposition, eternal vigilance as the price of good roses.

OBITUARY.

Goodwin Braslan.

Goodwin Braslan, son of the late Charles P. Braslan of California, died at his mother's home in this city on March 4, aged 20 years.

John Brenner.

John Brenner, formerly engaged in the retail florist business with a store on Fourteenth street, New York, died suddenly at his home in Whitestone, on March 11.

Mrs. Wallace G. Payne.

Mrs. Payne, wife of Wallace G. Payne, a well-known florist of Pottsville, Pa., passed away at midnight, Saturday, the 14th, after an illness of nearly six weeks, and was buried Wednesday, March 18th, 1914.

Edward Meehan.

Edward Meehan of Philadelphia died on Wednesday night, March 18, following an operation for appendicitis. Mr. Meehan came to Philadelphia from England sixty years ago. He is survived by his widow and three sons. His age was seventy-nine years.

Ernst Mack.

The funeral of Ernst Mack of Price Hill, Cincinnati, O., was held Monday afternoon, March 16. Mr. Mack was a prominent member of the local florist fraternity for nearly a quarter of a century and his death is a distinct loss to the trade.

Mrs. George T. Elliott.

Mrs. Margaret A. Elliott, widow of Geo. T. Elliott, and mother of W. H. Elliott, the well-known rose grower of Brighton, Mass., passed away at New London, Conn., on Sunday, March 15, aged 87 years. Mrs. Elliott was born at Kendell, England, May, 1827. She lived for some time in Wisconsin, where W. H. Elliott was born, and later returned east and settled in New London. At one time she was a member of the S. A. F. and attended several conventions of that society.

PROGRESS OF FLORICULTURE AT URBANA.

(Report made to Illinois State Florists' Association, at Danville, by H. B. Dorner, Professor of Floriculture.)

The work in floriculture has made considerable progress during the past year. The work has been hindered somewhat by the necessity of moving the houses from the west side of the campus to the new location on the east side. This move was made necessary by a change in the campus plans so as to provide a location for the new armory and a drill field.

The move was made during the past summer and the work is now finished except for grading about the buildings. The range as now completed consists of eight houses covering an area of 28,000 square feet. The four houses moved from the old site are of semi-iron construction, while the four new houses, which have been added, are of iron frame construction. In addition to the glass range, a new service building was also constructed. The latter is a two-story building with basement and provides potting rooms, laboratories, storage rooms and offices for the floricultural work.

The first experiments on roses and carnations were completed last year and two circulars are now in process of preparation. It is hoped that these will soon go to press and be ready for distribution at an early date. The delay in publication has been due to the necessity of making a very careful study of the great amount of data collected. Other experiments, approved by your Advisory Committee, are now being carried on and the results will be published in other circulars.

There are now eleven students registered in the four year course in floriculture, who are working for the professional degree of Bachelor of Science in Floriculture. In addition to these there are a number from other departments taking courses offered by this division. There are now registered 73 students in plant propagation, 8 in greenhouse management, 4 in floral decoration and 31 in amateur floriculture. During the past semester 18 took greenhouse construction, 15 garden flowers, 3 commercial crops and 44 amateur floriculture. Last year two students graduated from the division and are now located on commercial places. M. R. Bebb is now in charge of 30,000 square feet of glass in Muskogee, Okla. W. K. Palmer is with the F. Dorner & Sons Co. of Lafayette, Ind. One student will receive his degree this coming June. Mr. A. H. Nehrling, who was formerly associated in the work, left at the end of the past semester to take charge of the floricultural work at Massachusetts Agricultural College at Amherst.

It gives me great pleasure to report that work is progressing nicely, and that Illinois has not only the largest enrollment of students specializing in floriculture, but also the largest and best equipped range of glass for experimental and instructional work.

THE COLLEGE POINT MECCA.

One of the gayest floral pictures we have seen for a long time was the array of Easter plants already in bloom in one of the houses of A. Schultheis at College Point, N. Y., a few days ago. The entire centre bench was occupied by roses—the large flowered hybrids, the Ramblers and tiny polyanthas—a veritable riot of color, and the intermingled perfume of roses, lilacs and other fragrant blooms was simply delicious. Azaleas, genistas, pyruses, daisies and ericas added to the gaiety of the scene.

Mr. Schultheis is going strongly into the new hydrangeas. Some of the most beautiful now blooming in soft or deep tints of blue, violet, purple and pink are Gen. de Vibraye, Radiant, Germania, Bouquet Rose, Frau A. Rosenkranzer, Souv. de Chantard, Mme. Petrick, Saarbrucken Freifrau von Stumm, Eclaireur, Avalanche, Andre Leroy's Blue, Reine Gaillard, Louis Mouillere, Vicomtesse Vibraye, Jaconde, M. Riverain, M. Chantard Florisse and M. Hamard.

Among the roses that are on parade here, and will probably take part in the coming Flower Show are a lot of new Wichuraiana and polyantha hybrids as well as the older favorites. Tansendschoen, Hiawatha, Dorothy Perkins, Crimson Rambler, Flower of Fairfield, Newport Fairy, Mrs. Flight, Baby Dorothy, Mrs. Cutbush, Excelsa are some of the standard sorts that will have to watch their laurels in competition with the new comers.

There is no end of azaleas, some of the most pleasing of the newer ones being Brillianta Belgica, fine deep crimson double; M. Millaud, scarlet red; Lady Roosevelt enchantress pink, semi-double; Ernest Eeckhaute, brilliant deep crimson, small double flowers, fimbriated petals, crowded in compact masses; Etoile de Noel, semi-double crimson; Illustris, double white, occasionally blotched with salmon pink.

The only erica being grown here in quantity for Easter is E. cotinoides Veitchii, but it is very pretty. Queen Alexandra and Peach Blossom take the lead in spiraeas and Pink Pearl is at the very top of the rhododrendron list with no close rival. There are lilies, tulips and hyacinths galore. Schultheis has prepared for a great Easter.

BUSINESS TROUBLES.

Charles Limmer, Schenectady, N. Y., has been petitioned into bankruptcy.

PREPARE FOR EASTER

The blizzards and the extreme cold weather will make Easter plants very scarce, therefore, don't delay but send your orders in now.

LOOK WHAT WE CAN OFFER YOU—CHEAP AND GOOD

NEPHROLEPIS OR FERNS, Scotti, 5, 5½, 6 and 7 in. pots, 35c, 40c, 50c, 75c to $1.00. **Harrisii,** 7 in., 75c to $1.00. **Giatrasii,** 5½-in., 35c to 40c. **Smithii,** 6 in. pans, 35c, 40c, 50c.

FICUS Elastica (Rubber Plant), 4-in., 5-in., 5½-in., 6-in., 7-in., 25c, 35c, 40c, 50c, 75c.

ARECA lutescens robusta, 4 in., made up of 3 plants, 25c; 5-in., 35c.

KENTIA Forsteriana and Belmoreana, 5¼-in. pots, made up of 3 plants, 40c, 50c; single, 5½ in.: **Forsteriana** or **Belmoreana,** 40c, 50c, 60c, 75c; **Forsteriana,** 12-in. tubs, 65 to 75 in. high, $4.00 to $5.00.

COCOS Weddelliana, 4-in., 25c; made up, 30c; 3-in., 15c.

EASTER LILIES OUR SPECIALTY

We have the genuine **EASTER LILY, Lilium multiflorum.** We have the genuine stock, true to name, raised from selected bulbs, furnished by our grower in Japan; 9 to 12-in. bulbs; now in fine condition for Easter sale; 5½ to 6-in. pots, having from 5 to 10 buds to a plant; 10c per bud; plants having less than 5 buds, 12c per bud. **Order Now.** Buds now showing; plants of medium height, just right for Easter trade.

CYRTOMIUM Falcatum (the new brushed Holly Fern). 5½-in., 25c to 35c.

PRIMULA Obconica. In bloom, 4-in., 15c; 5½ in., $3.00 per doz. **PRIMULA Chinensis,** 5½-in., $3.00 per doz.

CINERARIA HYBRIDA. Our best well-known strain, same showing color now, right for Easter; 5-in., 5½-in., 6-in., 25c, 30c, 40c, 50c, 75c to $1.00.

ENGLISH IVY, 3-in., 7c; 4-in., 10c.

FERNS for dishes, Wilsoni only, 2½-in., 4c; 3 in., 6c.

PTERIS Wilsoni. In 6-in. pans, 25c.

HYACINTHS are scarce this Easter, but we put in last fall an immense stock of our own importation, which will make large spikes and cannot be compared with the cheap stuff that is now floating on the market. **Gertrude,** best pink; **La Grandesse,** best white; **King of the Blues,** best dark blue; **Grand Maitre,** best lavender blue. 4-in. pots, staked up, $12.00 for 100 pots. In bloom for Easter week.

TOURNESOL TULIPS, best double red and yellow variegated; **Murillo,** double rose; **Imperator Rubrum,** bright red double; **Couronne d'Or,** double yellow, new, three bulbs planted in a 4-in. pot, $15.00 per 100 pots, $8.00 a doz., in bloom one week before Easter.

DAFFODILS, Von Sion. Best double yellow **NARCISSUS** in existence, three double-nosed bulbs, planted in 5½ to 6-in. pot, $3.00 per doz. pots, out of cold frame, will bloom one to two weeks before Easter.

While we pay the highest price for our Bulbs of Hyacinths, Tulips, etc., from Holland growers, you must bear in mind that we can sell them no cheaper than we do, and we assure you that there is no profit in it for us for the fine stock we sell you.

ASPARAGUS SPRENGERI, 4 in., 10c; 2½ in., 4c.

ASPARAGUS PLUMOSUS NANUS, 3-in., 7c; 2½-in., 4c; 5½-in., 25c. to 35c.

Our specialty, the world wide known pure white **MOONVINE, Ipomoea Noctiflora,** is now ready, 2½-in. pots, $5.00 per 100.

ARAUCARIA Excelsa, 6-in. pots, 4, 5, 6, 7 tiers, 75c, $1.00, $1.25, $1.50.

RHODODENDRONS, 10-in. pans, full of buds, $1.25 to $1.50.

SPIRAEA GLADSTONE in 6 and 7-in. pots, in bud, 30c, 40c, 50c and 75c, right for Easter.

HYDRANGEA OTAKSA, full of foliage, all have buds, just right for Easter sales, 5½, 6 and 7 in. pots, 25c, 30c, 40c, 50c, 75c, $1.00, $1.25 to $1.50. **FRENCH HYDRANGEAS, Mme. Mouillere,** best white, and **Gen. de Vibraye,** bright rose, 30c, 40c and 50c.

BEGONIA GRACILIS LUMINOSA, deep red, in bloom and bud, 5½-in. pots, $3.00 per doz.

BEGONIA ARGENTEA COMPACTA, 4-in. pots, 15c.

NEPHROLEPIS CORDATA COMPACTA, 4-in., 25c.

WE ARE

Headquarters for Azaleas

FOR EASTER BLOOMING

EASTER GREETING!

All the go. The plants of the century. A rival of all Easter plants. For azaleas, go direct to the Azalea belt of Godfrey Aschmann.

Order now. 5 houses full, 10,000 of the choicest plants on hand, ready for immediate shipment. We are the only importers of **AZALEAS,** of which we have made a specialty for the last 25 years. We have the well-known, best double pink **Mme. Van der Cruyssen,** 5½-in., 6-in., 7-in., 8-in. pots, 60c, 75c, $1.00, $1.25, $1.50 to $2.00.

Vervaeneana. Best double rose variegated, large flowering, 5½-in., 6-in., 7-in. pots, 75c, $1.00, $1.25, $1.50 to $2.00; **Niobe** and **Deutsche Perle,** best double white; **Princess of India,** double variegated; **De Schryveriana,** double variegated; **Apollo,** best red; and other well-known varieties, 75c, $1.00, $1.25, $1.50 to $2.00. We have about 100 assorted at 50c, 60c, 75c, $1.00, $1.25 to $1.50.

All goods must travel at purchaser's risk only. No references investigated while the big rush is going on. Thousands of boxes have to be packed in a remarkably short time and only cash will be accepted. Please state if you want stock shipped in or out of pots.

ANTON SCHULTHEIS

316 19th STREET, COLLEGE POINT, QUEENSBOROUGH, N. Y.

A REVIEW OF THE CRAIG EASTER SHOW.

Perhaps the most striking feature of the Craig Easter offerings for 1914 are the hydrangeas. There are many houses devoted to these exclusively and they are exceedingly promising and well grown. The standbys, like Thomas Hogg and Otaksa, are well to the fore, of course, but what makes the Craig display so unique is the magnificent showing of the new French varieties. These have proved valuable additions, giving greater variety in color, form and character to this favorite old Easter plant.

Next come the roses: the Ramblers in all their fine array of variety, form and color, also in all sizes from little ones to big specimens, and a lot of the trained creations in fancy forms, globes, pyramids, circles, etc. All these are well done and promising, and a couple of weeks from this writing (March 17th) will be in perfection. There are also a nice lot of hybrids, such as Magna Charta, which are always in demand at this time.

We have never seen the rhododendrons look better; they are exceptionally well budded and the plants are very shapely and well furnished with foliage. One of the fine things about a rhododendron as an Easter plant is that it can be used in the garden after having done duty as an Easter offering. This point should never be forgotten by retailers when talking to their customers about their selections. The favorite azalea is no use in that connection.

Several houses are devoted to our old friend Genista fragrans, and mostly in the smaller sizes, not because they cannot be grown to big specimens but on account of the large demand for the smaller plant for basket work for which they are very suitable. Spireas look fine; nearly all of them the magnificent variety, Gladstone. There is a house of marguerites, the old-fashioned well-known white daisy, Chrysanthemum frutescens. This is in small to medium sizes and, like the genista, is in large demand for baskets, etc. Beautiful stock—a pleasure to look at.

We saw nothing of the Easter lilies, which seems strange in an Easter plant display; but it was explained that these were all at the Norwood establishment. We have young Robert's word for it that they are the finest ever. Foliage plants and ferns in great variety, comment on which, however (no matter how good they be and interesting), is not germane to this little story. G. C. W.

NEWS NOTES.

Beverly Farms, Mass.—John L. Chapman, gardener on the Spaulding estate has leased the greenhouses and will run them for commercial use.

Newburgh, N. Y.—Among the sufferers in the recent heavy snowfall was Wesley Wait, whose greenhouses were badly wrecked by falling telegraph poles.

Bordentown, N. J.—The recent heavy snowfall caused a portion of the greenhouse owned by William Jobes, which is leased by Frank K. Bennett, to collapse, entailing a loss of several hundred dollars' worth of flowers.

Easter Plants Standard Quality

AZALEAS—.50, .75, $1.00 up to $4.50.

ACACIA ARMATA—$2.00, $2.50, $3.00.

LILACS—Marie Legraye, $1.50 each.

SPIRAEAS—Gladstone and Queen Alexandra, .50 and .75 each.

TULIPS—Murillo, Couronne d'Or, Cardinal, Rose Grisdelin, Rose Luisante, 12 bulbs to pan, .50 per pan.

LILIES—Giganteums, .12 per bud and bloom.

WM. A. RIGGS, Auburndale, Mass.

Craig Quality Easter Plants

WERE never in better shape than now. The Roses, Hydrangeas, Lilies, Genistas, Valley, Daisies, Spiraeas, Rhododendrons and Azaleas, have all been timed to the minute. They are being grown cool and will require no extra heat to bring them into flower in good time. This means that Craig quality plants will be durable with you and with your customers. We would like you to come and see them, but if that is impossible, we would like you to reserve a good sized space in your place for them. Our catalogue is now ready; please send for it. We quote a few prices below.

LILIES

Our stock of this grand Easter plant is exceptionally fine this year and having 25,000 plants, we can positively please the most critical buyer. Plants with from 4 to 10 flowers, 12c. per bloom. Made up pans, from 15 to 25 flowers, 12c. per bloom. Plants with less than 4 flowers, 15c. per bloom. Cut lilies, medium, $12 per 100 blooms. **All plants have been grown moderately cool.**

RHODODENDRONS

Our stock is large, the plants being well budded and shapely, including all the best varieties in all colors. Prices, $1.50, $2.00, $2.50, $3.00, $3.50 and $4.00 each. Very large plants, $5.00, $6.00 and $7.50 each.

HYDRANGEAS

We have the largest and finest stock of Hydrangeas ever offered to the trade at Easter, having 7,500 perfect plants. Our stock includes over 6,000 of the new French varieties, all of which have proven so valuable to the retailer. The plants have all been grown cool and are well hardened off, insuring satisfaction to the buyer. Hydrangea Otaksa, 6 inch, $6.00, $9.00, $12.00, $15.00 and $18.00 per doz.; 7 inch and 8 inch, $2.00, $2.50, $3.00, $3.50 and $4.00 each. Specimens, $5.00, $6.00 and $7.50 each.

All of the following varieties have been tested by us under ordinary conditions as to their adaptability to forcing for Easter. All have proven themselves to be valuable additions.

Bouquet Rose, bright pink; Gene de Vibraye, bright rose; La Lorraine, bright pink; Mme. a Riveram, bright rose; Mme. E. Mouillere, best white; Mme. Maurice Hamar, bright pink; Mme. Renee Gaillard, large white; Souv. de Mme. E. Chantard, bright rose; Radiant, bright pink; Baby Bimbinet; Mont Rose, 6 inch and 7 inch pots, from 3 to 15 flowers, $6.00, $9.00, $12.00, $15.00, $18.00, $24.00, $30.00 and $36.00 per doz

April delivery, strong stock of the above varieties, 2½ inch pots, except where noted, $8.00 per 100, $75.00 per 1000.

EASTER ROSES

We desire to make special mention of our large stock of roses, growing upwards of 10,000 plants in the leading varieties. We have no hesitation in saying we are the largest growers of forcing roses for Easter in America. We are positive our stock will please the most critical buyers as the quality was never better. It has all been grown cool and will prove very satisfactory.

Baby Ramblers—All the choice and popular varieties in the polyantha class, 5 and 6 inch pots, $6.00 to $9.00 a dozen.

Half Standard Baby Ramblers—Orleans, Pres. Taft, Phyllis, etc., exceptionally fine plants, 3 foot stems, $1.25, $1.50 and $2.00 each.

Hybrid Roses—Magna Charta, etc., $9.00 to $18.00 per doz.

Trained Specimens—All the Ramblers, Lady Gay, Hiawatha, Dorothy Perkins, Tausendschoen, Excelsa, splendid plants in 6, 7, 8 in. pots, at prices ranging from $1.25 to $7.50 each.

SPIRAEAS

Spiraea Gladstone—Our stock is in superb condition, 6 inch pots, very heavy, $6.00 per doz., $45.00 per 100. 7 inch pots, very heavy, $9.00 per doz. 8 inch tubs, very heavy, made up, $12.00 per doz. 10 inch and 11 inch tubs, very heavy, made up, $18.00 and $24.00 per doz.

Spiraea Queen Alexandra—6 inch and 7 inch pots, very heavy, 75c. and $1.00 each.

MISCELLANEOUS

Genistas—Fine stock for basket work in the smaller sizes, from 3 inch pots, at $15.00 per 100 up to large plants at $1.00 to $3.00 each.

Daisies—Yellow and white, well-flowered plants, $4.00 to $9.00 per doz.

Azaleas—Lots of them in the accepted Easter favorites, 75c. up.

Crotons, Dracaenas, Ferns, Palms, Ficus.

SEED TRADE

AMERICAN SEED TRADE ASSOCIATION

Officers—President, Chas. C. Massie, Minneapolis, Minn.; 1st vice-president, J. M. Lupton, Mattituck, N. Y.; 2nd vice-president, W. F. Therkildson, Painesville, O.; secretary, C. E. Kendel; assistant secretary, S. F. Willard, Jr., both of Cleveland, O.

Mail Order and Counter Trade.

Mail order business is said to be coming in good volume again which indicates that the users of seeds still believe in the promise that seed time and harvest shall not fail. This shows good judgment on the part of the buyers. Those who depend largely on counter trade report that orders are coming quite up to average, but, of course, there will be no improvement in counter trade until there are more noticeable signs of spring. When warm weather does smile on us again, there will not be hours enough in the day to take care of the business that is likely to swamp the majority of retail seed houses.

San Francisco's Outlook for Canners' Convention.

We reported some few weeks since that the three associations comprising the annual canners' convention were taking a referendum vote of their members as to their choice for the place for holding the next annual convention. We are informed that the great majority of canners favor San Francisco, above any other individual town, but it is said that the Pacific Coast is in a minority when the vote for other towns is combined, and so far as the Machinery and Supplies Association are concerned, while San Francisco is said to lead as a first choice there are one or two others which lead when first and second choices are combined. The Brokers' Association we learn are pulling strongly for Frisco. The responsible officers of the three associations, according to information which has reached us, do not believe that it is practicable to go all the way to the Pacific Coast; but the pressure from their members may compel them to go there against their judgment. Many of those who have signified that San Francisco is their first choice, have at the same time stated that they will be unable to attend a convention held there personally. It does not seem to be a fair way to vote on this proposition and only those who expect to attend should vote for any town. It will doubtless be some weeks yet before the matter is definitely settled.

If the convention does not go to the Pacific Coast, it naturally should go to some place in the Middle West, but the difficulty of finding a town with a hall large enough for the Machinery and Supplies Association, which has hotel facilities sufficient to accommodate the crowd, is proving a hard nut to crack.

Surplus Peas.

There are no signs as yet that the congestion and the great pressure of the surplus peas in the country is being materially reduced, and great efforts are being made by both canners and seedmen to find a market for their surplus; where everybody has all they want of an item, it is difficult to induce them to take more, consequently those who are burdened with more than their usual requirements will probably have to carry the stock over into another year.

Free Seeds Again.

Congress has again voted for the annual free seed distribution, despite the attitude of the Secretary of Agriculture, who is known to be opposed. While many of the Congressmen and Senators resented the term "graft" as applied to this annual free seed distribution, many are so thick-skinned that it does not worry them in the slightest degree. We fail to see why the sending of seeds by Congressmen to their constituents is not in a sense at least buying the electorate. It looks as though those who favor this useless expenditure do so because it helps their political fortunes. They do not care especially about the farmer excepting his vote, and if custom had sanctioned the sending out of any other class of merchandise with the same end in view, they would undoubtedly favor that just as they do the free distribution of seeds. It looks as if the trade may as well accept the situation with the best grace possible, as there is no indication that Congressmen who are the beneficiaries of the System will relinquish any of their privileges.

Notes.

Portland, Me.—E. L. Thompson has opened a new seed store at 21 Free street.

The South Carolina Legislature has adjourned without taking action on the seed bill, which was vigorously opposed by the seedsmen.

St. Louis, Mo., March 17.—At least two persons were killed, 15 buried under debris and 10 injured when the west wall of the Missouri Athletic Club building, which was destroyed by a fire in which 30 persons lost their lives a week ago, collapsed under a high wind today and crashed through a four-story building occupied by the St. Louis Seed Company. The four-story building occupied by the St. Louis Seed Company had weakened, apparently, during the burning of the Missouri Athletic Club building, which adjoined it on the east, and when the brick wall crashed on the roof of the four-story building, the walls of the latter gave way and all above the second floor crumpled.

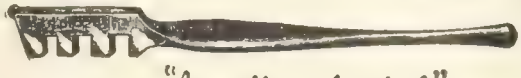
MICHELL'S Seed House

Dept. Q. 518 Market St., Phila., Pa.

PERSONAL.

Alexander Proctor has taken the position of gardener for Mr. W. J. Tully, at Locust Valley, N. Y.



G. Krosschell, Sassenheim, Holland, who has been on his annual visit to the United States, sailed on the Mauretania, March 17.

Philip Hansling, formerly superintendent of the street department of Hartford, Conn., has purchased the nursery business of C. H. Sierman, Park street.

Prof. H. C. Irish, who spent the winter at Ames, Iowa, as instructor of botany at the Ames College, is back again and has accepted a position with the school board of education as supervisor of the City School Gardens in St. Louis.

Mt. Holly, N. J.—Frank K. Bennett's greenhouse, on Burlington street, was badly damaged by the weight of the snow last week. One section of it collapsed, killing several hundred dollars' worth of young flowers which he was forcing for Easter. John Clair also lost some stock in his greenhouses, through the breaking of the glass.

Have You this Book on Your Desk?

If not, you haven't been fair to either yourself or your business.

Burpee's Annual

is the leading American Seed Catalog, the Silent Salesman of The House of Burpee, and is the Plain Truth About Seeds That Grow. It will be found to contain more information of genuine value to the planter,—professional or amateur,—than is found in any other book of its kind.

Burpee's Seeds Grow!

Extraordinary care and the Methods of The House of Burpee make it possible for us to maintain the truthfulness of this slogan.

Fordhook Farms

America's greatest trial grounds, must pass judgment and place the Stamp of Approval on all varieties of seed offered for sale even before they are packed.

Florists and Market Gardeners

should write for our BLUE LIST. This is our **Wholesale Price List for those who plant for profit.** The Business of Market Growing does not warrant the use of seeds of unknown quality any more than the use of haphazard methods.
We will gladly mail both our ANNUAL, which is a descriptive catalog, and our BLUE LIST, which contains the right prices for florists and market gardeners. Our Blue List contains the whole list of desirable florists' seeds.

Burpee's Flower Seeds for Florists

At Fordhook Farms (in Pennsylvania), Sunnybrook Farm (in New Jersey), and our Floradale Farm (in California) we are growing acres of flower seeds, especially those varieties that do best in the different localities. Other flower seeds are produced on contract by careful growers both at home and abroad,—subject to personal inspection.
The same care is used in testing and proving the excellence of our flower seeds that has made Burpee's vegetable seeds famous. Superior quality cannot be secured from any source.

Write to-day — "Lest you forget" A postcard will bring both these books

FOR FULL DESCRIPTIONS SEE OUR CATALOGUE—MAILED FREE.

We are the largest handlers of Cannas in the world. Our prices on Cannas will bear comparison with any house in the Canna business.

Our Cannas are true to name—two and three and sometimes four eyes—are sound, dormant, and are packed 250 in a box. Two can be "cleated" together and shipped as one. One box of 250 sold at thousand rate; it is cheaper for you to buy a box of 250 than 200 at 100 rate. Write for special prices on quantities.

If any Cannas are not found here, it may be understood that they are superseded by the foregoing. If selection is left to us we will substitute or send only the best for all purposes.

New Rose, Killarney Brilliant

The Most Valuable Rose Introduced in Many Years

We consider this new rose—a sport from the original pink Killarney—the most valuable rose that has been introduced in many years. It is well named Killarney Brilliant, on account of its brilliant color.

It is a great improvement on the original pink Killarney; first, because of its much more brilliant color, it being almost crimson in bright weather, while in midwinter—in dull, cloudy and foggy weather,—when the original pink Killarney loses its brilliancy and becomes badly faded, Killarney Brilliant is as bright and deep a pink as the original variety at its best. In addition to its great superiority in color, the flower is almost twice as large, having from twenty-five to forty full sized petals.

It has the same desirable color that Killarney Queen possesses, but has double the number of petals, making it a very double and a fuller flower; is also very much more productive, having same habit of growth and same freedom of bloom as its parent.

We have watched Killarney Brilliant growing during the past Winter, planted in the same house with the original and the double pink Killarney, and when those varieties faded so as to be almost unmarketable, Killarney Brilliant was superb. We are thoroughly convinced that it will immediately supplant the original Killarney as the standard market variety, and that every up-to-date grower will be compelled to plant it, on account of its great superiority. A prominent rose grower, who has seen it growing, says it is the only rose he has ever seen that needs no advertising; it sells itself.

Ready for Delivery Now, Strong, Grafted Plants, $7.50 per doz., $35.00 per 100, $300 per 1,000

One of the Dreer Specialties

A Planting of Japanese Iris at Our Nurseries, at Riverton, N. J.

Dreer's Imperial Japanese Iris

These magnificent Iris are among the most beautiful of our hardy early-summer flowering plants and are destined to become as popular as the hardy Phlox and Paeonies. They are valuable not only as decorative flowering subjects for the garden, but are also very useful as cut flowers.

Our stock of Japanese Iris is very extensive in a splendid assortment of home-grown varieties and can be relied upon for being true to name and description. We supply these in strong liberal divisions of a most satisfactory planting size.

Six-Petaled Japanese Iris

No. Order by name or number.

4. **Yomo-no-umi.** A fine free-flowering early double white.
5. **Koki-no-iro.** Rich royal purple with white veinings.
9. **Oniga-shima.** Rich purple with many white veins.
10. **Shiga-no-ura-nami.** Violet-purple, veined with white.
22. **Sano-watashi.** White, with canary-yellow centre.
24. **Gosetsu-mai.** White veined and traced throughout with aniline-blue.
25. **Senjo-no-hora.** Beautifully mottled deep purple and white.
26. **Uchiu.** Bright purple with crimson sheen.
28. **Tsurugi-no-mai.** Rich, deep purple.
29. **Rish-no-toma.** Silvery white, densely veined and minutely dotted with violet blue.
44. **Yoshimo.** Creamy-white, delicately veined with purple.
47. **Renjo-no-toma.** Petals peculiarly fluted, light violet, with white halo and light veinings.
53. **Samidare.** Silvery white, suffused throughout with rich ultramarine blue.
60. **Kagaribi.** Ground color white beautifully traced and marbled with ultramarine blue.
69. **Waku-hotei.** Pure white veined with purple.
74. **Renkaku.** White, densely marbled and spotted with bright violet-purple.
94. **Komochi-guma.** Rich, velvety pansy-violet.
107. **Tokyo.** The finest pure double white.
108. **Shimosa.** White ground, minutely and densely spotted throughout with bright violet purple.
109. **Hosokawa.** Royal purple with white veinings.

Price: Any of the above. 15 cts. each; $1.25 per doz.; $8.00 per 100; $70.00 per 1000. The set of 20 sorts for $2.00.

Three Petaled Japanese Iris

No. Order by name or number.

11. **Hano-no-nishiki.** Bright violet-purple, veined with white.
12. **Shippo.** Light lilac, densely veined with purple.
14. **Shishi-ikari.** Light ground color, veined and mottled with dark violet-purple.
18. **Meiran.** White, densely marbled and veined with light violet.
23. **Yedo-Kagami.** Magenta-lilac, veined with white.
33. **Kakujakuro.** White ground, marked with violet-blue in such a manner that makes it appear as though the color was dusted on.
43. **Shi-un-ryo.** Grayish-white, deeply and densely veined and suffused with violet.
55. **Schuchiukwa.** A showy variety, crimson-purple with white veins and white halo.
62. **Misutmoshito.** Violet-purple, marbled with purple.
67. **Kigan-no-misao.** A late flowering pure white.
73. **Shirataki.** Silvery-white, border of petals suffused with light Parma-violet.
77. **Yayaura.** White, occasionally marbled with light violet.
82. **Ari-Ake.** Violet-purple, marbled with white.
85. **Ojochin.** Light violet-purple, the larger veins white.
86. **Sei-o-bo.** Large pure white, with faint violet-purple markings.
96. **Tebotan.** White ground, with prominent violet-blue veining.
97. **Shiro-fungen.** Light ground, suffused throughout with bluish-violet.
100. **Yomo-zakuru.** Light ground color, densely veined and suffused reddish-purple.
102. **Shi-no-maki.** Rich royal purple.
106. **Sakata.** Light violet or lavender blue.

Price: Any of the above. 15 cts. each; $1.25 per doz.; $8.00 per 100; $70.00 per 1000. Set of 20 sorts for $2.00.

Extra Choice Mixed Varieties. $1.00 per doz.; $6.00 per 100; $50.00 per 1000.

The Importance of Having Our Canna Book

THERE'S a lot to know about cannas. Their popularity is increasing tremendously. They are one of the big sellers. This Canna Book of ours gives you in a short space a lot of facts that ought to help you increase your sales.

Its color chart you surely can't afford to be without. Everything in the book is endorsed by Antoine Wintzer, and you know what that means. Send for the book. But that isn't all—send along your orders. No matter whether other cannas on the market are grown in the North, South, East or West—none of them can surpass ours in quality and size.

They are superior stock in every way and are worth every cent we ask for them. Run over this list and mail your order.

The One Most Desirable DAHLIA For Cut Flower

DELICE

A soft, but lively pink color which appeals to everyone. Habit of growth perfect, with long, wiry and stiff stems which hold the flowers erect without the slightest inclination towards a weak neck. Very free flowering and of most desirable decorative form.

DELICE has always been scarce, the supply never equaling the demand, but we have made special efforts to produce a large stock and this is the first Spring that we have been in a position to offer it in dormant, undivided field grown roots.

Price, $2.00 per dozen; $15.00 per 100; $140.00 per 1000.

For the most complete list of Dahlias ever offered send for our SPECIAL DAHLIA CATALOGUE.

FINED FOR SUNDAY WORK.

George Lutz, salesman for Adolph Le Moult & Son, florists, at 202 Bowery, New York, was found working on a Sunday recently by Inspector Carrie P. Houser, and as the corporation did not file a schedule with the Commissioner of Labor showing that he had one day off in a week, charges were filed in the Court of Special Sessions, against the corporation, for violating the labor law. The matter came to the attention of Chief Justice Isaac Franklin Russell, and as the corporation, through its secretary, Adolph Le Moult, entered a plea of guilty, a fine of $20 was imposed.

FIRES.

Of Interest to Retail Florists

TRADE GETTING.

Because I have been rather successful in the florist business I have been asked by many friends in the business to give some advice to them along the lines of store management, and also of trade getting. I shall, however, take up the last part of this subject, as it is the most important for those who are working in the store and come in direct contact with the trade. My experience has been mostly in the small cities of New England, and where the shoe industry flourishes the best, and I write from the standpoint of a woman and in the handling of the retail trade.

I know of no set rules that will help, but will give you my own experience. The flower business is a peculiar one and appeals to the artistic sense, even when you are standing ankle deep in the designing room. To begin with, I love my trade; that is, I really like the people who come to trade with me. I look upon them, whether rich or poor, as deserving of deep affection, and I do not put up a "bluff" article when I take this attitude, for if ever there was a business in which affection for all of humanity is needed it is in the flower business.

Quite frequently young men will come to order cut flowers for dances for their fair escort. They welcome any suggestion you may make as to the color of flower that should be used; but, for goodness sake, make the suggestion show some interest in the order! I know of one case where an order was given by a young man who had no idea of what would be the best color for his lady friend to wear at a dance, so I hustled to the telephone, got into communication with the dressmaker, whose name he had found out, and discovered that the lady would wear a light blue dress. I was then able to give him the proper idea of color for a bouquet, and received a good sized order from him; not only that, but through him I received orders from nearly half the young men who attended that particular dance.

It is well to get a good idea of the arrangements of the houses and gardens of the wealthier class of patrons in your town. I have in mind a home which I visited when it was in the process of construction. I planned in my mind's eye just what kind of flowers and plants should be used in the different rooms, for different occasions, as I knew the owner would entertain a great deal. In a few weeks I had a call from Mrs. Owner, and she said she "was going to give a small card party, but wanted a few flowers for the different rooms," naming a small price she was willing to pay. I told her what I could give her that would bring out the harmony of the furnishing of her home. As I had already a pretty good idea of the house I was enabled in one visit to place my decorations where they were most effective without hesitation, and with absolute confidence. As a result of this work, I secured a valuable permanent customer. You cannot make much money on a decoration job, but you can make a whole lot of friends, and friends mean business.

I have seen some flower salesmen, in taking an order, give the whole history of the flowers that were to be used, including the wholesale price; but customers don't want history, they want flowers, and expect you will make a fair profit. I have seen a good-sized order lost just because the salesman went on in this fashion, in a kind of monologue: "The flowers will cost you three dollars, the frame one dollar, and the making up two dollars." By that time the customer's mind had become confused, and she concluded she would let him know later, which she did by going somewhere else. In small towns and cities, near relatives of the deceased give their orders personally and, quite frequently, they have other matters on their minds, so do not confuse them by useless talk. Don't do a lot of figuring in the presence of the customer, especially when you are taking a funeral order. It is also well to remember that, while your customer may be in a hurry, he will resent any show of haste on your part. You may smile at it, if you wish, but, as a salesman or woman, you cannot have your mind on a tango dance and take a good funeral order. A customer can detect, without looking for it, whether you are in sympathy with the conditions under which you are taking the order. And along this line, speaking especially for the small store, don't have any "loafers" up in the front of your store. Customers particularly resent being watched in a flower store.

I have found it extremely difficult to get clerks to realize the importance of the right mental attitude towards their work, but I can say frankly the quickest way to spoil a good mental attitude is to contract the habit of criticising the appearance or dress of callers, and never class trade as "wealthy" and "poor." Take just as much pains with the small purchaser as with the large one. Every one that steps into my store is my friend, and a friend of the store.

LILLIE JOHNSON.
Rockland, Mass.

WASHINGTON NOTES.

David Bisset, son of Peter Bisset, is confined to his home with a fracture of the left leg caused by his falling from a street car. Mr. Bissett was but recently allowed to leave the hospital where he was confined for a number of weeks following a collision between the motor cycle which he was operating and a large automobile truck, which caused a compound fracture of the knee.

Parcel post rates will now apply on shipments through the mail of seeds, cuttings, bulbs, roots, scions and plants, and the necessary instructions putting this order into effect is being sent by Postmaster General Burleson to all postmasters. This law was enacted by Congress on March 9, and repeals the rates heretofore applying. Packages and parcels of seeds, cuttings, bulbs, roots, scions and plants, weighing four ounces or less will hereafter be mailable at the flat rate of one cent for each ounce or fraction thereof, without regard to distance, while on parcels exceeding four ounces, the pound rates to the various zones will be applicable.

The DuPont Flower Shop is the name of the new store recently opened at 6 DuPont Circle, N. W., under the management of Elmer C. Mayberry. The Shop is one of the most attractive flower stores in the city. The interior fittings are of the new French gray. The store is divided at the rear by a lattice, which also covers a portion of the two side walls, to give space for a workroom. Above this is a large skylight and this with the windows and the several clusters of high-power electric lights gives ample illumination. There is extensive display space at the front, the window of the box type extends beyond the entrance to the store, the glass covering the entire front so that all flowers and plants on display are placed directly on the floor. The floor is of stone.

A CORDIAL INVITATION

PRESENTATION TO CHARLES KAHLERT.

Thirty-eight years in the employ of one firm is the fine record of Charles Kahlert, who has been with the retail house of Pennock Brothers, Philadelphia, since the opening of the Centennial, May 9th, 1876, and still in active harness. He decorated the Centennial window of the firm for the spring week. Seizing the occasion of Mr. Kahlert's 60th birthday, March 14th, members of the firm and fellow employees attended a little celebration at Mr. Kahlert's home in Norwood, Pa., on the 14th inst. During the proceedings A. B. Cartledge, senior member of the firm, presented Mr. Kahlert with a handsome gold watch and chain, from the firm and fellow employees, as a memento of their esteem and respect. Mr. Cartledge spoke feelingly of the long and faithful service and the sterling worth and high character of the recipient, and voiced the sentiments of all present in the happiest manner.

Commodore Westcott, who presented a gold engraved seal pendant, also spoke. He said Mr. Kahlert had started with him in Brooklyn, N. Y., and later joined him in Philadelphia after he became a member of Pennock Bros. and had been there ever since. He cordially endorsed all the good things that had been said and was glad to be present to testify to his esteem. He considered "Charlie" one of "his boys" and felt towards him more like a son than an old employee. Mr. Kahlert feelingly replied and thanked his friends most cordially for their good wishes and the beautiful mark of esteem, which he would wear next his heart as long as he lived.

The writer of this note has known Mr. Kahlert some twenty years and considers him a shining light. The editor of this journal has known him even longer, and I am sure will join me in wishing that he may live a thousand years. We are proud to have known him and extend our cordial congratulations on this occasion of well-deserved appreciation from his friends and fellow workers.

GEORGE C. WATSON.

PHILADELPHIA NOTES.

W. F. Littlefield and wife passed through the city and called on the trade last week. They are on their way home from a trip to Honolulu.

W. Frank Therkildson, advertising manager for W. Atlee Burpee & Co., has gone West on a friendly visit to his old location at Painesville, O. He will attend incidentally to committee matters connected with the American Seed Trade Association, of which he is vice-president.

Counter trade among the seed houses here is very backward for mid-March, and while they all know why, they cannot help growling at what old Boreas has been doing to them these five weeks back. And he is still doing it, the old scoundrel. Meantime, if we may believe the Washington Star:

"The groundhog sleeps well tucked away
While blizzards blow;
He doesn't even deign to say
I told you so."

Wm. A. Leonard, Landsdowne, is showing up as one of our most successful and enterprising growers. He has a big new addition to his already large area of glass under way and will complete same in time for next season's crops. In addition to being a great rose grower, Mr. Leonard is also an enthusiastic yachtsman — and a member of the Yachtsmen's Club of Philadelphia, with finely equipped quarters at Juniper and Jenson. We had the pleasure of meeting a number of old friends there the other day—as Mr. Leonard's guest.

Parker Thayer Barnes is in the far end counties of Pennsylvania teaching the farmers how to fight the insect pests for the past year or two. In a personal letter he states that there is going to be another short peach crop in that region, mainly because his solemn warnings have been largely unheeded. But the wise ones are waking up in this as in many other important matters, and the campaign of the Department of Agriculture, of which Prof. Surface is the ruling spirit, is bound in time to bear fruit. Mr. Barnes sends kindly greetings to all his old friends of the Florists' Club and others around Philadelphia.

Your editorial about the lads who are "perpetually burning incense to themselves," is very good. It's an American trait, but here in Philadelphia it has always been at low ebb. I can well remember twenty-six years ago, when I first settled in the Quaker City, how refreshing it was to read what Wilmer Atkinson said about his journal, "that it did not devote one-half of its space to telling how good the other half was." Yet for all that, Philadelphia has some advertisers of world-wide fame—Burpee, for instance, and Wanamaker, and lots of others. But they never scream to convince. They say it quietly, but strongly.

"The Right Way of Gardening" was the subject of a lecture by Maurice Fuld, of New York, a well known horticulturist, at 1714 Chestnut street, last night.

"Don't follow too many rules," he advised his audience. "Put little faith in what you read in rule books and seed catalogs. The majority of the latter are so devised as to fool the unknowing and to trick them into buying seeds that will be of no use to them.

"If the seed merchants would only realize that by tricking [illegible] a customer only to [illegible] they would adopt a [illegible] policy.

"Don't be afraid to [illegible] garden. Don't do [illegible] that would prove difficult to a professional gardener. Don't think [illegible]

be a gardener. Don't trust to luck. And, above all else, don't have too many 'don'ts.'"

The above is a sample of the way the Philadelphia papers reported Mr. Fuld after his lecture there on the 13th. The assertion that the seed catalogues are unreliable seems a pretty large order. Isn't this an aspersion on the whole seed trade of the country by one of its own members?

CHICAGO NOTES.

The Reissig Greenhouses at Riverside, Ill., one of the oldest florist establisments near Chicago have been sold, including 80 acres of land. There is a large new range of greenhouses on the property.

Phil Schupp, manager for J. A. Budlong, says this has been a remarkable year for lily of the valley in that the sales were steady from the beginning of the season to the present time. Lent, which usually cuts into the sales, has made almost no difference so far. The quality of the pips has proved first class, though some apprehension was felt at the time of their late arrival.

At Frank Oechslin's, greenhouses, where plants are grown exclusively, the Easter stock is at a most interesting stage. Rhododendrons are carefully shaded, the plants large, finely branched and buds just bursting. There is a fine lot of azaleas and much of the stock is of the newer and choice varieties. Several houses of roses will be just in time. Bulb stock will be practically gone. Mr. Oechslin expects to attend the Flower Show in New York and, as he served his apprenticeship in the East, he knows just what a treat is in store for him.

The Chicago Retailers' Association are making preparations for an extensive exhibit of flowers and florists' supplies at their next regular meeting.

All sorts of conflicting reports are afloat concerning the cut lily supply for Easter, and each grower seems to have an experience differing from all others. By sifting the evidence as much as possible the conclusion is reached that there are many giganteums not up to the average in height, and some real danger of flowers opening too soon should the weather be bright for some days preceding the very late Easter.

The excitement over the arrest of C. M. Dickinson, former manager of E. H. Hunt, Inc., at Stony Butte, Montana, by C. E. Pruner, traveling salesman for and one of the stockholders in the company, on the charge of embezzlement, as stated in our last issue, has subsided and the matter brought to a halt by the refusal of the governor of Montana to sign the extradition papers necessary to secure Mr. Dickinson's return to Illinois. Mr. Pruner is now in Texas and the matter will rest till his return. There was some irregularity in the making out of the papers, which have been held over a year.

Six years ago a few hundred shamrock plants were ordered from the East and sold to the retailers, who disposed of them as novelties to a public always on the watch for something new. Each year has seen the sales of Ireland's favorite plant grow, and this year surpasses anything known here before. For three days one of the large department stores has been disposing of thousands of plants in inch pots at 2½c. per plant, and every florist has sold more than ever before. Special boxes were offered by the florists, the invention of a local florist, and so arranged as to safely carry two plants in 2-inch pots.

About fifty Chicagoans attended the joint meeting of the Illinois and Indiana State Florists' Association at Danville, Ill., March 10-11, and a very enthusiastic meeting is reported. The attendance was more than double that of any previous meeting of either association. The exhibits of cut flowers were extremely good and the exhibitors spared no pains to make a creditable showing, while the display of various kinds of supplies were of general interest to the trade. It was a disappointment, however, so far as the booking of orders went, for the first evening was given over to the banquet and the second day was spent at the State Agricultural College at Urbana, Ill., and most of the florists left immediately afterwards for home.

Schloss Bros., new ribbon headquarters at 33 East 28th street, is well worth a visit from any florist attending the big flower show. It is right in the wholesale cut-flower district which is frequented by the entire trade, and Mr. Schloss reports a large increase in business since their opening six weeks ago. The show room, on the first floor of a new building, is 45 x 90 ft., finely lighted for inspecting the many new fancy ribbons for the Easter trade, and there are some handsome corsage novelties also worth examining.

Flower Market Reports

BOSTON The flower market didn't stay very long on high ground. The first dose of warm sun this week toppled it over and very decisive has been its fall, judging from conditions and outlook in the wholesale markets as we go to press. Everything has taken a tumble in the general slump and there are accumulations of carnations and bulb material especially, that have an ominous look. Roses, while of splendid quality, are overstocked already. Lilies slow and the speciosum rubrums are difficult to move at any price. Snapdragons, superb in all respects, bring but $4 to $6 per 100, which is entirely inadequate for such stock, and even at that they accumulate. There are very heavy receipts of violets, more of which are sold at $1.50 per 1000 than at any higher figures. The buyer has everything his own way for a while, at least.

BUFFALO The long-looked-for reaction has finally come, and the past week experienced the best volume of business since the Lenten season began. Not only has the market been cleaned up of the heavy surplus but a steady trade existed and prices were more satisfactory all around. The receipts were not quite so heavy but there was enough of everything and no shortage existed on any one line. Carnations had good sales, also roses, which have come on in good supply and Beauties sold to good advantage. Sales have increased on lilies, and bulbous stock has moved much better than the previous weeks. Sweet peas had a better call and violets were well cleaned up, though at department store prices.

CHICAGO A welcome break came in the monotony of a few dull weeks and for some unexplainable reason trade took a sudden turn for the better. While there was nothing extreme about it, both local and shipping trade decidedly picked up and good flowers sold readily though not at fancy prices. Wholesalers no longer expect prices that prevailed at the holidays and for weeks following, but are willing to work their stock off at a fair price and the retailers are encouraged to push sales by liberal use of the advertising columns of the city papers. There is a good supply of everything seasonable and good quality can be obtained in practically everything except American Beauties which are quite off with most growers. Killarneys and Richmonds and a few Sunbursts form the bulk of the roses and eight cents is about the limit with most houses. Sweet peas are more plentiful each week but the quality of the butterfly type is so good that any amount can be used. Violets are nearing the end of the season but some excellent home-grown ones are still offered. Sales of lily of the valley are keeping up unusually well. Bulb stock continues to come steadily and much of it is choice. Sales of dyed flowers showed no signs of diminution in out-of-town trade, but most wholesalers report a falling off of local demand. The sickly shade of green, that most attempts at dyeing white flowers produces could find favor but for a limited time and some of the larger dealers say their sales for Killarney and Richmond roses were much larger for St. Patrick's Day, greatly to their liking.

CINCINNATI Business is pretty fair. Prices are only ordinary ones but the aggregate of sales runs into money. The supply is in general easily sufficient for all requirements and in some lines it far exceeds actual needs. Shipping business is good. The demand for white carnations for the 17th was very good and easily took up all offerings at good prices. Th...

Flower Market Reports

(Continued from page 443)

continues good and the larger part of the stock coming in is in the larger and better grades. Carnations of all kinds are plentiful, also lilies. Large quantities of violets meet with a poor market. Sweet peas, too, are plentiful. Bulbous stock is apparently nearing an end for the season. Business in decorative greens is very good.

NEW YORK

The main thought in connection with the wholesale flower trade here at present moment is that it shows a very noticeable improvement for the past few days. How long it may last nobody can predict but it is welcome for however long it stays. On Monday morning an air of activity in and about the wholesale marts was discernible from the very start and it has kept up nicely since then. Carnations have found an active market and violets, although selling very low, are being distributed out much better than heretofore. Roses hold their own as to demand and are more than holding their own as to quality. They have never been finer at any season and it is pretty certain that at the coming New York show the rose growers will make a new record. Bulbous stock continues plentiful and sells low. There are lots of sweet peas of many grades, only the really fancy ones commanding a good price and sure sale. Cattleyas go with exasperating slowness and gardenias are also hanging fire badly. Very little talk about Easter yet in the flower district.

PHILADELPHIA

Early last week the depressed condition of the market continued and old "Iron Face" had it pretty much his own way. But by Thursday a vast change came over the scene and prices stiffened, and in many cases went up with a jump. This continued Friday and by noon Saturday the market was pretty well cleaned up. So take it altogether it was a pretty good week. Carnations are in brisk demand. The finest arriving at present are Gloriosa and Pink Delight. In roses the supply of short stemmers is rather redundant, and this has had a depressing effect on the whole rose market. There is always a good demand for medium roses, but when there are too many of these it hurts sales for the better qualities. Mrs. Taft and Mrs. Aaron Ward, which have been little in evidence for a while back, are now coming in more freely. The orchid market is not in very good shape. While the quality is fair, the demand is anything but brisk. Gardenias and violets also continue on the slow side, although the bright weather of the last few days is helping them a little. While sweet peas are very plentiful, they continue to sell well and the quality is par excellence. A much scarcer item now is the daffodil. Prices on these are holding very firm with some advances on the large flowering sorts. Paper whites are scarce and we see no Roman hyacinths around at all. All the staples of the season, such as lilies, lilac, mignonette, daisies, etc., are in ample supply

(Continued on page 452)

COCOANUT FIBRE SOIL

20th Century Plant Food Co., Beverly, Mass.
For page see List of Advertisers.

CYCLAMENS

200,000 GIANT FLOWERING CYCLAMEN. For the last 16 years we have selected three-fourths of our seed-bearing cyclamen stock before Xmas, to assure early blooming plants, and claim the finest commercial strain in this country; no fizzle of many so-called English varieties. Our aim is strong growers that don't have to be petted to be grown into a choice salable plant—a well built, five-petaled flower (many of them at one time), with well marked foliage; every plant an ideal, a prize winner. Received first prize at the Cleveland show and first and second at Toledo, early November, when blooming cyclamen were scarce.

STRONG AUGUST SOWN SEEDLINGS, once transplanted, $3.50 per 100; $30.00 per 1000. Cash with order. Cultural directions with all orders. C. WINTERICH, Cyclamen Specialist, Defiance, O.

Thomas Roland, Nahant, Mass.
For page see List of Advertisers.

DAHLIAS

Henry A. Dreer, Inc., Philadelphia, Pa.
The Most Desirable Dahlia for Cut Flower, Delice.

PREMEDITATED!!

A Combination To Promote Trade

Advertiser X Horticulture = BUYER

This issue of Horticulture was planned as a

Spring Trade Promoter

Wise advertisers have made liberal use of the opportunity it offers.

Two More Coming

March 28th issue will contain a detailed account of the New York Exhibition up to the middle of Show Week, in HORTICULTURE's well-known concise and readable style and will be given a very large extra mail circulation outside of our regular subscription list.

April 4th issue will be our Tenth Regular Easter Special, always popular with the trade. It will contain an account of the final days at Exhibition and will be mailed especially to the florist trade.

TO WORK UP SPRING BUSINESS

Advertise fully what you have to offer, in one or both of these optimistic stimulators

PULVERIZED OR SHREDDED

CATTLE MANURE

Rose and Plant Growers

Now is the time to get Cattle Manure into your bench and potting soil. Its peculiar action and effect cannot be had with anything else. Splendid quality being packed right now. Order today.

PULVERIZED

SHEEP MANURE

Carnation Growers

Can't afford to make beds or set plants without it. Wizard Brand is pure, full strength, weed seeds killed, uniform and reliable. Ask your Supply House for Wizard Brand or write us direct.

SPECIAL GREENHOUSE FERTILIZERS

FOR FLORISTS AND GARDENERS

Formulated and Manufactured by men who have made a life study of

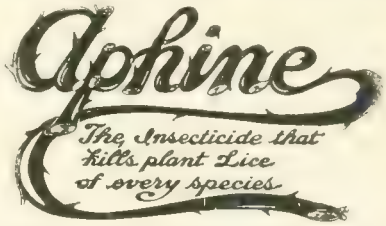
FLOWERS—FRUITS—VEGETABLES

UNDER GLASS

In this Country and Abroad

Proper fertilization under glass is more important than fertilization out of doors—and

Fertilization is Our Specialty



Why pay ocean freight and dealers' commissions on Imported General Fertilizers when you can buy Fertilizer Direct from the Manufacturer especially prepared to meet *your individual requirements.*

We are also manufacturers of MAK-GRO Odorless Plant Food put up in one pound tins and five pound bags—a splendid side line for Florists operating their own stores.

We are at your service on all matters relating to Greenhouse Fertilization. Write us for further particulars

CONSUMERS FERTILIZER CO., Long Acre Building **New York City**

Factory and Laboratory, Farmingdale, N. J. | Experimental Greenhouses, Catonsville, Md. | Experimental Farm, Farmingdale, N. J.

The Recognized Standard Insecticide.

W. N. Craig writes in Florists' Review (March 5th, 1914): "Scale on greenhouse plants is not easy to get rid of, as doses which are sufficiently strong to kill the scale will usually disfigure the plants at the same time. I have found APHINE a first-class remedy for scale, and if you will apply it according to directions you will kill and loosen the scales, although they will not fall off, as will some other pests."

It will only require the hose to wash off dead scale.

A remedy that is efficient in destroying scale, will destroy green, black, white fly, red spider, thrips and mealy bug.

$1.00 per quart—$2.50 per gallon.

FUNGINE will destroy mildew, rust and bench fungi.

75c per quart—$2.00 per gallon.

VERMINE will destroy root maggots, eel, wire and cut worms in the soil.

$1.00 per quart—$3.00 per gallon.

SCALINE will destroy San Jose and all hard scale and red spider on fruit and ornamental trees and bushes.

$1.50 per Gal—10 Gals. $10.—50 Gals. $37.50

NIKOTIANA—a 12% nicotine for fumigating over small lamps or by painting on steam pipes.

$1.50 per quart—$4.50 per gallon.

For Sale by Seedsmen.

British Distributors: British and American Fertilizing Co., Liverpool, Eng.

Scotch Soot

Where there is a house that is just full of buds almost ready to show color, nothing will turn better color into the flowers than a little soot, that can be scattered over the benches before watering. The amount applied should not be excessive, as the soot is very strong and may damage some of the foliage somewhat. Apply just enough to blacken the surface of the soil in the benches, and let it go at that. Better a little oftener than too much all at once.

We offer the genuine in original cwt. Sacks, at:

$2.75 per 112 lbs.; $12.50 per 560 lbs.

Flower Market Reports

(Continued from page 451)

and excellent quality. The abominable dyed carnation is to be seen again everywhere, outraging good taste and the glorious memory of the Saint! It should be made a hanging offence. And then—Fire and Brimstone!

ST. LOUIS The same old story of the week previous regarding the local flower market. Stock of all kinds is much more than the demand. Light colors in flowers are about the only ones in demand. White carnations bring $4 per 100 and other colors not over $3 for fancies. Roses are down low. Violets are a glut and have been all the week and bring only $2 in 1000 lots. Sweet peas, too, can be classed with violets and are down as low as $3 per 1000. All bulb stuff also suffers greatly for want of demand, except lilies, which have sold well. Greens are somewhat scarce, especially asparagus and common ferns. A great deal of wild smilax was used for spring opening decorations.

WASHINGTON Washington is now experiencing its first taste of real spring weather, and practically of cheaper flowers, for prices have been forced down with the rising of the mercury. Carnations have dropped from up to $4 per hundred to almost nothing although there are some few which still bring a price. Violets and sweet peas, both of which are of good quality have been subjected to a similar drop. The sudden change in the weather is liable to do some little damage to the Easter stocks by bringing them into bloom before the appointed time. A similar condition caused local growers much concern a few weeks ago. However, the stock at the present time points to its being in the pink of condition at the proper time. Rambler roses are now appearing in the stores in small quantities and are meeting with a ready sale. Lilies are in somewhat larger supply but are moving fairly well.

NEW CORPORATIONS.

ALPHANO HUMUS is Going to be At the National Flower Show

TO you who already know a little about Alphano Humus as a soil builder and fertilizer combined, and want to know a little more; as well as those of you who know more and want to know still more—we extend to you a cordial invitation to come to our exhibit and meet Alphano Humus face to face.

You will find us on the main aisle of the second floor at the right of the elevator. Right then and there you can see exactly what Alphano is.

You can convince yourself of what it will do for you, by the convincing convincement we have to show you, of what it has done for others.

You can get just the information you want as to its use either indoors or out.

We will gladly give you some sample bags to make tests with. If you are "from Missouri and have to be shown;" you are doubly welcome.

OUR PRICES WILL PROVE THIS. CHICAGO, ILL.

This House Will Be Exhibited At the National Flower Show, New York March 21 to 28

IT'S not a special house gotten up simply for show purposes, but exactly the same kind we are selling.

From it you can get exact knowledge of how we build our curved eave houses.

Come around and see us at the show. Make our exhibit your hanging out place, where you can leave your overcoat; or make appointments to meet your friends; or have your mail sent.

You will be cordially welcome, be assured of that.

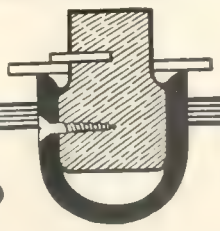
If You Want Still Further Proof of U-Bar Superiority Come and See Our House At the National Flower Show, New York



YOU can "pick it to pieces" all you want to; and for every "pick" we will have both an answer, and the proof that the answer is proven beyond all further answer by the construction itself.

There's a lot of talk nowadays about our curved eave house being "just about as good as another." In ten minutes with you we could knock that kind of talk into an old slouch hat.

Of course it's true there's always more than one way to do a thing; just like there's more than one way through the woods. But there's always one way that's better than all the other ways; just as there is one curved eave house that's better than all the other curved eave ones.

That the U-Bar is the better one, we are cordially inviting you to come to our exhibit at the show and see for yourself.

If you don't come then send for the new catalog that came from the printers a couple of weeks ago.

New Rose, Killarney Brilliant

The Most Valuable Rose Introduced in Many Years

Winner of Silver Medal at New York Show

We consider this new rose—a sport from the original pink Killarney—the most valuable rose that has been introduced in many years. It is well named Killarney Brilliant, on account of its brilliant color.

It is a great improvement on the original pink Killarney; first, because of its much more brilliant color, it being almost crimson in bright weather, while in midwinter—in dull, cloudy and foggy weather,—when the original pink Killarney loses its brilliancy and becomes badly faded, Killarney Brilliant is as bright and deep a pink as the original variety at its best. In addition to its great superiority in color, the flower is almost twice as large, having from twenty-five to forty full sized petals.

It has the same desirable color that Killarney Queen possesses, but has double the number of petals, making it a very double and a fuller flower; is also very much more productive, having same habit of growth and same freedom of bloom as its parent.

We have watched Killarney Brilliant growing during the past Winter, planted in the same house with the original and the double pink Killarney, and when those varieties faded so as to be almost unmarketable, Killarney Brilliant was superb. We are thoroughly convinced that it will immediately supplant the original Killarney as the standard market variety, and that every up-to-date grower will be compelled to plant it, on account of its great superiority. A prominent rose grower, who has seen it growing, says it is the only rose he has ever seen that needs no advertising; it sells itself.

CHRYSANTHEMUMS

New Pompons

GOLDEN CLIMAX. On the order of Quinola, but with foliage that is hard and which will not be subject to mildew. Exhibited at Chicago under the name "Climax." Blooms November 10th to 20th. Extra fine variety for cutting in sprays.

GOLDEN HARVEST. A medium-sized variety of the button type. Deep golden yellow, with a tinge of bronze; a color which when finished is similar to Souvenir d'Or when half developed. A color that is very pleasing.

GOLDEN WEST. A trifle larger than Baby, but of similar formation. Rather compact in growth, but an excellent variety for pot plants. When bench grown will produce excellent sprays for cutting.
From 2¼-inch pots: 30c. each, $3.00 per doz.
3 of a variety at the dozen rate.

CELCO. Bright yellow, shading to orange; similar to color of Quinola, but the sprays are not so compact and are ready to cut two weeks earlier, or about November 1st, when dark yellow Pompons are scarce. Medium height. C. S. A. Certificate.
Plants from 2¼-inch pots: 30c. each, $3.00 per doz.

LEOTA. Delicate pink with bright rose reverse, which gives the effective bright center in each bloom if cut a few days before fully developed. Dwarf habit; fine for pot plants. In season October 25th to November 5th. C. S. A. Certificate.
Plants from 2¼-inch pots: 30c. each, $3.00 per doz.

NESCO. Beautiful shade of old rose, flowers about the size of Iva, La Purite and Lodi. Medium height, maturing first week of November.
Plants from 2¼-inch pots: 30c. each, $3.00 per doz.

New Pompon Anemones

AZELDA. (E. D. Smith & Co.) Light pink, with a slight trace of lavender. Ray and disc floret same color, with the exception of the center of the cushion, which is cream color. Single row of lavender ray florets; produces exquisite sprays suitable for any sort of artistic arrangement.
Plants from 2¼-inch pots: 30c. each, $3.00 per doz.

DIANTHA. (E. D. Smith & Co., 1913.) A dwarf compact growing variety that is of the type so desirable for pot plants. It is also an excellent variety to grow for cutting in sprays. The guard petals are white and the center cream color.
Plants from 2¼-inch pots: 20c. each, $2.00 per doz.

LAURITA. (E. D. Smith & Co., 1913.) Bright yellow in color; of a compact dwarf habit. A valuable variety for pot plant culture as a small specimen.
Plants from 2¼-inch pots: 20c. each, $2.00 per doz.

PRINCESS. A seedling from Garza. Pure white, with ray petals, evenly spaced around a large Anemone center of quill petals, slightly touched with the pollen. In our observation, covering three seasons of bloom, it has never failed to show the Anemone center. The flower has good substance, giving a lasting quality as a cut flower. The habit of the plant is good, growing to a medium height and covered with flowers; it is thus an ideal pot plant. For effect in cutting it must be grown without disbudding when a single spray will produce from five to a dozen flowers. It is a midseason, blooming November 1st to 10th.
Plants from 2¼-inch pots: 25c. each, $2.50 per doz., $15.00 per 100.

NOTES ON CULTURE OF FLORISTS' STOCK

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

Carnation Ground

In preparing the ground for carnations it is always best to select a piece that is quite level and well-drained either naturally or artificially. Carnations while making their growth in the field require a rich soil, or the result will be a lot of stunted plants when housing time comes around. Give a good coating of well rotted manure, plow it under and harrow each way so the soil will be well pulverized. When the soil is deep plowed and well cultivated the roots can penetrate deep. Sod or pasture land is excellent when plowed in the fall and left all winter exposed to hard freezing.

Plants for Vases and Boxes

Much depends upon the plants used. Vases are sometimes in an exposed situation, while others are in a shady position. For a sunny and exposed situation the following named plants will prove very satisfactory. For centers use Dracæna indivisa or other grassy-leaved species. Chamalrops humilis or any of the Phoenix family will do fairly well. To fill the remainder, geraniums, coleus, Centaurea gymnocarpa, Begonia Vernon, petunias, ageratums, andachyranthes will give a fine color combination. For trailers Vinca major variegata, Solanum jasminoides, Abutilon vexillarium, nasturtiums, verbenas, German ivy and ivy leaved geraniums and many others. In a shady situation for centers use Phoenix rupicola, Latania Borbonica, Areca lutescens and cordylines and for the remainder use fuchsias, begonias, small plants of Ficus elastica, aspidistras and ferns. For trailers use German ivy, tradescantias, Kenilworth ivy, and Asparagus Sprengerii.

Preparations for Easter

The early buds on many of the lilies will now be showing white. These can now safely be given a cooler house and will be out in good season. It is possible now to make up these plants by selecting those which will flower together. No compunction need be used about shaking away or chopping off some of the balls to make them fit into the new receptacles. They will flower just as well if kept well watered. Tulips and narcissi which are usually grown in flats can be taken out and placed in pans. They will open just as well and last as long as if grown in them. Do not attempt this unless the plants are short and stocky and do it just before the flowers open. Hyacinths can be treated in the same way. Pansies and double daisies sold well in little baskets last Easter. If you have these in a cold house and they are coming into flower make up some pans or baskets of them. Flowering shrubs such as lilac, deutzias, cherries, double plums, etc., should now be coming into flower and ought to be opened in a cooler house. Wistarias also need similar treatment. Rambler roses, hydrangeas, spiraeas and all flowering stock will now be matted with roots and copious supplies of water are necessary to keep them in condition. What a treasure a man is who is a really careful hand at watering. He who does not skip a few pans on a bench every time he waters is the exception hard to find. Nothing so stamps the successful grower as the knowledge of how to use the hose right.

Starting Achimenes

These plants when well grown make very enticing subjects. They should be placed in pans now, using 5 to 8-inch pans. These plants require good drainage. The pans should be filled about one-quarter full of crocks and some moss placed over them. Finish off with sand so the pots or pans are about three-quarters full. Place the tubers quite close together and cover with sand. They should be given a temperature of at least 65 degrees at night. In about three or four weeks the young growths should make their appearance. When they have a growth of a couple of inches they can be potted into other pans, say six or seven in a 5-inch pan and eight or nine in a 6-inch pan. Give a compost of two parts fibrous loam, two parts leaf mold and about one part sand. Place near the glass and keep in a similar temperature to that in which they were started. Syringe and water with care.

Transplanting Seedlings

For the filling of seed pans and boxes strictly pure and fresh soil only should be used, excluding all soil used in previous indoor cultures, or any with fertilizing matter intermixed. There should be at all seasons, and at this time of year especially, adequate quantities of properly prepared soil handy for immediate use. The flats should be three inches deep, the soil made moderately firm, with smooth, even surface. With a blunt dibble, half an inch or more in width make a deep hole. Then let the seedling down, with its roots hanging straight, not bent upwards. You can insert the plant deep enough to let its seed leaves rest on the surface of the soil. The next most important thing to observe is to insert the dibble into the soil by the side of the plant so that the soil is pressed firmly around the roots.

Salvia Cuttings

Do not forget to keep propagating salvia right along, as this makes fine stock to have for late planting. The propagation of salvia can go on until May and yet make fine stock for many uses. Just as soon as they are rooted pot them up and place in a warm house. To keep them growing they will want a temperature of about 60 degrees at night. Keep them well watered and syringed.

Mr. Farrell's next notes will be on the following: Sweet Peas; Dracaena indivisa; Poinsettias; Sowing Palm Seed; Primulas; Preparing Beds and Borders.

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur Ruzicka

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to the office of HORTICULTURE.

The Easter Crops

All houses that will be in crop for Easter will show color now, and should receive very good care in regard to watering, so that they are not allowed to become too dry, and thus hurt the buds. As is often the case, all sorts of insects, diseases, etc., are held responsible for the deformed buds when in reality they are usually deformed by the growers' neglect to water them enough when the critical time is on. Beauties will seldom crop as heavy as the other varieties, and they therefore will escape this as they will stand a little more drying. This, however, should not be carried to any extremes as the Beauties are as likely to suffer from being too dry as the other varieties, and that is what will account for so many "blind" Beauties as they are sometimes called. The longer days are now here, and the weather is bound to be more or less bright, and if the houses are making any growth at all there will be little danger of getting them too wet. Another reason for not letting them get too dry, is that the soil, especially if it is heavy soil, is bound to crack up, and by so doing will tear the roots to pieces, so that the plants will receive a bad check, to say the least. To put additional color into the buds it is advisable to scatter a little soot over the surface of the benches; not a great deal but just enough to blacken the soil a little. This will then be watered in, and the plants will benefit thereby. A little of it can also be mixed into the manure water, but as soon as the buds begin to show color and the crop is heavy we would rather use the former method, and avoid using the liquid manure for a while. Although there are times when Easter will bring better prices, we never force or hold the plants back to have the crop come in for that time. There are so many other special flowers grown that there is a possibility of the prices being lower than on the average day.

Mildew

Watch out these warm spring days and nights for the ever-ready enemy of the rose—mildew. Keep the houses sufficiently warm at night, and do not take the night fireman off just yet. There may be cold snaps, and if the houses are not kept right you will be inviting trouble. Put a little sulphur on the pipes every now and then; not too much, say a little every twenty feet or so. This can also be mixed with a little lime, to take the strength out of it a little, and then applied. What lime really does is to fill in a good deal of the space where the sulphur would otherwise be, and thus there will be less sulphur on the pipes than there would be if sulphur were used alone. The pipes should never carry more than 8 lbs. of steam when the sulphur is applied, as the more steam they carry the hotter they will be, and the sulphur will evaporate more rapidly, and if they are too hot it will go into the air at once, making the fumes too strong, and these strong fumes are liable to bleach the buds, or even hurt the foliage to some extent. Where no steam is used, then a little lime and sulphur mixed together will do nicely if dusted on the plants when the weather is clear and the sun shines. Do not, however, apply the mixture too thick, as this would prove harmful. It does not have to show on the plants. A fine dusting is better than a heavy one in all cases. Another way to help check an attack of mildew is to apply a spray of Fungine as soon as the mildew becomes visible. This will kill all that is living, and then regulate the air so that there will be no danger of getting another dose of it. Houses that have more or less of the mildew all the time will have to be watched all the more carefully. The best place to tell if mildew is growing is to look at the old spots where the mildew had been before. It will show signs of life right here to start with.

Shifting the Young Stock

Keep the young plants coming all along, and never for a day allow them to get too dry or pot bound. As soon as they have formed a nice mass of roots, enough, say, to hold the ball of earth together, they should be shifted into larger pots. Clean pots should be used, especially for the last potting, for we hardly can know just how long the plants are to remain in these. Have them well crocked, so that there will be perfect drainage. Many plants are spoiled by improper drainage, for if not crocked well the soil will soon stop up the hole in the pot and then sour soil will result. The soil for the final potting can be as heavy as the soil to be used in the benches later on. Use more bonemeal in this than in the soil for previous pottings, for the plants are stronger now and the roots are hardier and they will be able to stand the food.

Bonemeal

It will not be advisable to use bonemeal from now on, especially on houses that are to be taken out early. The bone dissolves slowly and the plants will not get the benefit from it, and unless the soil is used on the fields or garden, a larger percentage of plant food will be thrown away, and at the prices we have to pay for all the raw material that we use in our business it is a very poor policy to allow several dollars' worth of plant food to be thrown away. Discarded rose soil is rich enough to grow general garden crops in as it comes from the benches, and will require little manure to grow good

vegetables. In fact it is used in many places in the place of manure or fertilizers.

The Novelties

There are some very attractive novelties being put out by the leading firms whose business it is to distribute and introduce these. Look them over very carefully, and see if there are not some that will, or ought to respond well to the treatment that they will receive in your greenhouses. Some of them will no doubt do wonderful things when planted by themselves, and given the special treatment that they require. This, however, does not say that they will do this all the time under all conditions and different system of culture. To try them out place them in a bench somewhere where they will receive treatment same as your growers are used to giving the plants. If they do well go in for them. Many times the growers are responsible for the failure of this and that variety for there are some that will require a little different treatment from the general run of plants. This, however, will not be admitted by some growers who insist that a rose is a rose and that all ought to grow under the one treatment. This idea is wrong, and we are glad to note it is not followed everywhere. If it were, few of the new roses would meet with the success that they have. Things and times change, and we must change, too, if we are to remain up-to-date.

Tying the Roses in the Boxes

In shipping the longer grades of roses, say fancies and specials, it is well to pass a rope through the box at the sides and around the bottom on the outside, so that the ends can be tied on the inside, and so hold the stems of the cut blooms in position, even though the box may be turned in every way. This is a very good way to do, and the only thing one can go wrong on is the leaves that may be crushed. This, however, is very little for with ordinary care the loss of foliage by breaking is very slight.

Cover Illustration

We selected for our cover design this week one of the prettiest plant arrangements we have seen for a long time. Unfortunately the photograph falls short of showing its dainty and graceful character. It was the work of the gardener for W. B. Thompson, Yonkers, N. Y., winning the $100 prize offered by Mrs. D. Willis James for group of flowering and foliage, stove and greenhouse plants, arranged for effect, 100 square feet, at the New York Flower Show.

....Spring Musings....

Scanning the horticultural horizon on this, the first day of spring, I can see nothing but a bright and prosperous season ahead of those who, with faith in their profession have gone ahead and prepared, not only for an ordinary but unusual busy season. Especially in the plant line there is no surplus stock anywhere, and some lines are already exhausted.

The country at large is returning to its normal prosperous condition, with an unusual activity in all industrial centres. This improvement was already very visible last fall. Never in the history of the bulb business was there such a shortage at the end of the season.

I would advise the plantsmen to prepare for prosperity. Those that do a so-termed catalogue business should publish more than ever of this class of literature, some of which are getting to be regular works of art. Those that do their advertising in the columns in HORTICULTURE and other papers of same character, should double their spaces and bring their stock before the buyers.

The method of personal calls on the would-be-buyer which has been much in use of late, seems to be rather overdone. In former years, a representative of a horticultural establishment was a welcome visitor at any of the florists' or private establishments, a sort of a medium for carrying information of horticultural interest. Nowadays the same man is told he is the seventeenth man who called during the week and in a good many cases is received in the same way as the book or sewing machine agents. This, however, does not apply in the case of the real gardener or florist, who is always ready to receive his fellow-craftsmen in a professional way.

Publicity should be more sought through the horticultural exhibition and flower show. It should be the practise of every florist to grow a few specimens, either in the line in which he is engaged, or a special line that he might take up and bring before the public at such exhibitions. Unfortunately, this missionary work is left to a few florists, while the others do not exert themselves or spend either time or money on such purpose, but still derive direct or indirect benefits from such exhibitions. The public cannot ask for anything which they do not know exists, and it is only through the exhibition they can get acquainted with the different plants and flowers.

Finally, look at your calling as your profession, and not as a trade. Instead of enticing a customer from your competitors, create a new one for yourself. Work in harmony with your competitor and it will make your life more pleasant and your efforts better recognized.

W. A. Manda.

A schedule suggestion

One of the prime attractions at the New York Flower Show this week is the group of great specimen Rambler Roses in bloom, exhibited by M. H. Walsh. Such wonderful examples of this class of roses would create a sensation anywhere in the world and constitute a prime drawing card for visitors. It is unfortunate, however, that the only class in the schedule offering a prize approaching in value the merits of such an important exhibit is that for group "arranged for effect." Competition between a group of specimens of this character and a display of smaller plants massed for color effect and general arrangement is hardly fair to either of the exhibitors or to the judges, there being so little in common to the two entries excepting their worthiness for the largest possible prize. The expense of transportation of these plants to and fro would practically eat up the largest premium offered. Another year perhaps the schedule committee will give further consideration to this matter. The absence of Mr. Walsh's roses from the show would have left a big gap.

The benefit of travel

Our list of visitors present in New York this week, attracted there by the Flower Show, while very incomplete, is a very good example of the class of people in the profession who can be depended upon to show up when any event of sufficient magnitude is in progress within a few hundred or more miles. The same names will appear again among the attendants at the S. A. F. Convention in Boston next August. It is to be noted that these men, although they spend money and time most freely in attending these exhibitions and society affairs, are never impoverished and, taken on an average, will size up respectably as against those who stay at home, often on the plea that they cannot afford to go to such gatherings. It might be well for these latter to give some thought as to whether there is not some relationship of cause and effect in the social prominence and business repute most of these untiring conventionites enjoy. There are, unquestionably, some exceptions on both sides but it is a sound proposition that the man who travels and comes in frequent contact with his fellow craftsman stands to beat out his neighbor who elects to "flock by himself" all the time.

Affiliation

Of the various problems which the different national and local organizations find confronting them and calling for some attempt at solution, perhaps the most important and far-reaching is the question of closer alliance between the various isolated local organizations, of which there are now many in all sections of the country. The problem is a many-sided one. The desirability of some method of co-operation or affiliation that will be generally acceptable and practical is not disputed by many but the recent discussions on the topic in some of the leading florists' clubs show very plainly that it will take some time and careful thought yet before anything like a generally satisfactory plan can be worked out in detail. The spirit of affiliation is in the air and so the time is opportune for threshing out something that will hold together. Even if it does fall short of the roseate dreams of some of the enthusiasts, that will be better than a structure hastily reared, fundamentally weak and liable to collapse in the first stormy weather. The S. A. F. Executive Board had a good long tussle with the subject and the report of their deliberations will be eagerly looked for.

NEW YORK

GRAND SPRING FLOWER SHOW

A splendid exhibition, running smoothly all through this week with excellent promise of financial success. Descriptive notes, list of awards, and list of exhibitors in trade section.

The big New York exhibition is drawing towards its close as we go to press. Thus far it has been a great success and there is every reason to expect that when the receipts and disbursements are counted up the balance will be found on the right side.

Nothing but praise and approval has been heard from visitors or exhibitors. The arrangements in every department of the undertaking appear to have been well made, for everything has run smoothly and rarely has an affair so large been carried on with so little friction. The opening found things in a fair condition of readiness, the judges were prompt in getting to work and the results of their decisions were quickly and accurately recorded and disseminated. Of dissatisfaction or protesting there was very little, considering the extent of the show and the high average excellence of the material shown in the many classes.

The exhibitors made a proud record for quality, this feature as well as the general arrangement and placing of the exhibits being distinctly ahead of last year.

The trade exhibits consisted very largely of plants, greenhouse structures and horticultural material, few florist supply houses being represented as compared with the S. A. F. trade shows and artificial stuff being conspicuously absent.

The retail florists got in this time "with both feet" and, as was to be expected, they got the lion's share of attention by the visitors, especially the ladies, and their booths were constantly crowded with curious or admiring throngs. On the special cut-flower days, however, the flower exhibits on the mezzanine floor became the great centre of attraction, the roses particularly getting an ovation. The staging of the cut roses on the mezzanine floor made that section the mecca for an enthusiastic multitude on Monday afternoon. Never has a finer display of greenhouse-grown roses been made. Hadley was the reigning sensation, but she was closely pressed for premier position by a vase of magnificent specimens of the wonderful Killarney Brilliant. The Hubbard medal was not awarded. It was felt that such an award should not be hastily bestowed and it has been arranged that the executive committee of the American Rose Society shall prepare a list of varieties qualified to compete and devise a plan whereby the awarding of this important trophy may be wisely safeguarded.

Perhaps the most unique sensation from the gardeners' point of view was the big group of Griffin's new Gloriosas, exhibited by Julius Roehrs Co. It was an unprecedented display of these charming subjects. While on the subject of Roehrs' exhibits we might say that the almost limitless

F. R. PIERSON

Chairman Flower Show Committee.

facilities of this eminent house have never been more convincingly demonstrated. If the founder of the firm could have come back to life again and seen the magnificent groups of orchids, stove plants, azaleas and other things bearing his name on the prize cards his delight would have been unbounded.

The bulbous displays were very extensive and made a brilliant spectacle on the mezanine floor. Their omission from the main floor detracted somewhat from the general color brightness here as compared with last year, but otherwise the change was a decided improvement. The Darwin tulips were a novelty in forced bulb exhibiting and came in for much attention. The beautiful soft pale pink Psyche was especially admired.

The orchid entries were numerous and extensive, many rare and beautiful novelties being shown by nearly a score of exhibitors. Thos. Roland's acacia group was not as extensive as the one he staged last year, but it was still beyond all possibility of rivalry. A part of the group had been shown in Boston the previous week, but all were still in perfect condition. Mr. Roland won first in every entry he made.

Massed color effect on the main floor was well-carried by the rhododendrons, lilacs and azaleas. The new French hydrangeas were shown in large numbers and fine finish by several exhibitors and came in for much admiration by the public. These and the massed cyclamen and schizanthus groups added greatly to the effectiveness of the spectacle.

THE FERNS.

Ferns certainly made a new record on this occasion. F. R. Pierson Company's great display of Nephrolepis varieties has never been equalled for number and perfection of specimens. W. A. Manda had also a great group, the crowning feature of which was Polypodium Mandaianum. Julius Roehrs' Company's Polypodium glaucophyllum crispum was a decided novelty, shown for the first time and well worthy of the special award given to it. A. N. Pierson had Adiantum Farleyense in scores of well-grown specimens. F. R. Pierson's Nephrolepis group contained no less than 33 distinct varieties.

THE ROSE PLANTS.

The rose plant entries made a magnificent show of color in which M. H. Walsh and A. Schultheis predominated. Walsh's wonderful Ramblers have never been displayed in finer form or to greater advantage. There were about thirty of these great trained specimens, from 5 to 7 feet tall and 3 to 4 feet through. Among the varieties undisseminated or of recent in-

troduction were several polyantha seedlings—one very distinct with unusually large flowers, medium pink with white base to the petals; another with medium-sized flowers, with rich glossy foliage; Regina, a pale salmon pink with waved petals, Mr. Walsh regards as the gem of the collection. These plants were all in tubs 20-22 inches in diameter. Mrs. M. H. Walsh is a porcelain white, with more petals and larger blooms than White Dorothy.

THE ORCHIDS.

The orchid displays were not only very extensive, but they were also very rich in novelties. Among the Julius Roehrs' collection we noticed such gems as Cymbidium×Pauwelsii and C.×Sanderianum; Odontioda Bradshawie O. Charlesworthi and O. Thwaitesse; Cypripedium×Maudiae variety non plus ultra; Laelio-Cattleya Dominiana; Odontoglossum×Eximium, O.× Jasper; O.×Ardentissimum; O.×Queen of Gaton. E. B. Dane showed a beautiful plant of Odontioda Bradshawae. Clement Moore had many fine things, such as the pure white Laelio-Cattleya Digbyana Imperative Derussie. The arrangement of colors in his exhibit was exquisite.

THE ROSES.

The rose men descended upon New York on Monday morning and were soon in possession of a goodly section of the mezzanine floor at the exhibition hall. Secretary Hammond established his headquarters nearby and all was hustle and bustle as the thousands of big luscious roses, some of them as tall as the men who carried them, were unpacked and gradually found their places in the long rows of vases in the enclosure set apart for their reception.

Competition was close and the judges' task was far from easy. Of American Beauty, there were but three entries in the class for vases of 100 but they were all very fine. The sensation of the show was the glorious crimson Hadley, raised by Montgomery Co. and shown by A. N. Pierson. It won the society's gold medal as the best new rose not yet disseminated, American or foreign, also the May prize for best 25 of any undisseminated variety. It was close pressed for premier position, however, by a vase of superb blooms of Killarney Brilliant from Robert Scott & Son, as the premium list shows. My Maryland and Mrs. Taft showed their fine staying qualities by opening up to perfection on the second day. Poor Bride and Bridesmaid are practically exterminated as forcing roses, not a bloom of either being shown. There were a few Bonsilene still. Sunburst made a fine appearance. Radiance proved worthy of its bright name and Killarney Queen was in every feature a queen. Manda's Cherokee found many sentimental worshipers. Mignon made a poor impression shown in sprays, ragged and straggly; a pretty little thing but at a disadvantage used in this way.

THE RETAILERS.

Not many of the New York retailers made their appearance as exhibitors, but those who did enter made very elaborate displays. Max Schling had a very extensive space in garden form which he termed The Garden of Flora. Baskets and jardinieres and other plant and flower design work were shown in great variety also a dinner table decoration and a Japanese garden of great merit, together with garden statuary, the whole electrically illumined. George Stumpp also had a very extensive display about 50 ft. front. The central feature of this booth was the unique illumined show case, which appears in the acompanying illustration. The front was a sheet of plate glass about ten feet square framed in cypress. Underneath was a compartment filled with ice and the shower bouquet and other floral work looked beautiful against the dark green velvet drapings of the interior.

Charles A. Dards' booth was finished in front with birch bark and showed a large variety of floral baskets tastefully arranged and displayed on a background of velvet flanked with stately palms. Alfred T. Bunyard also had a tasteful booth the background being a large mirror framed in foliage and flowering plants.

JAPANESE GARDEN.

The Japanese Garden by George E. M. Stumpp was a centre of interest constantly, visitors standing at the railing which surrounded it and intently studying its details from all sides. The exhibit was about 16 ft. square and presented in miniature a characteristic Japanese landscape comprising between thirty and forthy distinct gardens with plantings, structures of various kinds, bridges, brooks and ponds, etc. The water was constantly running through the gardens, being pumped by a miniature electric pump concealed underneath. It is stated that Mr. Stumpp was engaged for months on this exhibit and the truth of this is evident to anyone seeing it, for it is a marvel of ingenuity and patience.

SOCIETY HEADQUARTERS.

One of the most interesting and evidently best appreciated features was the spacious lattice-enclosed headquarters of the Horticultural Society of New York. It was elaborately adorned with plants and flowers and rich furnishings inside, and with a flower bed along the front of the enclosure. Here Mr. F. R. Newbold and other active officials held a continual reception, and ladies visiting the show found an excellent place to sit down and rest. Many new members were thus acquired for the society.

BANQUET TO JUDGES

The judges and a number of others including members of the horticultural press were invited to an informal dinner at the Vanderbilt Hotel, on Saturday evening. F. R. Pierson, chairman of the flower show committee and C. H. Totty sat at the head of the table. No speeches were made, which was quite a relief for once and every one was permitted to enjoy himself in his own way, to the accompaniment of delightful music and among rare and beautiful surroundings, this being one of the most recent additions to New York's swell hotels. There were about fifty in the party, representing widely separated sections of the country, all happy in the consiousness of a difficult duty having been zealously performed and with no fear of the consequences.

BROOKLYN DAY.

Tuesday was "Brooklyn Day" at the show. The Borough officials were the guests of the Brooklyn committee, which comprised in its membership most of the leading Brooklyn florists under the chairmanship of A. L. Miller. Brooklyn was irrespressible on Tuesday evening and it wasn't the fault of her florists if anybody escaped unconvinced of Brooklyn's prominence on the map.

GARDENERS' REUNION.

The gardeners' reunion on Tuesday afternoon and evening, March 24, was a great success. We beg the indulgence of our readers this week and hope to have an interesting story of this jovial event for our next issue.

THE AWARDS.

Following is the list of awards, regular and special, as reported up to the the evening of Wednesday, March 25. Important classes are in reserve for the closing days of the week and we shall make full report on these in our next issue.

SECTION A.

Plants in Flower—Private Growers.

Acacia, 3 plants, 1st, Berton H. and Howard Bowdon, Oceanic, N. J., gard. Percy E. Hicks.

Acacia specimen, 1st, Mrs. F. A. Constable, Mamaroneck, N. Y., gard. James Stuart.

Amaryllis, 25 plants, 25 varieties, 1st, Mrs. D. Willis James, Madison, N. J., gard. Wm. Duckham

Amaryllis, 12 plants, 12 varieties, 1st, Mrs. D. Willis James.

Anthurium specimen, 1st, Mrs. B. B. Tuttle, Naugatuck, Ct., 2d, Mrs. J. H. Wright.

Begonia, 6 plants, 1st W. B. Thompson, Yonkers, N. Y.

Cineraria hybrids, 6 plants, 1st, C. K. G. Billings, Fort Washington Ave., gard. James Bell; 2d, Thomas Aitchison, Mamaroneck.

Cineraria stellata, 6 plants, 1st, W. B. Thompson; 2d, Benjamin Stern, Roslyn.

Cineraria, specimen, 1st, W. B. Thompson; 2d, H. L. Pratt, Glen Cove.

Cyclamen, 25 plants, 1st, A. Lewisohn, gard. James B. Canning; 2d, Mrs. F. A. Constable, Mamaroneck.

Cyclamen, 12 plants, 1st, Percy Chubb, Glen Cove, gard F. Honeyman.

Chorizema, specimen, 1st, Mrs. F. A. Constable.

Genista, specimen, 1st, Miss Blanche Potter, Ossining, gard. George Witinger.

Hydrangea, 6 plants, 1st, Wm. Ziegler, Jr., Noroton, Ct., gard. A. Bieschke; 2d, John Wanamaker, Wyncote, Pa., gard. John H. Dodds.

Hydrangea, specimen, 1st, Wm. Ziegler, Jr.; 2d, John Wanamaker.

Imantophyllum, 3 plants, 1st, John Wanamaker; 2d, P. M. Warburg, Scarsdale, N. Y., gard. F. C. Luckenbacker.

Lilac, 12 plants, 1st, John Wanamaker; 2d, P. M. Warburg

Marguerite, specimen, 2d, Mrs. J. B. Trevor, Yonkers, N. Y.; gard. Howard Nichols.

Primula, 12 plants, 1st, Percy Chubb.

Primula, 6 plants, 1st, Percy Chubb.

Primula obconica, 12 plants, 1st, Percy Chubb, Glen Cove; 2d, John Wanamaker

Rhododendron, 3 plants, 3 varieties, 1st, W. B. Thompson.

Schizanthus, 6 plants, 1st, W. B. Thompson; 2d, A. Lewisohn.

Schizanthus, specimen, 1st, C. K. G. Billings; 2d, A. Lewisohn.

Flowering plants, any variety; 1st, F. E. Lewis, Ridgefield, Ct., gard. Jas. Ballantyne; 2d, W. B. Thompson.

Flowering and foliage, stove and gr en-

house, plants, arranged for effect, 100 sq. ft., 1st, W. B. Thompson.

SECTION B.

Plants in Flower—Commercial Growers.

Acacia, collection, 200 sq. ft., 1st, Thomas Roland, Nahant, Mass.

Acacia, 6 plants, 1st, Thomas Roland; 2d, Julius Roehrs Co., Rutherford, N. J.

Acacia, 3 plants, 1st, Thomas Roland; 2d, Julius Roehrs Co.; 3d, Knight & Struck Co.

Acacia, specimen, 1st, Thomas Roland; 2d, Julius Roehrs Co.

Azalea Indica, 100 sq. ft., 1st, Julius Roehrs Co.

Azalea Indica, 12 plants, not less than 6 varieties, 1st, Julius Roehrs Co.

Azalea Indica, 6 plants, 1st, Julius Roehrs Co.; 2d, A. N. Pierson, Cromwell Ct.

Bougainvillea, 6 plants, 1st, L. Dupuy, Whitestone, L. I.

Cyclamen, 25 plants, 2d, Julius Roehrs Co

Erica, Epacris and Boronia, 1st, Knight & Struck Co.

Erica, 6 plants, 1st, Thomas Roland; 2d, Knight & Struck Co.; 3d, Louis Dupuy.

Hydrangeas, 150 sq. ft., Silver cup, Julius Roehrs Co.; 2d, Louis Dupuy.

Hydrangea, 6 plants, 1st, Dryer Bros., Whitestone, N. Y.; 2d, Louis Dupuy.

Lilac, 12 plants, Julius Roehrs Co.

Marguerite, 6 plants, 1st, Madsen & Christenson, Woodridge, N. J.

Marguerite, specimen, 1st, Madsen & Christenson.

Rhododendron, 12 plants, 1st, A. N. Pierson; 2d, F. R. Pierson Co., Tarrytown, N. Y.

Rhododendron, 6 plants, silver cup, F. R. Pierson Co.

Rhododendron, 3 plants, 1st, F. R. Pierson Co.

Flowering and foliage, stove and greenhouse plants, silver cup, Julius Roehrs Co.; 2d, Bobbink & Atkins, Rutherford, N. J.

Forced shrubs, herbaceous plants, arranged for effect, 1st, Bobbink & Atkins.

SECTION C.

Palms and Foliage Plants—Private Growers.

Croton, 12 plants, 12 vars., 1st, W. B. Thompson.

Croton, specimen, 1st, Mrs. J. B. Trevor.

Dracaena, 6 plants, 1st, John Wanamaker.

Dracaena, specimen, 1st, John Wanamaker.

Kentia Forsteriana, 1st, Mrs. F. A. Constable.

Kentia Belmoreana, 1st, Mrs. J. Hood, Wright, New York, gard. Chas. Webber.

Phoenix Roebelenii, 2 plants, 1st, B. Stern.

Phoenix rupicola, 1st, Mrs. J. Hood Wright.

Palm, specimen, 1st, Mrs. M. Cockcroft, Naugatuck, Ct., gard. A. Paterson; 2d, John Wanamaker.

Six foliage plants, exclusive of palms, 1st, Mrs. D. Willis James; 2d, W. B. Thompson.

Specimen foliage plant, 1st, John Wanamaker; 2d, Wm. H. Fisher, New Canaan, Ct.

SECTION D.

Palms and Foliage Plants—Commercial Growers.

Areca lutescens, specimen, 2d. W. A. Manda, South Orange, N. J.

Cocos Australis, 1st, W. A. Manda.

Cocos plumosus, 1st, Julius Roehrs Co.; 2d, Exotic Nurseries, Secaucus, N. J.; 3d, W. A. Manda.

Dracaena, 12 plants, 1st, W. A. Manda; 2d, Julius Roehrs Co.; 3d, Bobbink & Atkins.

Dracaena, specimen, any variety, 1st, Julius Roehrs Co.; 2d, W. A. Manda.

Ficus pandurata, 1st, W. A. Manda; 2d, Bobbink & Atkins.

Kentia Belmoreana, 1st, Bobbink & Atkins; 2d, W. A. Manda.

Kentia Forsteriana, 1st, Julius Roehrs Co.; 2d, W. A. Manda.

Phoenix Roebelinii, 2 plants, 1st, Exotic Nursery; 2d, Julius Roehrs Co.

Phoenix rupicola, 1st, W. A. Manda.

Phoenix, any other variety, 1st, Julius Roehrs Co.

Palms, other than above, 12 plants, 12 varieties, 1st, W. A. Manda; 2d ,Julius Roehrs Co.

Palm, specimen, 1st, Julius Roehrs Co.; 2d, W. A. Manda.

Flower Showcase in Booth of George M. Stumpp.

Stove and greenhouse plants, 6 plants, 1st, W. A. Manda; 2d, Julius Roehrs Co.

Yew trees, 6 trained plants, 1st Bobbink & Atkins.

Miscellaneous Plants—Commercial Growers.

Bay trees, 2 plants, pyramidal, 1st, Julius Roehrs Co.; 2d, Bobbink & Atkins.

Bay trees, 2 plants, standard, 1st, Julius Roehrs Co.; 2d, Bobbink & Atkins Co.

Bay trees, 2 plants, columnar, 1st, Bobbink & Atkins; 2d, Exotic Nursery.

Box trees, 2 plants, pyramidal, 1st, Bobbink & Atkins; 2d, Julius Roehrs Co.

Box trees, 2 plants, standard, 1st, Exotic Nursery; 2d, Bobbink & Atkins.

Box trees, 2 plants, bush, 1st, Bobbink & Atkins; 2d, Julius Roehrs Co.

Box trees, 6 trained plants, 1st, Bobbink & Atkins.

Conifers, 25 plants, 25 varieties, 1st, Bobbink & Atkins, 2d F. R. Pierson Co.

Japanese maples, 6 plants, 1st, Thomas Meehan's Sons, Germantown, Pa.

SECTION F.

Ferns—Private Growers.

Adiantum cuneatum, specimen, 1st, W. B. Thompson.

Adiantum, any other variety, 1st, Mrs. D. Willis James; 2d, B. Stern.

Cibotium Scheidii. 1st, John Wanamaker; 2d, H. W. Boettgers Estate, Riverdale-on-Hudson, gard. Rudolph Heiderkamp.

Goniophlebium subauriculatum, 1st, Mrs. J. B. Trevor; 2d, Mrs. J. Hood Wright.

Fern, any other variety, 1st, B. Stern; 2d, W. B. Thompson.

Selaginella, specimen plant, any variety, 1st, B. Stern.

SECTION G.

Ferns—Commercial Growers.

Cibotium Scheidii, 1st, W. A. Manda.

Ferns, 12 plants, 12 varieties, 1st, W. A. Manda.

Nephrolepis exaltata Bostoniensis, 1st, Louis Dupuy; 2d, F. R. Pierson Co.

Nephrolepis, any other variety, 1st, F. R. Pierson Co.; 2d, Dreyer Bros.

Collection of Nephrolepis, silver cup, F. R. Pierson Co.; 2d, W. A. Manda.

Stag's Horn Fern, 3 plants, 1st, W. A. Manda; 2d, Julius Roehrs Co.

Tree Fern, 1st, W. A. Manda.

Fern, specimen, any other variety, 1st, Julius Roehrs Co.; 2d, A. N. Pierson.

SECTION H.

Bulbous Plants—Private Growers.

Hyacinths, 3 10-inch pans, white, 1st, C. K. G. Billings; 2d, Mrs. D. Willis James.

Hyacinths, pink or red, 1st, Mrs. D. Willis James; 2d, John T. Pratt.

Hyacinths, light blue, 1st, C. K. G. Billings; 2d, Mrs. D. Willis James.

Hyacinths, dark blue, 1st, Mrs. D. Willis James; 2d, John T. Pratt.

Lilies, 12 pots, 1st, W. B. Thompson.

Lily of the Valley, 3 10-inch pans, 1st, Henry Gould, Port Washington, gard. Wm. Vert; 2d, C. K. G. Billings.

Narcissus, short or medium trumpet, 6 10-inch pans, 1st, John T. Pratt; 2d, E. Fardel, Booth Estate, Great Neck.

Narcissus, Glory of Leiden, 1st, E. Fardell; 2d, John T. Pratt.

Narcissus, Bicolor or Victoria, 1st, C. K. G. Billings; 2d, John T. Pratt.

Narcissus Empress, 1st, John T. Pratt; 2d, C. K. G. Billings.

Narcissus Emperor, 1st, John T. Pratt; 2d, James A. MacDonald, Flushing, gard. R. Hughes.

Narcissus Golden Spur, 1st, H. L. Pratt, Glen Cove, gard. Henry Gaut; 2d, C. K. G. Billings.

Narcissus Double Von Sion, 1st, H. L. Pratt; 2d, E. Fardel.

Tulips, Early Single, 12 10-inch pans, 1st, E. Fardel.

Tulips, Early Single, 6 10-inch pans, 1st, E. Fardel.
Tulips, Darwin, 12 10-inch pans, 1st, James A. MacDonald; 2d, H. L. Pratt.
Bulbs, arranged for effect, 1st, E. Fardel.
Bulbs, arranged for effect with foliage plants, 1st, Mrs. D. Willis James.

SECTION I.

Bulbous Plants—Commercial Growers.

Lilies, 25 pots, 1st, Louis Dupuy; 2d, John Meisem, Elmhurst.
Lilies, 50 pots, 1st, Louis Dupuy; 2d, John Meisem.
Lily of the Valley, 20 10-inch pans, 1st, Wm. H. Siebrecht, Astoria, N. Y.; 2d, Julius Roehrs Co.
Narcissus, 20 10-inch pans, 1st, Anton Schultheis, College Point, N. Y.
Tulips, early single, 1st, Anton Schultheis.
Tulips, double, 1st, Anton Schultheis.
Miscellaneous bulbs, collection, Silver cup, Anton Schultheis.

SECTION J.

Orchid Plants—Private Growers.

Collection arranged for effect, 1st, Clement Moore, Hackensack, N. J., gard. J. P. Mossman.
Three plants, 1st, Clement Moore.
Brasso-Cattleya or Brasso-Laelia, 1st, Clement Moore.
Cattleya Schroederae, 1st, Clement Moore.
Cattleya, specimen, 1st, Clement Moore.
Dendrobium, 6 plants, 1st, Clement Moore.
Dendrobium Wardianum, 1st, Miss M. L. Cockcroft; 2d, F. V. Burton, Newburgh, gard. W. Cordes.
Dendrobium, any other variety, 1st, Mrs F. A. Constable.
Cattleya, Laelia or Laelio-Cattleya hybrid, 1st, Clement Moore.
Odontoglossum, 1st, Arthur N. Cooley, Pittsfield, Mass.
Vanda, any variety, 1st, Albert J. Manda, West Orange, N. J.
Specimen plant, any other variety, 1st, A. N. Cooley; 2d, Duncan Finlayson, Brookline, Mass.

SECTION K.

Orchid Plants—Commercial Growers.

Collection, 100 plants in variety, arranged for effect, $250, 1st, Julius Roehrs Co.; 2d, W. A. Manda.
Twelve plants, Silver cup, 1st, W. A. Manda; 2d, Julius Roehrs Co.
Six plants, 1st, Julius Roehrs Co.; 2d, W. A. Manda.
Brasso-Cattleya or Brasso-Laelia, 1st, Julius Roehrs Co.; 2d, W. A. Manda.
Cattleya Schroederae, 1st, Julius Roehrs Co.; 2d, W. A. Manda.
Cattleya, specimen, 1st, Julius Roehrs Co.; 2d, Lager & Hurrell, Summit, N. J.
Cypripedium, 25 plants, 1st, Julius Roehrs Co.; 2d, W. A. Manda.
Cypripedium, specimen, 1st, Julius Roehrs Co.; 2d, W. A. Manda.
Dendrobium, 12 plants, 1st, Julius Roehrs Co.; 2d, Lager & Hurrell.
Dendrobium nobile, 1st, Lager & Hurrell.
Dendrobium Wardianum, 1st, W. A. Manda, Inc.
Dendrobium, any other variety, 1st, Lager & Hurrell; 2d, W. A. Manda.
Cattleya, Laelia, or Laelio-Cattleya Hybrid, 1st, Julius Roehrs Co.; 2d, W. A. Manda.
Odontoglossum, any variety, 1st, Julius Roehrs Co.; 2d, W. A. Manda, Inc.
Oncidium, any variety, 1st, W. A. Manda, Inc.; 2d, Julius Roehrs Co.
Phalaenopsis, any variety, 1st, Julius Roehrs Co.; 2d W. A. Manda
Vanda, specimen, any variety, 1st, W. A. Manda.

SECTION L.

Orchids Cut—Private Growers.

25 vases arranged for effect, Silver cup, Clement Moore.
Cattleya, 1st, Wm. Ziegler, Jr.; 2d, H. W. Boettgers Estate.
Laelia, 1st, Arthur N. Cooley.
Laelio-Cattleya or hybrid Cattleya, 1st, Clement Moore; 2d, Arthur N. Cooley.
Dendrobium, 1st, C. E. Chapman, Oakland, gard. Frank Black.
Odontoglossum, 1st, C. E. Chapman; 2d, Arthur N. Cooley.
Phalaenopsis, 1st, Arthur N. Cooley; 2d, Mrs. B. B. Tuttle, gard. M. J. Pope.
Vanda, 1st, Arthur N. Cooley.
Any other orchid, 1st, Clement Moore; 2d, B. Stern.

THE H. H. CHARLES CUP.

For Collection of Bulbous Flowering Plants. Won by Anton Schultheis.

SECTION M.

Orchids Cut—Commercial Growers.

Display arranged for effect, 1st, Joseph A. Manda, W. Orange, N. J.
Vase of cut orchids, 1st, Max Schling, New York City; 2d, Julius Roehrs Co.
Cattleya, 1st, W. A. Manda; 2d, Julius Roehrs Co.
Laelia, 1st, Julius Roehrs Co.
Laelio-Cattleya or Hybrid Cattleya, 1st, Julius Roehrs Co.
Odontoglossum, 1st, Julius Roehrs Co.
Phalaenopsis, 1st, W. A. Manda; 2d, Julius Roehrs Co.
Vanda, any variety, 1st, W. A. Manda.
Any other Orchid, 1st, W. A. Manda; 2d, Julius Roehrs Co.

SECTION N.

Roses in Pots and Tubs—Private Growers.

Display in pots or tubs, 100 sq. ft., 1st, Miss S. B. Fay, Woods Hole, Mass.
Collection hybrid perpetuals, 25 plants, 1st, Thos. Aitchison, Mamaroneck, N. Y.
Six climbing, 1st, Miss S. B. Fay.
Crimson Rambler, specimen, 1st, John Wanamaker.
Lady Gay, 1st, Miss S. B. Fay.
Tausendschoen, 1st, John Wanamaker.
Hiawatha, 1st, Miss S. B. Fay.
Climbing, any other variety, 1st, Miss S. B. Fay.

SECTION O.

Roses in Pots and Tubs—Commercial Growers.

Display in pots or tubs, arranged for effect, to occupy 300 sq. ft., $250, 1st, Anton Schultheis, College Point, N. Y.; 2d, H. C. Steinhoff, West Hoboken, N. J.
Twelve climbing, 1st, Anton Schultheis.
Crimson Rambler, 1st, Anton Schultheis.
Dorothy Perkins, 1st, Anton Schultheis.
Tausendschoen, 1st, Louis Dupuy.
Hiawatha, specimen, 1st, M. H. Walsh, Woods Hole, Mass.
Climbing, any other variety, 1st, Louis Dupuy; 2d, M. H. Walsh.
Collection, 25 plants, arranged for effect, 1st, Anton Schultheis; 2d, H. C. Steinhoff.
Six trained specimens of Hybrid Wichuraiana or Rambler roses, 1st, M. H. Walsh.
Display of hardy outdoor roses in pots, silver medal to Anton Schultheis; bronze medal to H. C. Steinhoff.
Pest rambler or climbing rose of American origin, 1st, M. H. Walsh.

SECTION P.

Cut Roses—Private Growers.

12 American Beauty, 1st, James B. Duke, Somerville, N. J.
12 Milady, 1st, Mrs. F. A. Constable.
12 Mrs. George Shawyer, 1st, P. B. Weidner, Ogontz, Pa.; 2d, H. W. Boettgers.
12 Mrs. Charles Russell, 1st, Mrs. M. K. Jessup, Lenox, Mass.; 2d, Mrs. F. A. Constable.
12 White Killarney, 1st, James B. Duke.
12 Richmond, 1st, P. B. Weidner.
12 Radiance, 1st, M. K. Jessup.
12 Lady Hillingdon, 1st, P. B. Weidner.
12 Sunburst, 1st, Mrs. F. A. Constable.
12 My Maryland, 1st, John Wanamaker.
12 any other disseminated variety, white, 1st, P. B. Weidner; do. pink, 1st, P. B. Weidner; do. red, 1st, P. B. Weidner.
25 roses in one vase, 1st, P. B. Weidner.

SECTION Q.

Cut Roses—Commercial Growers.

100 American Beauty, 1st, L. A. Noe, Madison, N. J.; 2d, Myers & Samtman.

Chestnut Hill, Pa.; 3d, Brant & Hentz, Madison, N. J.

50 American Beauty, 1st, L. A. Noe; 2d, Gude Bros., Washington, D. C.

50 Mrs. Charles Russell, 1st, Aug. Doemling, Lansdowne, Pa.

The Silver Medal Sweepstakes in Section R was won by Cottage Gardens Co., with Carnation Matchless, and the bronze medal by Cottage Gardens Co. with Mrs. C. W. Ward.

THE TRADE DISPLAYS.

The largest booth in the trade section was that of A. N. Pierson. Here all the plant and flower specialties of this enterprising concern were displayed in large numbers and there was a big crowd in and around the booth constantly. It was one of the busiest places in the hall.

The leading seed houses had trade booths of greater or less extent, some of them being fitted up elaborately with brilliant masses of spring flowering bulbs, and a good business was done by all in orders for bulbs, lawn seeds and garden sundries.

The fertilizer and insecticide houses made a strong showing and had no trouble in getting the attention of the visiting public.

Following is a list of the various firms having either booths with displays of more or less extent or with desk space. A good business was reported by all:

Alphano Humus Co., New York, samples of their product, with illustrations showing results from the use of same.

Revere Rubber Co., display of Revere Hose.

Reed & Keller, a very extensive display of florists' vases, baskets and designs all in silver finish.

Stumpp & Walter Co., large display of Spring flowering bulbs, etc., and various lawn grasses sprouted in pans, all labeled.

Peters & Reed Pottery Co., pottery, mission finish.

New York Stable Manure Co., samples of their specialty.

John Lewis Childs, Summer flowering bulbs and fine group of Calla Elliottiana.

Bon Arbor Chemical Co., samples of their products.

Russin & Hanfling, florists' baskets.

Fred. A. Stokes Co., books and framed illustrations.

Gardencraft Toy Co., garden specialties for children.

S. S. Pennock-Meehan Co., Philadelphia, a beautiful array of ribbons and baskets.

E. A. Lippman, greenhouse shading.

Benj. Hammond, Fishkill, samples of his products.

Plantlife Company, samples of "Plant Life."

Miller & Doing, Brooklyn, Illinois self-watering flower boxes.

Consumers' Fertilizer Co., New York, a large booth with display of Mak-Gro Plant Food.

B. Hammond Tracy, gladiolus bulbs.

A. Cowee, gladiolus bulbs.

Schloss Bros., an elaborate exhibit of florists' ribbons.

Coldwell Lawn Mower Co., Newburgh, a large exhibit of motor mowers in various models.

Joseph Heacock Co., Wyncote, Pa., splendid Kentias and Cybotiums.

R. M. Ward & Co., illustrations of Japan lily fields and pertinent subjects.

Kroeschell Bros. Co., Chicago, Kroeschell boilers.

Charles H. Totty, Madison, N. J., samples of Shawyer Roses and other specialties.

R. J. Irwin Co., trade plant samples.

Julius Roehrs Co., Rutherford, N. J., extensive collection of greenhouse plants.

J. M. Thorburn & Co., extensive show of flowering plants and bulbs.

International Nurseries, sample conifers.

Joseph Breck & Sons Corp., Boston, Huebner's Champion Winter-Flowering Antirrhinum.

Hitchings & Co., greenhouse fully equipped with slate and iron benches; sectional boiler.

Pierson U-Bar Co., complete greenhouse, the benches filled with flowering plants and the booth enclosed with hedge and garden border.

Lord & Burnham Co., complete greenhouse, benches and heating appliance.

Metropolitan Material Co., Brooklyn, section of greenhouse and iron gutters.

Lager & Hurrell, a very tasteful and original display of Orchids.

F. R. Pierson Co., Tarrytown, N. Y., collection of specimen conifers, Killarney Queen roses, Nephrolepis, etc.

W. A. Manda, So. Orange, N. J., specimen conifers and decorative plants.

Haerens Co., new azalea, Pink Pearl.

Thos. Meehan & Sons, pergola booth with little conifers.

Knight & Struck, beautiful collection of New Holland plants, Cape Heaths, etc.

Hontsch & Co., greenhouse boiler.

Gt. Van Waveren & Krayff, illustrations of their products.

Carnation Supply Co., models of carnation supports.

Bobbink & Atkins, Rutherford, N. J., tubs and rustic furniture. Very extensive collection of bays and trained buxus specimens.

Empire Specialty Co., flower holders.

J. L. Dillon, young roses.

Doubleday, Page & Co., samples of their publication.

A. T. De La Mare Co., samples of their publications.

Horticulture Publishing Co., samples of Horticulture.

Stuyvesant Co., samples of their publications.

Kennedy & Hunter, W. E. Marshall & Co., Wertheimer Bros. and others, desk space.

PHILADELPHIA SPRING SHOW.

The main hall was well filled with a good collection of spring flowers, mostly hyacinths, tulips and daffodils. All the best of the newer varieties were shown in excellent culture, and the competition between the different gardeners was very keen. The principal prize winners were: P. A. B. Widener, gard. Wm. Kleinheinz; Thos. P. Hunter, gard. Joseph Hurley; John W. Pepper, gard. Wm. Robertson; C. B. Newbold, gard. Samuel Batchelor; George H. McFadden, gard. David Aiken.

The center of the hall was well set off by two good-sized groups of flowering plants—the Robertson group containing wistaria, azalea, anthurium, genista, Cineraria stellata, hydrangea, acacia and Farquhar rose—all beautifully grown specimen plants. The Kleinheinz group contained genista, Pink Pearl rhododendron, Boronia elatior, Marie Le Graye lilac, Acacia Drummondi and Azalea Indica alba—the latter one of the most striking specimens ever seen, being 5 ft. high and 6 ft. diameter and one mass of bloom.

Other features of the main hall were well-done lots of the newer varieties of pink and white spireas; splendid specimens ever seen, being 5 feet high and 6 feet diameter and one mass of bloom.

Other features of the main hall were well-done lots of the newer varieties of pink and white spireas; splendid lots of Easter lilies and callas; a grand showing of wallflowers from Robertson in all colors and fine big specimens nicely flowered; standard heliotrope, fine pots of Primula obconica and lily of the valley. The front of the stage was, as usual, devoted to offerings for the Dreer prizes, which called for a quite different and very interesting class of plants and proved of fine educative interest. These exhibits covered excellent specimens of such things is Iberis sempervirens, iris of sorts, hardy ferns, spireas, hardy pinks, snowdrops, dielytra, polyanthus, anemone, etc., and a fine showing of hardy roses in pots.

A plant of Amorphophyllus Rivieri, five feet high, was exhibited by Capt. S. R. Vaughan, of West Philadelphia. Dreer had a good display of lawn requisites and a picture gallery of dahlias and gladioli, also spring suggestions. Michell's trade display was confined mostly to lawn mowers and lawn grass. All the premiums were put up by the following well-known seed houses: Hosea Waterer, Henry F. Michell Co., and Henry A. Dreer. The judges were Robert Craig, A. B. Cartledge, Chester Davis and William Graham.

The Lord & Burnham gold watch was awarded to William Robertson for his group of flowering plants.

John H. Dodds sent in a handsome lot of carnations on the second day, not for competition, but to show they were still alive around Lyndhurst. They were extra fine flowers, and proved a great attraction.

VISITORS' REGISTER.

Boston — Wm. Currie, Milwaukee, Wis.

Cincinnati—W. W. Stableton and sister, Manchester, Ohio.

Buffalo — August Poehlmann and George Asmus of Chicago; Sidney Green of H. Bayersdorfer & Co., Philadelphia.

Chicago: A. H. Eddy, Sault Ste. Marie, Mich.; W. E. Blackburn, Evansville, Ind.; Frank Farney, representing Rice Co., Philadelphia; Miss Rennison, Sioux City, Ia.; L. L. Lamborn, Alliance, O.; Geo. W. Smith, Cleveland, O.; Miss Ella Kaber, La Porte, Ind.; H. A. Reichert, Michigan City, Ind.; Herman Schutz, Menominee, Mich.

Philadelphia — F. Cooper, Wellington, New Zealand; John Walker, Youngstown, O.; Edwin A. Seidewitz, Baltimore, Md.; Raymond Kister, Williamsport, Pa.; Charles Loechner, New York City; Antoine Leuthy, Roslindale, Mass.; George Asmus, Chicago, Ill.; M. Henry Lynch, West Grove, Pa.; August Poehlmann, Chicago, Ill.; George H. Cooke, Washington, D. C.; Samuel McClements, Pittsburgh, Pa.; Fred. M. Isenberg, Huntington, Pa.; Mrs. Mary Johnson, Baltimore, Md.

New York—Theodore Wirth, Minneapolis; J. J. Hess, Omaha; John Evans, Richmond, Ind.; A. F. J. Baur, Indianapolis; George Asmus, V. Bergman, Chicago; W. F. Kasting, Mr. and Mrs. W. J. Palmer, J. F. Cowell, Buffalo; Peter Crowe, Utica; P. R. Quinlan, Syracuse; Thos. Tracy, Ed. Tracy, W. C. Gloeckner, Albany; Phil Breitmeyer, Detroit; Mr. and Mrs. J. A. Peterson, Cincinnati; Wm. Falconer, Pittsburgh; George C. Watson, Robt. Craig, Jr., E. A. Stroud, S. S. Skidelsky, Philadelphia; W. F. Gude, Geo. Cooke, F. H. Kramer, J. Henry Small, H. W. Lawton, Washington; E. A. Seidewitz, Baltimore; J. F. Huss, Hartford; G. X. Amrhyn, John Champion, New Haven; G. A. Dennison, San Francisco; J. S. Hay, Providence; F. J. Dolansky, Wm. Miller, Lynn, Mass.; P. Welch, W. J. Collins, F. N. Sanborn, W. J. Stewart, Boston; E. Allan Peirce, Waltham, Mass.; Thomas Roland, Nahant, Mass.; C. S. Strout, Biddeford, Me.; A. E. Thatcher, Ed. Kirk, Wm. Burton, Bar Harbor, Me.; E. J. Norman, A. J. Loveless, Lenox, Mass.; Geo. W. Wyness, Pride's Crossing, Mass.; Wm. Anderson, Lancaster, Mass.; W. H. DeGraaff, Leiden, Holland; D. McKenzie, Chestnut Hill, Mass.; A. McKenzie, Highland Falls, N. Y.; John Eliot, Norfolk, Conn.; C. Warburton, Fall River, Mass.; A. Meikle, Thos. J. Gibson, Newport, R. I.; L. J. Reuter, Mr. and Mrs. S. J. Reuter, Westerly, R. I.; A. N. Pierson, W. R. Pierson, Cromwell, Conn.; M. H. Walsh, Wood's Hole, Mass., Herman Bartsch, Waverley, Mass.; Wm. Nicholson, Wm. R. Nicholson, S. J. Goddard, Framingham, Mass., and many others.

BANQUET TO THE S. A. F. EXECUTIVE BOARD

Just half a hundred of Boston horticulturists and invited guests sat down to a bountiful repast and royal good time at the Parker House, on Thursday evening, March 19. The accompanying picture gives some idea of the scene, except that the vases of flowers with which the table was adorned were temporarily set one side, so that the features of the good-looking gentlemen present might be fully in sight.

After the menu had received due attention, J. K. M. L. Farquhar expressed pleasure on behalf of the Boston fraternity at having a visit from the Executive Board after an interim of 24 years and introduced President Theodore Wirth, as the first speaker. Mr. Wirth got a great and noisy reception. In his kind remarks about Boston he referred affectionately to the work of the late J. A. Pettigrew and appreciatively to the gardeners' share in Boston's horticultural preeminence. He asserted that every one associated with the S. A. F. gets back with compound interest all he ever puts in.

John H. Dillon, the new chairman of the Boston Park Commission was next introduced, W. J. Stewart participating in the introduction with a few remarks on his long association and acquaintance with Mr. Dillon, they having worked together as boys in a flower store many years ago. Mr. Dillon made an eloquent address, declaring his pride in being a gardener and his sincere desire to administer the affairs of Boston's great park system with zeal and efficiency. He gave assurance of his sympathy with the work of the S. A. F., and presented officially the regrets of the Chief Executive of the city in his inability to be present.

Alexander McGregor of the Governor's Council, presented the greetings of the Commonwealth. He had a word of appreciation for the happy occasion and for the optimistic man who keeps on the sunny side of the street. It was an eloquent address and uproariously applauded.

W. F. Kasting spoke for the toast "Our Country." He made a gloriously patriotic speech, paid high compliment to Boston floriculture and said he would always retain sweet memories of his visit..

The contest of oratory was next entered by W. F. Gude, who made an address full of altruistic sentiment and praise of the spirit of organization and united effort and closed with the presentation of resolutions of thanks by the visitors to their Boston hosts, which the visitors adopted with great enthusiasm.

J. J. Hess, presented the compliments of Nebraska and said that the advice "Go West young man" still holds good.

Secretary W. P. Rich of the Mass. Horticultural Society spoke kindly greetings from that body, 83 years of age, yet still young and full of progressiveness, determined to make its future history as great and glorious as its past has been. He said that the S. A. F., will be known more than in the past, after this enthusiastic convention.

W. J. Kennedy responded happily for the Gardeners' and Florists' Club, of which he is president. E. Allan Peirce spoke for the flower markets. J. F. Huss brought a cheery message from Connecticut and spoke diplomatically of the great mission of the florists' clubs. A. E. Thatcher was ready with a good story and a healthy boost for what Maine is going to do for the Convention.

P. Welch the next speaker, was given a grand ovation. His speech was full of wit and constructive suggestion. He was hailed as "The man of the hour." Deputy Park Commissioner, J.

B. Shea, whom everybody loves, was then called upon and was greeted with prolonged applause. He gave a little history of Mr. Pettigrew's great work in tree planting for Boston. He promisted on behalf of his associates and the city authorities that Boston would do her best for the Convention. August Poehlman extended congratulation and felicitation on the promising outlook. George Asmus followed in a similar vein and applauded the flower show as one of the greatest horticultural forces.

Wm. Burton, Ed. Kirk, J. A. Peterson, John Evans and lastly Thomas Roland had a few brief words. Mr. Roland declared that the convention is only a plaything as compared with the great outdoor garden which is planned as an adjunct this year.

MAIL IMPORTATIONS OF PLANTS FORBIDDEN.

An order issued by the Second Assistant Postmaster General, December 16, 1913, prohibits the importation from foreign countries through the mails of all plants and plant products for propagation, including seeds, except field, vegetable, and flower seeds. This prohibition, therefore, applies to bulbs, roots, and tubers, and to all seeds of trees, shrubs, or other plants, except only field, vegetable and flower seeds.

Cotton seed, which would be rated as a field seed, is, however, prohibited entry into the United States from any foreign country except certain States in Mexico, by Quarantine No. 8, and this prohibition, therefore, naturally extends to mail packages as well as to shipments by other carriers. Domestic Quarantine. No. 9 also prohibits the movement of cotton seed from Hawaii to the United States.

Under the order issued by the Second Assistant Postmaster General, nursery stock and other plant products for propagation, except as noted, received in the mails from foreign countries are to be returned from the post office of receipt, as prohibited, to the country and place of origin.

This restricts the carriage of such products from foreign countries to other means, such as by express or freight. Importations by these methods pass through the customs office in the normal way, and are under complete control. Postal sendings are entered under an entirely different system and necessitate examination at any little post office throughout the United States.

It is possible to transmit many injurious insects and plant diseases in lots of plants or seeds sent through the mails, and the inspection of such mail sendings is an impossibility without a vast army of inspectors. It was, further, found necessary to make the restriction very broad, much broader than the original definition of nursery stock, for the reason that foreign shippers, and postmasters as well, were quite unable to make the distinction between nursery stock and herbaceous plants, etc., and the only safe course was to exclude all plants from mail sendings with the exception of the seeds noted, which are deemed to carry comparatively little danger of introducing insect pests or diseases.

C. L. Marlatt, Chairman,
Federal Horticultural Board.

GROWING SWEET PEAS

A Paper by Howard Nichols of Yonkers, N. Y., before the Yonkers Horticultural Society.

The Lathyrus is divided into two classes—the annual and the perennial. The latter, which is seldom seen in this part of the country, is used to cover a trellis or pergola. It is very easily grown and may be propagated from cuttings taken in the autumn. There are many varieties of perennials, and some have from six to twelve flowers on one stem. The flowers grow close together and the stems are inclined to be short. The flowers lack good color, and for this reason, it has never become a prominent flower.

The annual sweet pea is becoming very popular, both under glass and out of doors, and great advancement has been made in the past few years as to length of stem and size of flowers.

There are many out door varieties and so easily grown that they are found in almost every garden. The writer knows of no other flower where brighter colors are produced.

The sweet pea originated in Sicily and was sent to England over two hundred years ago. Very little was done to improve its size, until 1870, when Henry Eckford took up the work. In 1877, Thomas Laxton engaged in improving on the sweet pea, and was quite successful. W. Atlee Burpee was about the first extensive grower in America, and one who produced some very fine exhibition novelties. At the present time, most of our sweet pea seeds are grown in this country.

A few years ago, the well-known variety "Countess Spencer" and its sport "Helen Lewis" were put on the market. From that time, the Spencers flourished and are now considered the best varieties we have. Since the Sweet Pea Society of America was organized, great enthusiasm has been shown among the sweet pea growers in this country.

Sweet Peas Under Glass.

The first and most important requisite when growing these flowers under glass, is to secure a light and airy house, as good results can only be obtained where there is light, air and sunshine. They may be grown either in pots, boxes or benches, but do best when planted in the ground, with a border such as is used in a vinery, made with a drainage of brick and stone, six or eight inches deep, and filled in with about eighteen inches of loam, using plenty of cow manure and ground bone. Sow seed in rows running north and south, so the sun can shine from both sides. They will do best in a cool temperature, about 45 degrees at night, with a raise of 15 to 20 degrees with sunlight. Always give plenty of air, if possible. As peas are subject to red spider, it is always well to keep plenty of moisture in the house. An occasional spraying will be found beneficial. Always watch for green fly, as this insect, if allowed to remain, will soon weaken the plants.

There are a great many varieties that do well under glass. Blanche Ferry is a very old variety and is still in cultivation, but in looking over the list, we find many fine varieties to force, especially among the Unwins.

For the Garden.

Those who desire early sweet peas for the garden will find great advantage in the fall-sowing method. They will not only bloom early, but be strong and of good color. In order to have full success with this method, small sashes are found to be the best covering for winter, although they can be grown successfully, covered with plain spruce plank.

One wishing to grow peas by this method, should first select an open space in the highest part of the garden, where water will not lie and freeze in winter, also where a hydrant is close at hand, as they will require an abundance of water in summer. When preparing the ground in the autumn, care should be taken to dig the ground very deep, putting in plenty of well rotted cow manure. The writer prefers to plant in double rows, six inches apart. When the vines become high enough, they will form a wide row and the air can circulate throughout it better than if planted in one row.

Place the rows four feet apart, running north and south, and plant the seeds three inches deep, about Oct. 15. They will be safe without protection until Nov. 10, when a board should be placed on each side of the double row, and the sashes or boards, whichever the grower wishes to use, should be put on at night, only when frost is expected, until about Dec. 1, after which date sashes should remain on night and day, giving plenty of air during the day. When the severe weather sets in, it will be necessary to fill in between the boards with long straw and manure from the horse stable. When the temperature drops to about twenty-five at night it will be necessary to cover the sashes with long straw, which should be taken off during the day to let in light and air.

It is always well to give plenty of air, as this will keep the plants strong and enable them to stand the cold weather. Do not allow the plants to lie on the ground in winter; better use small brush to hold them erect. The most important part is not to remove the sashes too early in the spring. April 20 is time enough to remove sashes for the summer. Although they will need to be taken off during warm weather, it is not wise to put them away until this date. They will then be ready for the brush. After staking, it is well to dig the ground between the rows, as it will be well trodden down after the winter's work. Fork the soil up around the vines, so as to form a trench between the rows, which will help to hold the water. Later fill this trench with manure to retain the moisture during hot days. Frequent watering will be found beneficial; never allow them to become too dry. As we have found them to be strong feeders, we advocate feeding once each week with sheep manure or nitrate of soda, or

both. This will induce them to spread their wings and lengthen their stems.

Desirable Varieties.

There are many new varieties coming before us each year. We have found the following twenty-five to do well this year: Senator Spencer, Lovely Spencer, Tennant Spencer, Mrs. Sankey Spencer, America Spencer, Primrose Spencer, Mrs. Routzahn Spencer, Duplex Spencer, Aurora Spencer, Flora Norton Spencer, Appleblossom Spencer, George Herbert Spencer, King Edward Spencer, Black Knight Spencer, Mrs. Walter Wright Spencer, Salopian, Florence Nightengale, Miss Willmott, Queen Victoria, Gladys Unwin, White Wonder, Bolton's Pink, Queen Alexandra, Helen Lewis, Lady Grissel Hamilton.

Many fine peas have been grown by planting in pots or boxes in graperies or frames. Those who do not have a greenhouse can start them early in frames, by planting in flower pots. A good way to grow early peas is to have boxes, six inches wide, six inches high and three feet long, with a movable side; plant seeds in these boxes Feb. 1st and keep in a cool house with plenty of air and sunshine, to have them grow strong and healthy. Plant out in spring as soon as weather will permit, and support them as soon as possible. They can then be treated in the same manner as those planted in the autumn.

A good way to grow peas, for one who wants cut flowers with little trouble, is to select a warm spot in the garden in autumn and dig in a little lime and cow manure. When prepared, cover this space with eight inches of leaves, after the first severe frost. About March 1st, some fine day, remove the leaves and dig once more, after which plant the seed four inches deep. As the seed is very slow to start, they will be coming through the ground after all danger of frost is over, and will have a chance to grow strong while the cool weather is with us. As we all know, the extreme heat we have to contend with during the summer months is very injurious to sweet peas. It has been the cause of many failures.

PERSONAL.

L. J. Muller has accepted a position as gardener to Mr. Howard Phipps, Westbury, N. Y., from April 1, 1914.

Thos. Windram, Cincinnati, has returned after an extended stay at the Lake Shore Ferneries at Leesburg, Fla.

James McHutchison of New York starts on March 28 on a trip to New South Wales and South Africa. Will be away about seven months.

Arthur Kowalski of Slattery & Beyers, Buffalo, was operated on for appendicitis on Monday last and word has been received that the operation was successful and he is doing nicely.

A vicious bulldog was strangled to death, last Monday by George Metz, a florist of Corona, L. I. Metz saw the dog attack a woman on Lincoln street and went to her aid. He was attacked by the animal, but got a good grip on the dog's throat and choked the animal to death.

THE MAKING OF A COUNTRY HOME

The following paper was read before the Horticultural Club of Boston about three years ago by the late J. A. Pettigrew, superintendent of the Public Parks of Boston. In the recent meeting of the S. A. F. Executive Committee in Boston, Mr. Pettigrew's name was frequently mentioned in connection with the plans for cooperation by the Park Department with the S. A. F. for an outdoor garden display next August. For this reason and because the time for garden planting is at hand, and especially because anything that Mr. Pettigrew had to say was always sound and inspiring, we give place here at this time to his words of wisdom, believing that many of our readers will find it interesting and profitable.

Among people of wealth and leisure a widespread interest is being felt in the subject of country life, and the founding of country homes. On every hand homes can be seen already established or in process of development by those whom the love of country has induced to enjoy its advantages and delightful associations as an alternative to residences among walls of brick and mortar which so loudly echo the turmoil and strife of city life. The busy man so immersed in business that he can spare but little thought to the subject, or who feels that the time has not arrived for its consideration, these notes will not interest. There are those, however, having partial or abundant leisure and to whom country life appeals who would welcome the idea of engaging personally in the work of making a country home. It is for such that these notes are compiled.

The fascination of the work is so great that a little sustained attention to it soon develops into a strong interest. A more intimate acquaintance with nature results, and with it a broader appreciation of her wonderful ways.

The advanced state in which horticulture is to be found in the British Isles today, and the charm, beauty, and dignity of so many of the old homes to be found there, are due largely, no doubt, to the intense personal interest taken in their growth and development by the owners. This interest frequently expands into a close technical study of plant life. Not only among the proprietors of old estates which are clothed with centuries of horticultural traditions is the love of the home and garden rife. It extends to the farmer and cottager. The farmer with pride will call your attention to the fine oaks or maples in his hedgerows, while the cottager will be hard pinched indeed if he does not find the opportunity to clothe the walls of his cottage with climbing vines, or his windows with boxes of flowering plants. It is the love for gardening, so deeply implanted in the heart of the Britisher, which gives to England one of her greatest charms.

New England is so wonderfully endowed with the beauty that Nature has implanted that the choice of a home site, it might be said, need only be governed by geographical considerations or convenience of location in its relation to transportation. Land, too, suitable for country estates is plentiful and cheap.

The character of the flora is distinctly and charmingly interesting. Wooded hills and valleys abound, while the soil is so well adapted to plant life that it is easily possible with good cultivation, to produce a growth of hard wood trees, 30 feet in height, in a dozen years. Pines also, 20 or 25 feet high, may be grown in the same space of time; so that if the prospective homemaker is not able to secure a fair proportion of natural woodland as a part of his estate, he need not be discouraged. He may take comfort in the fact that he can plant where he will and create his own woodland, which often results more satisfactorily than the effort to bring into harmony with his design a piece of existing woodland which uncontrolled nature has distorted or marred or that may not be so located as to permit of blending it into natural harmony with the surroundings.

The ground for the country home having been selected, be it ten acres or be it three hundred acres in extent, fidelity to nature should be the keynote governing its development. The motive impelling the creation of the home is a wish to be associated with nature, therefore have the home express nature faithfully. Presumably the builder of a country estate is one of artistic taste or instincts who is qualified to plan the lines of the necessary walks and roads so that they may be convenient for their purpose yet unobtrusive, so that there shall not be one linear foot in excess of absolute requirements and so that they shall be designed as much as possible to lie within the borders of the woodlands or intended plantations of trees and shrubbery; for walks and drives do not in themselves enter into the landscape design excepting as useful agents which may be masked by planting. If the home-builder will in addition locate his home in its proper relation to convenience, to the command of pleasing views, and to its setting, existing or to be made, he may, with the help of a copy of Downing and a practical, intelligent gardener as superintendent of the work, and the occasional services of an engineer where exact lines and grades are necessary, have the enjoyment and pride of being the creator of his own home. An alternative could be the employment of a competent, well-experienced landscape gardener to make a design for the estate, when with the staff before enumerated the owner can enter upon the work of construction.

In planning home grounds it is a good thing to remember that the moving of earth is one of the most expensive of works, a fact that is too often overlooked and much unnecessary expense is thereby incurred. The plan in its topographical features should be bent to fit the ground as closely as

possible; the relation of soil and subsoil should not be disturbed by grading, if it can be avoided. In the removal of soils to other places it is essential that they be restored to their original relation; that is, with the subsoil below and the loam on top. The expense of such manipulation is more than double the cost of straight excavation work. A large amount of thought is not too much to expend in considering the removal of a very small amount of earth; that is, if it is expended in the effort to find some way in which the removal can be avoided. A little change in walk or grade or some other modification of an idea will often accomplish this result.

Attention cannot be given too soon to such natural woodlands as the estate may possess. These areas are generly made up in great part of thick growths of trees, which have injured each other, more or less, by close contact; natural perhaps in having sprung from the soil without the aid of man, but having, nevertheless, been subject to such unnatural conditions as to upset nature's balance. The first operation in a piece of thick woodland desired to be retained for natural effect should be that of thinning. Trees of individual merit or beauty should have interfering trees removed to allow of their development.

In places, areas of greater or less size may be found entirely filled with trees, which, by reason of overcrowding, are so far impaired that they can never recover their lost beauty. In such cases, a free cutting should be made, to allow light to penetrate, so as to permit of the growth of saplings or newly planted material below, and further cuttings made from year to year, as they may be needed. Judicious thinning of all trees should be made when they interfere with the growth of better ones, noting at the same time, and retaining picturesque groupings and pleasing combinations of trees, preserving, meanwhile, a natural appearance in the general mass, and encouraging as much individuality as possible without impairment of natural woodland effect. This thinning will permit of the passage of light to the undergrowth, which will respond quickly to its influence and will materially enhance the beauty and naturalness of the woodland. A woodland so dense as to prohibit the growth of vegetation on its floor is dreary and monotonous.

The improvement in the woodland by thinning is soon noticeable. The branches, instead of struggling upward in search of light, spread out to such an extent that it quickly becomes apparent that the work of the axe whether in woodland or plantation is never completed: it is vandalism to lay it aside. The best time for making selections for permanent trees, in plantation or woodlands, is in the summer. At this season the condition of the trees can be more easily ascertained, as their relative position and needs are more apparent than at any other time.

The treatment of old woodlands includes the careful cutting from the trees of dead or diseased limbs. A large proportion of trees come to an untimely end because of the decay introduced into the larger limbs and boles, through the stumps of dead limbs or branches. Each cut should be made close and even with the bole or limb where the severance is to be made, and well painted over, renewing the coat when necessary until the wound is healed.

No work in the development of a country estate should take precedence over that of planting, other than the work necessary to make the ground intended for plantation available. Roads and walks are of secondary importance in comparison. As a general principle, it may be said that a bordering belt of trees should be planted on the boundaries of the estate. This may vary in width in conformity with the topography of the ground, or may be omitted when desirable to obtain cross-country views. This omission, however, should only be done in the case of the opening of views of exceptional interest or beauty. The bordering plantation also serves as a screen to shut out undesirable features from within. It gives, too, a sense of seclusion and possession, which in a country home is desirable.

Another principle in planting, is that, generally, it is desirable to plant on the high grounds and lay down to turf the lower grounds, thus accentuating the topographical variation. Such planting, however, must be subject to the preservation or creation of pleasing views within the boundaries of the estate, or the shutting out of undesirable features.

The preparation of the ground for planting in masses should be done during the summer previously to planting, by plowing and deeply sub-soiling. This should be repeated two or three times to produce a good condition of mellowness in the soil. Spring planting is preferable in our northern latitudes. Fall planted trees, unless put in early enough to have made roots to sustain them, are apt to dry out by evaporation during the long months of freezing.

A good method is to make selections and purchases in the fall, which can be heeled in and protected from drying winds. Then planting can be commenced much earlier, unhampered by the delays of spring shipments from nurseries.

In planting for mass effects, plant thickly; 12 feet apart is not too close: the ground is the more quickly shaded. The trees also shelter each other. Thin out by transplanting, or even by cutting out whenever the branches interfere. Under no consideration permit injury to be done by over-crowding. This method has many advantages; it provides shade for the ground and for the trunks of the trees; it permits of easy and cheap cultivation of the ground by horse machinery; it is a convenient nursery from which finer trees can be secured each season than can be obtained from commercial nurseries; and it, also, gives a greater number from which to select the permanent trees.

It is well to plant the intended permanent trees at a distance of from 30 to 50 feet apart, according to expective development. A second or even a third arrangement might be made, by using different kinds of trees in each. The advantage of this plan is that any one of the three arrangements may be adopted and retained when thinning. It is not desirable to plant shrubs throughout new plantations of trees, as they interfere with the free use of the cultivator, which is a valuable adjunct to the diligent planter desiring vigorous and rapid growth. Cultivation should be maintained for a period of three to five years, when shrubbery or ground cover may be introduced. Shrubbery may be set out on the borders of the plantations when the trees are planted, of such wood bordering plants as shad bush, red bud, witch hazel, viburnums, cornels, etc.

Of the kinds of trees to plant, all our native trees are good, although some are better adapted to our climate than others. Of exotic trees we can always find a place for the white willow, the European beech or the European elm, and others. The planting of a New England country estate should consist largely of oaks, maples, beeches, birches, hickories, red cedars, pines, hemlocks and spruces; for appropriateness and beauty these cannot be excelled. Exclude from the planting lists exotic trees and shrubs which do not blend with native material, and above all bar out variegated sports and monstrosities, which have no place in planting for natural effects.

The selection of a location for the house is an important matter for consideration. It would be difficult to frame rules for guidance where so many combinations of topography or other existing features are apt to occur, each one a study in itself, to be solved on the ground. Let us take one example, however. Let it be that of level open ground, then let us, if possible, place the house with its back opposite to the most uninviting aspect, and behind the house plant a mass of trees for a background, and irregular clumps off from two or more of the corners, for support to the house. Behind the background of trees have the kitchen garden. This garden may be a walled garden, with espaliers, the walls and espaliers for training fruit trees.

It may have also flower borders between the espaliers and the box-edged walks. In that case the espaliers could be used for training flowering vines, delightfully quaint, while they would

NATIONAL ASSOCIATION OF GARDENERS

FARQUHAR'S EVERGREEN LAWN GRASS SEED

In making or renovating a lawn, much depends on the Grass Seed Mixture used. Why not have the best?

Our Lawn Grass Mixtures are all composed of the finest quality seeds, and under normal conditions, should produce the best results. The formulas used are the result of a lifelong experience with grasses adapted to lawn making in this country.

Special Mixtures for—Shady Places, Putting Greens, Fair Greens, Sea Shore, Tennis Courts, Terraces

Catalogue on application

R. & J. FARQUHAR & CO., Boston, Mass.

be very convenient to the house for the picking of flowers and fruit. In this garden may also be placed a low fruit house or two, and forcing pits or low houses for vegetables. Such facilities for providing early fruits and vegetables are, I think, desirable and even necessary, in view of the long winter season; but I am of the opinion that the erection of ranges of houses for the growth of ornamental plants, or cut flowers for use in the house, is an expensive mistake. Can we not have an abundance of flowers from the garden? Commencing early in spring with snow drops, and ending with the hardy asters and chrysanthemums with the fall frosts, what a succession of beautiful flowers we have. Thence on, until spring again, we have our myriads of fruits and berries to carry on beauty's procession, than which nothing can be more appropriate for the season.

Behind the background near the vegetable garden can be placed the stables and any other necessary building or house convenience. The whole can then be screened by a heavy plantation of trees or shrubbery of varying outline.

From at least two points of advantage within the house, long vistas of simple open turf, stretching away into the distance could be made. The boundary lines of these views should be broken up into deep bays and bold points of foliage, the lines of which again could be opened for lateral views.

Judicious planting of vines should be made against the house: for example, wisterias or bignonias at the corners, or at the porches or other projections, and ampelopsis and evonymus against flat portions of the facade, but all sparingly. The effect should be that the house supports the vines, which in turn soften the architectural lines; not that the vines are a support to the house or that the architecture needs to be hidden—breathe it not—sometimes that were better. Procumbent shrubs, too, planted along the base line at intervals will tend to soften the junction of turf and the walls. This shrubbery line may be of varying width. In front of, and under the edges of the shrubbery, spring-flowering bulbs could be planted; such as, crocus, snow-drops, narcissus, etc.

As far back as gardening history can inform us there have been flower gardens round the house. In the old times they were even made within the lines of the moat, for their protection. After civil wars ceased to trouble the land, or in the Elizabethian period, gardens took a place in the open lawn, which occupied the space formerly taken up by the moat. The old gardens were planted with home-like and familiar friends of humble type such as roses, artemesia, monkshood, argemone, marigold, foxglove, hollyhock, etc.—plants famous in song and story. Before the middle of the last century, the fashion changed, the old-fashioned flowers were banished from all gardens of any pretensions, and the florid "bedding out" style adopted. This comprised lines as in the ribbon border, of one color, sometimes hundreds of feet long, also beds in the designs of animals, flags, carpet and rug work, planted with exotic material. Flowers were never prostituted to such base uses as they were during the period of this craze. At its height it seemed as though a gardener's ability could only be measured by his dexterity with the sheep shears, in clipping the various plants into the desired shapes. As in former years, the test would be a hammer, cast iron nails, listing, and an inhospitably cold garden wall. While the old formal style still lingers in places, the tendency in ornamental gardening now is to use tropical plants in beds and borders, with a ground cover of smaller plants.

To return to the house, the flower garden should be on the lawn in front. The ground being level or nearly so, terrace walls are not needed; there is no interruption in the foreground to the view down the vistas of tree-bordered turf. Off at either of the vistas are irregular groups of trees, bordered by rather widely-set shrubbery. Among and in front of this shrubbery the flower garden should be made not in a clearly defined border, but with tall herbaceous plants, such as delphiniums, foxglove, holly-hocks, lilies, etc., planted among the taller growing shrubs at the back. Then down to the front, among shrubs of dwarf growth, let us have phloxes, salvias, hardy asters, pyrethrums, roses, lilies, heleniums, solidago; and in front periwinkle, dwarf asters, iberis, veronicas, and many others almost too numerous to mention.

It is not intended to be understood that a grading down of shrubs or plants from tall at the back to dwarf in front is intended, rather let dwarf run back occasionally in short vistas, as it were, and let tall plants come to the front; the smug insipidity of graded planting can thus be broken up and a more natural tone imparted. Nor should the lines of the border be too clearly defined, let it in a natural manner project itself boldly into the lawn, and again retreat back nearly to the tree line.

It is important in our garden to have space enough between the shrubs to give plenty of room for root growth of the shrubs, and leave sufficient for the needs of the herbaceous plants too. The shrubs will, if carefully selected for their berried effects in winter, or for the coloration of their branches, go far to cover the deficiencies of the bare herbaceous plants at that season.

The planting of a country home grounds opens up a large field for enthusiastic gardeners. On the tree borders of the turfy glades what a field there is for the development of a fringe of beautiful things! Thorns, flowering dogwoods, witch hazel, juneberries and red buds would frame the vistas with a succession of bloom, during a great part of the spring and early summer. And what opportunity for the planting of spring flowering bulbs by the thousand, sprinkling them partly under the branches of the shrubbery and having waves of them spread out over the turf in front. Narcissi, crocuses, snowdrops, scillas, grape hyacinths and fall blooming crocuses would be the kinds suitable. In the herbaceous border May-flowering and Darwin tulips might be added.

A piece of damp woodland bordering a creek could be planted with many beautiful plants including ferns, which love moist and shady conditions, while the borders of the creek would give a home to the Irises, the neisias, senecios, swamp azaleas, andromedas, rhododendrons, loosestrifes and sagittarias.

A pond in the low ground, fully exposed to the sun would give opportunity for the planting of Latour Marliacs' beautiful hybrid water lilies, as well as our own handsome ones. A great wealth of material, besides, is at the service of the water gardener. Then a ravine of rocky dell, possessing a good cover of leafy mulch, suggests the absorbing delight of planting a collection of native ferns.

A bank under partial shade suggests a mass of primroses, while another bank reminds one of the beautiful little Canadian cornel, and how well it would

PREPARE FOR EASTER

The blizzards and the extreme cold weather will make Easter plants very scarce, therefore, don't delay but send your orders in now.

LOOK WHAT WE CAN OFFER YOU—CHEAP AND GOOD

NEPHROLEPIS OR FERNS, Scotti. 5, 5½, 6 and 7-in. pots, 35c, 40c, 50c, 75c to $1.00. **Harrisii.** 7-in., 75c to $1.00. **Giatrasii.** 5½ in., 35c to 40c. **Smithii.** 6 in. pans, 25c, 40c, 50c.

FICUS Elastica (Rubber Plant). 4-in., 5-in., 5½-in., 6-in., 7-in., 25c, 35c, 40c, 50c, 75c.

ARECA lutescens robusta. 4-in., made up of 3 plants, 25c; 5-in., 35c.

KENTIA Forsteriana and Belmoreana. 5½ in. pots, made up of 3 plants, 40c, 50c; single, 5½-in.; **Forsteriana** or **Belmoreana,** 40c, 50c, 60c, 75c; **Forsteriana,** 12-in. tubs, 65 to 75 in. high, $4.00 to $5.00.

COCOS Weddelliana. 4-in., 25c; made up, 30c; 3-in., 15c.

EASTER LILIES OUR SPECIALTY

We have the genuine **EASTER LILY, Lilium multiflorum.** We have the genuine stock, true to name, raised from selected bulbs, furnished by our grower in Japan; 9 to 12-in. bulbs; now in fine condition for Easter sale; 5½ to 6-in. pots, having from 5 to 10 buds to a plant; 10c per bud; plants having less than 5 buds, 12c per bud. **Order Now.** Buds now showing; plants of medium height, just right for Easter trade.

CYRTOMIUM Falcatum (the new brushed Holly Fern). 5½-in., 25c to 35c.

PRIMULA Obconica. In bloom, 4-in., 15c; 5½-in., $3.00 per doz. **PRIMULA Chinensis,** 5½-in., $3.00 per doz.

CINERARIA HYBRIDA. Our best well-known strain, same showing color now, right for Easter; 5-in., 5½-in., 6-in., 25c, 30c, 40c, 50c, 75c to $1.00.

ENGLISH IVY. 3-in., 7c; 4-in., 10c.

FERNS for dishes, Wilsoni only, 2½-in., 4c; 3-in., 6c.

PTERIS Wilsoni. In 6-in. pans, 25c.

HYACINTHS are scarce this Easter, but we put in last fall an immense stock of our own importation, which will make large spikes and cannot be compared with the cheap stuff that is now floating on the market. **Gertrude,** best pink; **La Grandesse,** best white; **King of the Blues,** best dark blue; **Grand Maitre,** best lavender blue. 4-in. pots, staked up, $12.00 for 100 pots. In bloom for Easter week.

TOURNESOL TULIPS, best double red and yellow variegated; **Murillo,** double rose; **Imperator Rubrum,** bright red double; **Couronne d'Or,** double yellow, new, three bulbs planted in a 4-in. pot, $15.00 per 100 pots, $8.00 a doz., in bloom one week before Easter.

DAFFODILS, Von Sion. Best double yellow **NARCISSUS** in existence, three double-nosed bulbs, planted in 5½ to 6-in. pot, $3.00 per doz. pots, out of cold frame, will bloom one to two weeks before Easter.

While we pay the highest price for our Bulbs of Hyacinths, Tulips, etc., from Holland growers, you must bear in mind that we can sell them no cheaper than we do, and we assure you that there is no profit in it for us for the fine stock we sell you.

ASPARAGUS SPRENGERI, 4-in., 10c; 2½-in., 4c.

ASPARAGUS PLUMOSUS NANUS, 3-in., 7c; 2½-in., 4c; 5½-in., 25c. to 35c.

Our specialty, the world wide known pure white **MOONVINE, Ipomoea Noctiflora,** is now ready, 2½-in. pots, $5.00 per 100.

ARAUCARIA Excelsa. 6-in. pots, 4, 5, 6, 7 tiers, 75c, $1.00, $1.25, $1.50.

RHODODENDRONS. 10-in. pans, full of buds, $1.25 to $1.50.

SPIRAEA GLADSTONE in 6 and 7-in. pots, in bud, 30c, 40c, 50c and 75c, right for Easter.

HYDRANGEA OTAKSA, full of foliage, all have buds, just right for Easter sales, 5½, 6 and 7-in. pots, 25c, 30c, 40c, 50c, 75c, $1.00, $1.25 to $1.50. **FRENCH HYDRANGEAS, Mme. Mouillere,** best white, and **Gen. de Vibraye,** bright rose, 30c, 40c and 50c.

BEGONIA GRACILIS LUMINOSA, deep red, in bloom and bud, 5½-in. pots, $3.00 per doz.

BEGONIA ARGENTEA COMPACTA, 4 in. pots, 15c.

NEPHROLEPIS CORDATA COMPACTA, 4-in., 25c.

WE ARE

Headquarters for Azaleas

FOR EASTER BLOOMING

EASTER GREETING!

All the go. The plants of the century. A rival of all Easter plants. For azaleas, go direct to the Azalea belt of Godfrey Aschmann.

Order now. 5 houses full, 10,000 of the choicest plants on hand, ready for immediate shipment. We are the only importers of **AZALEAS,** of which we have made a specialty for the last 25 years. We have the well-known, best double pink **Mme. Van der Cruyssen,** 5½-in., 6-in., 7-in., 8-in. pots, 60c, 75c, $1.00, $1.25, $1.50 to $2.00.

Vervaeneana. Best double rose variegated, large flowering, 5½-in., 6-in., 7-in. pots, 75c, $1.00, $1.25, $1.50 to $2.00; **Niobe** and **Deutsche Perle,** best double white; **Princess of India,** double variegated; **De Schryveriana,** double variegated; **Apollo,** best red; and other well-known varieties, 75c, $1.00, $1.25, $1.50 to $2.00. We have about 100 assorted at 50c, 60c, 75c, $1.00, $1.25 to $1.50.

All goods must travel at purchaser's risk only. No references investigated while the big rush is going on. Thousands of boxes have to be packed in a remarkably short time and only cash will be accepted. Please state if you want stock shipped in or out of pots.

GODFREY ASCHMANN, 1012 West Ontario Street, Philadelphia, Pa.

WHOLESALE GROWER, IMPORTER AND SHIPPER OF POT PLANTS

be adapted for its growth! Here is an ideal spot for Solomon's seal, and over yonder are just the conditions required for the bear berry. And so on.

In such work the home-maker would find his days filled with enjoyment, and the satisfaction of accomplishment, accentuated by a close association with Nature in one of her most charming expressions.

NEW CORPORATIONS.

Burlington, Vt.—Gove, the Florist, capital stock, $20,000. Incorporators, Elmer E. Gove, Cora E. Gove and H. P. Prindle.

Irvington, N. Y.—Martin & Brunger Co., landscape gardeners, capital stock $5,000. Incorporators, Louis A. Martin, John Brunger and James A. Kiernan.

Atlantic City, N. J.—Littman, Florist, capital stock, $125,000. Incorporators, B. H. Kendrick, A. Littman, A. B. Endicott, Jr.

Newark, N. J.—The writer had a very pleasant stroll through the plant of Aug. Begerow, who has three houses, 35x216 feet. He grows about 15,000 geraniums for the spring trade, also a large amount of other bedding stock. Smilax and Asparagus plumosa are also grown and there is a very fine stock of schizanthus for the Easter trade. H. B. McKnight, foreman for Mr. Begerow has a promising carnation seedling, a cross between Winsor and Victory. Another, a cross between Prosperity and Beacon has been named Prince George. It is a rich fringed red, large flower and robust grower, making an immense plant either in the field or indoors.

Craig Quality Easter Plants

WERE never in better shape than now. The Roses, Hydrangeas, Lilies, Genistas, Valley, Daisies, Spiraeas, Rhododendrons and Azaleas, have all been timed to the minute. They are being grown cool and will require no extra heat to bring them into flower in good time. This means that Craig quality plants will be durable with you and with your customers. We would like you to come and see them, but if that is impossible, we would like you to reserve a good sized space in your place for them. Our catalogue is now ready; please send for it. We quote a few prices below.

LILIES

Our stock of this grand Easter plant is exceptionally fine this year and having 25,000 plants, we can positively please the most critical buyer. Plants with from 4 to 10 flowers, 12c. per bloom. Made up pans, from 15 to 25 flowers, 12c. per bloom. Plants with less than 4 flowers, 15c. per bloom. Cut lilies, medium, $12 per 100 blooms. **All plants have been grown moderately cool.**

RHODODENDRONS

Our stock is large, the plants being well budded and shapely, including all the best varieties in all colors. Prices, $1.50, $2.00, $2.50, $3.00, $3.50 and $4.00 each. Very large plants, $5.00, $6.00 and $7.50 each.

HYDRANGEAS

We have the largest and finest stock of Hydrangeas ever offered to the trade at Easter, having 7,500 perfect plants. Our stock includes over 6,000 of the new French varieties, all of which have proven so valuable to the retailer. The plants have all been grown cool and are well hardened off, insuring satisfaction to the buyer. Hydrangea Otaksa, 6 inch, $6.00, $9.00, $12.00, $15.00 and $18.00 per doz.; 7 inch and 8 inch, $2.00, $2.50, $3.00, $3.50 and $4.00 each. Specimens, $5.00, $6.00 and $7.50 each.

All of the following varieties have been tested by us under ordinary conditions as to their adaptability to forcing for Easter. All have proven themselves to be valuable additions.

Bouquet Rose, bright pink; Gene de Vibraye, bright rose; La Lorraine, bright pink; Mme. a Riveram, bright rose; Mme. E. Mouillere, best white; Mme. Maurice Hamar, bright pink; Mme. Renee Gaillard, large white; Souv. de Mme. E. Chantard, bright rose; Radiant, bright pink; Baby Bimbinet; Mont Rose, 6 inch and 7 inch pots, from 3 to 15 flowers, $6.00, $9.00, $12.00, $15.00, $18.00, $24.00, $30.00 and $36.00 per doz.

April delivery, strong stock of the above varieties, 2½ inch pots, except where noted, $8.00 per 100, $75.00 per 1000.

EASTER ROSES

We desire to make special mention of our large stock of roses, growing upwards of 10,000 plants in the leading varieties. We have no hesitation in saying we are the largest growers of forcing roses for Easter in America. We are positive our stock will please the most critical buyers as the quality was never better. It has all been grown cool and will prove very satisfactory.

Baby Ramblers—All the choice and popular varieties in the polyantha class, 5 and 6 inch pots, $6.00 to $9.00 a dozen.

Half Standard Baby Ramblers—Orleans, Pres. Taft, Phyllis, etc., exceptionally fine plants, 3 foot stems, $1.25, $1.50 and $2.00 each.

Hybrid Roses—Magna Charta, etc., $9.00 to $18.00 per doz.

Trained Specimens—All the Ramblers, Lady Gay, Hiawatha, Dorothy Perkins, Tausendschoen, Excelsa, splendid plants in 6, 7, 8 in. pots, at prices ranging from $1.25 to $7.50 each.

SPIRAEAS

Spiraea Gladstone—Our stock is in superb condition, 6 inch pots, very heavy, $6.00 per doz., $45.00 per 100. 7 inch pots, very heavy, $9.00 per doz. 8 inch tubs, very heavy, made up, $12.00 per doz. 10 inch and 11 inch tubs, very heavy, made up, $18.00 and $24.00 per doz.

A Story of Roses!

American growers will no doubt be interested to learn that I have made a contract with Hugh Dickson, Ltd., of Belfast, Ireland, by which, as sole agent, I will distribute to American growers his varieties at the same time and price every year, as they are distributed in Europe. This stock is now growing in my establishment and the buyer will have no vexatious customs delay or charges to pay. The name "DICKSON" is one to conjure with in Roses, and Messrs. Hugh Dickson claim the finest strain of Rose seedlings in the world, as they were awarded a Gold Medal last year by the National Rose Society for each of the 1914 varieties which are as follows:

Mrs. James Lyans **William Cooper**
Brilliant **Mrs. A. Grey**
Countess Clanwilliam

Price $2.50 each per plant; 4" pot plants in full growth

Very liberal discount to trade growers

Mrs. Andrew Carnegie

The new Scotch Gold Medal Druschki seedling. This is an Improved Druschki in form, just as large in size, and in addition is deliciously fragrant.

Grafted or Own Root Plants; $1.00 each, $9.00 doz.

OTHER ROSE NOVELTIES NOW READY
(OUR OWN GRAFTING)

Killarney Brilliant — King of Killarneys
Ophelia — Light salmon pink with golden shadings
Prince D'Arenberg — Brilliant scarlet

MADISON, N. J.

One of the Dreer Specialties

A Planting of Japanese Iris at Our Nurseries, at Riverton, N. J.

Dreer's Imperial Japanese Iris

These magnificent Iris are among the most beautiful of our hardy early-summer flowering plants and are destined to become as popular as the hardy Phlox and Paeonies. They are valuable not only as decorative flowering subjects for the garden, but are also very useful as cut flowers.

Our stock of Japanese Iris is very extensive in a splendid assortment of home-grown varieties and can be relied upon for being true to name and description. We supply these in strong liberal divisions of a most satisfactory planting size.

Six-Petaled Japanese Iris

No. Order by name or number.

4. **Yomo-no-umi.** A fine free-flowering early double white.
5. **Koki-no-iro.** Rich royal purple with white veinings.
9. **Oniga-shima.** Rich purple with many white veins.
10. **Shiga-no-ura-nami.** Violet-purple, veined with white.
22. **Sano-watashi.** White, with canary-yellow centre.
24. **Gosetsu-mai.** White veined and traced throughout with aniline-blue.
25. **Senjo-no-hora.** Beautifully mottled deep purple and white.
26. **Uchiu.** Bright purple with crimson sheen.
28. **Tsurugi-no-mai.** Rich, deep purple.
29. **Rish-no-toma.** Silvery white, densely veined and minutely dotted with violet blue.
44. **Yoshimo.** Creamy-white, delicately veined with purple.
47. **Renjo-no-toma.** Petals peculiarly fluted, light violet, with white halo and light veinings.
53. **Samidare.** Silvery white, suffused throughout with rich ultramarine blue.
60. **Kagaribi.** Ground color white beautifully traced and marbled with ultramarine blue.
69. **Waku-hotei.** Pure white veined with purple.
74. **Renkaku.** White, densely marbled and spotted with bright violet-purple.
94. **Komochi-guma.** Rich, velvety pansy-violet.
107. **Tokyo.** The finest pure double white.
108. **Shimosa.** White ground, minutely and densely spotted throughout with bright violet purple.
109. **Hosokawa.** Royal purple with white veinings.

Price: Any of the above. 15 cts. each; $1.25 per doz.; $8.00 per 100; $70.00 per 1000. The set of 20 sorts for $2.00.

Three Petaled Japanese Iris

No. Order by name or number.

11. **Hano-no-nishiki.** Bright violet-purple, veined with white.
12. **Shippo.** Light lilac, densely veined with purple.
14. **Shishi-ikari.** Light ground color, veined and mottled with dark violet-purple.
18. **Meiran.** White, densely marbled and veined with light violet.
23. **Yedo-Kagami.** Magenta-lilac, veined with white.
33. **Kakujakuro.** White ground, marked with violet-blue in such a manner that makes it appear as though the color was dusted on.
43. **Shi-un-ryo.** Grayish-white, deeply and densely veined and suffused with violet.
55. **Schuchiukwa.** A showy variety, crimson-purple with white veins and white halo.
62. **Misutmoshito.** Violet-purple, marbled with purple.
67. **Kigan-no-misao.** A late flowering pure white.
73. **Shirataki.** Silvery-white, border of petals suffused with light Parma-violet.
77. **Yayaura.** White, occasionally marbled with light violet.
82. **Ari-Ake.** Violet-purple, marbled with white.
85. **Ojochin.** Light violet-purple, the larger veins white.
86. **Sei-o-bo.** Large pure white, with faint violet-purple markings.
96. **Tebotan.** White ground, with prominent violet-blue veining.
97. **Shiro-fungen.** Light ground, suffused throughout with bluish-violet.
100. **Yomo-zakuru.** Light ground color, densely veined and suffused reddish-purple.
102. **Shi-no-maki.** Rich royal purple.
106. **Sakata.** Light violet or lavender blue.

Price: Any of the above. 15 cts. each; $1.25 per doz.; $8.00 per 100; $70.00 per 1000. Set of 20 sorts for $2.00.

Extra Choice Mixed Varieties. $1.00 per doz.; $6.00 per 100; $50.00 per 1000.

The One Most Desirable DAHLIA For Cut Flower

DELICE

A soft, but lively pink color which appeals to everyone. Habit of growth perfect, with long, wiry and stiff stems which hold the flowers erect without the slightest inclination towards a weak neck. Very free flowering and of most desirable decorative form.

DELICE has always been scarce, the supply never equaling the demand, but we have made special efforts to produce a large stock and this is the first Spring that we have been in a position to offer it in dormant, undivided field grown roots.

Price, $2.00 per dozen; $15.00 per 100; $140.00 per 1000.

For the most complete list of Dahlias ever offered send for our SPECIAL DAHLIA CATALOGUE.

The above offer is for the trade only.

WILLIAM SAUNDERS. 3½ feet. 60 cts. per doz.; $4.75 per 100; $45.00 per 1000.

FOR FULL DESCRIPTIONS SEE OUR CATALOGUE—MAILED FREE.

We are the largest handlers of Cannas in the world. Our prices on Cannas will bear comparison with any house in the Canna business.

Our Cannas are true to name—two and three and sometimes four eyes—are sound, dormant, and are packed 250 in a box. Two can be "cleated" together and shipped as one. One box of 250 sold at thousand rate; it is cheaper for you to buy a box of 250 than 200 at 100 rate. Write for special prices on quantities.

If any Cannas are not found here, it may be understood that they are superseded by the foregoing. If selection is left to us we will substitute or send only the best for all purposes.

ARTHUR T. BODDINGTON

SEEDSMAN 342 West 14th Street, NEW YORK CITY

SEED TRADE

AMERICAN SEED TRADE ASSOCIATION

Officers—President, Chas. C. Massie, Minneapolis, Minn.; 1st vice-president, J. M. Lupton, Mattituck, N. Y.; 2nd vice-president, W. F. Therkildson, Painesville, O.; secretary, C. E. Kendel; assistant secretary, S. F. Willard, Jr., both of Cleveland, O.

A letter from some of our Washington friends indicates that they are somewhat disturbed because of an item published in HORTICULTURE two or three weeks ago, saying that Washington was a pretty warm place in late June. We supposed we were stating a fact but wish to add that Washington is no exception among our cities at that time of year. Nearly all cities are very warm and the idea in mind at the time was that if the executive committee of the Seed Trade Association had chosen some summer resort for the convention, it would doubtless have been cooler and more comfortable than Washington or any other city is likely to be. We have no disposition in the world to knock Washington; on the contrary, we regard it as a very beautiful town and one that all Americans may well be proud of, and if Washington has not yet learned the secret of controlling its climate, it has the weather bureau and will probably be the first to benefit from any information which may come to those in charge about tempering the heat of summer or the cold of winter.

There are unmistakable signs of spring in the air, and in the odor of the soil as one goes through the country which is very noticeable and undoubtedly the seed trade will be very busy for the next sixty days. If the spring is a little late in opening but continues warm without any cold snaps to set back vegetation, we may get just as early crops as we do when we have a warm genial March. We shall try to have some special seed trade notes in our next issue that may be of general interest.

Much sympathy is expressed for the St. Louis Seed Co. in their second catastrophe. They had adjusted their fire claims on a basis of $85,000 the day before their building was wrecked and the little that was saved from the fire is now a total loss, with seeds and garden implements, chickens, birds and gold fish under thousands of tons of debris. The company has now leased 406-408 N. Broadway and have a large force working getting in shape for opening their business this week.

The new parcel post ruling about seeds which went into effect March 10th is being worked out by the seedsmen to the best of their ability. One of the unsurmountables is the postage on peas, beans and corn to distant points like California. The postage stated in most of the catalogues is not nearly enough under the zone system. Of course by they will gain a little on the nearbys but the customers usually write for the stamps back. Changes of that sort should not be made in the middle of a season, after the catalogues are all printed and distributed.

Government Seeds.

While it is too late to accomplish it at this session of Congress no opportunity should be neglected by those who realize the necessity of it to push the idea for a reform in the distribution of government seeds, if the practice is to be continued. It is now used as the means of bolstering up good fellowship of the members of Congress and becomes a favor of the legislators rather than an effort which was intended to work to the betterment of the farmers. It has wandered far from the original purpose. Today the distribution of free seeds means the sending of a package of the commonest variety with which each and every person with a garden plot is supplied or can be without any great expenditure.

The idea of this assistance on the part of the Department of Agriculture was to place in the hands of the agriculturists seeds of a known quality which while not common could be expected to be of value in connection with the development of the various sections of the country. It is the introduction of the new and rare seeds which will prove of value and be accepted with appreciation by the tillers of the soil. Whatever can be done in that way as a contribution to scientific farming and an encouragement and suggestion for new crops has merit which is likely to be recognized. It would at least result in the giving of adequate tests to such seed which under the present method is a rank failure and waste of good money. The reformers have a great opportunity for work in this direction.—*Norwich (Conn.) Bulletin.*

Another Seed Postage Bill.

You are probably aware that on March 9th Congress passed the appropriations act for the Post Office Department, in which the Postmaster General was authorized to transfer seeds, bulbs, etc., to the parcel post. On March 10th the Postmaster General made a sweeping order transferring all seeds, etc., so that they must now pay postage at the rate of one cent for each ounce or fraction thereof up to four ounces; all packages in excess of four ounces will pay pound postage zone rates. This, of course, goes farther than the seedsmen who desired this transfer wished.

I now call your attention to Senate Bill 4980, filed by Senator Pomerene on March 20th, which bill is to place seeds, cuttings, etc., in fourth class matter, and for the same rates of postage:

"Provided, that all packages thereof containing eight ounces or less shall be charged for at the rate of one cent for two ounces or fraction thereof."

This is evidently an effort to place seeds in the same category as books.

CURTIS NYE SMITH.

Seed trade visitors in Cleveland last week were: C. N. Keeney, Le Roy, N. Y.; W. F. Therkildson, advertising manager for W. Atlee Burpee & Co.; Bert Chadwick, with C. F. Meyer & Co., New York.

NEWS NOTES.

Detroit, Mich.—The Flower Growers' Corporation is the name given to the new wholesale house just organized by Chas. H. Maynard, who becomes manager. It is incorporated under the laws of Michigan. The officers hope to be ready for business about April 1st at 118 Broadway.

Bayonne, N. J.—Business in this locality seems to be very brisk with all the florists as at every store the writer visited they were very busy making up. Patrick Cran, of 18th street, reports that business this season has kept up wonderfully well. G. A. Ripp, Jr., of 751 Broadway, reports that trade has been exceptionally good for this time of the year. F. W. O. Schroeter of 457 Avenue E also reports good business. Mr. Schroeter is a grower as well and has about eight houses for ferns, callas and miscellaneous stock.

CLUBS AND SOCIETIES

LANCASTER COUNTY FLORISTS' CLUB.

Two-thirty P. M., March 19th, found us on our way to Manheim and the Hostetters, Emanuel, Phares and Monroe. To give in detail an account of these trips is simply to repeat, as the majority of growers in this section are carnation men with an occasional side line. It is the genial good fellowship established and the readiness to discuss both failures and successes that makes the trips valuable. E. P. Hostetter has the largest area of glass of the three. His carnations did not average up quite as good as at the other two places, but sweet peas, snapdragons, yellow daisies, primula and Sprengerii made up a combination of stock that is bringing in money. Combination boxes of all this stock are arranged with an eye to effect, made up so that a buyer could hardly resist when he saw the box opened. Manheim produces snapdragons with eight-foot stems and flower spikes in proportionate length.

Seven-thirty P. M. we were ready for our meeting and had with us Adam Heim, Connersville, Ind.; Thos. D. Nolan of the King Construction Co., and Ernest Morrell of the Berry Hill Nurseries, Harrisburg, Pa. The latter gentleman gave us an interesting and instructive lecture accompanied by lantern slides on Herbaceous Plants and Their Uses, and opened up our eyes to some hitherto unknown possibilities.

At the regular business part of the session, H. A. Schroyer, chairman of his committee, reported having secured a written order from the traction company authorizing the conductors on all cars to accept cut flowers or designs for rush orders, or where it is impractical to use the regular express cars. This is quite an item to our growers and could have been secured only by means of the Club. The writer reported for his committee on co-operative buying, having secured another local concern that would allow us straight ten per cent on steam and hot water fittings and supplies of all kinds. This also will mean considerable to those who take advantage of it. The co-operative buying sticker for use on correspondence was distributed at this meeting.

After a half hour's local color and fun, through the question box, Mrs. A. M. Herr moved for the ladies that a rising vote of thanks be given the Club for their privilege of seeing the slides and hearing the interesting lecture and despite the present day narrow skirt every lady was on her feet in an instant. Mr. Nolan in behalf of the Scranton florists invited us to attend their spring show, and the meeting adjourned to meet April 16th, when for a visiting trip the members take the Coatsville car, 1.45 P. M., and get over what ground the afternoon allows.

ALBERT M. HERR.

COOK COUNTY FLORISTS' ASSOCIATION.

The regular monthly meeting of the Cook County Florists' Association, Chicago, was held March 19th and the principal event of the evening was the installation of the newly elected officers by H. E. Philpott, as follows: President, N. P. Miller; vice-president, A. Henderson; secretary, A. T. Pyfer; treasurer, J. Zech; sergeant-at-arms, M. Fink. There was a discussion on the advanced express rates on short hauls, which culminated with a motion to write a letter of protest to the commission. Communications from various railroads regarding the coming convention at Boston in August were read and referred to the transportation committee, which will report at the next meeting. Herbert E. Smith, of Danville, Ill., newly elected president of the Illinois State Florists' Association, was proposed for honorary membership.

GARDENERS' AND FLORISTS' CLUB OF BALTIMORE.

Prof. F. W. Besley, State Forester, gave a very interesting and instructive illustrated lecture before the Gar-

E. C. BRUCKER,

Re-elected treasurer of the Buffalo Florists' Club.

deners' and Florists' Club of Baltimore, March 23. He talked mainly on the value of roadside trees and the kinds suitable for street planting. His views well illustrated the advantage of trees for such purposes. The ones showing the mutilation by improper trimming and the after results were educational and especially so as the Gardeners' Club have for years been trying to prevent the tree butchers from destroying the street trees of Baltimore. The past year the municipal authorities took full charge of all street tree planting and it is now hoped the city will soon be in a way to have fine tree-lined avenues. There is a bill now before the legislature for planting trees along the public highways in the State, which will be cared for by the State Board of Forestry.

The club is in the best financial condition of its history. Walter L. Halloway, of Old York Road, exhibited a fine stem of double white snapdragon grown from seed.

AMERICAN ROSE SOCIETY.

The American Rose Society at its annual meeting in Grand Central Palace, New York, on March 23, reelected Wallace R. Pierson as president; vice-president, Robert Pyle; secretary, Benj. Hammond; treasurer, Harry O. May, all by an unanimous vote. Directors elected were August Poehlmann, Chicago, and Louis J. Reuter, Westerly, R. I. The selection of the next

GEO. B. HART, Manufacturer, 24 to 30 Stone Street, Rochester, N.Y.

place of meeting was postponed until the time of the S. A. F. Convention in Boston next August.

The St. Louis Retail Florists' Association held its meeting on St. Patrick's night at the Washington Hotel. The one important thing that was decided upon was to invite the wholesale florists to make an exhibit of cut stock and supplies at their next meeting. A lunch was served after the meeting.

The Chicago Retail Florists' Association has a very complete showing of plants and florists' supplies at J. L. Raske's. All kinds of blooming plants for Easter are included and all the accessories so popular and attractive are shown. A box of the new carnation Philadelphia arrived in good condition. At this writing, March 24, the exhibit is incomplete.

Notice is hereby given to members of the Buffalo Florists' Club, fellow florists and out-of-town florists and growers, that an invitation has been extended to inspect the greenhouses of S. A. Anderson of 495 Elmwood avenue on Sunday next and it is hoped that a good delegation will be on hand as there is something in store for all. The able manager, Jos. Streit will be on the lookout that no one is overlooked.

The Ladies' Auxiliary of the Detroit Florist Club meets on the first and third Fridays of each month at 2.30 P. M. in the Florist Club's room. The officers of the organization are as follows: President, Mrs. E. A. Fetters; vice-president, Mrs. Charles Plumb; secretary, Mrs. N. J. Stahelin; treasurer, Mrs. Robert A. Rahaley; press committee, Mrs. Walter Toepke; auditors, Mrs. G. Asman and Mrs. Jerome Stock; social, Mrs. Schroeter and Mrs. Warncke; house, Mrs. Poechelon; membership, Miss Jean and Mrs. Michell; relief, Mrs. F. Pantke and Mrs. Smith.

CHICAGO NOTES.

Rhododendrons are gaining in favor each year as Easter plants and some magnificent specimens will be offered this year. At a local plant grower's Pink Pearl is regarded as a fine addition to the older varieties.

The spring openings at the big State street stores call for the lavish use of decorative materials this week. In one store natural ferns and palms were used exclusively, calling for several thousands, while in others festoons of prepared materials, largely in green, were used. Some large vases of natural roses were used on the counters.

The annual flower sale on the day preceding Easter, at the Congress Hotel, for the benefit of the Destitute Crippled Children's Home, is each year getting to be more of an event with society people. The sum netted last year was several thousand dollars, and while that means just so many dollars taken from the retailers' Easter trade, so far they have donated most of the flowers. Plants are also included and hampers and the society people fill their Easter wants without visiting the florists.

Poughkeepsie, N. Y.—L. F. Graham of Little Falls, N. Y., has purchased the greenhouse business of Geo. A. Relyea.

DURING RECESS.

Essex County, N. J., Florists' Club.

The Ladies' Night meeting of the Essex Co. Florists' Club was held on Thursday evening, March 19th, at Kreuger Auditorium and was a very great success. The evening of enjoyment was started with a fine menu. During the dinner there was good music and talent, which put guests and members in good spirits. The entertainment committee earned their vote of thanks for the manner in which they worked and the way they carried out the entertainment and decoration. A little speech making was in order and the following gentlemen responded: J. K. Allen, A. H. Langjahr and A. Guttman of New York, E. Jacobi, president of the club of Irvington, N. J., R. Yuill, chairman of the committee, and J. Rassbach. After the speech-making dancing was enjoyed until a late hour. Two hundred tickets were distributed for the New York Flower Show among the members. The entertainment committee was composed of the following: R. Yuill, chairman, J. Rassbach, W. L. Jones, A. Deisler, Chas. Deisler, J. L. Puffer, E. Kemp, J. J. McLoughlin and William Muller. The next meeting will be held on the 16th of April.

J. M. WHITE.

Baltimore, Md. — Pierce & Co., wholesale florists on No. Charles street, have bought G. V. Smith's floral place on Madison avenue and will make extensive improvements which they expect to complete by May 1.

Flower Market Reports

BOSTON Business has held up very well thus far and prices have not receded to any great extent but it looks now as though the product would show a considerable increase within a day or two and the result will be lower values. All roses are plentiful and good, excepting Beauty, and have been moving very satisfactorily. Carnations have recovered somewhat from the stagnation of last week. Sweet peas are falling off in quality also in market value. There are lots of violets, good and cheap. Bulbous stock continues to come in heavy, double tulips enjoying the best demand. Lilies are are in normal supply and demand but callas are in overstock and are accumulating in wholesalers' hands. Lily of the valley is easy in all grades. Cattleyas received now are mostly Schroederæ and, as usual, are disposed of with difficulty and at much lower prices than the other species command. Hardy ferns are scarce at advanced figures.

BUFFALO Again a decided change from spring weather to winter. The cold snap continued throughout the week and it had a telling effect on business, especially the transient trade for the retail merchant. Roses are coming on better each day, some excellent Killarneys are seen; also Maryland are beginning to come on in better stem and color. Bonsilene and Safrano have sold well all winter. There are more Richmonds, short Beauties and Milady than in weeks previous. Carnations are improving though a good portion are still of the ordinary grade. Lily of the valley good and still quiet. Mignonette plentiful and excellent tulips of the Murillo variety have sold best. Daffodils have not been too plentiful and clean up daily. Choice snapdragon in pink, white and yellow sells well. Good wood ferns are scarce.

CHICAGO The condition of the market is in a general way considered quite satisfactory for late March. There is an abundance of stock of all kinds and with few exceptions a good quality of all kinds of flowers can be found. The most important exception is still the American Beauty, which is decidedly off crop now, and though very poor, the long-stemmed ones are in such demand that some of the large houses are getting six dollars per dozen for the few that can be called at all satisfactory. Short Beauties sell slowly. St. Patrick's Day cleaned up all the white carnations and the following Friday all kinds of carnations were moved off to avoid a glut on Saturday, with the result that the week end found business good and prices fair. Excellent pink and white Killarneys are seen on the counters. Richmond and Sunburst are not quite so much in evidence. Ten-week stock is coming in in fair quantity and sells readily. Bulbous stock is growing less but there is still enough to meet the demand. Lily of the valley is of a good grade and finds ready sale. Common ferns are selling at three dollars per thousand.

CINCINNATI Business is very good. An active demand that lasted throughout last week continued into this week. The call for stock was so strong that in spite of very heavy receipts the wholesalers were able to realize fair prices for their goods. The supply of roses is much larger and better than it was. All the good ones up to the time of this writing are cleaning up easily. Easter lilies are not as plentiful as they were and are running short of requirements. The offerings of callas are large. Good narcissi sold comparatively well last week, probably because of the limited supply. Heavy cuts of sweet peas are offered. The poor ones hardly have any kind of a market. Violets and orchids are both in the class of poor sellers.

Flower Market Reports

(Continued from page 490)

NEW YORK The market fell down badly directly after our last report, but soon recovered in some degree, although in the spell of warm spring weather which appears to be imminent, it can hardly be expected to long retain its backbone. Prices are down, of course, and the winter schedule is a thing of the past. It will be, from now out, not so much a question of market price as market activity, so that the goods may be quickly unloaded. There are plenty of all roses, carnations, sweet peas, violets, daisies, lilies, cattleyas, etc., and quality holds good. American Beauty is the only item that still lacks in supply and quality. Daisies, both yellow and white, are now overplentiful after a long period of scarcity. Schroederæ is the main reliance in cattleyas at present and the flowers sell slowly at low figures. Dendrobiums Wardianum and nobile are in good supply, at $5 per 100 blooms. Wallflowers of superb quality are seen in abundance. They bring about 20 to 25 cents a bunch of a dozen spikes. There are plenty of lilies, and all bulbous material is still abundant and cheap.

PHILADELPHIA There was a good volume of business last week, with large supplies and moderate prices all through the list. The street boys were a big factor on Friday and Saturday and helped to clean up the accumulated surpluses, so that there was little left over and nearly everything found a market of some kind. The rose market is very well supplied and all grades hang fire, especially in the higher priced qualities. Where a dozen American Beauties were being cut a week ago there are now a hundred. In pink roses, Russell and Killarney are the leaders. The former is particularly fine just now and one of the features of the market. The only white is Killarney, but there are some

CUT FLOWERS FOR EASTER

Berger Bros., Philadelphia, Pa.
For page see List of Advertisers.

CYCLAMENS

200,000 GIANT FLOWERING CYCLAMEN. For the last 16 years we have selected three-fourths of our seed-bearing cyclamen stock before Xmas, to assure early blooming plants, and claim the finest commercial strain in this country; no fizzle of many so-called English varieties. Our aim is strong growers that don't have to be petted to be grown into a choice salable plant—a well built, five-petaled flower (many of them at one time), with well marked foliage; every plant an ideal, a prize winner. Received first prize at the Cleveland show and first and second at Toledo, early November, when blooming cyclamen were scarce.

STRONG AUGUST SOWN SEEDLINGS, once transplanted, $3.50 per 100; $30.00 per 1000. Cash with order. Cultural directions with all orders. C. WINTERICH, Cyclamen Specialist, Defiance, O.

Thomas Roland, Nahant, Mass.
For page see List of Advertisers.

DAHLIAS

Henry A. Dreer, Inc., Philadelphia, Pa.
The Most Desirable Dahlia for Cut-Flower, Delice.

Flower Market Reports

(Continued from page 501)

nice cuts of Kaiserin promised for Easter week. Carnations continue extra fine and very plentiful; a large business is being done but at low figures. The indications are that the flush of the crop is on right now and that by Easter there will not be quite such a heavy cut. Lots of gardenias are to be seen on the street, which is a good indication that they are cheap. Orchids are more plentiful, the most conspicuous being Cattleya Schroederae. Much business is being done in sweet peas, which are splendid stock, especially the Spencers; prices quite moderate. Snapdragon is now better stock and more plentiful and sells well. Southern daffodils and arbutus are in.

ST. LOUIS The first day of spring ended up with a snow storm and the second day opened with one. These weather conditions retard trade somewhat, but do not seem to cut off the big supply. The local market was so packed up with stock of all kinds every day last week that about all we can say for this week is that trade has been very dull. The demand could not come any way near consuming the consignments. Down town florists used thousands of violets and sweet peas in special sales at low prices.

WASHINGTON Business during the past week or ten days has fallen to a very low ebb and this condition, with a large supply of flowers, has caused prices to drop considerably. Carnations, roses and gardenias are in large supply and can be had at a very low figure, while violets and sweet peas, with the exception of the orchid-flowering variety, can be bought at less than $5 per thousand. Potted plants in all varieties are meeting with a fair sale, and the first of the Easter crop is now coming in. The present dullness is attributed in large part to the local legislation enacted and pending in Congress, a large portion of which is detrimental to the interests of good business.

PHILADELPHIA NOTES.

Adam Graham of Cleveland, O., has bought a Spanish castle in the Isle of Pines. John Walker of Youngstown, O., has bought twenty acres in the same island. What do you suppose these two buccaneers are up to anyway?

Berger Bros. are now comfortably established in their new quarters at 1225 Race street. This new move gives them increased facilities in many ways and they will be pleased to welcome all their old friends, and are prepared to take good care of many new ones. The firm is composed of Harry and John Berger—both live wires in the business and men whom it is a pleasure to know.

Omaha, Neb.—A boy of 17 years has been arrested charged with breaking into the flower store of John Bath and the larceny of $75.

Obituary

Melvin Folsom.

Melvin Folsom, for some years engaged in the florist business, died at his home in Rochester, N. H., on March 10, after a long illness. His age was 56 years.

Byron L. Smith.

Many florists of Chicago will feel a sense of personal loss in the death of Byron L. Smith at his winter home, 2140 Prairie avenue, Chicago, March 22nd. He always responded when the horticultural interests of Chicago and vicinity were concerned, and from his magnificent estate at Lake Forest, his summer home, have come many attractive exhibits for flower shows in Chicago and Lake Forest. Briar Hill is one of the finest of the north shore estates.

The Late Edward Meehan.

The death of Edward Meehan, which was briefly announced in last issue, removes a remarkable man in many ways. He was one of the three brothers, Thomas, Edward and Joseph Meehan, and while not in the limelight like Thomas or Joseph, he was the great worker of the outfit and practically ran the nurseries. He was a fine propagator and grower and had a keen gift for detecting variations and improvements. It was from his close observation and superior discernment that many of the best new introductions of the firm were due and the world at large owes him a tribute of honor. He came from England when he was 14 and was hard at work in the nursery business for some 65 years—in fact he was practically in harness until his death at the age of 79. Thomas was the scientist and writer and gatherer of fame: Joseph was office chief; and Edward the field general—a great outfit; two of whom have now been gathered to their fathers, full of years and honors, but leaving worthy successors to carry on their work. Joseph still remains with us, hale and hearty and pretty active.

NEWS NOTES.

Ainsworth, Ia.—Arthur Peterson has bought the Melinsky greenhouses.

Chambersburg, Pa.—A new greenhouse building establishment has been formed by Hiram Plasterer, with office on Baltimore avenue.

Baraboo, Wis.—E. T. Ross has purchased the Wm. Peck greenhouses on Fifth street and will remove them to his place on Eighth street.

Sioux City, Ia.—C. G. Johnson has purchased the Peter Reard farm for his two nephews, who will conduct a greenhouse and truck gardening business.

Southington, Ct.—The greenhouse business of Olsen & Lundin, which was placed in the hands of a receiver some months ago, has been purchased by Irving Michael, of Wallingford.

St. Joseph, Mo.—The Kelsey Nursery Company are about to erect a frost-proof storage building, of brick and tile, 140 x 180, close to the Rock Island R. R. tracks. A brick office 20 x 30 will be attached. The cost will be between $20,000 and $25,000.

SOILS AND FERTILIZERS.

(Abstract of a lecture by Prof. H. J. Wheeler before the Massachusetts Horticultural Society.)

"The types of bacteria, fungi, protozoa, and other beneficial or injurious organisms in soils are affected," said Mr. Wheeler, "by the amounts and relations of mineral and dead organic matter present and even by the chemical reaction. Organic matter is highly essential in giving to the soil proper tilth, in improving its physical aeration, its water-holding capacity, and its power to absorb and hold plant food. Soil is no longer looked upon as a lifeless mass, but as teeming with low forms of plant and animal life.

"It is impossible," said Mr. Wheeler, "to follow all the lines of agricultural investigation. One of the most important was the establishment of the fact that legumes and certain other plants assimilate nitrogen directly from the air. This was shown by Hellriegel and his associates in Germany, to be due to the intervention of micro-organisms which grow on the roots of the plants and cause the development of the peculiar nodular growth.

New Theories Concerning Soils and Nutrition.

"Many new theories concerning soils and plant nutrition have recently been advanced. Among these is the idea that the chief function of fertilizers is to improve the physical condition of soils, also, that fertilizers are not needed as plant food, on the supposition that the minerals represented in the soil are present in sufficient quantity to be dissolved and replenish the soil solution rapidly enough to meet the plant requirements. It has also been claimed that poisonous substances develop in the soil as the result of the decomposition of decaying vegetable matter, and also in the shape of excreta from the roots of plants.

Fallacious Ideas.

"The idea that fertilizers are useful chiefly for improving the physical condition of the soil has since been abandoned. It has also been shown in an article published within a few weeks by former director Hall of the Agricultural Experimental Station of Rothamsted, England, that at least wheat and barley plants after growing in the soil for sixty years continuously have not thrown off toxic excreta capable of accumulating in the soil. It is stated by Mr. Hall, as a result of these and further experiments by him, that fertilizers have been returned to their old category as plant foods and that the theories advanced by the Bureau of Soils in Washington concerning them, are fallacious. He has also shown that where mineral fertilizers are added to the soil in excess of the immediate needs of the plants, they are stored in such forms as to be subsequently highly available. It was even found by Hall that barley throve better in extracts of soil in which barley had been grown for sixty years than in artificial solutions containing the same quantities of mineral ingredients. This he attributed to the possible benefit of small amounts of soluble organic materials, which had accumulated in the soil.

Some Rhode Island Experiments.

"In the experiments which I conducted in Rhode Island, where about fifteen different kinds of plants were each grown on a separate area for two successive years, with like fertilization, it was found that when onions followed the third year on all of the areas, the yields ranged from 12 to 412 bushels per acre according to crop which had preceded. The continuation of this work by Director Hartwell has shown that buckwheat was able to thrive better where onions had failed than elsewhere. These results show that in the plan for treatment and fertilization, one must take cognizance of the previous manuring, fertilization, and cropping of the land as well as the kind of crops which are to follow. The fact that certain poisonous substances develop in soils was long ago recognized in Holland by Mulder, in England by Voelcker, and in other places in Europe by still other investigators. It was even found more than twenty years ago in connection with the experiments in Rhode Island that ammonium sulphate, which had proved at Rothamsted, England, to be a good fertilizer, was immediately poisonous on the highly acid Rhode Island soil. After liming, it became, however, highly effective.

"Even nitrate of soda, highly esteemed as a fertilizer, may seriously injure the physical condition of certain soils and such injury is capable of being corrected upon the application of sulphate of ammonia. Such facts, as well as the possible loss of nitrates by drainage, illustrate certain advantages of ready-mixed, commercial fertilizers in which the nitrogenous ingredients are introduced in several forms so that losses from leaching may be avoided and so that the supply necessary to plants may be continuous throughout their growing season.

So-Called Plant Poisons.

"Certain of the so-called plant poisons, which develop in soils, appear to be both food and medicine for certain other groups of plants. An instance of this is afforded by the fact that under conditions where onion plants will die, cranberry plants thrive better than if the soil is corrected so as to meet the needs of the onions. Similarly mignonette cannot be grown on soils which are nevertheless ideally adapted to Silene orientalis, aster and

many other of the flowering plants.

"Recent investigations at the Indiana station show that in some cases where the tilth of the soil had been improved by the introduction of vegetable matter, and where there is an abundant supply of ordinary plant food, crops failed to thrive because of the presence of aluminum nitrate. It was shown, however, that upon the addition of lime, the alumina is precipitated, the nitric acid combines with lime, and the plants then thrive splendidly.

Raw Rock Phosphate.

"Certain speakers and agricultural writers in the Middle West have designated fertilizers as 'stimulants,' thus creating the false impression that their effect is but temporary and that the after-effects from their use are bad. This is absolutely misleading to the public and is nothing short of an attempt to create prejudice without the least justification for doing so. In the Middle West much attention has been called to raw rock phosphate and speakers from that section have even come into New England and recommend its general use here. It is of special interest, therefore, to note that the director of the Ohio station as well as the investigators at the Tennessee station, who are close to the source of raw rock phosphate, hold that superphosphate is more economical for use in their states than the raw untreated material. Results at the Rhode Island station in the earlier years of the experiment, when like money values of different phosphates were used, further substantiate the results as reported from Ohio and Tennessee.

"Experiments by Loew show that it is sometimes of great importance to add lime to soils for the purpose of counteracting the effects of an unusual amount of magnesia. There may also be cases where the addition of magnesia to a soil may be beneficial on account of the lime being in excess. The requirements in these particulars vary with different plants.

Usefulness of Soil Disinfectants.

"Interest has been awakened in the subject of the treatment of soils by the fact that carbon disulphide, toluene and various other soil disinfectants have been found to be highly beneficial. According to the results at the Rothamsted Experimental Station, this is due in some cases to the destruction of microscopic forms of animal life which feed upon the useful bacteria. When these animals are destroyed the bacteria increases enormously with marked benefit to the soil. Investigations in Europe and at the Agricultural Experiment Station in Rhode Island show that sodium, if present in fertilizers, whether as nitrate of soda or as common salt in association with muriate of potash and kainit, is of use to certain plants if the supply of potash is insufficient, whereas there are cases of plants which show but little, if any ability to benefit by it.

"Recent utilization of great waterfalls for the generation of powerful electrical currents has made it possible to combine the gaseous nitrogen of the atmosphere in such a way that calcium cyanide, calcium nitrate, ammonium sulphate and ammonium nitrate are now coming on the market as plant foods. The nitrogen of the air surrounding the earth, which could formerly be utilized through the aid of leguminous plants, may now, therefore, be made our priceless possession for the nutrition and maintenance of the human race."

FLORICULTURE DAY AT AMHERST.

Section 4, which is devoted to floriculture, had a busy day, with every period taken by a lecturer. Professor A. H. Nehrling, who has but recently taken up his work as head of the floriculture department at this college, was the first speaker. His subject was "Opportunities in Floriculture." In the absence of Harry A. Bunyard, Asa G. Kinney of Mt. Holyoke College, spoke on Mushroom Culture.

T. D. Hatfield of Wellesley was the concluding speaker of the morning, and his subject was Raising Plants from Seed. He brought out numerous valuable points in regard to the probable effects of pollination and acclimatization of plants grown from seeds. Eber Holmes was the first afternoon speaker, his subject being Outdoor Rose Culture. He first discussed the varieties of roses best suited for outdoor planting and the kind and type of plants which should be bought. Factors of location, soil, methods and time for planting, methods of culture during the growing season, care during fall and winter were treated each in its turn. He discussed the different insect pests and fungus diseases, and methods of combating them. In closing he called attention to the profits which may be realized in growing outdoor roses, as well as those grown in greenhouses. E. J. Canning gave a general practical talk on "Methods of Improving Plants." He discussed the three principal factors of amelioration of plants, cultivation, selection and crossing.

The concluding talk of the day was by Professor Nehrling on Glass Houses in the Middle West. He called attention to the fact that architectural features as well as details of construction must be considered in planning conservatories for park or private use.

There were over 1000 visitors who attended the third session of Farmers' Week at M. A. C. in spite of the weather.

W. H. HATFIELD.

LEMON OIL CO'S STANDARD

SOLUBLE IN WATER

NO ODOR INSECTICIDE NO POISON

Guaranteed under the Insecticide Act, 1910. Serial No. 321

Save your plants and trees. Just the thing for Greenhouse and outdoor use. Destroys Mealy Bug, Brown and White Scale, Thrip, Red Spider, Black and Green Fly, Mites, Ants, Insects on Rose-bushes, Carnations, etc. without injury to plants and without odor. Used according to directions our standard Insecticide will prevent ravages on your crops by insects.

Non-poisonous and harmless to user and plant. Leading Seedsmen and Florists have used it with wonderful results.

Destroys Lice in Poultry Houses, Fleas on Dogs and all Domestic Pests. Excellent as a wash for dogs and other animals. Relieves mange.

Effective where others fail.

½ Pint - - 25c; Pint - - 40c; Quart - - 75c
½ Gallon, $1.25; Gallon, $2.00; 5 Gallon Can, $9

Directions on every package

PLANTLIFE

PLANTLIFE has several advantages over liquid insecticides on the market. Containing refined tobacco dust it can be used to mix with the soil, acting as an excellent fertilizer, at the same time destroying worms and insects in the ground before they have a chance to reach the plant.

PLANTLIFE has been found very effective in ridding greenhouses of insects by dusting on plants. When dry, use for dusting about once a week.

Put up in bulk for greenhouse men; in packages for retail trade.
Bag of 100 lbs. $3.50.
Let us quote you prices in quantity.

The Plantlife Company, 251 East 66th Street NEW YORK, N. Y.

Cocoanut Fibre Soil

This is the Real Nature's Humus. Put it on your lawn this spring. Don't let it burn up, or stand all summer hose in hand.

Order now in 100 lb. bags.

20th CENTURY PLANT FOOD CO.
27 & 29 OCEAN ST., - - BEVERLY, MASS.

Aphine

The Insecticide that kills plant Lice of every species

The Recognized Standard Insecticide

W. N. Craig writes in Florists' Review (March 5th, 1914): "Scale on greenhouse plants is not easy to get rid of, as doses which are sufficiently strong to kill the scale will usually disfigure the plants at the same time. I have found APHINE a first-class remedy for scale, and if you will apply it according to directions you will kill and loosen the scales, although they will not fall off, as will some other pests."
It will only require the hose to wash off dead scale.
A remedy that is efficient in destroying scale, will destroy green, black, white fly, red spider, thrips and mealy bug.

$1.00 per quart—$2.50 per gallon.

FUNGINE will destroy mildew, rust and bench fungi.
75c. per quart—$2.00 per gallon.

VERMINE will destroy root maggots, eel, wire and cut worms in the soil.
$1.00 per quart—$3.00 per gallon.

SCALINE will destroy San Jose and all hard scale and red spider on fruit and ornamental trees and bushes.
$1.50 per gallon—10 gallons $10—50 gallons $37.50.

NIKOTIANA—a 12% nicotine for fumigating over small lamps or by painting on steam pipes.
$1.50 per quart—$4.50 per gallon.

For Sale by Seedsmen.

PEIRCE PAPER FLOWER POT

A waterproof paper pot.

Does not fold up or come apart.

Plants in transit retain moisture within the plant ball instead of its being absorbed by the packing, insuring their traveling long distances in perfect condition.

Received a Certificate of Merit from the Society of American Florists and Ornamental Horticulturists, Minneapolis, August, 1913.

Only paper pot ever so recognized.

Ask your seedsman or supply house. If they do not keep them, send direct.

Made in Standard sizes, 2 inch to 6 inch inclusive.

Samples furnished free.

FIRES.

Baldwin's, N. Y.—George T. Schunneman's boiler shed was burned down on Friday, March 20.

Mt. Zion, Pa.—The greenhouse of Ezra Rozelle was partially destroyed by fire March 13th, causing a loss of $1000; partially covered by insurance.

Bayside, N. Y.—A greenhouse occupied by John Hart at 7th street and Warburton avenue, was destroyed by fire on the night of March 19. The loss is estimated at $2,000 on the greenhouse and $2,000 on the contents.

Springfield, N. J.—A large fire occurred on March 17th, at the F. & F. branch of the American Nursery Co., in Morris avenue. The loss, estimated at between $10,000 and $15,000, consisted of a large barn, six valuable horses, five wagons, ten sets of harness and contents of barn. The fire was discovered shortly before ten o'clock by Emil Stemel, an employe of the nursery. It is thought it had been smoldering for some time before it was discovered. Great credit is due the Springfield and Milburn fire department for confining the fire to the barn.

PATENTS GRANTED.

1,090,267. Device for Cutting Grass. John H. Berry, Newton, Ill., assignor of one-fourth to James A. Bowles, Villa Grove, Ill.

Short Hills, N. J.—Thomas Jones is suing the Public Service Gas Co. for $6,000 for loss of orchids killed by gas escaping from a broken pipe last year.

JERSEY CITY, N. J.

The President Points Out Some Cypress Points

IF I could take you out to our lumber piles and throw down a few boards and point out blue sap and white sap in the cypress, and then show you cypress with the shakes and cypress that is pecky, and then take you into our wood working mill and show you the kind of cypress we were actually running through the machines for our greenhouses, you would then begin to appreciate what a really good enduring house such as we make, is worth every cent we charge for it. You would begin to get a line on the kind of materials we use and the careful way they are handled.

You would see us sifting out and discarding sappy parts. You would see our foreman refusing to pass rough netted parts. You would see on every hand inspections of materials from the raw to their finished state. You would hardly begin to wonder how we can hand so good a house for so reasonable a price.

Put this down in your memory box that entirely sap free "cypress" is next to impossible to buy nowadays, just as is knot free or clear pine. The only way you can get sap free materials, is to get materials from cypress with their objectionable sappy parts cut out. There's no greenhouse concern in this country today, that sells materials that their cypress is any freer from sap than ours.

The other day I overheard our wood working foreman saying, "The President is a regular crank about the cypress that goes into the materials." He's got the right idea about me and I'll see to it that he keeps his idea right.

If you want a house built of materials put on by men with the right idea back of them, from one end of the house to the other, we have a notion you will find a talk with some one of us to your advantage. Write us or, "we go anywhere for business."

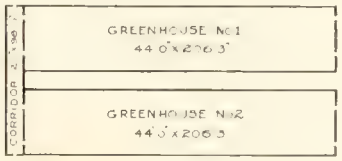
Three Growers Tell How Their Lord and Burnham Houses Stood the Snow and Blow

JAS. HAMILTON, Mt. Washington, Md.

I thought you might be interested to know that we have just emerged from the most severe Cyclonic Storm that ever visited this section and while trees were blown down, windows blown in in dwellings, houses twisted, etc., all around us, the two houses 42 ft. 6 in. x 100 ft which we got from you and erected in 1911 and 1912 came through without as much as a single cracked glass. When you consider that this storm lasted for about 30 hours and for about 8 hours of that time the wind obtained a velocity of 70 to 75 miles per hour, it speaks volumes for both your material and our construction.

Yours,



Jas Hamilton

STEVENSON BROS., Towson, Md.

Last Sunday night and all day Monday our L. & B. houses were subjected to a cyclone of wind and snow. We thought at times that we would lose all of our glass. The wind at times reached a velocity of 80 and 90 miles per hour. Fortunately we lost less than two dozen lights and the frame work was as rigid as a stone wall during the gale. The worst by far, we have ever experienced, as our houses are in very exposed place. Their resistance to the storm was remarkable.

Yours very truly,

Stevenson Bros

HULL BROS., Waymart. Pa.

Perhaps it may interest you to know that we are very highly pleased with the greenhouse we got from you. We have a fine crop of lettuce in it, which is selling rapidly at good prices.

Other stuff is growing nicely there, too. We used muck for soil there, and are quite sure it is the very best for greenhouse use.

The house is very attractive, and we feel that it is a great credit in every way.

During the awful storm of the 1st inst. the greenhouse stood as quiet as a rock, although it stands in a very windy place. This same storm unroofed and demolished buildings for our neighbors too. The boiler pleases us, too, because it was no trouble to keep the temperature even too high, when 15 degrees below zero, and wind blowing a gale at midnight. It will not burn culm well, but we think that it is practically impossible without some sort of a blower, which we expect to install before another season. Burns buckwheat coal well. Will say that we are very much pleased with the way you dealt with us, and with the quality and style of the material you sent. We hope to build more houses soon, and will not forget you then.

Thanking you and with best wishes, we are,

Yours very truly,

Hull Bros.

BODDINGTON'S QUALITY CANNAS

F. O. B. NEW YORK OR CHICAGO

A SHORT STORY

Occasionally you hear a "KNOCK" regarding our Cannas, but when you trace and run it down, you will find that the "hammer is out" from the fellow who has Cannas to sell.

During the past ten years we have sold over 5,000,000 Cannas and our trade for this stock is increasing every year; doesn't look as if our Cannas were poor or untrue, does it?

This year our growing stock was inspected by Mr. Boddington personally. No, we don't grow them ourselves in New York city; they are contracted and grown for us by— (To be continued in our next.)

Also, we were the first to popularize the Canna and to put King Humbert within the reach of all. We put the "Can" in Cannas and we are going to keep it there.

WILLIAM SAUNDERS. 3½ feet. 60 cts. per doz.; $4.75 per 100; $45.00 per 1000.

FOR FULL DESCRIPTIONS SEE OUR CATALOGUE—MAILED FREE.

We are the largest handlers of Cannas in the world. Our prices on Cannas will bear comparison with any house in the Canna business.

Our Cannas are true to name—two and three and sometimes four eyes—are sound, dormant, and are packed 250 in a box. Two can be "cleated" together and shipped as one. One box of 250 sold at thousand rate; it is cheaper for you to buy a box of 250 than 200 at 100 rate. Write for special prices on quantities.

If any Cannas are not found here, it may be understood that they are superseded by the foregoing. If selection is left to us we will substitute or send only the best for all purposes.

Bird's Nest Ferns

Asplenium Nidus-Avis, Largest Stock in America. All sizes from 2½-in. pots to 4-in. pots, $25.00 to $50.00 per 100. Flats of Seedlings, 200 plants to a flat, June and July delivery $5.00 per flat.

Flats of **Mixed Ferns,** June and July delivery, about 200 plants to a flat, $2.00 per flat.

Box Trees, bushes, 25c. to $1.00 each. Elegant pyramidal specimens, $2.50 to $25.00 per pair. Every one a bargain.

A. M. DAVENPORT, WATERTOWN, MASS.

Miscellaneous Stock

A few items every florist needs. For complete list send for catalog No. 5. Send us your list of wants.

CALADIUM ESCULENTUM—Good bulbs with sound centers: 5 to 7 in. circumference, $2.00 per 100; 7 to 9 in. circumference, $3.00 per 100; 9 to 11 in. circumference, $6.00 per 100.

BEGONIA, TUBEROUS ROOTED—Bulbs large from one of Belgium's best growers: Single Separate colors, $2.50 per 100, $22.50 per 1000; Single Mixed colors, $2.25 per 100, $20.00 per 1000; Double Separate colors, $4.50 per 100, $40.00 per 1000; Double Mixed colors, $4.00 per 100, $35.00 per 1000.

GLOXINIAS—Fine sound bulbs in separate colors, $4.00 per 100, $35.00 per 1000.

RHODODENDRONS—A fine lot of hardy sorts, in plants full of buds and with good foliage, 18 in. high, 8 to 12 buds, $9.00 per doz.; 24 in. high, 12 to 14 buds, $12.00 per doz.

AZALEA MOLLIS—Bushy, well budded plants, 15 to 18 in. high, $35.00 per dozen.

DUTCHMAN'S PIPE Aristolochia Sipho, tops 1 ft. long, a grand vine for shade and cold exposure, $3.50 per dozen, $25.00 per 100.

MAGNOLIA—Fine well budded plants, with ball of earth, burlapped; all varieties, White, Pink and Red, 4 to 5 ft. high, $1.50 each. Stellata or Halleana, early star shaped white, 2½ to 3 ft. high, at $1.50 each.

ENGLISH IVY—Two or more shoots, 3 ft. long, $12.00 per 100.

The Storrs & Harrison Co.

Painesville, O.

HELIOTROPE, fine short bushy plants, 2¼ in., $1.75 per 100; $15.00 per 1000.
COLEUS, Golden Bedder and Verschaffeltii or mixed R. C., 60c. per 100; $5.00 per 1000.
LOBELIA, Katherine Mallard, dwarf double R. C., $1.00 per 100; 2¼ in. pot, $1.75 per 100.
FUCHSIAS, 2¼ in. pot, $1.75 per 100; $15.00 per 1000.
FEVERFEW, Little Gem, $2.00 per 100.
VINCAS, 2¼ in. pot, $2.00 per 100; 3 in. pot, $4.00 per 100; 4 in. pot, $8.00 per 100.
AGERATUM, 2¼ in. pot, $1.50 per 100; $12.00 per 1000.
ASPARAGUS SPRENGERI, 2¼ in. pot, $2.00 per 100; 3 in., $3.00 per 100 strong.
ASPARAGUS PLUMOSUS, 4 in. pot, $6.00 per 100 strong.
DRACAENA INDIVISA, 4 in. pot, $8.00 per 100.
ENGLISH IVY, R. C. $1.50 per 100.
ACHYRANTHES LINDENII, 2¼ in. pot, $1.50 per 100.
TRADESCANTIA, in 3 varieties, R. C. $1.00 per 100.

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

LIBRARY OF THE NEW YORK BOTANICAL GARDEN

Care of Sweet Peas

To make sweet peas hold out as long as possible, bear in mind that they are naturally cool, moisture loving subjects and no attempt should ever be made to force or coddle them. There are few days after April comes in when the ventilators cannot be opened for at least a few hours daily. Growth is now rapid under glass, and unless the plants are looked over frequently, there is danger of the haulm becoming bent which will spoil the flowers for sale purposes. Sweet peas should be watered so as to keep the soil always in a moist state. When the flowers are picked give a good syringing. Plants flowering should be supplied with liquid manure once a week, or in place of this have a top dressing of cow or sheep manure hoed in before watering. A night temperature of 50 degrees will be about right.

Dracaena indivisa

To have vigorous stock of this unapproachable vase plant give it good attention. Seed that was sown early in the year, when large enough should be potted into small pots, this will hold them until they can be planted out in the open ground, which is better then growing them under glass during the summer. Use a compost of fibrous loam three parts, well-rotted cow manure and leaf mold one part each. Give them a light warm house so as to push them along and exercise caution as to watering. Do not keep in too low a temperature. About 60 degrees will grow them on in good shape. On all bright days give them a good syringing which helps to keep them clear of thrips.

Overhauling Poinsettias

Do not wait too long before overhauling the poinsettias. Old plants that have been resting since the new year can now be started, shortening back the stems and repotting in as small pots as the roots will permit. Remove all stock plants to a well-lighted bench where there is a temperature of about 65 degrees at night. Give them a good soaking of water and then keep rather on the dry side until the plants start to break and they will soon produce a quantity of fine cuttings. When cutting in, you can use the old-wood cuttings; by placing in a warm frame and keeping the temperature from 65 to 70 degrees, in about three or four weeks they will be rooted. Pot them into 3-inch pots, using a good loam to which has been added one-fourth of rotten manure. Cuttings can be rooted at any time from now until the middle of August. Those propagated in July and August are fine for making up pans, but the earlier ones will give the finest bracts for cutting.

Sowing Palm Seeds

There is many a grower who has some room to spare and could to advantage raise some palms from seed. It is during the spring and summer that the greater number of shipments arrive. The seeds can be sown in a bench, flats or pans where they can have a bottom heat of 75 to 80 degrees. When planting palm seed remember that they will not come up in a couple of weeks like most seeds. Palm seed germinates very irregularly and the germinating period varies according to the variety, anywhere from four weeks to six months. Leaf mold, sand and loam in equal parts, make a good compost for any variety. Give them a house with from 65 to 70 degrees at night. They will germinate better if given a closed sash where they will have a bottom heat of from 75 to 80 degrees. As the hot weather comes on a mild-hot bed makes an ideal place. When they show one or two leaves pot off singly into 2-inch or 2½-inch pots.

Transplanting Primulas

The earliest sown primulas are now nice little plants with several leaves. Timeliness in transplanting is a point principally to be observed in growing primulas. Use a compost of equal parts of new soil and leaf mold, with a little well decayed cow manure. Give a light shelf or bench where the temperature will not run over 50 degrees at night. These plants will grow from this out so in about six weeks they should be ready for 2-inch pots using a compost of fibrous loam four parts, well rotted cow manure and leaf mold one part each. Give air daily whenever possible, but always avoiding cold draughts and do not try to force them. They are benefited by a light shading during the hottest hours of the day. Never let them suffer for the want of water and syringe on all fine days. A comfortable spacing out once a week will give them more room to grow. Look every ten days or fortnight for aphis, and where they are seen fumigate immediately.

Preparing Beds and Borders

The necessity of attention to all beds and borders, on the opening of spring, is so evident that it is scarcely necessary to urge it. All beds and borders should now have a good cleaning and be put in the best order. Give them a good coating of well-rotted manure which can be dug in lightly. All hardy herbaceous perennials should be uncovered and lightly worked over and also manured, as these plants are rank feeders.

Mr. Farrell's next notes will be on the following: Care of Seedlings; Chrysanthemums; Alocasias; Orchids; Young Marguerites.

As an Advertising Medium Horticulture has NO superior. Because they ALL read it. And they read it ALL.

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur Ružička

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr Ružička. Such communications should invariably be addressed to the office of HORTICULTURE.

Selection of Sod for Next Fall

Now will be the time to select the plot of ground that is to furnish the sod heaps next fall. Select a piece that has a good sod on it, and then as soon as possible spread a good coat of manure over the field, and then keep the grass cut. It is not best to rake it off. Much better results will be had where the grass is allowed to lie there after it is cut, thus making an additional coat of fibre that is so badly wanted in greenhouse soils. If the grass is kept cut short all through the growing season it will produce an enormous quantity of roots, and it is these that hold the earth together and make the sod. A little bonemeal may also be applied every once in a while, if the season is wet so that the grass will take it. Do not think that it is wasted if applied to grass land. There is only one way that manures applied to a grass field are wasted and that is where it is on a hillside where the soil will wash. Of course under such conditions it would not be advisable to apply the manure as a good deal of it will be lost in the first heavy rain that comes along. Where the ground is almost level and the water will not run into the creek, but will slowly sink into the land, the grass roots will quickly catch all the manure that may be washed out. These roots will hold this plant, and as soon as warm weather comes will turn it into a heavy coat of grass. This if cut and allowed to lie will help thicken the sod. It may seem a waste to allow a perfectly good crop of hay go to waste, but unless the hay would be of exceptional quality, and very high priced, it will pay to simply mow it down. Where manure is plentiful this may be used instead of the cover of grass cut green, but we think there are a few places indeed where there is a surplus of this much needed plantfood.

Turning Over the Sod Heaps

Even with the rush of the spring work, it will pay in the end to take a little time, and turn all the sod that is to be used for the houses this summer. The manure that has been put in will be mixed with the soil much better and as a result it will be in much better condition at planting time. If all the turning is left until planting time, there will be some places in the benches that will be all manure and then there will be places where there will be none at all. And what is worse, the soil has been packed so between the layers of manure that all the water and plant food that has been leaching out has managed to run off to one side and out of the heap. This would be avoided if the manure was mixed with the soil as it should be. Therefore it is well to turn the heaps over, and break up the sod and mix the manure well with it. If you can, add some very coarse bone. This will take time to dissolve and will be about right when the soil is put into the benches. With the ever-increasing expenses, no time must be lost between crops. Run the old plants as long as they are paying, and then lose as little time as possible in getting the young plants to produce flowers. This must not be overdone, however, for too much summer forcing means dead plants in the winter when the prices are higher, although the margin of profit may not be much greater, for the summer expenses are much smaller.

Syringing

With the warmer weather will come the spider, if allowed to go unchecked. Syringe the plants as often as possible using a good force and clean water, for if the water is taken from ponds or similar places there may be a little sand in it, and this will tear the leaves all to pieces. Water alone will do this if the hose is handled a least bit carelessly. See that the water reaches well underneath the leaves, and that the plants are syringed more from the inner walks toward the front of the benches, then taking only the one row from the front. If the plants are syringed in this way there will be little danger of getting the plants too wet on the north side of the benches.

Liquid Manure

If the roses are growing at all they will take as much of this as it is possible to give them. It can hardly be made too strong for the plants are well rooted by this time, and will take it without harm if they are not too dry at the time it is applied. This can be overcome by watering with clear water just before the manure water is applied, and it will save a good deal of the liquid as well as protect the plants. If this is done there is no need to apply too much of the liquid manure — just enough to soak the soil with it. See that there is not too much nitrate used, or other chemical fertilizer. Use cow manure alone with a little bonemeal dumped in, or a little soot. Where two sets of pipes are used it will be a very easy matter to water with clear water and then follow with the liquid manure. We are sure growers that have been using the one set only and have installed the other set will say that they cannot see how they ever got along with one set before. One good thing about two sets of pipe is that you may be syringing in one house, watering in another, and using liquid manure in the third. This is impossible with one set and where the strictest economy is practised it will pay to have the two sets. The liquid manure pipes should be of good size so that they will not be very likely to get stopped up every few minutes. Time is worth a good deal of money, and time saved means money saved, and more.

Cymbidium insigne

This handsome cymbidium is still quite rare in cultivation and no doubt to many still unknown. It was introduced some eight years ago from Annam, where it was found growing along ravines in sandy soil at an elevation of 4,000 to 5,000 feet. In shape the flowers resemble those of C. Lowianum, but the color is a beautiful pearly pink throughout, the inside of the lip and the column being in addition blotched and spotted with rich carmine. The scape grows erect to a height of from three to four and a half feet. The leaves are long and narrow and the pseudo bulbs rather small and nearly round. The blooming season is April and the flowers will remain in perfection for many weeks.

Here we certainly have a splendid orchid for decorative purposes, one which would sell readily if it could be had in quantity, which I hope will be soon. It requires a little higher temperature than C. Lowianum and its allies, and a lighter and more open compost. It will be found to do well with the cattleyas.

M. J. Cope

How We Might Improve

Conditions in New York for florists are better than in most parts of the civilized world. The same thing is true for the grower, if we did not spoil it ourselves. The grower who grows the stock, the grower who wants to sell the stock, does not always look for the right channel as an outlet, and the retailer who aims to keep up to a certain standard does not help sufficiently that the grower may do that. Not so much because he does not want to, but because he never thought of it, that where one alone is too weak, two might be strong enough. The public are today so far advanced as flower buyers, that when they have guests they must have flowers on their tables, in their rooms, wherever their place can be improved with flowers. Statistics show that one-third of the flowers sent by the grower to the wholesale market are sold far below the average price. On the other hand it is plain that the retailer who buys the high-grade stock at full prices has thus to pay for the stock which is left over. But is it a necessity that stock be left over? By no means. Fifty out of every one hundred buyers make it a custom to patronize two florists, one of whom keeps a high-grade stock, and sells at the standard prices. But when they merely need cut flowers for the house, they go to places where they get this stock at prices often far below the wholesale value, so ridiculously low in fact, that a grower would blush if he knew how his stock was sold. Now, those people who buy their arranged flowers, centerpieces, bouquets or other arrangements from good florists would just as readily pay a fair price for their flowers if there were not someone calling to them, "We will give you *jonquils* at 19c. a bunch and we will give you roses at 25c. a dozen." These people must have flowers for their houses, not as a luxury, but as a real necessity. They are taught to have flowers as they are taught to have their clothes, as a necessity of refined living, and if they could be brought to realize how the florists' business and the growers' work is degraded, they would not know between the good and the poor florist. They would only patronize sound competition and buy from good florists only. Then, if they were not given a chance to learn what surplus is in the market, their business would go steadily to the general trade, which would reduce the leavings in the wholesale market, so that instead of one-third these leavings would not be one-tenth, which the wholesaler has to dispose of at such ridiculously low prices.

Business prospects for spring are very good. Business was never better. A few have done a smaller business than their average year and they begin to cry and other people cry after them, and they are so used to crying that they spoil the pleasure of having a good business for others. It is time to wake up and cheer up and take notice that a promising Spring is coming.

Max Schling.

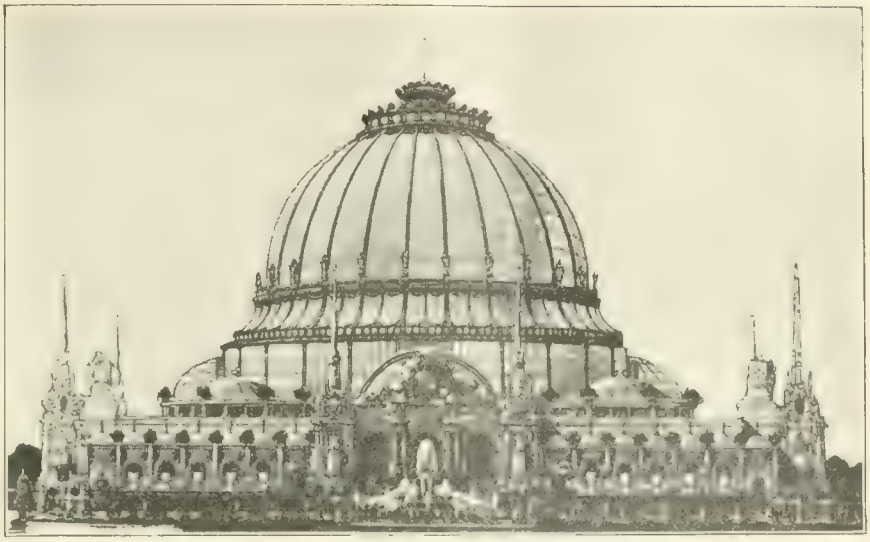
Boost Horticulture's Advertisers

This is our annual Easter number. Less pretentious than some of its predecessors, but circumstances this year seemed to favor the spreading out over several issues of the customary advertising support which made a large Easter number a possibility and, as our readers are aware, the present is our third "special" number in three weeks. The Easter season comes at the time when bustle and activities prevail in every department of the avocations in which HORTICULTURE's readers are engaged or directly interested. We all look for the activity and bustle to continue and grow lustily after the Easter awakening. The advertisers in this and the two preceding numbers are particularly interested in the immediate seasonable trade. They evidently believe that advertising in HORTICULTURE is the most direct route to a prompt and substantial revival. We ask our readers to do their part to demonstrate to these enterprising representatives of the profession, that their faith in HORTICULTURE was well placed. Send them your spring order and make it a good one.

Our friends in Washington



We would call attention to the notes which appear in our news columns relative to the work which the U. S. Department of Agriculture is undertaking, in securing information on the behavior of ornamental plants in all parts of the United States. This is a new phase in the regular work of the Department and the attempt should have the hearty cooperation of every one engaged in plant cultivation for ornamental purposes. This end of horticulture has thus far been given but meagre attention and the disposition now manifested is very gratifying, coming, as it does, just as the Agricultural Colleges and State Experiment Stations are also showing an interest in the advancement of floriculture and the development of ornamental gardening generally. The Department of Agriculture has done and is now doing much that is great and good for the health and sustenance of our people. But "man shall not live by bread alone." As our dear old W. R. Smith was wont to say, we must also "feed the esthetic soul of mankind" and the present broadening out of the Department's activities in this direction should receive all encouragement possible.

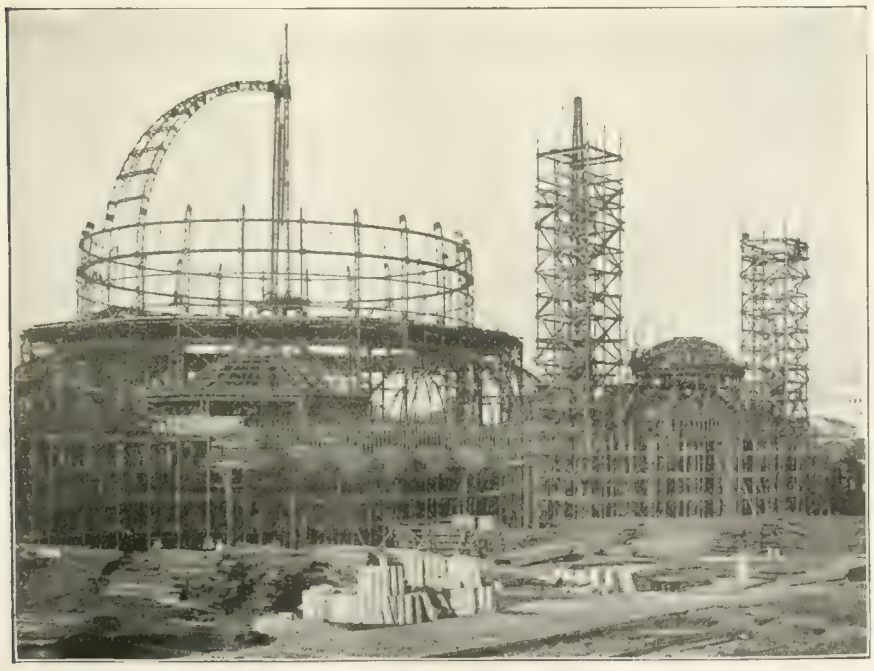
What "pull-together" will do

It is in order now to congratulate our New York friends on the complete success of their spring flower show. This happy consummation may be attributed to various causes but the main reason back of all other reasons was the hearty joint participation of trade and amateur interests which was brought about through the well-directed alliance between the Horticultural Society of New York and the New York Florists' Club. Lacking the enthusiastic support of either of these organizations the result would probably have been very different. Plans for an annual repetition are a natural sequence to this success and there appears now no good reason why a spring flower show in the metropolis may not be counted upon as a regular attraction each year. The solving of the great problem of years, so long regarded as insurmountable, is not only a great thing for the well-being of horticulture in and about New York but for other cities as well, furnishing incentive and stimulus and a wholesome lesson which will inspire confidence and courage to go in and win. Thus New York's victory will be far-reaching and we shall all, either directly or indirectly, share in the resultant benefit.

Panama-Pacific Notes

The query is often made "will the San Francisco Exposition" be ready on time?" For the information of our readers we are publishing this week two cuts—one showing the progress made in the Palace of Horticulture, which was made for the Chief of the Department, G. A. Dennison, when he left San Francisco on March 18, and the other made from the architectural drawings of the completed building. The Palace of Horticulture is 320 feet in its greatest width by approximately 700 in length and the dome, which is constructed entirely of steel and glass, is 185 feet high. It will be finished July 1, 1914. It is prominently located immediately to the left of the main entrance of the Exposition grounds and faces the South Gardens, which will constitute the main horticultural feature of the landscape-gardening departments. Surrounding the Palace of Horticulture, on the east, west and north, will be the Horticulture Gardens, in which will be installed the outside growing exhibits of the leading producers of the world. The Palace is divided into two sections, the conservatory section which will be arranged to accommodate plants requiring varying temperatures, from 45 to 80 degrees, and the section devoted to economic horticulture, pertaining to fruits and nuts and their derivatives, machinery employed in culture, etc., etc.

Palace of Horticulture When Completed



G. A. Dennison.

G. A. DENNISON.

The gentleman whose portrait appears herewith has already made many good friends in the eastern section of the country where he is now traveling as Commissioner for the Horticultural Department of the Panama-Pacific Exposition, of which he is Chief. Mr. Dennison is well experienced in his work having officiated in three or four previous World's Fairs and seems to be just the man for the position he fills. In New York where he attended the Flower Show and in Boston this week he has been in consultation with prominent growers and dealers and we understand that already large exhibits from various eastern specialists have been pledged for the big exhibition on the other side of the continent next year.

William Plumb.

Palace of Horticulture as it Appears Now.

We are in receipt of the information that the advisory committee of the Horticultural Department of the Panama Pacific Exposition met on March 27 and unanimously endorsed William Plumb for the position of Superintendent of Floriculture. The formality of appointment by Mr. G. A. Dennison, Chief of Horticulture, will unquestionably follow in due time. Mr. Plumb is well and favorably known among the horticultural fraternity and his selection for this important post will be universally approved.

CLUBS AND SOCIETIES

OYSTER BAY HORTICULTURAL SOCIETY.

The regular meeting of this Society was held on March 26. A letter was read from the National Association of Gardeners with reference to co-operation.

W. Robertson spoke on the growing of cinerarias and antirrhinums and Joseph Robinson on carnations. James Duthie also spoke on the growing of schizanthus and Mr. A. Patten on the growing of antirrhinums. A very interesting essay on dahlias was read by James Duthie and was greatly enjoyed as Mr. Duthie is a past-master on the growing of the dahlia. An invitation was extended to the members by the Nassau County Horticultural Society to attend a lecture on April 8, on "Home Gardens."

First prizes were awarded to Wm. Robertson for cinerarias and F. Petroccia for violets. Cultural certificate to John Devine for antirrhinums and honorable mention for stocks. Cultural certificate to Wm. Robertson for cinerarias and to James Duthie for fine collection of pot plants. The silver medals given by Fottler, Fiske, Rawson Co., of Boston were duly presented to James Duthie and John Sorosick.

The dates for the shows were set as follows: Summer show, June 18; Dahlia show, Sept. 30 and Oct. 1; Chrysanthemum show Oct. 30.

W. Robertson will read an essay on Mushrooms at the next meeting, April 22. Prizes at the April meeting will be for 3 lettuce, 1 pot campanula, any variety; 6 tulips, any variety.

F. KIRKMAN, Secy.

A GREENHOUSE GATHERING.

Some time ago at one of the meetings of the Buffalo Florist Club an invitation was extended to the members and also to all fellow florists by S. A. Anderson to spend a short time in inspecting the greenhouses on Elmwood avenue. This took place on Sunday, the 29th, and a delegation of sixty turned out.

It must be said that the stock in those houses looked in the pink of condition and the Easter stock will be immense. There are genistas, azaleas, Giganteum lilies, hydrangeas, Hybrid roses, Ramblers and Baby Ramblers and any amount of spirea and bulbous stock. A short meeting was called to order by President Eiss, A committee was appointed to draft a resolution on the death of Charles Christensen; S. A. Anderson, Louis Neubeck and W. A. Adams being appointed. Mr. Anderson, being called upon for a few remarks, stated that he appreciated the visit. Lunch and cigars were served by the Streit waiters and Joe Streit was all-around superintendent. A very enjoyable afternoon was spent and a hearty vote of thanks extended to Mr. Anderson for his kind hospitality.

On April 21st, the regular meeting will be held at the club rooms, when President Dunbar of the Rochester Club will give a stereopticon talk on tree culture and in addition Mr. Gillis will show some interesting slides on park views in and about Rochester and Buffalo. Every member and fellow florist is urgently requested to attend and to make this a record breaking meeting. The membership committee are scheming out a new initiation which will be used some time in May.

BOSTON LADIES MEET.

The ladies of the members of the Gardeners' and Florists' Club of Boston, to the number of thirty, were guests of Mrs. W. W. Edgar at her home in Waverley, Mass., on Wednesday afternoon, April 1. They were most hospitably entertained and had a glorious time getting better acquainted and talking over plans for the reception of visiting ladies at the S. A. F. convention next August. President Kennedy of the Gardeners' and Florists' Club was the only gentleman present, but his courage was good and he made a nice little speech to the assembled ladies.

SOCIETY OF AMERICAN FLORISTS

Department of Plant Registration.

Public notice is hereby given that Chas. Rathjen, 813 Center Street, Janesville, Wis., offers for registration the Antirrhinum described below. Any person objecting to the registration or to the use of the proposed name, is requested to communicate with the secretary at once, failing to receive objection to the registration, the same will be made three weeks from this date.

Raiser's Description: A seedling of unnamed parents. Growth free and vigorous, about three feet high. Stems very stiff and wiry; does not require staking. Foliage dark green and heavy, requires no disbudding. Flowers larger than Ramsburg's "Silver Pink," wide-open, and slightly waved. Color: The entire flower is pink, about the shade of "My Maryland" rose, excepting at the extreme base, which is wine color and a yellow spot at the lips. It is not affected by aphis.

Name: Janesville.

March 23, 1914.

Public notice is hereby given that as no objection has been received or filed to the registration of the Nephrolepis New York, by George Giatris, 463 Summit Street, West Hoboken, N. J., same becomes complete.

JOHN YOUNG, Secy.

March 28, 1914.

CLUB AND SOCIETY NOTES.

Treasurer Harry O. May's report to the American Rose Society at New York for the past year showed total receipts of $3834.26; disbursements, $2880.53; balance in bank, $953.73.

The schedule of the June Exhibition to be held in Newport, R. I., under the auspices of the Garden Association and the Horticultural Society, is ready for distribution. Copies can be had on application to William Gray, Secretary, Bellevue Ave., Newport, R. I.

The Horticultural Club of Boston, had as special guests at its monthly dinner at the Parker House, on the evening of April 1, G. A. Dennison of San Francisco, Cal. and William Currie of Milwaukee, Wis. The table decoration of acacia sprays, by Thomas Roland was very pretty.

The next regular meeting of the Holyoke and Northampton Florists' and Gardeners' Club will be held with George Strugnel, Bonnie Brae Greenhouses, Holyoke, Mass., on Tuesday, April 14, 7.30 P. M.

JAMES WHITING, Sec.

The second March meeting of the Connecticut Horticultural Society was held on the evening of the 27th. Alfred Cebelius exhibited a collection of roses, comprising Milady, Double Pink Killarney, Mrs. Aaron Ward, Mrs. Charles Russell, White Killarney and Richmond. President Huss exhibited two pots of Geum Mrs. Bradshaw, a hardy perennial, and the scarlet flowers are excellent for bouquets. Each exhibit was awarded a first class certificate.

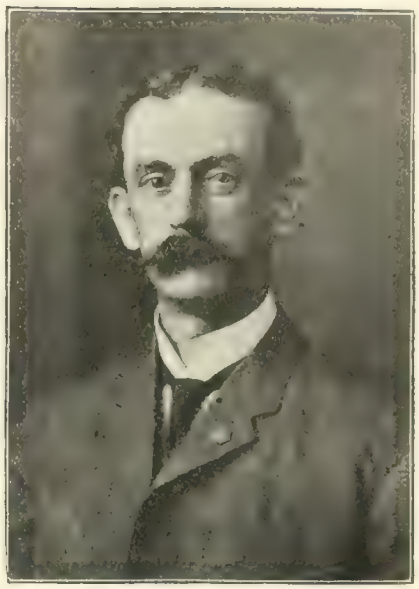
Professor A. G. Gulley, of the Connecticut Agricultural College, addressed the society on Apple Trees to Plant in a Small Family Garden.

ALFRED DIXON, Sec.

At the regular meeting of the Southampton (N. Y.) Horticultural Society held March 5, it was voted to hold the Annual Exhibition of flowers, vegetables, etc., July 22 and 23. The neccessary committees were appointed, and other preliminary matters attended to launching the enterprise with every prospect of success. At the next regular meeting, March 19, several communications were received assuring co-operation and assistance. We feel we have every assurance of being able to carry to its final culmination the best show we have ever given, provided of course, that nature does her share, and we have the proper amount of sunshine and showers rightly sandwiched.

A VISIT TO WAVERLEY, MASS.

On Saturday, March 28, the Gardeners' and Florists' Club of Boston enjoyed their annual visit to the plant houses of W. W. Edgar Co., Waverley, to inspect the Easter display. Although it was a very disagreeable rainy day about fifty members were in the party. A tour through the houses showed a splendid lot of material for the great spring festival. Finest of all and excelling anything of the kind even seen here was a house of Magna Charta and American Beauty pot plants in bloom. Ramblers are also good, also hydrangeas, acacias, genistas spiraea, azaleas, lilacs, rhododendrons, and liles, the latter numbering 14,000 bulbs and uniformly good Rhododendron White Pearl was much admired. There are thousands upon thousands of geraniums in bloom all of which will be turned into money at Easter thus leaving room for Decoration Day stock and other spring material with which the long rows of cement frames are filled.



A bountiful collation was provided and congratulatory remarks were made by President Kennedy, Messrs. Elder, D. Finlayson, P. Miller and others.

THE NEW YORK FLOWER SHOW

The big spring exhibition in the Grand Central Palace came to a successful close last Sunday night and it only remains for us to record the events of the closing days, congratulate managers and exhibitors, and extend hearty good wishes for many equally successful repetitions in the years to come.

It had been intended to wind-up on Saturday night but it was finally decided to hold over one day longer. We do not think the results were sufficient to afford much encouragement for a repetition of so long a period in the future. There are many valid reasons why a six-days' show would be preferable to a nine-days' show.

The judges of the American Rose Society failed to agree between the claims of the Radiance, a bright red rose, and the Excelsa, a climbing rose, for the gold medal given by Mrs. Gertrude M. Hubbard of Washington, which is awarded every five years to the raiser or originator of the best rose within that period of time. The Killarney White would have been the unanimous choice, but this rose was ineligible, as it has been shown for six years.

We omitted several things of importance in our last week's issue not the least of which was the Bloomingdale retail flower booth, arranged by C. C. Trepel and in charge of three blooming young ladies dressed in stunning gowns and dispensing smiles that were well-nigh irresistible.

Breitmeyer's Display of Carnation Philadelphia Pink
Arranged by A. T. Bunyard.

The Silver Medal for rose Killarney Brilliant was won by Robert Scott & Son. Sharon Hill, Pa., and not A. N. Pierson as incorrectly stated in our notes last week.

The handsome plant group which we used in our cover illustration last week was the work of R. M. Johnston, gardener for Mr. W. B. Thompson, Yonkers, N. Y. Mr. Johnston was also well in evidence in various plant classes. A group of Euphorbia Jacquinæflora shown by him, although they did not figure in the list of awards, were especially noteworthy because of the advanced season for such plants.

A. N. Pierson's Rose Group
Arranged by J. M. Gasser Co. and Geo. E. M. Stumpp.

The following additional prizes were awarded: Carnation display, 1,500 blooms, arranged for effect—1st to Cottage Gardens Co., for fine arrangement of Matchless, Mrs. C. W. Ward, Beacon and several unnamed varieties. 2nd Breitmeyer Floral Co., Mt. Clemens, Mich., with Philadelphia Pink. 3rd S. A. Anderson, Buffalo, for a brilliant arrangement.

The $75 silver cup given by the Hotel Manhattan for the best vase of 300 carnations was awarded to the pink and white varieties exhibited by the J. M. Gasser Company of Cleveland, Ohio. Three prizes of $25, $15 and $10, for the best vases of 150 blooms shown by private growers, were won by P. A. B. Widener of Ogontz, Penn.; Thomas Aitchison of Mamaroneck, and George Masson of Tuxedo Park.

Display of cut Roses, covering 200 square feet of space, and to contain not less than 500, nor more than 1,000 blooms. Quality of blooms, artistic arrangement, and general effect to be considered in making awards. Decorative green of any kind, including plants, permitted. 1st A. N. Pierson, Cromwell, Conn., 2nd F. R. Pierson Co., Tarrytown, N. Y.

Table Decoration, private growers—1st Adolph Lewishon, gardener J. Canning. 2nd Thomas Aitchison, Mamaroneck.

BANQUET AT HOTEL ASTOR.

The banquet in the ball room of the Hotel Astor on Thursday evening, March 26, was attended by about 250 ladies and gentlemen and was a very brilliant and enjoyable affair. President Wm. Duckham of the New York Florists' Club presided and at his right and left at the head table were R. W. Hallam, president of the International Exposition Co.; G. A. Dennison, Chief of Horticulture at Panama Pacific Exhibition; T. A. Havemeyer, F. R. Newbold, W. H. Siebrecht, Prof. A. C. Beal, Patrick O'Mara, F. R. Pierson. Most of these gentlemen made brief speeches and F. R. Pierson was the spokesman in the presentation to W. H. Siebrecht, as past president of the New York Florists' Club, of a handsome silver tea service. The tables were most beautifully decorated. After the talking, which was purposely cut short, dancing in an adjoining hall was indulged in until a late hour.

THE GARDENERS' REUNION.

This jovial annual gathering took place at Thum's Alleys, New York City on Tuesday evening, March 24. About 75 or 80 gardeners were present. Bowling began at 1 o'clock and continued until 6 o'clock, when prizes donated by the various firms, representative of the trade generally, were distributed. Adjournment was then made to the dining room where a good time was enjoyed until midnight. The speakers at the banquet were Charles H. Totty who officiated as toastmaster, William Anderson, M. C. Ebel, secretary of the N. A. G.; R. Vincent, Jr.; W. H. Duckham, president of the New York Florists' Club; Jas. Stuart, A. Herrington, J. W. Everitt and several other gentlemen well known in the trade. Some excellent scores were made in the bowling.

The reunion was not under the management of any one organization, but was conducted by a committee composed of members of the various local societies and headed by James Stuart of Mamaroneck, and was even a greater success than the two previous reunions which were held in New York. This affair is to be an annual event.

PANAMA-PACIFIC EXPOSITION.

At the request of G. A. Dennison, Chief of Horticulture, a meeting of the Advisory Committee, which he had previously appointed was held Friday, March 27, in the Grand Central Palace, New York, at the time of the Flower Show. There was in attendance John Young, Secretary of the Society of American Florists and Ornamental Horticulturists; M. C. Ebel,

F. R. Pierson's Rose Group
Arranged for Effect.

RUSH! LAST CALL. RUSH!!

Be sure to stock up on Pot Covering Material for your Easter Plants.

Water-Proof Crepe Paper. All Desirable Floral Patterns. 10 ft. rolls, guaranteed, $1.50 per doz. rolls; $11.50 per 100 rolls; prices for larger quantities on application.

Porto Rican Mats. We are the largest importers in the world of this staple article. Four distinct weave patterns; all appropriate tints to match flower colors.

Penny Crepe Pot Covers. A cheap line, useful for the lower-priced plants.

Tumbler Baskets. Forty or fifty brand new styles, in novel finish.

Telegraphic Orders Filled Promptly.

H. BAYERSDORFER & CO., 1129 Arch Street, Philadelphia, Pa.

Secretary of the National Association of Gardeners; A. F. J. Baur, Secretary of the American Carnation Society; Benj. Hammond, Secretary of the American Rose Society; Harry A. Bunyard, Secretary of the American Sweet Pea Society; Charles H. Totty, of the National Flower Show Committee and Mr. G. A. Dennison. Mr. Dennison gave the reasons for calling the meeting and requested the committee to recommend some one to be Superintendent of Floriculture. The Committee organized with Charles H. Totty as chairman and John Young, secretary. Mr. Totty was elected chairman to serve until the close of the Exposition. The name of William Plumb of New York was recommended as the unanimous choice of the committee and William Plumb will be superintendent of Floriculture to serve until the close of the Exposition.

JOHN YOUNG, Secy.

BOSTON NOTES.

James F. M. Farquhar returned Monday, March 30, from his stay in Porto Rico. His many friends will be pleased to know that his health is greatly improved.

N. F. McCarthy & Co. began their series of spring plant auction sales on Tuesday, March 31. The spacious salesroom was well packed with hardy shrubbery, conifers, buxus and roots for spring planting and a lively crowd was on hand to respond when the versatile auctioneer made his opening speech. The sales will continue every Tuesday and Friday until June.

The ground plan and lay-out of show beds in the outdoor garden which is to be a prominent feature of the S. A. F. convention next August, as prepared by the Park and Recreation Department of the City of Boston, is now prepared and will be distributed to the various trade journals so that it may appear simultaneously in all sections of the country next week. Full particulars as to space charges, etc., will be given at same time.

The nursery shipping season is commencing fully two weeks late this spring, we are informed by the Palisades Nurseries of Sparkill, N. Y. A number of substantial orders from their large advertisement in last week's HORTICULTURE are also acknowledged. Things are looking very promising for the coming season, and a record business is looked for, notwithstanding the late start.

THOMAS F. GALVIN BOSTON'S NEW PARK COMMISSIONER.

Mayor Curley has added one more practical florist to the Park and Recreation Commission of the City of Boston. Mr. Galvin is a representative business man and the horticultural interests of his city will not suffer in his care. We cannot do better than quote from the Boston Transcript which speaks as follows in approval of

THOMAS F. GALVIN.

Mr. Galvin's selection for this important office:

"The appointment of Thomas F. Galvin to be a member of the Park Commission certainly carries no shock to the public. Mr. Galvin has not figured largely in the public service, doubtless for the reason that he has had a large and engrossing private business whose interests he has found more to his taste. He is one of Boston's most prominent florists and there are few men whose names are better known in the city. His training and experience have been of a kind that would seem to qualify him for the position he has been invited to take. He has been a practical student of nature and its possibilities since his earliest youth. His father was a valued and highly respected public servant, filling several positions with fidelity and efficiency, among them one similar to that which his son is now called to occupy. It cannot be said that Mr. Galvin receives this recognition because he "needs the job," which if he accepts, will take considerable of his time and attention. But he has always been interested in Boston's welfare and particularly along the lines where his new duties will take him. It is reasonable to hope and expect that he will prove a valuable addition to the administrative forces of the city."

NEWARK, N. J., NOTES.

Business has been entirely satisfactory during the past week, with stocks in good shape and cut flowers in all the lines. The trade is looking forward to an excellent Easter business but this, of course, does not develop until immediately before the holiday itself.

F. P. Wolfinger reports that business has kept up wonderfully well, and he also expects a very large amount of business at Easter time. F. M. York is about to offer his business for sale. His store is in a very good location, right off the main street, with a nice large window.

H. C. Strobell & Co., of 783 Broad street, is going to move about May 1 to a much nicer location and a better store at 895 and 897 Broad street, after having been at the present store for the past 20 years.

Geo. Penek has opened another store at 637 Broad street and reports that it is the best paying store that he owns, he having at the present time five stores under his control.

Chas. C. Weatheridge, who is the oldest florist on Broad street, having been in the florist business for a good many years, has at the rear of his store a small greenhouse well stocked with Easter plants.

Harry J. Stein, of Hahne & Co., and J. H. Harvey both report business as unexpectedly good.

J. M. W.

NEWS NOTES.

Glenwood Springs, Col.—Mrs. M. E. Cristy has bought the Glenwood Greenhouses.

Allentown, Pa.—Clayton Weaver, of Mt. Gilead, O., has purchased the greenhouse business of D. B. Kroninger, and will hereafter conduct the business under the name of the Emaus Floral Co.

PREPARE FOR EASTER

The blizzards and the extreme cold weather will make Easter plants very scarce, therefore, don't delay but send your orders in now.

LOOK WHAT WE CAN OFFER YOU—CHEAP AND GOOD

NEPHROLEPIS OR FERNS, Scotti, 5, 5½, 6 and 7-in. pots, 35c, 40c, 50c, 75c to $1.00. **Harrisii,** 7-in., 75c to $1.00. **Giatrasii,** 5½-in., 35c to 40c. **Smithii,** 6-in. pans, 35c, 40c, 50c.

FICUS Elastica (Rubber Plant), 4-in., 5-in., 5½-in., 6-in., 7-in., 25c, 35c, 40c, 50c, 75c.

ARECA lutescens robusta, 4-in., made up of 3 plants, 25c; 5-in., 35c.

KENTIA Forsteriana and Belmoreana, 5¼-in. pots, made up of 3 plants, 40c, 50c; single, 5½-in.; **Forsteriana** or **Belmoreana,** 40c, 50c, 60c, 75c; **Forsteriana,** 12-in. tubs, 65 to 75 in. high, $4.00 to $5.00.

COCOS Weddelliana. 4-in., 25c; made up, 30c; 3-in., 15c.

EASTER LILIES OUR SPECIALTY

We have the genuine **EASTER LILY, Lilium multiflorum.** We have the genuine stock, true to name, raised from selected bulbs, furnished by our grower in Japan; 9 to 12-in. bulbs; now in fine condition for Easter sale; 5½ to 6-in. pots, having from 5 to 10 buds to a plant; 10c per bud; plants having less than 5 buds, 12c per bud. **Order Now.** Buds now showing; plants of medium height, just right for Easter trade.

CYRTOMIUM Falcatum (the new brushed Holly Fern). 5½-in., 25c to 35c.

PRIMULA Obconica. In bloom, 4-in., 15c; 5½-in., $3.00 per doz. **PRIMULA Chinensis,** 5½-in., $3.00 per doz.

CINERARIA HYBRIDA. Our best well-known strain, same showing color now, right for Easter; 5-in., 5½-in., 6-in., 25c, 30c, 40c, 50c, 75c to $1.00.

ENGLISH IVY. 3-in., 7c; 4-in., 10c.

FERNS for dishes, Wilsoni only, 2½-in., 4c; 3-in., 6c.

PTERIS Wilsoni. In 6-in. pans, 25c.

HYACINTHS are scarce this Easter, but we put in last fall an immense stock of our own importation, which will make large spikes and cannot be compared with the cheap stuff that is now floating on the market. **Gertrude,** best pink; **La Grandesse,** best white; **King of the Blues,** best dark blue; **Grand Maitre,** best lavender blue. 4-in. pots, staked up, $12.00 for 100 pots. In bloom for Easter week.

TOURNESOL TULIPS, best double red and yellow variegated; **Murillo,** double rose; **Imperator Rubrum,** bright red double; **Couronne d'Or,** double yellow, new, three bulbs planted in a 4-in. pot, $15.00 per 100 pots, $8.00 a doz., in bloom one week before Easter.

DAFFODILS, Von Sion. Best double yellow **NARCISSUS** in existence, three double-nosed bulbs, planted in 5½ to 6-in. pot, $3.00 per doz. pots, out of cold frame, will bloom one to two weeks before Easter.

While we pay the highest price for our Bulbs of Hyacinths, Tulips, etc., from Holland growers, you must bear in mind that we can sell them no cheaper than we do, and we assure you that there is no profit in it for us for the fine stock we sell you.

ASPARAGUS SPRENGERI, 4-in., 10c; 2½-in., 4c.

ASPARAGUS PLUMOSUS NANUS, 3-in., 7c; 2½-in., 4c; 5½-in., 25c. to 35c.

Our specialty, the world wide known pure white **MOONVINE, Ipomoea Noctiflora,** is now ready, 2½-in. pots, $5.00 per 100.

ARAUCARIA Excelsa. 6-in. pots, 4, 5, 6, 7 tiers, 75c, $1.00, $1.25, $1.50.

RHODODENDRONS. 10-in. pans, full of buds, $1.25 to $1.50.

SPIRAEA GLADSTONE in 6 and 7-in. pots, in bud, 30c, 40c, 50c and 75c, right for Easter.

HYDRANGEA OTAKSA, full of foliage, all have buds, just right for Easter sales, 5½, 6 and 7-in. pots, 25c, 30c, 40c, 50c, 75c, $1.00, $1.25 to $1.50. **FRENCH HYDRANGEAS, Mme. Mouillere,** best white, and **Gen. de Vibraye,** bright rose, 30c, 40c and 50c.

BEGONIA GRACILIS LUMINOSA, deep red, in bloom and bud, 5½-in. pots, $3.00 per doz.

BEGONIA ARGENTEA COMPACTA, 4-in. pots, 15c.

NEPHROLEPIS CORDATA COMPACTA, 4-in., 25c.

WE ARE

Headquarters for Azaleas

FOR EASTER BLOOMING

EASTER GREETING!

All the go. The plants of the century. A rival of all Easter plants. For azaleas, go direct to the Azalea belt of Godfrey Aschmann.

Order now. 5 houses full, 10,000 of the choicest plants on hand, ready for immediate shipment. We are the only importers of **AZALEAS,** of which we have made a specialty for the last 25 years. We have the well-known, best double pink **Mme. Van der Cruyssen,** 5½-in., 6-in., 7-in., 8-in. pots, 60c, 75c, $1.00, $1.25, $1.50 to $2.00.

Vervaeneana. Best double rose variegated, large flowering, 5½-in., 6-in., 7-in. pots, 75c, $1.00, $1.25, $1.50 to $2.00; **Niobe** and **Deutsche Perle,** best double white; **Princess of India,** double variegated; **De Schryveriana,** double variegated; **Apollo,** best red; and other well-known varieties, 75c, $1.00, $1.25, $1.50 to $2.00. We have about 100 assorted at 50c, 60c, 75c, $1.00, $1.25 to $1.50.

All goods must travel at purchaser's risk only. No references investigated while the big rush is going on. Thousands of boxes have to be packed in a remarkably short time and only cash will be accepted. Please state if you want stock shipped in or out of pots.

THOMAS ROLAND, Nah

FOREST PRODUCTS EXPOSITION.

An important undertaking and one entirely new in connection with the wood industry of America is the establishing of an annual show in the Grand Central Palace, New York, called the Forest Products Exposition. It will be held from May 21 to May 30, inclusive, and it will be an enlargement of the pioneer exposition on these lines in the Chicago Coliseum, from April 30 to May 9.

A special appropriation of $10,000 has been favorably acted on by Congress and the Senate for the exhibit of forest service, which will be available for the two shows. The scope of the New York Exposition will be educational, yet entertaining, and on somewhat different ideas from the Chicago show. The great forests which are being guarded by the Government Forest Service are nearer by many miles to Chicago than to New York, which is the reason that the Grand Central Palace exposition has been framed on more popular lines.

The decorative scheme at the Grand Central Palace will be appropriate and extensive, including growing boxwood hedges as dividing rails on the aisles; natural and artificial branches, leaves, bark and trees, to carry out the forest atmosphere, while the National Lumber Manufacturers' Association and many affiliated organizations will have typical and picturesque displays.

Forest preservation is the lesson to be taught by the show, and it will be made enduring by hundreds of exhibits to reveal the value of the timbered stretches in natural irrigation, especially in serving as the sources, or fountain heads, of streams and rivers, and of the vast industrial uses of wood and wood products, especially the ground and chemical fiber products.

The Northern Hemlock and Hardwood Manufacturers' Association, the Lumbermen's Association of New York, the Michigan Hardwood Manufacturers Association, the Merchants and Manufacturers Exchange of New York and other organizations representing an investment of millions of dollars will have exhibits. The Redwood Mill Owners Association of California in its exhibit will include a bungalow of two rooms, the exterior of redwood boards from a house and barn built at Fortuna, Cal., in 1853, while the interior will be trimmed in finished redwood, one detail being a redwood table seventy-two inches in length, made from a single board. The Northern Hemlock and Hardwood Manufacturers Association and the Michigan Hardwood Manufacturers Association have combined in the exhibit of a bungalow that is unique in the rarity and variety of the woods used in its construction. The exterior will be bass wood, with Northern white cedar shingles; the living room will be trimmed in elm, with red birch flooring; the dining-room in birch.

Obituary

William Dawkins.

William Dawkins, well known as an expert gardener, died on Sunday, Mar. 29, of general debility, at the age of 76 years. Mr. Dawkins was born in Tottenham, London, England. He came to Canada with the 30th Foot Infantry at the time of the Trent affair. After leaving the army he worked in Canada in a hardware house. Came to Philadelphia in 1870 and started as a florist at 40th and Walnut streets, where his old greenhouse still stands. From there to England and back to Boston, where he worked first for Anthony McLaren and after a short time in business for himself went to the Bussey Institution under Jackson Dawson, afterwards becoming Mr. Dawson's assistant in the Arnold Arboretum for about 21 or 22 years. After another trip to England and back, he returned again to take charge of the Van Brunt estate at Readville, Mass.,

WILLIAM DAWKINS.

where he remained some fifteen years. His health failing, he went to Vancouver for a few months, returning discouraged to Boston last October. Mr. Dawkins was a very close friend of Jackson Dawson, who has nothing but appreciative words for his loyalty, industry and skill.

J. H. Jones.

J. H. Jones a well-known figure in the farm implement business of Philadelphia, was accidentally killed on Market St., near 15th on the 28th of March. Mr. Jones was in his 89th year and was to a certain extent known in the seed business—as he ran a line of farm seeds with his main stock of implements and machinery. For many years the business was in his own name. It has been run for a number of years as the Farmers' Supply Co.

Charles Christensen.

We learn with regret of the sudden death of Charles Christensen, the well-known grower of Eggerstsville, N. Y. Mr. Christensen was taken to the hospital on Monday, March 23 and passed away on Saturday afternoon. The Buffalo Florists' Club and local florists generally attended the funeral on Monday, March 30, at the home of his son in Eggerstsville.

Mrs. Wallace Payne.

Mrs. Wallace Payne, wife of the well known Girardville, Pa., florist, died on Saturday evening following childbirth. She was 32 years of age and a daughter of Mr. and Mrs. Thomas Taylor, of Girardville. Her husband and several children survive her.

BRITISH HORTICULTURE.

At the annual show of bulb blooms, held by the Royal Horticultural Society in London, on March 10th, the gold medal of the General Bulb Growers' Association, Haarlem, was awarded to the Duke of Bedford. R. and G. Cuthbert, Southgate, received the gold medal of the Association in the trade section, for an excellent display of hyacinths. The varieties included: Jacques, City of Haarlem, Lord Derby, Queen of the Blues, Lord Balfour, etc.

Bacterial Treatment of Peat.

Some further details of experiments made in the bacterial treatment of peat was recently given by Professor Bottomley at a meeting of the Royal Society of Arts, in London. Recent results indicated, the Professor stated, the probability of the presence of another factor, besides that due to nitrogen fixation and the manurial effect. In an experiment at Kew Gardens with richardias, potted up in heavily manured soil, Mr. Watson found that a top dressing of about half an ounce of peat to a 10-inch pot doubled the weight of the treated plant in a month's time. Dr. Rosenheim, of King's College, had obtained equally striking results with Primula malacoides by treating twice only with the extract of a hundred and fiftieth of an ounce of bacterised peat. Such effects could not be due to the small amount of direct food material present in the peat or its extract added to the soil, and it was realized that in the prepared peat there was something which had the effect of stimulating and promoting growth in an extraordinary manner. Numerous experiments now in progress indicated that this something was probably similar in nature, as Dr. Rosenheim suggested, to the accessory food bodies recently found to play such an important part in animal growth and nutrition. There might be something of this sort in the peat enabling the plant to grow actively and to assimilate the food present. This seemed to be so, because of the way in which the peat stimulated the growth of the plant even in heavily manured soil.

Bedding Plants and Roses

A PROSPEROUS PLANT GROWING ESTABLISHMENT.

Prosperity in a plant establishment is indicated in two ways—quantity and quality of stock and sales. A. M. Davenport of Watertown, Mass., can therefore be safely pronounced prosperous, for he has both quantity and quality, yet has nothing more to offer for Easter, being all sold out already. Lilies, Ramblers, Azaleas—everything bearing a flower—are ordered up to the limit. Preparations are being made for a very busy May, June and July. 100,000 Asplenium Nidus-Avis in all small sizes and some 2,000 seed pans with counless young fern spores germinating are a feature of this place which makes the visitor open his eyes very wide. Among bedding plants here Begonia Chatelaine stands out temptingly.

Nurseries of the National Farm School

The accompanying pictures give a glimpse of the well-equipped nurseries of the National Farm School, located at Doylestown, Pa.—an institution devoted to the instruction of Jewish boys in agriculture and horticulture, and which has been doing splendid work for the past ten or fifteen years under the able guidance of Professor John H. Washburn. The horticultural department is looked after by Walter F. Fancourt, a practical gardener, florist and nurseryman of wide experience and training—scientifically, commercially and every other way.

STATISTICS OF ORNAMENTAL PLANTS REQUESTED.

In the study of ornamental plants being conducted by the Department of Agriculture, as much information as possible is desired as to the actual behavior of plants in different localities. With this in view, a form for the recording of the desired information has been prepared, which will be supplied to anyone signifying a willingness to co-operate in the work. The information asked for covers the time of opening and dropping of leaves and flowers and coloring and dropping of the fruit when there are any.

Those willing to report information of this character will please write to F. L. Mulford, Landscape Gardener, Department of Agriculture, Washington, D. C.

We hope Mr. Mulford will be favored with the most helpful co-operation by all those of our readers who are in a position to assist in this work.

The blanks, which Mr. Mulford will be pleased to supply to all who apply, are as follows:

SPECIES

VARIETY

Place of observation

LEAVES. Date of leaf buds bursting ; fully opening ; beginning to color ; beginning to fall ; all fallen .

FLOWERS.—Dates of first bloom ; full bloom ; blossoms fallen .

FRUITS.—Dates of beginning to color , fully colored ; beginning to drop ; finished dropping

Last spring frost ; first fall frost .

Color of flowers ; color of fruit .

SOIL.—Fine, coarse, light, heavy, sand, loam, clay; very, moderately dry, moist, wet, waterlogged, marshy, stream, lake, at an elevation of about feet above sea level, protected by , exposed to .

REMARKS:*

We have been putting our best efforts into the production of

GLADIOLI

during the past twenty-five years with the result that we now have at

Flowerfield

a stock that is **Unequalled** in the World.

Our **Standard** for our own seedlings is very high.

We carry the other fellows' varieties when they are "Top Notchers."

PUBLICATIONS RECEIVED.

After a lapse of fourteen years since the publication of the first edition of Bailey's Cyclopedia of American Horticulture we have the pleasure of extending a hearty welcome to The Standard Cyclopedia of Horticulture, the first volume of which has just been published by The MacMillan Company, New York. This is not merely a revised edition of the old Cyclopedia but is really a new work from start to finish, with much new matter both in the way of text and illustrations, while even the old matter that has been retained has been rewritten. It has, of course, been reset throughout. The indefatiguable author has newly elaborated many subjects and continuous effort has been made to secure information from authentic first sources. The present issue, although founded on the former compilation, is thus essentially a new work, with a greatly extended scope and enlarged practical usefulness, and at the same time does not overburden its pages with lists or descriptions of plants with no interest or value except to the botanist or historian. Thus it is unique as a book of reference and study and should have a place on the book-shelf of every gardener and florist, for it is very live literature for anyone engaged in any department of the horticultural field.

The identification of species and the cultivation of plants are the two fundamental bases of the text and in working up from these the best authorities have been enlisted and the assistance of the most skillful exponents of the art has been secured. That it is not possible for one to grow plants successfully "by book" has evidently been kept in mind by the author and the cultural details as given are not so much explicit directions as they are elucidations of standard practice.

This valuable work comes in response to the marked growth of outdoor horticulture which is now making such great progress in this country and in recognition of the resultant widespread need for an intrinsic and comprehensive garden literature. It fills the bill to a degree hitherto unapproached by any publication or any collection of publications that could conveniently be assembled. The glasshouse industries, such as florists' plant and flower growing, vegetable forcing for market, etc., are not neglected, and the most proficient operators in these special lines have been enlisted to present the facts in these rapidly growing avocations.

As above mentioned, the first volume of the six which will complete the set has only come out. The Synopsis of the Vegetable Kingdom by William Miller, with which the first volume of the old issue began, gives place to A Synopsis of the Plant Kingdom by Karl M. Wiegand. The original form and method are still retained but the key has been extensively revised and adapted to the present work. The text matter which follows takes in only the initial letters A and B, yet comprises in these two letters 602 pages as against 197 in the original. Important genera are also elaborated far beyond their limits in the old Cyclopedia. For instance, Acacia occupies 12 pages in this work, whereas in the older one it occupied 5; Acer fills 10 pages, against 5; Begonia 15, against 10; Agave 9, against 4½; Apple 21, against 2½ in the old Cyclopedia.

The publisher is Macmillan Company, New York. The price is $6.00 a volume or $36.00 for the set. HORTICULTURE can supply the volumes as they appear, at publishers' price.

The Carnation Year Book for 1914. Published by the Perpetual Flowering Carnation Society, London, England. This annual is the official organ of the Society and is edited by J. S. Brunton, the president. The lengthening list of members shows that this organization is rapidly growing in numbers and influence. The annual report shows a total membership of 434. Besides the usual contents of reports, papers, etc., there are many illustrations of different varieties of carnations, etc., and a complete list of carnations registered by the society since its organization.

That Farm, by Harrison Whittingham. A story of how a successful city merchant goes back to the land. A good practical introduction to the fundamental principles of successful farming and one which will save the ambitious amateur farmer many disheartening experiences if carefully perused. The author undertakes to tell the workers of the world how they may find a rich harvest of life's good things in agriculture. Illustrated. Price $1.20 net. Published by Doubleday, Page & Co., Garden City, N. Y.

My Garden Doctor, by Frances Duncan. A nice little story for anyone needing the toning up effects of fresh air and outdoor interest. Nature is presented in her most wholesome guise as the Garden Doctor. There are some trite sayings, such as "Gardening consists not so much in a wild frenzy of industry in the spring as in doing odd bits of work at the proper time." Published by Doubleday Page & Co., Garden City, N. Y. Price $1.00 net.

Tenth Annual Report of the State Forester of Massachusetts. F. W. Rane—An interesting public document dealing with the activities of the department throughout the year 1913, and more especially with the problems of controlling the gypsy and brown tail moths, reforestation and fire protection. There are a number of interesting forest views, diagrams, etc.

Conard & Jones Co., West Grove, Pa.—"The Book of the Swastika Canna."—A publication for the trade. Very useful for anyone interested in modern Canna development. Wholesale prices quoted.

Peter Henderson & Co., New York City.— Henderson's Implement Catalogue.—A handsome publication of 66 pages, covers in bright colors, profusely illustrated and fully covering its special field.

S. A. Anderson, Buffalo, N. Y.—"Flowers." A retail florists' hand-book, illustrated with handsome engravings of floral wreaths and designs for all purposes for which flowers are used. A model album for the purpose.

General Swedish Seed Co., Svalof, Sweden — Illustrated Descriptive List of Swedish Agricultural Seed Specialties—Crown Oats, Golden Barley, etc. Loechner & Co., 11 Warren St., New York, General Agents for U. S. A.

Conard & Jones Co., West Grove, Pa.—New Floral Guide, 1914. As heretofore this book is a bright and inspiring publication for the amateur. Largely devoted to roses, which are illustrated in profusion, but fully covering the list of desirable garden subjects.

Palisades Nurseries, Sparkill, N. Y.—Palisades Popular Perennials. Also Wholesale Price List of Hardy Perennials for Spring and Fall, 1914. These lists are very comprehensive, covering a vast number of the finest garden border subjects. The retail list is handsomely illustrated with original half-tone pictures and is a very enticing awakener to the beauty of these hardy herbaceous plants. The wholesale list is a business document that the trade will appreciate.

"GET THEM AT DREER'S"

The New French Hydrangeas

For Memorial Day

We can still furnish plants, now stored in cold frames and which, if given geranium house conditions, will flower fine for Decoration Day. At the prices we quote you will find them a profitable investment. We particularly recommend the 6-inch and 7-inch pot stock.

AVALANCHE. A splendid, large, white with a well established reputation; an easy variety to force.

BOTANISTE PELTEREAU. Enormous flowers of a pretty mauve rose.

BOUQUET ROSE. Large trusses of rosy amber, turning to bright pink; a favorite with all growers.

DENTELLE. Entirely distinct, deeply fringed flower of a creamy-white color; it is not suited for forcing; but for Decoration Day and later flowering it is very valuable.

E. G. HILL. This is by far the best pink variety for early forcing that we have yet tried. Trusses of immense size; color a most pleasing shade of pink which does not fade; growth vigorous, foliage of a pea-green color large and attractive. It is one of the easiest to force, coming into flower as early as Mme. Emile Mouillere.

FRAICHEUR. Very large, regularly shaped flowers, white, delicately suffused with rose; very free flowering.

GENERAL DE VIBRAYE. A favorite wherever seen; very large heads of bright rose-colored flowers; a splendid early forcing variety.

LA LORRAINE. Very large flowers, pale rose, turning to bright pink; has become a general favorite.

MME. A. RIVERAIN. Superb bright rose color; very vigorous and floriferous.

MME. E. MOUILLERE. Probably the most popular white variety on the market to day; an early, easy variety to force.

MME. MAURICE HAMAR. A delicate flesh-rose color. A vigorous grower, the individual flowers as well as the trusses being very large. One of the easist to force early.

MME. RAYMOND. Large trusses of perfectly round flowers of a transparent white, passing to a tender rose.

MLLE. AGNES BARILLET. A splendid white; flowers large and very freely produced.

MLLE. DE TREMAULT. As the result of our own trials, we are convinced that this variety is the best very large-flowered white yet introduced. As free flowering as any, of splendid, erect habit, producing flower heads as large as the old popular Otaksa.

MLLE. RENEE GAILLARD. Very large panicles of milky white, irregularly dentated flowers.

MOUSSELINE. A beautiful mauve rose, with cream-colored center; the flower heads are large and held erect; a fine acquisition.

MONT ROSE. Immense panicles of clear flesh rose, entirely distinct. One of the best very early-flowering varieties.

MONS. G. RENAULT. Very large flowers of a bright rose, with carmine reflex; very free and easily forced.

ORNEMENT. Large, pretty mauve-pink flowers; very free flowering.

RADIANT. At the International Show in New York last spring, Radiant was the one variety which attracted much attention. It is an easy variety to force, of a splendid, rich, live rose carmine, entirely distinct from all others.

RONSARD. Flowers and trusses very large, of a beautiful rose tint.

SOUVENIR DE MME. E. CHAUTARD. One of the very best, of splendid, erect habit, very robust, medium-sized heads, of bright rose-colored flowers; one of the very best of the Bouquet Rose type.

SENATEUR HENRI DAVID. Another splendid rose-colored variety, with red reflections, flowers produced in immense large heads; on the style of La Lorraine, but an earlier bloomer.

The Next Canners' Convention.

Editor HORTICULTURE:

My Dear Sir: — In a recent issue of your journal I notice an article under the caption, "Next Canners Convention." It is stated therein that the question of which shall be the next convention city has gone to a referendum of the members of the three associations. I regret to observe that you argue against the selection of San Francisco, on the ground that the Convention date in 1915 falls so early that those attending the Convention will not be able to combine business with pleasure and enjoy the Panama-Pacific International Exposition at its best; it being your conviction that our officials cannot make good their claims to have the Exposition ready for the public by the opening date, Feb 20, 1915. This seeming misapprehension it is my hope and endeavor to correct.

I do not know on what grounds you base your belief that this Exposition cannot be ready on the opening date; the truth is we not only can be, but barring unforseeable disaster, will be. All our plans are based on a schedule which calls for completion in ample season and today we are ahead of the schedule. Our main exhibit palaces will be entirely finished and ready for exhibits by July 1st. Three of the twelve are ready now. The only exhibit building that may be incomplete by July 1st, is that of Fine Arts, a steel construction, but we do not wish to install the exhibits there until close to the time of opening, and the building will be ready long before we need it. We are pushing the building of the state and national pavilions, and they will be ready, too.

As for exhibits, our total space is already over-applied for, and there remains only the task of selection and allotment of space. Exhibitors will have fully eight months to make their installations.

By all means let the Canners come out here in 1915. If they don't they will miss the most beautiful and most important exposition in all history.

As it may well be, that a word from your influential journal may change the current of opinion among the Canners, and lead to the convention coming to California, may I hope to enlist your co-operation towards this wished-for consummation. Anticipating my cordial thanks, I am,

Very truly yours,
GEO. HOUGH PERRY,
Director, Division of Exploitation.
San Francisco.

A New Seed Postal Bill.

On the 24th inst. Curtis Nye Smith advised us that Senator Pomerene had introduced a bill (S. 4980) to place seeds, cuttings, etc., in 4th class matter at the rate of one cent for two ounces or fraction thereof on packages containing eight ounces or less. Mr. Smith now informs us that on the 23rd inst. said bill was reported favorably without amendment from the Committee on Postoffices and Post-Roads, ordered to be engrossed for a third reading, read the third time, and passed. This bill now goes to the House.

Yours truly,
CURTIS NYE SMITH.

Chicago Seed Trade.

Five consecutive days without a ray of sunshine and with cold March winds blowing have reduced counter trade to a minimum. Spring rains are putting the ground into condition for planting but are not conducive to enthusiasm for buying seeds, and the retail seedsmen are having time now to finish all the details of preparation for the busy days just ahead.

The supply of onion sets is about exhausted here and this week will practically close the season. The large dealers say the orders are coming in, not only from the West but from the South and are now being turned down. While the local crop was not up to the average in size and better than the average in keeping qualities there were not enough to supply the deficiency in other parts of the country and many more car loads could be used to fill orders now coming in. The season closes with prices from $2.50 to $2.75 per bushel on small lots. There are said to be no sales in large lots. Beans are selling from $6.00 to $7.00 per bu. and are scarce. There are plenty of most kinds of peas and they sell for $6.00 and $8.00 per bu., according to variety.

New Seed Testing Law in New York.

With reference to the New York Seed Law, I beg to advise, that:

Assembly Bill No. 678 Int. 660, an act to amend the agricultural law, in relation to inspection and sale of seeds, introduced by Mr. Tallett, has not only passed the legislature, but has the approval of the Governor, and is now a law. The purport of the bill was to change the method of testing seeds from "by count" to "by weight." In all other respects the law remains unchanged.

MARSHALL H. DURYEA.
New York State Correspondent,
American Seed Trade Association.

Congressional seed distribution has been recognized by the bankruptcy courts at last. When Representative Treadway of Massachusetts opened his mail, the other morning, he found a newspaper account of a man in Pittsfield who had gone broke and who filed a petition in bankruptcy. The news article gave the liabilities as $116,000 and the assets at $110 "and a package of seeds from Representative Treadway."

"SEEDS WITH A LINEAGE"

NEWS NOTES.

New York.—Samuel A. Woodrow has purchased the entire business interests of Woodrow & Marketos, wholesale plant dealers at 41 West 28th street. Business will, however, be continued under the old firm name.

Elizabeth, N. J.—Business has been very satisfactory the past few weeks in this locality considering the time of the year. Plants of all kinds are selling well and at the present time there is a better call for these than for flowers. Among the leading establishments here are the Union Square Floral Shop which reports business the past few weeks as very good considering the time of the year, and a very large Easter trade in prospect; J. J. Brummer, who makes a similar report; J. A. Meekins who anticipates a very large business in potted plants for the Easter trade; John White, Jr., who is busy getting his houses in shape for the Easter rush, and who has a big supply of very healthy looking bedding stock.

Orders For Easter Delivery of Flowers,
Designs or Choice Plants
Given Prompt and Careful Attention

CHICAGO NOTES.

John Riemersma, of Indiana avenue and 71st street, has added two handsome greenhouses for show purposes to his retail place.

The A. A. Arnold Paper Box Co. has found a market for its flower boxes in many parts of the world. An order just received is from Honolulu.

Work is now under way at the Coliseum getting ready for the Forestry Exhibit, which will be of special interest to many in the trade. The opening takes place April 30.

Some splendid specimens of Pelargonium Easter Greetings, are in this market and they are much admired. They are said to be free and continuous bloomers and are certainly very attractive. There is always room for more blooming plants here at Easter.

Chicago has a sort of epidemic of new retail flower stores this week. Evidently with an eye to capturing a share of the Easter trade, six within the city limits have sprung into existence and one just outside at Indiana Harbor. The list is given on another page.

The German, who, under the various names of Miller, Frei and Pajonk, has been advertising geranium and other young plants fraudulently, in some of the trade papers, is now in Joliet, Ill., where he was sentenced by Judge Landis for two years. The advertisements asked for cash before shipment and his correspondence shows that he had many responses. Florists from all parts of the country are out hundreds of dollars and are calling upon the papers to make good their loss. His case was tried in the Federal Court for fraudulent use of the mails.

WASHINGTON NOTES.

The sympathy of the entire trade is with Mr. Leapley, of Leapley & Meyer, whose brother, Peter F. Leapley, died last week at the age of twenty years.

Richard Vincent, Jr., of White Marsh, Md., delighted the citizens of Hyattsville, Md., on Tuesday evening last, with his illustrated lecture on dahlias and other flowers, which he delivered at the First Baptist Church.

A potted French marguerite, measuring six and one-half feet in diameter, in the window of George H. Cooke, is attracting considerable attention. This novelty was brought from New York by Mr. Cooke on his return from the show.

The Department of Agriculture will have a new office building at the south side of B street between Thirteenth and Fourteenth, according to a statement just made public. It is said that the building will cost $300,000, will be eight stories high and will contain 200 rooms.

The next regular meeting of the Florists' Club of Washington will be held on Tuesday evening, April 7. The business will be of direct interest to all as a discussion will no doubt be held on certain matters now pending in Congress among which is one to increase the taxes on property through the abolishing of the present half-and-half principle by which Congress annually appropriates one-half of the funds necessary to conduct the affairs of the District of Columbia.

Our Specials for Easter

BEAUTIES

A good supply of the special and a fair amount of the medium. We can recommend them to you for Quality—fine large buds of a good color.

KILLARNEY BRILLIANT

Our grower expects to cut a large quantity of them for Easter. It's the only supply of this new rose. The prices are very moderate. You will find ready sale for them.

GARDENIAS

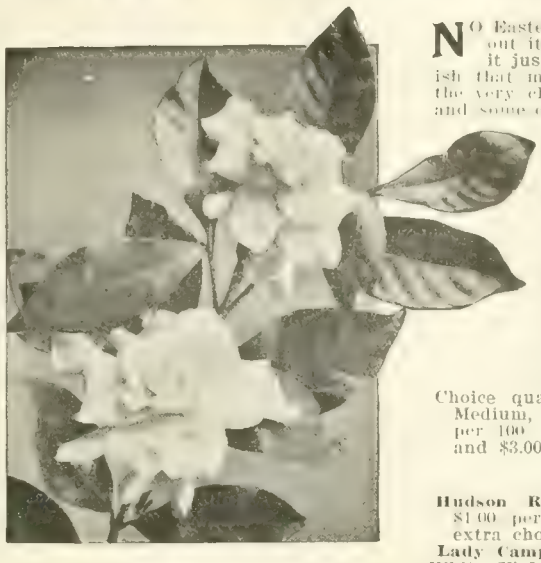
Flower Market Reports

BOSTON An overloaded market with greatly reduced demand on every staple line is the situation here this week. Everything from the finest American Beauties down to the foot of the list is in excessive supply. The only things that have any activity are Easter lilies, violets and the rose novelties. Quality is high on all kinds of stock, but in the present flooded condition of the market that does not help matters much. Warmer weather is now in sight so very little change for the better can be looked for until Easter.

BUFFALO Trade has again been on the quiet side the past week and in a good many instances stock had to be forced to the buyers. There has been a heavy supply of about everything, especially carnations and roses. Business was very light up to Saturday and stock had accumulated heavily. Floral work was lightly scattered and social functions practically out of existence. Transient trade was also quiet and had it not been for the "week end" sales the volume of business was the lightest in some time. It is hoped that things will shape up into better market conditions the coming week.

CHICAGO A depression has come over the market and the wholesalers are finding it difficult to move stock even at bargain prices. Trade kept up fairly well 'till after the close of the third week in March when conditions similar to those early in the month returned. Stock is feeling the effect of continued rainy weather and is not quite as tempting to the buyers, who, on the other hand, feel the need of especially attractive flowers to stimulate business. The proximity to Easter is another cause, no doubt, though Lent is generally conceded to make little difference this year in demand for flowers, which is largely for funeral work. Plenty of daffodils are coming up from the South, but there is such a difference in quality and size from Northern ones that they do not cut into the sales of the latter. There is an abundance of sweet peas and prices have a wide range. Carnations cannot be said to be at their best and American Beauties, with few exceptions, are out of the question if good quality is desired. Roses are changing hands at lower prices just now than in many months before and some sales are reported as low as $15 per thousand for very fair stock. Some good violets are still among the offerings. Ferns have taken another jump and are selling for $3.50 per thousand with every indication that they will go higher.



NEW YORK Market conditions are extremely bad here at the present time. The supply far exceeds the demand, overstock is in sight everywhere and prices obtained are extremely low. Bulbous stock is in unmanageable surplus but the quality is exceedingly fine and these fine blooms are worthy of a better fate than they have to face this week. As to roses it is only the scarcer varieties and novelties that bring quoted rates. The standard varieties are being sold in thousand lots at $10 to $15 in the lower grades. There has been a considerable drop in price on southern asparagus. Carnations, violets and lily of the valley are all in the same predicament as the roses.

PHILADELPHIA The market has been fairly satisfactory, but the rain-storm last Saturday spoiled things for the clean up, and a great deal of stock was left over unsold. Outside of this there was little change in conditions or prices from last report; prices if anything rather easier. White carnations seem to be more abundant. Stocks of all kinds continue very good and plentiful. Easter lilies and callas are selling rather better, although the prices rule low. Outdoor daffodils from South are selling at $5 to $6 per thousand.

ST. LOUIS With Easter only two weeks away it will be hard to tell now just how stock is going to be in this market. The maket continues in an overloaded

(Continued on page 547)

Flowers For The Easter Parade

NO Easter costume is complete without its corsage of flowers, giving it just that dainty touch and finish that make it perfect. Some want the very choicest, some medium priced and some cheaper flowers, but the majority—the masses—want the moderate-priced flowers, which we will have in quantity.

Flower Market Reports

(Continued from page 545)

condition, prices have gone away down and all kinds of stock in all grades are so plentiful, and the call so small that a great many flowers are dumped by the wholesalers. The daily supply from our local growers has been larger than any time this year and should this fine weather continue, this will continue right up to Easter. The flowers that are in greatest abundance are violets, carnations, sweet peas and roses. Some of the prices obtained for them in thousand lots could hardly be quoted correctly.

WASHINGTON The bottom has certainly dropped out of the local market so far as prices are concerned, for the annual glut is on and the buyer's offer is more often accepted in place of the quoted prices. The rising temperature has caused the maturing of large quantities of bulbous stock with the probable result of cleaning the market of these before Easter. Outdoor jonquils have made their appearance and while holding up to a good price early in the week they have commenced to decline. Hordes of pedlars daily line the streets offering arbutus, sweet peas, pansies and violets at prices which make their handling by the storekeepers a losing proposition. Roses and carnations of exceptional quality can be had at low figures and gardenias seem almost to have no price at all. Of all the flowers now in the market Easter lilies alone can be said to have retained their hold, for these continue to bring $1.50 per dozen, as they have for many months. Growers, as a whole, in and about the city of Washington are well pleased with the prospects of full stocks of all varieties for the Easter trade. From all reports it would appear that there will be more than enough lilies of local production. Roses in the popular sized pots will be sent in to the stores in large quantities and it is promised that the quality will be A1. This same will apply to azaleas, rhododendrons and other seasonable potted plants. The marketmen are already planning for the erection of large stands on which to display their plants and although business is now down to the dregs, it is believed that this condition will change during the coming week.

Kansas City, Mo.—Kansas City already has a country-wide fame for its parks and boulevards; now, it appears, there is a chance that it is to get itself talked about as a city of flowers, the Kansas City Star thinks. Kansas City florists and seedsmen say there is a rapidly growing interest in flower culture here and that the coming season promises to see greater activity in ornamental gardening enterprises than ever before.

In hundreds of homes improvised indoor "hotbeds" germinate seeds that later are to be transplanted to porch and window boxes, hanging baskets and lawn beds, and enthusiastic flower lovers are completing lists of roots and bulbs of hardy flowering shrubs that are to be set out.

A plan has been formulated which if adopted, would make Kansas City distinctive among all of the large cities of the country. It is proposed to have the business district, as well as the residence sections, take up window gardening as a work of civic improvement in the summer months, with the effect of giving the city a dress of blossoms and trailing vines to relieve the bare masonry and monotonous architecture. The idea is one that has been carried out in many European cities, greatly to their beautification.

NEW YORK QUOTATIONS PER 100. To Dealers Only

MISCELLANEOUS	Last Half of Week ending Mar. 28 1914	First Half of Week beginning Apr. 1 1914
Cattleyas	25.00 to 50.00	25.00 to 50.00

About twenty other good varieties. Terms cash. JOHN B. TANGUY, West Grove, Pa.

COCOANUT FIBRE SOIL

20th Century Plant Food Co., Beverly, Mass.
For page see List of Advertisers.

CYCLAMENS

200,000 GIANT FLOWERING CYCLAMEN. For the last 16 years we have selected three-fourths of our seed-bearing cyclamen stock before Xmas, to assure early blooming plants, and claim the finest commercial strain in this country; no fizzle of many so-called English varieties. Our aim is strong growers that don't have to be petted to be grown into a choice salable plant—a well built, five-petaled flower (many of them at one time), with well marked foliage; every plant an ideal, a prize winner. Received first prize at the Cleveland show and first and second at Toledo, early November, when blooming cyclamen were scarce.

STRONG AUGUST SOWN SEEDLINGS, once transplanted, $3.50 per 100; $30.00 per 1000. Cash with order. Cultural directions with all orders. C. WINTERICH, Cyclamen Specialist, Defiance, O.

Thomas Roland, Nahant, Mass.
For page see List of Advertisers.

PHILADELPHIA NOTES.

Jno. Kulp has sold out his place at Wayne Junction, Phila., to W. C. Weidenbacher and is going into the growing of carnations and roses at Fort Washington, Pa.

Professor W. B. Nissley of State College, Pa., will be the attraction at the next meeting of the Florists' Club, Tuesday evening, April 7. His subpect will be "Fertilizers — Manufactured and Natural." The growers will be out in force as they are all eager to hear the latest in scientific research in the line, and State College has made quite a reputation for progressiveness in horticulture. Quite a number of the younger generation of commercial flower growers are graduates of this institution.

PATENT GRANTED.

1,089,719. Hedge Trimmer. Joseph P. Meyer, Rochester, N. Y.

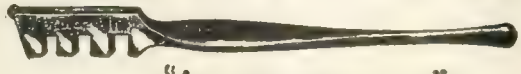
A FERTILIZER QUERY.

Will you please tell me through HORTICULTURE the best fertilizer for Rubber Trees in large boxes, also for the Latania Borbonica of large size in boxes. Yours respectfully,

A SUBSCRIBER.

Replying to the foregoing we would not hesitate to use any of the plant foods advertised in this paper. A handful of dried blood might be added to the latania food as nothing will color up the foliage so quickly. Liquid cow manure is always good. Whatever is used be careful not to give too much at once. Better a little and often.

FIRES.



Youngstown, O.—The flower store of George McLean was damaged in a fire which swept the building in which it is located, on Thursday, March 26.

Saginaw, Mich.—The Stevens Gladioli Company's warehouse and contents were totally destroyed by fire last week. The loss is estimated at $15,000, with insurance of $4,200.

SEED TRADE.

Bridgeport, Ct.—Mallett Cockfield Co., have opened a new seed store on Fairfield avenue.

More Red Devil Cutters Used Annually Than All Others Combined

Sold by the Seed Dealers

Office of ALFRED GOLDRING, Florist, Cobleskill, N. Y., March 17, 1914

We use Hammond's **SLUG SHOT** on Currant Bushes in the Spring before the leaves are started. We put it on around the roots and have done it for two years, and find that the worms are killed before they get on the bush. For Potatoes we put on **Slug Shot** as soon as the bugs come, and we have good vines, plenty of tubers and no bugs. It is the best thing we have ever used. **For Sow Bugs in greenhouses it is sure death.** We had a lot of them before using Slug Shot, but they get out where it is used.

ALFRED GOLDRING.

Hammond's Paint & Slug Shot Works, BEACON, N. Y.

Aphine

The Insecticide that Kills plant Lice of every species

The Recognized Standard Insecticide.

W. N. Craig writes in Florists' Review (March 5th, 1914): "Scale on greenhouse plants is not easy to get rid of, as doses which are sufficiently strong to kill the scale will usually disfigure the plants at the same time. I have found APHINE a first-class remedy for scale, and if you will apply it according to directions you will kill and loosen the scales, although they will not fall off, as will some other pests."

It will only require the hose to wash off dead scale.

A remedy that is efficient in destroying scale, will destroy green, black, white fly, red spider, thrips and mealy bug.

$1.00 per quart—$2.50 per gallon.

FUNGINE will destroy mildew, rust and bench fungi.

75c per quart—$2.00 per gallon.

VERMINE will destroy root maggots, eel, wire and cut worms in the soil.

$1.00 per quart—$3.00 per gallon.

SCALINE will destroy San Jose and all hard scale and red spider on fruit and ornamental trees and bushes.

$1.50 per Gal—10 Gals. $10.—50 Gals. $37.50

NIKOTIANA—a 12% nicotine for fumigating over small lamps or by painting on steam pipes.

$1.50 per quart—$4.50 per gallon.

For Sale by Seedsmen.

British Distributors: British and American Fertilizing Co., Liverpool, Eng.

Scotch Soot

Where there is a house that is just full of buds almost ready to show color, nothing will turn better color into the flowers than a little soot, that can be scattered over the benches before watering. The amount applied should not be excessive, as the soot is very strong and may damage some of the foliage somewhat. Apply just enough to blacken the surface of the soil in the benches, and let it go at that. Better a little oftener than too much all at once.

We offer the genuine in original cwt. Sacks, at:

$2.75 per 112 lbs.; $12.50 per 560 lbs.

PLANTLIFE

PLANTLIFE has several advantages over liquid insecticides on the market. Containing refined tobacco dust it can be used to mix with the soil, acting as an excellent fertilizer, at the same time destroying worms and insects in the ground before they have a chance to reach the plant.

PLANTLIFE has been found very effective in ridding greenhouses of insects by dusting on plants. When dry, use for dusting about once a week.

Put up in bulk for greenhouse men;
in packages for retail trade.
Bag of 100 lbs. $3.50.
Let us quote you prices in quantity.

The Plantlife Company, 251 East 66th Street NEW YORK, N. Y.

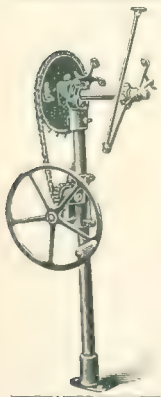
OUR SPECIALTY — Long Distance and Trade Export

STANDARD FLOWER POTS

If your greenhouses are within 500 miles of the Capitol, write us, we can save you money.

W. H. ERNEST
28th & M Sts. Washington, D. C.



When writing to advertisers kindly mention HORTICULTURE.

IF YOU ONLY KNEW what a good gutter the METROPOLITAN PATENTED is, you would use no other. It is made of cast iron and will not rust. That part of your greenhouse which in other constructions is the weakest becomes the strongest. Not this one, it is ice-clearing and carries all the water of condensation from the inside, and it is so constructed that almost the entire end of the bar is exposed to the air, thereby preventing decay. Only one screw, about two inches from the end, is all that is necessary to secure the bars. For side stationary glass, wood headers are absolutely unnecessary, thereby causing no shade. Zinc glass stops are not necessary, the gutter is made with a lug to prevent the glass from slipping. Let your next house be built with a **Metropolitan Patented Iron Wall Construction.** You will never regret it. Our price and service are right.

METROPOLITAN MATERIAL CO.
Patented Greenhouses—Heating Engineers
Hotbed Sash, Glass, etc.
1392-1414 Metropolitan Ave., BROOKLYN, N. Y.

KING
GREENHOUSES
are practical, first, last and all the time. Every detail is the result of careful study.

714 Chestnut Street, Philadelphia.

MASTICA
FOR Greenhouse Glass
USE IT NOW
F. O. PIERCE CO.
12 W. BROADWAY
NEW YORK

Mastica is elastic and tenacious, admits of expansion and contraction. Putty becomes hard and brittle. Broken glass more easily removed without breaking of other glass as occurs with hard putty. Lasts longer than putty. Easy to apply.

2nd Hand PIPE for TRUCK FARMS AND GARDENS
Cut and drilled for Irrigation and Heating purposes. 14-foot lengths and up. Perfect condition with new threads and couplings. Also pipe and tubes cut to sketch for fences and building supports. Guaranteed satisfaction.
PFAFF & KENDALL, 106 Foundry St, Newark, N. J.

THE FLORISTS' HAIL ASSOCIATION OF AMERICA, insurer of 39,000,000 sq. ft. of glass
For particulars address
John G. Esler, Sec'y Saddle River, N.J.

Send For This Unusual Greenhouse Catalog

JUST from the glimpse you get of these two pages, you can see how charming the general treatment must be, and how complete is the showing of each subject considered.

One thing that we think is decidedly in its favor, is that by far the greater number of subjects shown are of modest size—say, from 25 feet long up to 100 feet. There are just enough of the larger subjects to give you an idea of the scope of our work. The text is free from any technical description, and reads along just like you and I would chat about it, if we were comfortably seated together talking things over. If you are interested in having a greenhouse or adding to the one you already have, you are welcome to this catalog.

The One Best Pink Canna Is Mrs. Alfred Conard

IT'S a wondrous salmon pink that fades into beautiful pink tones. It blooms early and **keeps at it.** When spent, the blooms free themselves from the stalk. Its height is average. We originated this canna. It has all the stamina and back bone in it that are characteristic of the cannas Mr. Wintzer develops.

We have an exceptionally fine lot of fat clumps, such as will look good to your most critical customers. **You can depend on our not sending you any culls.**

If you want Conard, Humbert, Meteor, Blanche Wintzer or whatever kinds; if we should be sold out on our fine Swastika standard size stock—we won't send anything. That's the way we do business.

We ship our cannas in any quantities direct from our storage shelves and not in already packed boxed lots.

PRICES

	10	100	1000
Mrs. A. F. Conard, Salmon Pink flowers, 4 ft.	$2.50	$12.00	$100.00
Meteor (Wintzer's), Best Red yet, 5 ft.	3.00	20.00	175.00

For full list and prices of Swastika Cannas see our Canna Book. If you haven't one, send for one. This is the book that has the canna color chart, which you "need in your business."

THE CONARD & JONES CO.

Swastika Brand Cannas

WEST GROVE, PA.

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

LIBRARY NEW YORK BOTANICAL GARDEN

Care of Seedlings

All seedlings should be looked over at least three times a day to guard against their becoming too dry or too wet, either of which will spell loss. Give careful ventilation in all cases. As soon as any show the character leaf, they should be transplanted into other flats. When pricking out the little plants see that they get plenty of room to grow. Place them well up to the glass so they do not draw up too much. There is plenty of time yet to sow asters, balsams, celosias, coreopsis, marigolds, ricinus, phloxes, scabiosas, tropaeolums, zinnias and many other kinds.

Chrysanthemums

For general stock, chrysanthemums may be propagated at any time up until June, but for the production of high grade flowers and for exhibition plants and blooms early propagation is essential. The earlier rooted cuttings are of little use, however, to the average country florist. Medium flowers net more money than the big ones. People may admire the latter, but they object to paying a price commensurate with their cost. We prefer the cuttings which need no shortening back. Those three or four inches long are about right. It will be necessary to keep the cuttings well soaked for the first two weeks. In bright weather several dampings overhead will be required to keep them plump, and no good grower ever wants to see stock in the cutting bench with a flaggy look. A temperature of 50 degrees is high enough for the cuttings to root in. They should not remain too long in the sand, but be potted off as soon as rooted. Ordinary good soil is all they want at present. The shifting into larger pots should not be delayed too long in the case of exhibition plants.

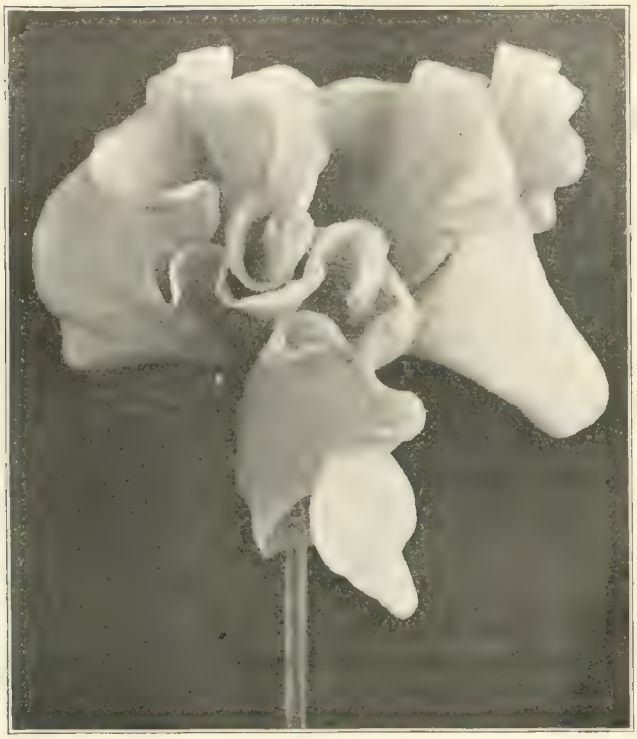
Alocasias

These tropical plants can be increased either by cuttings of the rhizomes or by suckers. When doing either way they are better when placed in small pots that have been filled with a compost of peat and sand in equal parts. Pack the compost well around these pieces and plunge where they can have plenty of bottom heat. There is nothing better than a closed frame over bottom heat of about 75 degrees. They can be kept in this until they begin to show good roots. In potting up the new made plants they will want plenty of drainage. Give at least one-third of the pot to drainage. Use very fibry loam and fibrous peat in equal parts, with quite a portion of sphagnum moss, some lumps of charcoal and silver sand. Give them plenty of overhead syringing and keep a night temperature of 70 to 75 degrees.

Orchids

Odontoglossums will now need some attention. Remove any of the decayed compost replacing it with some sphagnum and chopped fern fibre. In order to keep the compost sweet this sometimes has to be done twice a year. These orchids do better in a house having a northern aspect. Fresh air should be given at all times when possible. Keep up an abundance of moisture by wetting down the paths and under the benches two or three times a day in fine weather. See that the compost does not become too dry as they like a good supply of water at their roots during the warm weather. We are now coming into the season when the grower has many things to contend with, in order to bring these orchids through the summer in good condition. Give shading just heavy enough to break the direct solar rays. A high degree of moisture should be maintained from this out.

Time to Provide



While there is a sufficiency of cut flowers at nearly all times of the year there is one short period when a dearth in cut flowers is keenly felt—from the beginning of June until the latter part of July. It is not unlikely that the general replenishing and replanting of the leading cut flower stock, taking place at that season, may, to some extent, be responsible for the scarcity at a time when June weddings, school commencements and numerous social affairs create quite a demand. Roses and carnations should not all at once be thrown out. Some of the least exhausted and most promising at that time might be allowed to remain in the houses a month or two longer. Of the common flowering plants annual and greenhouse varieties suitable for the purpose, quite a number would thus prove useful.

Young Marguerites

Marguerites intended for next winter's flowering should be pinched back often so they will not become leggy. Planted out after the middle of May they will make fine stock which can be lifted and housed in September. This holds good with white varieties, but the yellow sorts do better when kept in pots during the summer. They are not so liable to go blind when treated this way.

Mr Farrell's next notes will be on the following: Allamandas; Ferns; Ramblers for Easter, 1915; Planting Gladiolus; Sowing Campanulas; Ripening up Freesias.

As an Advertising Medium Horticulture has NO superior. Because they ALL read it. And they read it ALL.

A Duplex Flower of Sweet Pea Yarrawa

A Burpee Sensation

The accompanying pictures of one of Burpee's latest sweet pea novelties furnish a striking indication of the present tendency in sweet pea development. The illustrations are considerably reduced from the original photographs, which are life size. According to same the duplex flower shown separately is 3½ inches across and the other picture is reduced to just about one-half size.

The progress which has been made in sweet peas since Burpee and several others began to specialize some twenty years ago is just one uninterrupted floricultural triumph and the end is not yet in sight.

Spray of Winter Fowering Sweet Pea Yarrawa

The Gardeners' Problem

The executive committee of the National Association of Gardeners held their quarterly meeting here in Philadelphia on the 7th inst. The secretary usually sends you an official report, so what I have to say is only by way of comment and not of narrative. The burning question seems to be how to get away from the fifty dollars a month salary limit. There is no getting away from it so long as people of wealth are willing to hire a laborer who calls himself a gardener, at that price. The remedy to my mind is to start a campaign of education among the people who are wealthy enough to hire a real gardener and show them by facts, figures and statistics that they are losing money by not doing so. A good gardener is worth anywhere from one hundred dollars up—just by the same process of reasoning as one would employ in hiring a lawyer or a doctor. The larger the estate the more the responsibility. The larger the responsibility the higher the salary. If a good man is squeezed down to taking less than he is worth, the greater the temptation to make something on the side. If a poor man—that is, an ignorant man willing to take laborers' wages, is hired, then the estate will suffer not only in that but in many other ways. So that it is the employing class that the campaign of education must be aimed at. It will do no good to scold the seedsmen or other allied interests; nor to split the ceiling in gardeners' meetings about the villany of those fifty-dollar fellows calling themselves gardeners. One hundred should be the minimum, and two hundred, three hundred, five hundred, or even more should not be considered anything out of the way if the training, experience and native ability be present. But the employers have to be educated up to that. There is where the legitimate work of the N. A. G. really comes in.

George C. Watson.

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur Ružička

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to the office of HORTICULTURE.

Disbudding

This is one of the operations in rose growing that should receive attention at all times. Certain days should be put aside for this work each week, and then let the men attend to it no matter what else may require attention. Twice a week will do the trick and if the houses are gone over regularly, there will never be five or six buds on a stem. These side shoots only take up a good deal of the strength of the plant and then they do not amount to anything at all. Remove all the side buds, except those that are on a very strong bottom break, and here it will pay to leave one or two of the uppermost shoots and then wait to see if the main bud will come good. A great many times these buds will come deformed, and if the side buds are allowed to come on, the main bud can be removed as soon as it can be determined whether it will come good or not, and if it should come deformed, then one of the side shoots will no doubt form a good bud, thus saving the big shoot and stem that would otherwise be wasted.

Cutting

By this time it can be known just which of the houses can be emptied first, and in these houses it will pay to cut all the roses away down to the hard wood, thus gaining an inch or two on every stem, and making No. 1's out of a good many No. 2's. This gain may seem so trifling that many will not wish to bother with it at all, but it will be surprising to know the increase in the longer grades of stock, more so if the houses are cutting a large amount of short stuff. As the warm weather will come on now, see that the buds are cut tight enough, although it must not be carried too far, for there is such a thing as cutting too tight.

Mulching

Where the roses are growing freely, they should never be allowed to suffer from want of mulching. Where liquid manure is applied very freely, this mulch should consist merely of good coarse sod broken into lumps about the size of an egg, with a little manure mixed through it. This applied to the benches will give the roots all the necessary protection that they need, and at the same time will help to hold the water just where it is placed, keeping it from running all over the benches. This is very important, for unless there is something to hold the water it will run over the benches so that instead of the soil being the same all through, it will be too wet in places and in others too dry.

Lime

Where the houses have not been mulched recently, it will be advisable to use a little lime on the benches, specially if they have not had any for a while. This will help harden the plants, so that they will not be so very likely to get a dose of mildew so common among the roses in the spring of the year. Do not apply too much of it all at once; preferably a light dose, and apply another in two weeks' time. Fresh air-slacked lime should be used for this purpose, as often the lime sold as agricultural lime is only ground up limestone. This is very slow in action, and is not as effective as the air-slacked lime.

Fumigating

Never for one week neglect to fumigate the houses, the last thing at night, with a good syringing the day following. Mr. Greenfly will be right there with all the millions of his cousins if he is given half of a chance. Keep him out, for if you do not he will in time make you get out, or else cut into your profits so that you will wonder what is the matter with the rose business. The cost of living is high enough without taking several hundred thousand boarders that never pay and are only pests—parasites. Keep them out—they only appear through carelessness or worse.

Paint

Right now is the time to think of the paint and putty that you will need next summer. Do not let this go, but order your supply at once while the leaks, cracks and so on in the houses are fresh in the mind. If we let this go for a while, dry weather will come, and then the houses will not leak, or show signs of doing so, and the chances are that they will be allowed to go unpainted another year. It is poor economy indeed to let the houses go, as they will need rebuilding soon if they are not looked after.

Building

There is often a question of doing it yourself and saving money, but as with many others, there are two sides to this. See if you have the men that will keep your place running full, without the least neglect anywhere, and, if you can then build yourself, then do so. It is a poor saving to neglect half the place to save a few dollars in building. The loss is often much greater than whatever was saved and often the work is not done half so well as if the greenhouse builders were at it themselves. They have men well versed in all the different branches and they know just what to do and when to do it. Think the matter over well before deciding.

Easter

On the eve of the great floral feast day—the happy culmination of the florists' long winter toil, HORTICULTURE extends to one and all kindly greetings and sincere good wishes for a successful and happy Easter and a bountiful measure of the blessings which this joyous season symbolizes.

Money well used

All honor to the Brooklyn lady who has bequeathed the sum of $10,500 to keep the church pulpit supplied with flowers. The world is made up of all kinds of people and they have varying convictions as to how money—their own or their neighbor's—should be disposed of. For our part we have nothing but commendation for any act which brings plants, trees and flowers to the people in increasing quantity, and only the opposite sentiments for any attempt to limit or curtail the use of these things, which are nature's most potent humanizing agencies.

"To me the meanest flower that blows can give
Thoughts that do often lie too deep for tears."

To quote a certain popular official of the S. A. F., one eminent in debate—"I'll rest my case there."

The Convention and the Garden

The Convention Garden plans which we present in this issue will, no doubt, be perused with much interest, as evidence that this feature so auspiciously inaugurated in Minneapolis last year will again form a prime attraction of the summer convention of the Society of American Florists. As an educational exponent of the most advanced horticultural art this Convention Garden will certainly take high rank and its influence, locally as well as over the larger field, cannot be overestimated. Its direct service to the convention visitors will largely be condensed into the space of a few days but Boston and her thousands of summer visitors will enjoy it in all its glory for many weeks and who can measure the extent of its salutary influence or the material gain which will come to commercial horticulture in a broad way and as a direct consequence. The visit of the S. A. F. brought to Minneapolis much of lasting value. It will do the same for Boston. No matter how lavishly Boston may prepare for the reception and entertainment of the two thousand or more visitors who are expected next August the balance of indebtedness for benefits gained will be on the side of the city. That much we are sure of.

A questionable policy

The condensed report of Secretary Young on the work of the S. A. F. Executive Board at its meeting in Boston, which we are privileged to present in this issue, will be found interesting as a concise summary of the deliberations of the Board. It shows that the responsibilities of these officers of the Society are becoming more and more numerous, demanding increasingly serious consideration and involving the adjudication of many knotty problems. We are disappointed, however, that these diligent gentlemen, so wise in all other respects, should have deemed it advisable to permit any one hotel—however palatial and sumptuous—to use the special title of "headquarters," in a city so well supplied with good hotels and for a Convention so large in numbers that probably not one-fifth of those in attendance can be accommodated at "headquarters." For a period of some eighteen years the S. A. F. invariably announced its official headquarters as at its convention hall and to the general satisfaction of the members, the Executive Committee always deeming it inexpedient to accord special privilege to any one hotel and discreetly steering clear of this mischief-breeding practice which may be all right for a society of one or two hundred members but in an organization as large as the S. A. F. is prolific in discontent for those who fail to secure accommodations in the privileged house and more or less discomfort for those who do manage to get in.

A PROMISING SEEDLING CARNATION.

The cut shows Frank Dinda, of Farmingdale, Long Island, N. Y., with an armful of his sensational white carnation, a cross between Prosperity and Enchantress, which he has been grow-

ing for the past five years and which will be introduced probably next season. This seedling took second prize for vase of 100 white, Matchless winning 1st. Every bloom exhibited measured four inches or over, and its wonderful keeping qualities were well shown by the fine condition of the blooms at the close of the show. Mr. Dinda is building a new range exclusively for this carnation, King construction and Kroeschell boiler and piping system. The accompanying picture was badly focussed, but it suffices to show the remarkable size of the blooms.

MUSHROOMS IN CELLAR.

I wish to ask a question in regard to growing mushrooms in a cellar. I have a box in the cellar where the temperature has been all along very close to 70 degrees, that is, when I put the thermometer under the cover on top of the box, which is a cover fixed up of paper. I planted the spawn the first of February, had straw placed over it until I noticed the shoots coming up through the soil. Now the surface of the loam, in the box, is all over with white shoots just long and thin like a bud, but a few days ago I got two good big mushrooms from it and not one since. I watered it when it began to look dry and have taken good care of it. I placed about eight inches of horse manure, well turned over, in the bottom of this box, damped it well, did all things according to directions and now I'd like to know if I ought to have good mushrooms by this time.

Hoping you will give me your opinion on same, I am,

Yours truly,

Campello, Mass. P. A. McC.

Mushrooms are such a precarious and uncertain crop that it would be impossible to say, unless one saw the conditions, why more of the fungi have not appeared. You should be cutting mushrooms now, if as you say, the bed has spawned on the first of February; but it very often happens that even when all the requirements are followed carefully the bed is a failure. Temperature and the atmospheric conditions are two matters of great importance, and we think a temperature of 70° considerably higher than is desirable. A moist atmosphere and a temperature of 55° would be much more suitable.

A FLOWER SHOW QUESTION.

Editor of HORTICULTURE:

Dear Sir: It seems to me that some methods should be devised whereby the bona fide gardener would be able to obtain admittance to all flower shows without being compelled to pay for every time he re-enters, and to be able to enter without temptation to subterfuge to escape payment. In discussing this matter with several gardeners who attended the New York show one told me that he had paid no less than eight times to get into the show, and another that he had gone in a backway and escaped payment altogether. Surely both methods are entirely unnecessary and I would suggest that for the gardener who travels from a distance and intends to make the show his headquarters for appointments during the week or for the duration of the show, a lump sum might be paid to cover that period.

A strange fact in regard to many of the wholesale exhibitors of plants was that they had not a representative to explain their exhibit to the public, with only a few exceptions, and apparently these booked many orders. I think the sundriesmen, in every case, had an attendant, but not so the plantsmen.

VERNON T. SHERWOOD.

Charlestown, N. H.

OH, EVER'THING'S A-GOIN'.

When ever'thing's a-goin' like she's got a-goin', now—
The maple sap a-drippin', and the buds on ever' bough
A-sort o' reachin' up-ards all a-trimblin', ever' one,
Like 'bout a million brownie fists a-shakin' at the sun,
The children want their shoes off 'fore their breakfast, and the spring
Is here so good and plenty that the old hen has to sing!
When things is goin' this a-way, w'y, that's the sign, you know,
That ever'thing's a-goin' like we like to see her go!

Oh, ever'thing's a-goin' like we like to see her go!
Old winter's up and dusted, with his dratted frost and snow.
The ice is out o' the crick ag'in, the freeze is out the ground,
And you'll see faces thawin', too, ef you'll jes' look around—
The bluebird landin' home ag'in, and glad to git the chance,
'Cause here's where he belongs at; that's a settled circumstance.
And him and Mr. Robin now's a chunin' fer the show.
Oh, ever'thing's a-goin' like we like to see her go!

The sun ain't jes' p'tendin' now—the ba'm is in the breeze—
The trees 'll soon be green as grass, and grass as green as trees.
The buds is all jes' eechin', and the dogwood down the run
Is bound to bust out laughin' 'fore another week is done.
The bees is wakin', gapy-like, and rumblin' fer their buzz,
A-thinkin', ever wakefuler, of other days that wuz—
When all the land was orchard blooms and clover, don't you know.
Oh, ever'thin's a-goin' like we like to see her go!

—James Whitcomb Riley.

ACACIA PUBESCENS MEETS ITS MASTER.

Acacia pubescens is notoriously a bad propagator. But was there ever a problem in propagation too hard for Jackson Dawson? In this picture we have this invincible veteran plant

propagator standing alongside of three plants of Acacia pubescens which were grafted one year ago last July. Notice the height. Can you beat it?

HARDY DWARF-GROWING EVERGREENS.

Will any reader of HORTICULTURE name six varieties of evergreens not over four or five feet at maturity which are perfectly hardy in this section?

Is there any reason why evergreens should not be planted on the south side of a residence?

Swampscott, Mass. A. B.

Replying to the foregoing inquiry regarding evergreens, we would say, that we find evergreens when well established generally withstand drought or heat better than deciduous trees or shrubs. They, therefore, and particularly the dwarfer varieties, are very useful for planting on the south side and close to a building where on account of heat and scarcity of moisture shrubs of many kinds would not succeed. The following named varieties of evergreens are very hardy and are dwarf and can be used in grouping to good advantage.

Juniperus Chinensis argentea, J. Japonica aurea, J. sabina, J. tamaricifolia, J. Pfitzeriana.

Picea Gregoriana, P. pumila, P. pygmea.

Pinus mughus.

Taxus cuspidata, T. c. brevifolia.

Thuya globosa, T. Hoveyi, T. minima.

JOHN KIRST

Bedford, Mass.

CLUBS AND SOCIETIES

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

Directors' Meeting.

The annual meeting of the Board of Directors of the Society of American Florists and Ornamental Horticulturists was held at the Parker House, Boston, Mass., March 17th and 18th, 1914. Present: President Theodore Wirth, Vice-President Patrick Welch, Secretary John Young, Treasurer Wm. F. Kasting, ex-President John K. M. L. Farquhar; directors, Charles H. Totty, John A. Evans, August Poehlmann, Thomas Roland, J. A. Peterson and J. J. Hess, also W. F. Gude, the Washington representative, and George Asmus, chairman of the National Flower Show Committee.

Mr. Farquhar and the Boston members of the Board had made every arrangement in advance, so that the work of the Board was transacted without any delays or intermissions. Luncheon and dinner had been provided for in an adjoining room, so no time was lost in journeying to places of refreshment and the meetings of the Board were practically continuous. The local members reported in detail as to the progress already made toward carrying out the details of the convention, and that for the Outdoor Planting Exhibition a plot of ground containing about ten acres in the Back Bay section had been obtained and was being prepared and laid out for the use of the society.

It was decided that the Outdoor Planting Exhibition should be known hereafter as the "Convention Garden." It was decided that details connected therewith be left in the hands of the local committee. The prices to be charged for space are to be not less than 5 cents per square foot and not to exceed 10 cents per square foot; as this plot of ground is in the Park Department a charge for rental could not be made, and the 5 to 10 cents per square foot will be charged for the care and maintenance of the exhibit; carrying out the arrangement made with the authorities of Boston. It was necessary that the sum of $1,500 be deposited with the Treasurer of the City of Boston, to assure the city against any losses which might occur. Any profits that may be derived from the Convention Garden will be turned into the treasury of the society.

Awards for the exhibits in the Convention Garden will be in the form of medals, certificates, or diplomas; there will be no money prizes. Allotment of space and the management of the Convention Garden will be under the supervision of the Advisory Committee, but under the direct management of James B. Shea, Deputy Commissioner of Parks. The President is authorized to appoint five judges for the Convention Garden.

Mechanics Building was selected as the place in which to hold the indoor trade exhibition. In this building there will be 40,000 square feet of available space. The rules governing same and the prices for space are to be the same as charged at the convention held in Minneapolis. The rule regarding signs was amended so that the official sign should not cost more than $3.00.

A preliminary programme was presented by the committee appointed for the purpose, and the completion of same was left to the President, Vice-President and Secretary. It was decided to have a three-day business convention, the fourth day being set aside for entertainment.

Messrs. Roland, Farquhar and Hess were appointed a committee to consider the proper standardization of flower pots. This committee is to report at the meeting of the Board of Directors to be held in Boston before the next convention.

It was recommended that the society join the L'Union Horticol Professionelle International, the fee for same being $10.00.

It was decided that the Hotel Copley-Plaza be selected as headquarters for the society during the time of the convention. The local committee will publish in the trade papers a list of all the other hotels, and rates, at a later date. Appropriations were made for different purposes for carrying on the work of the society, for the present year.

President Wirth appointed Charles E. Critchell as chairman of the Committee on Sports.

The Secretary's and Treasurer's reports were referred to an Auditing Committee and found to be correct. These reports had previously been audited by a firm of certified public accountants in Buffalo. The action of the treasurer in depositing the funds of the society in the different banks mentioned in his report was approved.

The question of "Affiliation" was given careful consideration by the meeting, and George Asmus, W. F. Kasting, and J. J. Hess were appointed a committee to devise plans for affiliation; such plans could then be presented to the different organizations stating what the society would be willing to do towards bringing about affiliation. This committee is to report at the meeting of the Board previous to the convention, mileage to be allowed the members of this committee for one meeting only in a central city.

George Asmus gave a detailed report of the progress on the work being done towards the next National Flower Show, to be held in Philadelphia, in 1916, and states that he and the other members of the committee were on their way to Philadelphia to inspect the building where the next National Flower Show will be held.

It was decided that the public should not be admitted to the indoor Trade Exhibition which is to be held at the Mechanics Building at the time of the convention.

Mr. Gude presented final resolutions as offered by his committee.

JOHN YOUNG, Secretary.

FLORISTS' CLUB OF PHILADELPHIA.

Professor Nissly, from State College was the attraction at the monthly meeting of the Florists' Club on the 7th inst. He was scientifically all to the good; but the Florists' Club is a different proposition from Susquehanna County. Many of the members at the wind-up seemed to think that the "two-O-four" for cow fertilizer was a good idea—if they only could get it. One member said he had a few carloads for three dollars and was instantly besieged! So the price went up, until the professor's dictum seemed to be a joke. The chemical composition of the hog and the hen product were lauded to the skies by the professor, but the flower growers seemed to feel they had gone through that long ago—and still stood by the good old cow—no matter what Ohio College had to say. We feel that this experience must be a very refreshing and illuminating one for State College, and look for great results in their further teachings. If they will keep near to the big growers of Philadelphia they will come pretty near to giving a few pointers to the rest of the country. And even they (the big growers) don't know such a terrible lot. Said the professor: "If you see sorrel in a field, it needs lime." Why? He didn't know—he took the word of the plant for it! That's how far science has advanced. But I knew that when I was a kid forty years ago cutting tansys on the pasture as a penalty for being fresh to people older than myself. The moral of all this is: Don't get the big head merely because you are from a college. It's the iconoclasts who really find out things in the long run. Keep tabs for yourself. G. C. W.

AMERICAN ROSE SOCIETY.

The Hubbard Medal.

At the Rose Exhibition of last week the matter of awarding the Hubbard medal was an important feature that was omitted, for the reason that it was felt to be something that no one wanted to make a mistake about.

The plan was for the Executive Committee and the Judges to have decided upon this on Monday the 23rd. At that time a free discussion occurred as well as could be, and a committee of three were appointed to submit a list of eligible roses that had been introduced within the last five years. This was done on Thursday afternoon, the 28th, and fairly gone over. In the mean time one and another had been interviewed upon the subject and all felt that the awarding of the medal carried with it a great deal of weight, that we had two distinct classes of roses—the climbing and the bush rose, also the special greenhouse varieties. A vote was taken in which Excelsa and Radiance, representing two classes of roses were voted upon, and the vote was a tie. The two classes being so different it was not felt that they really could be judged one against the other, so a

proposition was made to put up a second gold medal of equal value to the Hubbard medal so the two classes could be recognized. This met with general favor, but no decision was arrived at, and it was deferred until a later meeting of the Executive Committee, while in the meantime we should endeavor to obtain the opinion of some of the best informed people upon the subject.

BENJ. HAMMOND, Secy.

NEW BEDFORD HORTICULTURAL SOCIETY.

At the regular monthly meeting of the New Bedford, Mass., Horticultural Society, held in Library Hall on Monday evening, April 6, after a short business session those present listened to a very pleasing and instructive talk on gladioli by B. Hammond Tracy of Wenham. Mr. Tracy not only held his audience with his descriptions of methods employed in production of flowers, exhibiting and arranging for home decoration, but also created considerable enthusiasm along this line which will doubtless help materially in bringing the gladioli to the front in our September exhibition. Three new members were elected.

TUXEDO (N. Y.) HORTICULTURAL SOCIETY.

At the regular monthly meeting on April 1, Murice Fuld gave a very instructive and interesting lecture On The Progressive Age, as applied to Horticulture. We hope to have Mr. Fuld again on some future occasion. He also staged from Knight & Struck Co., a vase of 15 varieties of "Dutch" Iris and advised as to their qualities for forcing. The judges awarded a certificate of merit. The executive committee reported the schedule of the fall show in progress, also the entertainment committee reported that arrangements had been made for the Ladies' evening, which is to be held on April 16. This is the first evening of its kind the society has ever held and all are anxious to make it a good time for the ladies.

Thos. Wilson, Secy.

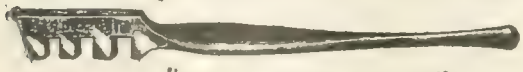
CLUB AND SOCIETY NOTES.

The Cincinnati Florists' Club will hold its regular meeting on next Monday, April 13. A large attendance is expected.

Due to its nearness to the Easter rush, the regular monthly meeting of the Florists' Club of Washington, scheduled for Tuesday evening last, was postponed and the florists will not again get together until April 21, when some very important business will be brought up for their attention.



A new horticultural society has been organized jointly by Auburn and Lewiston, Me., and C. A. Allen was chosen as its first president at an enthusiastic meeting held in the municipal court room in Auburn on March 30. The object of the society, as announced, is to inculcate the love of flowers and encourage their planting.

The discussion committee of the North Shore Horticultural Society announce the following meetings, at Manchester, Mass.:

April 17, Prof. A. Vincent Osmun of Massachusetts Agricultural College, will give a practical talk on "Fungus, Rusts, Blights, etc." He will devote part of the time to a description of the life history of fungus and other low orders of plants as compared to the higher or flowering plants.

May 1, Mr. Allan Peabody will give a talk on his recent trip to Porto Rico. Mr. Peabody has no doubt made some interesting observations of things relating to horticulture and kindred interests.

SEED TRADE

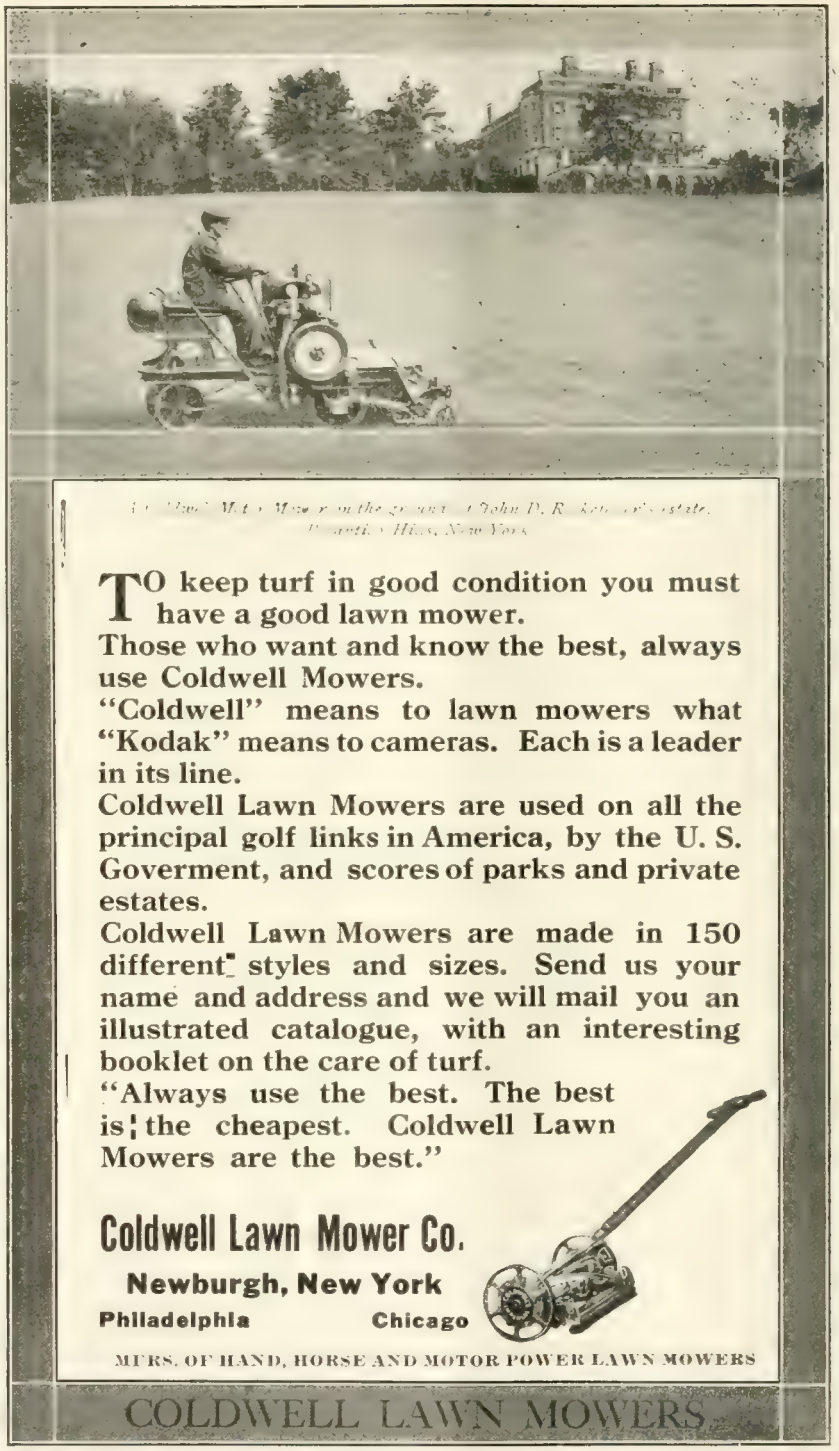
AMERICAN SEED TRADE ASSOCIATION

Officers—President, Chas. C. Massie, Minneapolis, Minn.; 1st vice-president, J. M. Lupton, Mattituck, N. Y.; 2nd vice-president, W. F. Therkildson, Painesville, O.; secretary, C. E. Kendel; assistant secretary, S. F. Willard, Jr., both of Cleveland, O.

Parcel Post Popular.

The mail order houses, and in fact the seed trade as a whole, appear to be much gratified by the ruling of the Post Office Department allowing the sending of seeds, bulbs, etc., by parcel post. Why this was not permitted at the introduction of the system, not even the post office officials themselves are able to explain. It simply illustrates the truth of the theory of evolution—they have simply grown to it.

Dull Business.



Local trade from Chicago eastward is and has been very bad, which is largely chargeable to the weather. What share is due to the general business depression can only be surmised. A number of seed houses having a very large trade with private estates report a considerable falling off in business from old customers, and say that the new ones are just about keeping the volume of business on a level with last year. It is quite possible that after the spring really opens conditions may very materially improve. Let us hope so!

Panama-Pacific Opening.

An item from Geo. Hough Perry, taking exception to statements made in this paper expressing doubts about the Panama-Pacific Exposition opening on time, is worthy of attention. There is no disposition on the part of this paper to damage in any way the prospects of the Exposition or to find fault with the management. They simply were influenced by experience, and that experience is that not a single international exposition has been ready on time. To be sure, the opening has taken place on schedule, but in many instances the buildings and grounds were not complete, and the exhibits were not in place for many weeks after the formal opening. If our San Francisco friends can establish a new record, we shall be among the first to congratulate them, and in the meantime will accept their word for it and wish them every success.

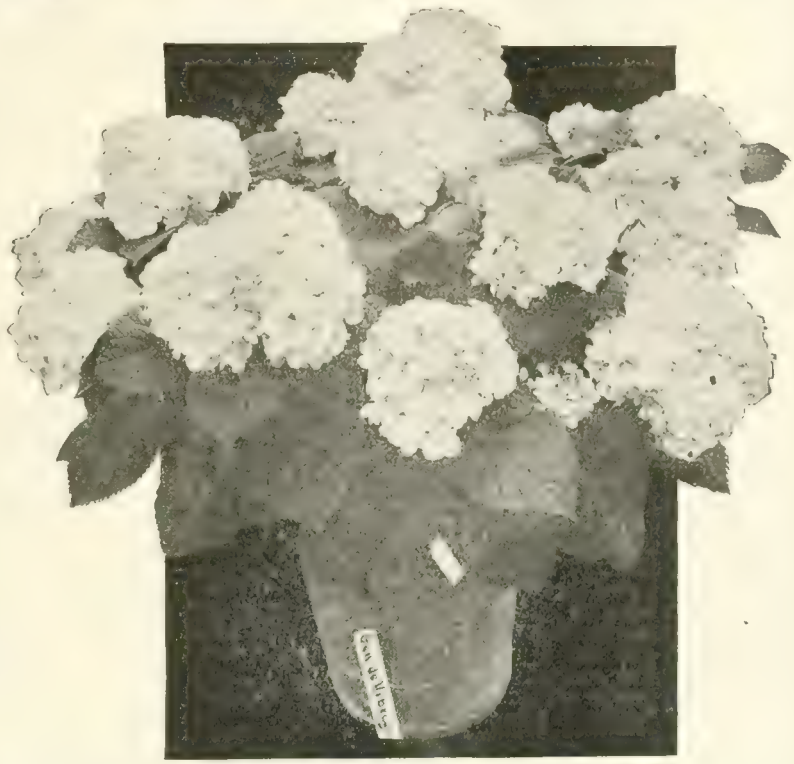
Mild Winter in 'Northwest.

We have learned that the past winter has been an exceedingly mild one in the far Northwest, particularly in Montana and Idaho. It is reported that the snowfall has been the lightest in twenty years, and as their water supply for irrigation purposes is largely derived from the melting snows in the mountains, many old-timers are fearful of a water famine this coming summer, and consequently a very serious shortage in crops. We are advised that they are having an unusually early spring, and that grain and other seeds are being planted at this early date. The ranchers are evidently eager to get full benefit of the spring moisture which it is hoped will carry the crops along so far that they may be able to tide over the much-feared drought which is liable to come during June and July. Should the present fears materialize those who are carrying stocks of garden seeds may find that they have money at interest, as, despite the pretty general impression that peas are in great surplus, we do not believe there is anywhere near enough to meet another year's requirements, and that a fair crop the coming summer would be readily absorbed both by the seed trade and the canners.

Next Canners' Convention.

We are advised that a meeting of the Committee on Location to decide the place for holding the next Canners' Convention is to be held in the very near future, and we may be able to announce the decision of this Committee in our next issue. We understand California and San Francisco have a strong lead, though this does not necessarily imply that the convention must go there.

Forging to the Front.



Among the mail order houses which are forging to the front we may mention the Joseph Harris Co. of Coldwater, N. Y. This concern in a quiet way and without any fireworks has continued to grow until it can now be readily figured among the large mail order seed houses of the country. This success is mainly due to the able man-

"GET THEM AT DREER'S"

The New French Hydrangeas

For Memorial Day

We can still furnish plants, now stored in cold frames and which, if given geranium house conditions, will flower fine for Decoration Day. At the prices we quote you will find them a profitable investment. We particularly recommend the 6 inch and 7-inch pot stock.

AVALANCHE. A splendid, large, white with a well established reputation; an easy variety to force.

BOTANISTE PELTEREAU. Enormous flowers of a pretty mauve rose.

BOUQUET ROSE. Large trusses of rosy amber, turning to bright pink; a favorite with all growers.

DENTELLE. Entirely distinct, deeply fringed flower of a creamy-white color; it is not suited for forcing; but for Decoration Day and later flowering it is very valuable.

E. G. HILL. This is by far the best pink variety for early forcing that we have yet tried. Trusses of immense size; color a most pleasing shade of pink which does not fade; growth vigorous, foliage of a pea-green color large and attractive. It is one of the easiest to force, coming into flower as early as Mme. Emile Mouillere.

FRAICHEUR. Very large, regularly shaped flowers, white, delicately suffused with rose; very free flowering.

GENERAL DE VIBRAYE. A favorite wherever seen; very large heads of bright rose-colored flowers; a splendid early forcing variety.

LA LORRAINE. Very large flowers, pale rose, turning to bright pink; has become a general favorite.

MME. A. RIVERAIN. Superb bright rose color; very vigorous and floriferous.

MME. E. MOUILLERE. Probably the most popular white variety on the market to day; an early, easy variety to force.

MME. MAURICE HAMAR. A delicate flesh-rose color. A vigorous grower, the individual flowers as well as the trusses being very large. One of the easist to force early.

MME. RAYMOND. Large trusses of perfectly round flowers of a transparent white, passing to a tender rose.

MLLE. AGNES BARILLET. A splendid white; flowers large and very freely produced.

MLLE. DE TREMAULT. As the result of our own trials, we are convinced that this variety is the best very large-flowered white yet introduced. As free flowering as any, of splendid, erect habit, producing flower heads as large as the old popular Otaksa.

MLLE. RENEE GAILLARD. Very large panicles of milky white, irregularly dentated flowers.

MOUSSELINE. A beautiful mauve rose, with cream-colored center; the flower heads are large and held erect; a fine acquisition.

MONT ROSE. Immense panicles of clear flesh rose, entirely distinct. One of the best very early-flowering varieties.

MONS. G. RENAULT. Very large flowers of a bright rose, with carmine reflex; very free and easily forced.

ORNEMENT. Large, pretty mauve-pink flowers; very free flowering.

RADIANT. At the International Show in New York last spring, Radiant was the one variety which attracted much attention. It is an easy variety to force, of a splendid, rich, live rose carmine, entirely distinct from all others.

RONSARD. Flowers and trusses very large, of a beautiful rose tint.

SOUVENIR DE MME. E. CHAUTARD. One of the very best, of splendid, erect habit, very robust, medium-sized heads, of bright rose-colored flowers; one of the very best of the Bouquet Rose type.

SENATEUR HENRI DAVID. Another splendid rose-colored variety, with red reflections, flowers produced in immense large heads; on the style of La Lorraine, but an earlier bloomer.

HENRY A. DREER, Inc.

714-716 Chestnut St., PHILADELPHIA, PA.

agement of S. M. Harris and a younger but very brilliant sister, who has elected to remain with him and assist in the building up of their business. Those who have had dealings with this company have only words of warm praise for them.

Another concern which is worthy of passing mention is the F. A. Sherman Co., Albany, N. Y. Mr. Sherman was for many years the senior partner in the firm of Sherman & Eberle. Some five years ago Mr. Eberle bought out Mr. Sherman and for about two years the latter was out of the seed business; then he began again and his success must be most gratifying to him, and, we may add, very deserving.

Free Seeds According to the Waterbury Idea.

These are the days when the constituent at home is reminded that he has a representative of his interests as a citizen at the seat of government in Washington. There is no doubt about it, for has he not been sent several packages of seeds,—flower, vegetable and fruit? There are many who receive the seeds and throw them on a shelf to be forgotten. Many others have found them worth while experimenting with and not a few in all communities have succeeded in making attractive flower gardens or vegetable gardens without going to any expense except the investment of a little time for planting and for attending the plants from time to time during the growing season.

More should make use of the free seeds which are so generously passed around by the members of congress. The government asks only that those who do plant government seeds will take the trouble to send in a report on their success with the seeds used and their theories as to the reasons for the success or failure of their particular experiments. There is no real obligation to do this, but some valuable information as to soil conditions and local problems in agriculture has been gathered from contributions of persons who have experimented with government seeds.—*Waterbury (Conn.) Republican.*

Free Seeds—Another View.

I have been watching very closely what you say about the free seed business. I know that Mr. Ashbrook, M. C., of our old district, is sending free seeds to farmers in the new district of which he will be a resident. I also noticed a news item in a daily paper that free seeds were coming to Findlay, O., by the wagon-load from two opposing statesmen.

Why would it not be a good idea to try to find out the total cost of the free seed distribution from the time it is brought up in Congress until they are delivered by the rural carrier, then all farm papers print the names of members of Congress who vote for free seeds, and dub them the "free seed pork barrel statesmen?" Also the grangers and other farm organizations should resolve to work and vote against any member of Congress who persists in distributing free seeds at public expense.—"*A Farmer*," *in 'Nat'l Stockman and Farmer.'*

Wayne County, O.

Imported Red Clover Seed.

The seed importation act of August 24, 1912, does not directly prohibit the importation of seeds on account of low vitality. It does, however, prohibit the importation of those seeds mentioned in the act when they contain 3 per cent. or more of weed seeds. As red clover seed, which germinates poorly, usually contains more than 3 per cent. of weed seeds the enforcement of the act has resulted in keeping red clover seed of low vitality out of the country.

During the last four months 101 lots of red clover seed, aggregating over 3½ million pounds, have been imported into the United States. Germination tests of this seed made by the seed laboratory of the United States Department of Agriculture show an average of 97 per cent. of live seed, the poorest lot containing 89 per cent. This is in marked contrast to the condition which existed in 1906. One million pounds of the red clover seed imported that year germinated less than 59 per cent.

Chicago Seed Notes.

The Leonard Seed Co. report onion sets are practically cleaned up. Had the weather been warmer the shortage would have been more keenly felt and even at this late day there are probabilities that there will be a large demand for sets that will go unfilled, when spring opens in earnest. All important varieties of cabbage seeds are scarce, owing to the heavy demand. Last year the amount of cabbages grown was insufficient and market gardeners are seeing to it, that this mistake is not repeated this year. They also note a shortage in the common varieties of flower seeds as four o'clocks, etc. Continued damp weather has made sales of lawn grass seed particularly good.

PLAN OF THE BOSTON

The Park and Recreation Department of the City of Boston in conjunction with the S. A. F. and O. H. Convention Garden Committee presents herewith a plan of the proposed garden. Owing to the lateness of the season and the near approach of planting time, early consideration by intending exhibitors is desired.

The only charge will be for planting and care of plants throughout the season, as stated in the communication from Secretary Young on another page. All the arrangements, grouping and control of the exhibits will be under the direction of the Park and Recreation Department of the City of Boston, and no exhibit may be removed until that Department gives authority for such removal next autumn.

It is expected that this will be the largest exhibit of its kind ever made in this country, numerous inquiries for space having been made already.

The Tent space will be devoted to tender plants requiring protection from sun and wind.

CONVENTION GARDEN.

Space G is shaded by large trees and should be devoted to evergreens, shrubbery, etc.

The other groups, A, B, C, D, E and F, are all open, level land, available for general exhibits.

The small bays in the adjacent Fens Pond bordering on sections E and F are admirably adapted to water gardening, semi-aquatic and shore planting.

Allotments will be made with preference to earliness of application, which, together with all inquiries and correspondence, should be addressed to James B. Shea, Deputy Commissioner, Department of Parks and Recreation, 33 Beacon street, Boston.

It is the earnest desire of the Committee that all allotments be completed by May 1st.

JOHN H. DILLON,
Chairman Park and Recreation Commission.

JAS. B. SHEA,
Chairman Convention Garden Committee.

FLOWERS ON OCEAN LINER.

Roses worth a fortune were taken to Europe last Thursday on the White Star liner Cretic when she sailed for Mediterranean ports with the first big tourist passenger list of the opening season. Not for many years has such a magnificent floral display been seen on a steamer sailing out of Boston. For an hour previous to the taking in of the gang plank messenger boys and delivery men kept boarding the big steamship with long boxes of American Beauties, fancy baskets and bouquets from friends ashore for those sailing. Some of the lady passengers were almost hidden from sight by immense displays of roses, carnations and lilies of the valley.

Malden, Mass.—The greenhouses formerly conducted by Peter Ball are now run by Neal E. Boyle under the name of the Faulkner Conservatories. Mr. Boyle is quite proud of his Easter lilies this year and well he might be for they are fine, over six thousand pots of giganteum and bloomed to perfection.

CHICAGO NOTES.

Felix Reichling is the new manager at Peter Reinberg's store, taking the place left vacant by Tim Matchin.

The regular meeting of the Retailers' Association, which was to have taken place April 6th, was postponed indefinitely.

J. Mangel will have to wait another month for his stand in the entrance to the new Field building, that portion having been left until the last.

It is the opinion of Geo. Asmus that indications are for a big Easter business, but that it will come in the form of many sales of small size rather than fewer sales of large size.

At A. Henderson's, caladiums, tuberoses and gladiolus are now about all there is left of the season's offerings. The traveling men are giving encouraging reports of business on the road.

Everywhere the subject of the length of the lily stems is under discussion. The growers who have always produced tall lilies before are inclined to lay it to the bulbs, while the one who can show the tall plants so desired for Easter, smiles in satisfaction. A. Henderson declares it is all stored up in the bulb and it is the test of ability to produce the long stem and the perfect flower.

Easter Plants.

Very handsome ericas have been received and when tastefully "dressed up" are very attractive to purchasers. Well-flowered Bauera rubioides were also brought from the east and made fine window plants, their pink coloring being very warm and bright. Genistas are not so much in evidence as heretofore at the retailers. Begonia Chattelaine is making its first appearance here this year. It is used in filling baskets with good effect and seems sure to become popular. Baby Rambler roses are in good supply especially in the smaller sizes. On account of the more attractive colors of the newer varieties the original Baby Ramblers are not so popular as formerly. Among the rhododendrons offered in the stores Pink Pearl seems well in the lead.

Azaleas are proving up the predictions made when they arrived in poor condition last fall. Consequently this Easter is not going to find so many perfect plants on the counters as in other years. As usual Madam Vander Cruysen is a great favorite.

Some of the florists' windows contain the finest specimens of trained roses ever grown here and while the supply is larger than usual, it is still unequal to the demand which seems larger each year. Next to lilies come roses, as one retailer stated, and in filling baskets every size was needed.

One large plant grower claims a loss of 35 per cent of his giganteum lilies. He says "we have discarded others and now giganteum seems to be going the same way and lily growing is a huge gamble with the odds against the grower."

An excellent illustrated article on grafting, by Prof. Le Roy Cady, of St. Paul, appears in the April number of the Minnesota Horticulturist.

PHILADELPHIA NOTES.

Through the efforts of Mrs. George G. Meade Large, a prominent young society matron, Rittenhouse Square will be converted into a flower mart for one day in the first week of May.

Mrs. Large had the flower markets of Paris in mind when she thought of this novel way of holding a spring sale. The centre of the square will be filled with gayly striped booths, which will be in charge of well-known society women.

One booth will be devoted to preparing window boxes, another to garden tools. Cut flowers will be sold by the younger members of the Rittenhouse Square Association, and boutonniers will be offered for sale by some of the pretty girls who will be presented next season.

There will be two push carts, copied from those used by the peasants in France, who go about the streets with their wares.

Mrs. Large, before undertaking the affair, obtained permission from City Councils. It has been decided to divide the proceeds of the sale between charity and the Rittenhouse Square Association.

The affair will be open to the public, and there will be no admission, but every one loving flowers is invited to come and revel in their beauty.

Philadelphia North American.

Salaams to the lady. More sense in that than chasing around nowhere in particular in an auto; or being bored to death at a dress-show.

On Saturday last a very impressive vase of the new carnation "Philadelphia Pink" was on exhibition in the show window of Pennock Bros. It caught the crowd.

WASHINGTON NOTES.

The sympathy of the entire trade is with Mr. and Mrs. James E. Dalgleish, who recently suffered the loss of their ten year old daughter, Frances Lucretia Dalgleish, who passed away following an attack of heart trouble.

William Marche has been elected to membership in the Washington Board of Trade and his name now appears on the roster of all of the city's important commercial organizations. He has been prominently identified with the Chamber of Commerce and the Retail Merchants' Association, as well as the Florists' Club.

Fred H. Kramer on Sunday last tendered a reception to The Minute Men, a patriotic organization of this city, at his store at 916 F street, and it proved a most novel idea for that establishment was filled with Easter plants and cut flowers, which with the Japanese lanterns hung from the roof of the conservatory, made a most pleasing effect.

Peter Bisset, of the Department of Agriculture, and an active member of the Florists' Club of Washington, is doing much to instill a love of flowers into the hearts of Washingtonians and last week delivered an illustrated lecture on "Flower Gardens and Improved Plants," before the Citizens' Northeast Suburban Association. Charles F. Tansill, president of the Brookland Brotherhood addressed the assemblage on "The Making of Flower Gardens and Beautifying the Homes."

Cincinnati.—M. Anderson has closed his local store and arranged to ship the fixtures to Dayton, Ohio, to use at his place there.

R. Murphy has an excellent new light snapdragon which he has named Lorraine.

Don't Fail to Call and Look Them Over.

H. BAYERSDORFER & CO., 1129 Arch Street, PHILADELPHIA, PA.

Obituary

F. Walker.

F. Walker, the oldest florist in Louisville, Ky., died last week, aged 85 years. He was head of the firm of F. Walker & Co., and had been engaged in the florist business for nearly 40 years.

James H. McManus.

Like a thunderbolt from a clear sky, came the information on Saturday morning, April 4, that James McManus, identified from boyhood with the flower store of Thomas F. Galvin, Boston, had dropped dead the evening before, at his home in Jamaica Plain. He had gone home from the store as usual and after supper fell from his chair, dead, without any premonition. Mr. McManus was born in West Roxbury, Mass., in 1858 and when a boy of 12 went to work in the store of John Galvin, father of Thomas F. Galvin, who is now the head of the corporation and of which Mr. McManus was a stockholder. He leaves a widow and one daughter. James McManus was one of the most industrious men we have ever known. Methodical and steady, he was always on duty, alert and reliable. He had rare good taste in the arrangement of flowers and no florist's business has ever had the services of a more loyal, faithful and useful employee. His sudden passing away is deeply deplored.

Springfield, Mass.—Springfield is to have a rose garden in Forest park which will attract attention all over the land within a few years if the plans of Marshall Headle, the new municipal florist, materialize. Mr. Headle, who recently came to the park department, has scanned the field he is to cover and already has a number of beautification schemes developing, one of which is the rose garden idea. The site for the garden is practically selected and the first bushes will be set out this spring.

WIRE DESIGNS and FLORISTS SUPPLIES

1008 Vine St., PHILADELPHIA, PA.

REACTIONARY.

One of the things which has always appealed to a man with narrow vision is that he can improve his own business by chasing the street vendors who sell cheap posies off the earth. He has succeeded in many places in doing this to a large extent, and yet his business does not seem to improve. He refuses to see that these humble vendors are really missionaries for his business and the love of flowers in general.

The latest move in Philadelphia is a petition to Mayor Blankenburg to chase the Easter plant vendors off the City Hall Plaza—a time-honored institution which has done much to spread a love of flowers among the people. To advocate so short-sighted a policy in my opinion indicates a mind defectively narrow, shallow and quite unable to grasp things at their fundamentals. Why not get out and hustle for some more new business for themselves instead of gunning for the fellow who does?

G. C. W.

OUT OF THE ORDINARY.

"Tango Tints."

The Baltimore Sun, in enumerating some of the floral attractions offered for Easter in that town mentions "sweet peas in tango tints." Can't seem to get the thing out of mind even in Holy Week!

Gardening as Penalty.

Raising flowers and "garden sass" will be the punishment given juveniles for their misdemeanors in the future by the Malden (Mass.) Court. Judge Bruce, whose original methods of handling problems of juvenile delinquency have won him much commendation, believes that few of the boys and girls brought before him are wholly bad, and that the way to reclaim them is not through confinement in correctional institutions.

Vacant land has been offered by J. G. Chandler, of Malden, for Judge Bruce's purpose, and the judge will hereafter sentence juveniles to terms at raising vegetables and flowers.

BUSINESS TROUBLES.

Hartford, Conn.—In the United States Court, bankruptcy petitions were filed on April 3 by Alfred G. Williams, florist, of Norwalk, with liabilities of $2,713.20 and assets of $290.40.

PERSONAL.

James Watt succeeds the late Paul Volquardsen as head gardener for Mrs. W. G. Weld, Bellevue avenue, Newport, R. I.

W. A. Miller has taken a position with the C. P. Mueller Floral Co., Wichita, Kan. He has been with the W. L. Rock Flower Company, Kansas City, Mo., for the past twelve years.

In its department "People of Interest," the Boston Morning Herald for Sunday, April 5, devoted two whole columns to an account of the activities and attainments of J. K. M. L. Farquhar, together with an excellent portrait of that gentlemen. It was a very interesting and inspiring story of the career of a self-made man.

William Allan has resigned his position as gardener for Dr. H. B. Jacobs, Narragansett Ave., Newport, R. I. Mr. Allan was in charge of the place for nearly twenty years, succeeding his father who held that position for about twenty-five years. John McGowan who has been gardener for several years at the L. S. Bruguiere estate near Newport, R. I., has succeeded William Allan at Dr. Jacobs' place.

FIRE.

Brooklyn, N. Y.—Policeman O'Brien of the Herbert street station had his attention attracted early Saturday morning, April 4, to smoke coming from the store of the Le Grand Floral Company, of 575 Grand street. On examination he found that the entire store was ablaze, the flames being hidden from the street by the window display of cut flowers. He turned in an alarm after rousing the tenants in the upper floors of the house. The fire was extinguished after three-quarters of an hour's work. The damage, which amounted to $1,500, is covered by insurance.

Plainfield, N. J.—H. J. Forristel has bought the florist business from his uncle, William H. Forristel, on Bellview avenue, near Park avenue, and will take possession at once.

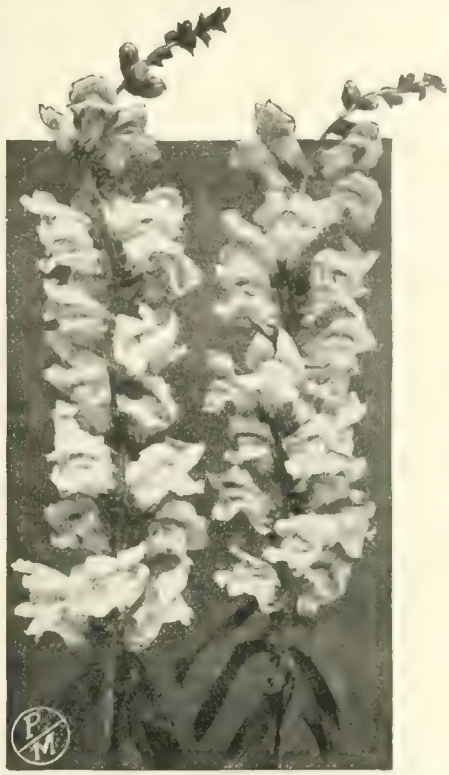
Flower Market Reports

BOSTON



This market at present moment is in the maze of shipping trade crossed with a lot of guesswork and the final outcome of the Easter hustle is as blind a proposition as that of some of our experimenting hybridizers. The rose market is exceptionally good, as it looks today (Thursday), but it will be an uncertain quantity until Saturday's story is recorded. Lilies are a very doubtful quantity. It seems that many more are in evidence than in any previous year and every corner grocery and 10 cent store appears to have a supply. Many of them are much too dwarf, but all are well furnished with flowers. Carnations started in weak but are recovering somewhat. Violets and sweet peas are moving well, the single violets outselling the doubles as usual. Bulbous stock is selling better than in any Easter time in recent years. Callas also seem to have recovered some of their old-time popularity. A few candidum lilies are seen, and these also are "high-liners." Plant business is proceeding as usual and more ribbon adornment is seen than heretofore in Boston.

BUFFALO

On Saturday a heavy day's business was expected, but an all day snow storm kept the buyers well scattered and light speculating was the result. The receipts have been heavy throughout the past week and there is nothing on the scarce side. The supply is heavy on carnations and a good many of the ordinary accumulated to a large extent. Roses are also heavy and beauties more plentiful than last reported. There are plenty of sweet peas, violets, lily of the valley and other corsage flowers and a heavy supply of bulbous material which has only a fair demand. Aside from good ferns there is plenty of everything.

CHICAGO

Neither local nor shipping trade could be called heavy the first week in April, but as no very great amount of stock was coming in it was fortunate that the demand was not greater. At this writing, Tuesday before Easter, shipping is under way and will continue till local trade takes its place for the Easter rush at the latter part of the week. Just now the prospects for a shortage of carnations seems imminent, for the steady cutting which began before the holidays has finally reached its limit and the crop is nearing the end. Dark weather for three weeks, has contributed its share also. Lilies are coming into the market in rather limited quantities today, but the opinion prevails that there will be sufficient for all, though not all will be first class. Bulbous stock is growing scarce and much of it is small, but there is some really excellent stock remaining. American Beauties probably are going to equal the demand, in spite of earlier appearances to the contrary, though a strictly fancy grade will be wanting. There are plenty of roses now and no fear is felt for an adequate supply for the week. Sweet peas are shortening up. Lily of the valley holds firm and quality is excellent. Ferns are scarce and high.

SNAPDRAGON

For weddings nothing more decorative than Snapdragon, whether it be white, yellow, pink or that wonderfully rich, clear pink that has been such a grand seller with us for the last few years.

All colors, $1.00 to $1.25 doz.
Choice Pink, $1.50 to $2.00 doz.

EVERYTHING IN RIBBONS—We carry one of the largest and most varied stocks of Ribbons pertaining to the florist business of any house in the country. If you have not received one of our new catalogues, advise us and we will mail you one at once.

CINCINNATI

From present reports there will be a good and adequate supply of almost all kinds of seasonable flowers for Easter. Easter lilies are in a fine crop and all receipts coming in at the time of this writing are excellent in respect to quality. Roses except American Beauties are also in a good crop. The carnations are not quite on a full crop, but the cut will be good and large. A fair amount of tulips, jonquils and hyacinths may also be had. The sweet pea supply is large as well as that of lily of the valley. Other offerings include antirrhinum, orchids, callas, rubrum lilies, mignonette and forget-me-nots. Business last week was very good. Practically all good stock in roses, carnations and lilies met with a ready sale, very little if any being sacrificed. Business in greens was also very good.

NEW YORK

Quite an agreeable change has come over the wholesale market within the past two or three days. Business has improved greatly and prices have made a decided advance on most lines, especially on the ordinary grades of roses and all grades of carnations. Lilies are very plentiful and the outlook is that there will be great quantities of these for Saturday, the opinion being that moderate prices must prevail owing to the large supply. Good violets are holding up well and will bring good figures for Easter if the weather should be favorable for outdoor wearing. Bulbous stock is normal, with the exception of poeticus narcissus which is very plentiful, the flowers selling from $6.00 to $7.50 per 1000.

Flower Market Reports

(Continued from page 581)

PHILADELPHIA The early part of last week we experienced rather sluggish business, but the last two days were extra good, with a splendid clean-up. The best change that came over the scene was especially noticeable in carnations which from a large overflow actually developed into a shortage, was much to the surprise of the buyers who thought they were being imposed on. One buyer looked very skeptical indeed and said he was doing no more business than on the preceding days. The comment of a wholesaler after that retailer had left summed up a very common occurrence in the flower market. Said he: "That lad seems to think that because he's doing no business nobody else is." And he added a piece of sententious wisdom to this effect: "Its a bad thing to think you're the only tin can on the dump and its worse for the man who thinks it than for anybody else." While all grades of roses remained plentiful they felt the effects of the improved market although not so strongly as carnations and there was a slight hardening in prices towards the end. Beauties have been quite plentiful and here and there some fine flowers have had to be sacrificed. The quotations for the coming Easter are a vast change from the $10 top figure of 1913. This year $6 is the highest and so on down the grades. This is due, of course, to the later date of Easter this year. Three weeks ago Beauties were just as scarce as they were at the same date in 1913. In cattleyas, Schroederæ still holds the fort although a few Mossiæ are beginning to appear. The gardenia market has improved a little, but we still see lots of them on the street which means there are sacrifices somewhere. Violets are plentiful and slow. The indications are for a good demand on these for Easter and good prices are being got for advance bookings. Sweet peas are far too many in the lower grades. High quality is not so plentiful as we have been receiving up to now. Easter lilies are about normal and prices are reasonable. There is likely to be a big slump after Easter as there are an immense number of shorts in pots that are not likely to sell and these will be cut and dumped on the cut flower market next week, demoralizing things generally both for these and for the good stock. Daffodils of the choice greenhouse-grown quality are about over, but there is plenty of the cheap outdoor stuff from the south now arriving. Snapdragon plentiful and of fine quality.

ST. LOUIS The Easter market from all indications is going to be good, with plenty of stock for all, but with considerable advance in prices, according to the quotations posted by the wholesalers this morning April 6. The past week stock was sold so very cheap at both wholesale and retail, that the sudden advance in the prices will hurt the sale of cut stock greatly. The large retail places in the West End say they expect a great plant trade this week and will advise the sale of these in place of cut stock. Lilies are going to be very plentiful this year, as all of our local places will have plenty. Roses and carnations will no doubt be in abundance as they have been the last two weeks, also sweet peas. Violets though, are becoming pale and not so many will come in. Bulb stock promises to be heavy in all lines.

WASHINGTON Stock for the Easter trade is exceptionally plentiful and the prices average about the same as in previous years. The first of the week found the market somewhat short of carnations, but this was perhaps due to the increased demand for the flower over the previous few weeks. White roses, have been and are of fine quality. The supply of Easter lilies is sufficient to meet all local requirements. Potted plants are of fine quality and the sale good. When seen by HORTICULTURE's correspondent on Tuesday, J. Henry Small, Jr., William F. Gude, William Marche, George C. Shaffer, Fred H. Kramer, Otto Bauer, George H. Cooke, and others appeared very optimistic and while some of these gentlemen refused to absolutely commit themselves, yet from their conversation they expected something in the way of "big" business that would offset the dullness of the Lenten season.

VISITORS' REGISTER.

Boston—Fred Lautenschlager, representing Kroeschell Bros. Co., Chicago; Dr. Geo. E. Stone, Amherst, Mass.

Chicago—A. C. Brown, Springfield, Ill.; Edw. Amerpoehl, Janesville, Wis.; J. Dinkel, Springfield, Ill.; Geo. F. Crabb, Grand Rapids, Mich.; Alfred Forder, Cincinnati, O.; Mrs. J. R. Bather, Clinton, Ia.

Cincinnati—Samuel Seligman, New York; Joseph M. Stern, Cleveland, O.; Paul E. Graves, representing Amherst Waxed Paper Mills, Amherst, Mass.; Mr. Van Acker, of Van Acker Bros., Saffelane, Belgium; Mrs. Lampert, Xenia, O.; Jim Keller, Lexington, Ky.; Floyd Anderson, Xenia, O.; and Mrs. Winters, Charleston, West Virginia.

NEW BOSTON WHOLESALE HOUSE.

McAlpine & McDonald have opened up a new, well-equipped and commodious salesroom at 256 Devonshire street for wholesale cut flowers, greens, and plants. Business has made a good start already.

The trustees of the Massachusetts Horticultural Society, always ready to extend a generous helping hand to any worthy enterprise for the advancement of horticulture, have appropriated on behalf of the society, the sum of $500, to be expended at the discretion of a committee consisting of President, J. K. M. L. Farquhar and Messrs. Thomas Roland and E. W. Wilder in the interest of the S. A. F. Convention.

Buyer's Directory and Ready Reference Guide

Advertisements under this head, one cent a word. Initials count as words.

Display advertisers in this issue are also listed under this classification without charge. Reference to List of Advertisers will indicate the respective pages.

Buyers failing to find what they want in this list will confer a favor by writing us and we will try to put them in communication with reliable dealers.

COCOANUT FIBRE SOIL

20th Century Plant Food Co., Beverly, Mass.
For page see List of Advertisers.

CYCLAMENS

200,000 GIANT FLOWERING CYCLAMEN. For the last 16 years we have selected three-fourths of our seed-bearing cyclamen stock before Xmas, to assure early blooming plants, and claim the finest commercial strain in this country; no fizzle of many so-called English varieties. Our aim is strong growers that don't have to be petted to be grown into a choice salable plant—a well built, five-petaled flower (many of them at one time), with well marked foliage; every plant an ideal, a prize winner. Received first prize at the Cleveland show and first and second at Toledo, early November, when blooming cyclamen were scarce.

STRONG AUGUST SOWN SEEDLINGS, once transplanted, $3.50 per 100; $30.00 per 1000. Cash with order. Cultural directions with all orders. C. WINTERICH, Cyclamen Specialist, Defiance, O.

Thomas Roland, Nahant, Mass.
For page see List of Advertisers.

DAHLIAS

Dahlias at greatly reduced prices for 1914. Send for wholesale list. Order early. J. L. MOORE, Northboro, Mass.

When a goose lays an egg, she just waddles off as if she was ashamed of it,—because she is a goose. When a hen lays an egg, she calls heaven and earth to witness it. The hen is a natural born advertiser. Hence the demand for hens' eggs exceeds the demand for goose eggs, and the hen has all the business she can attend to. —*Andrew Lang.*

WANTS, FOR SALE, ETC.

HELP WANTED

WANTED—Working foreman in commercial place, ten miles from Boston, to grow miscellaneous stock for retail trade. Good habits and sobriety essential. Address G. B., care HORTICULTURE.

SITUATIONS WANTED

SITUATION WANTED as gardener; life experience under glass and outside gardening. Very best references. Age, 26; nationality, English. "B. C.," care of HORTICULTURE.

POSITION WANTED—By experienced rose grower, Massachusetts preferred. Understands general greenhouse crops. Address A, care HORTICULTURE.

FOR SALE

FOR SALE—Fresh from factory, new; 10 x 12, 16 x 18, 16 x 24, double thick. A and B qualities. Market dropped. Now is the time to buy and save money. PARSHELSKY BROS., INC., 215-217 Havemeyer St., Brooklyn, N. Y.

NEWS NOTES.

Rocky Ford, Col.—The Englewood Floral Co., of Denver, will open a branch here.

Sioux City, Ia.—J. W. Dunford has purchased the business of the Whiting Nursery Co.

Oswego, N. Y.—F. Penfold has bought out the interest of his partner, P. Leavens, and will continue the florist store at 102 East Bridge street.

Warren, R. I.—Wm. J. Faulkner, florist, has sold his place and will locate in Kearsarge, N. H., where he will continue business on a larger scale.

Rochester, N. Y.—By mutual consent, the firm of Hooker, Wyman & Co., has dissolved partnership. Horace Hooker, C. G. Hooker and Lewis Hooker will continue the business under the firm name of Hooker Bros.

Whitemarsh, Md.—On Wednesday evening, March 25, R. Vincent & Sons Co. gave a banquet to their employees. Tables were set for 100. R. A. Vincent was the toastmaster and T. Alvah Merritt, of Patapsco Neck, and John M. Rider, of Brooklyn, responded to toasts. Being Maryland Day, Mr. Merritt devoted his remarks to Maryland history. T. A. Vincent, who is postmaster of the House of Delegates, was called upon for a speech, and he gave an account of the workings of the Legislature. Musical selections and some recitations were included in the program.

Seattle, Wash.—Gains Edward Ramquist, 16 years old, son of Mr. and Mrs. Oscar E. Ramquist, a florist residing at 4806 Alki avenue, killed himself in an upstairs room at the family home on Sunday afternoon, March 22, by hanging. He fastened a towel around his neck, attached the other end to a door knob and then squatted on the floor. The body of the boy was found by one of his younger brothers shortly after 2 o'clock in the afternoon. The father said his son had been injured in the head some time ago and since that time has complained of constant headache. This is believed to have shattered his nerves and caused him to end his life.

MASSACHUSETTS AGRICULTURAL COLLEGE.

The short course class in floriculture has recently taken its annual trip to Boston to visit the markets, stores and greenhouse establishments in that vicinity. Three days were spent visiting the various places. The first day included visits to J. T. Butterworth at South Framingham, S. J. Goddard and Wm. R. Nicholson at Framingham and Robert Montgomery at Natick. An early start was made the next morning in order to see the Boston flower markets when business was in full swing. The remainder of the morning was spent in visiting the retail stores in the city; in the afternoon a trip was made to Peter Fisher's establishment at Ellis, Mass. On the last day the places visited were Thomas Roland's range at Nahant, William Sim's at Cliftondale, and Thomas Roland's range at Revere. This trip has come to be one of the features of the course since it gives the students an opportunity to see all phases of the florticultural industry.

LEMON OIL CO'S STANDARD
SOLUBLE IN WATER
NO ODOR INSECTICIDE NO POISON

Guaranteed under the Insecticide Act, 1910. Serial No. 321

Save your plants and trees. Just the thing for Greenhouse and outdoor use. Destroys Mealy Bug, Brown and White Scale, Thrip, Red Spider, Black and Green Fly, Mites. Ants, Insects on Rose-bushes, Carnations, etc. without injury to plants and without odor. Used according to directions our standard Insecticide will prevent ravages on your crops by insects.

Non-poisonous and harmless to user and plant. Leading Seedsmen and Florists have used it with wonderful results.

Destroys Lice in Poultry Houses, Fleas on Dogs and all Domestic Pests. Excellent as a wash for dogs and other animals. Relieves mange.

Effective where others fail.

½ Pint - - 25c; Pint - - 40c; Quart - - 75c
½ Gallon, $1.25; Gallon, $2.00; 5 Gallon Can, $9

THE PULVERIZED MANURE CO.
31 Union Stock Yards, Chicago

Scotch Soot

Where there is a house that is just full of buds almost ready to show color, nothing will turn better color into the flowers than a little soot, that can be scattered over the benches before watering. The amount applied should not be excessive, as the soot is very strong and may damage some of the foliage somewhat. Apply just enough to blacken the surface of the soil in the benches, and let it go at that. Better a little oftener than too much all at once.

We offer the genuine in original cwt. Sacks, at:
$2.75 per 112 lbs.; $12.50 per 560 lbs.

Stumpp & Walter Co.
30-32 Barclay Street, NEW YORK

In a recent issue it was announced that John Chapman had leased the Spaulding greenhouses at Beverly Farms, Mass., and was to run them commercially. Mr. Chapman states, however, that the owners have decided not to operate the garden this year, and the position of superintendent being abolished, Mr. Chapman terminated his affiliation, with the good will and best wishes of the proprietors.

HAMMOND'S SLUG-SHOT — I SLAY BUGS — 1880 — 1880 — KILLS INSECTS, SAVES FOLIAGE — TRADE MARK REGISTERED IN U.S. PAT. OFFICE

We use Hammond's **SLUG SHOT** on Currant Bushes in the Spring before the leaves are started. We put it on around the roots and have done it for two years, and find that the worms are killed before they get on the bush. For Potatoes we put on **Slug Shot** as soon as the bugs come, and we have good vines, plenty of tubers and no bugs. It is the best thing we have ever used. **For Sow Bugs in greenhouses it is sure death.** We had a lot of them before using Slug Shot, but they get out where it is used.

ALFRED GOLDRING.

Hammond's Paint & Slug Shot Works, BEACON, N. Y.

PINO-LYPTOL

THE VERY NEWEST AND QUICKEST METHOD OF DESTROYING WEEDS, GRASS AND OTHER GROWTH IN GARDEN WALKS, GUTTERS TENNIS COURTS, DRIVEWAYS, ETC.

This fluid absolutely destroys all weeds and other growth wherever applied, and its effect on the ground prevents the growth of fresh ones for a year and thus saves a great deal of time and labor, as no cutting, hoeing or hauling away of the weeds is required.

We manufacture the strongest line of DISINFECTANTS on the market.

PLANTLIFE

PLANTLIFE has several advantages over liquid insecticides on the market. Containing refined tobacco dust it can be used to mix with the soil, acting as an excellent fertilizer, at the same time destroying worms and insects in the ground before they have a chance to reach the plant.

PLANTLIFE has been found very effective in ridding greenhouses of insects by dusting on plants. When dry, use for dusting about once a week.

Put up in bulk for greenhouse men; in packages for retail trade.

Bag of 100 lbs. $3.50.

Let us quote you prices in quantity.

WM. ELLIOTT & SONS

42 Vesey St., New York

Aphine

The Insecticide that kills plant Lice of every species

The Recognized Standard Insecticide.

W. N. Craig writes in Florists' Review (March 5th, 1914): "Scale on greenhouse plants is not easy to get rid of, as doses which are sufficiently strong to kill the scale will usually disfigure the plants at the same time. I have found APHINE a first-class remedy for scale, and if you will apply it according to directions you will kill and loosen the scales, although they will not fall off, as will some other pests."

It will only require the hose to wash off dead scale.

A remedy that is efficient in destroying scale, will destroy green, black, white fly, red spider, thrips and mealy bug.

$1.00 per quart—$2.50 per gallon.

FUNGINE will destroy mildew, rust and bench fungi.

75c per quart—$2.00 per gallon.

VERMINE will destroy root maggots, eel, wire and cut worms in the soil.

$1.00 per quart—$3.00 per gallon.

SCALINE will destroy San Jose and all hard scale and red spider on fruit and ornamental trees and bushes.

$1.50 per Gal—10 Gals. $10.—50 Gals. $37.50

NIKOTIANA—a 12% nicotine for fumigating over small lamps or by painting on steam pipes.

$1.50 per quart—$4.50 per gallon.

For Sale by Seedsmen.

JERSEY CITY, N. J.

A Before Easter Thought For After Easter Action

SOME men never make up their mind to build until after the winter holiday trade is over.

Others talk and talk about it from January first straight through until after Easter. If the cash register has jingled merrily enough then, they stop talking and begin acting. So every year right after Easter we get a lot of orders from men who want their houses "**right away**." They must have them rushed with a hurrah. Some of them seem almost to believe it possible to have them up and finished in time to grow stock for Decoration Day.

The fact is, however, that if any one can turn out a house quickly and erect it with speed, and still give you a top notch job, L. & B. is that any one. No other concern has such extensive factories; or employs as many men.

We do not, however, advise rush jobs. But, as we said before, if any one can rush a job, and still make a good job, we can.

We shall expect to hear from you right away after Easter.

These Leading Canna Novelties You Surely Want

TO our notion here are six of the top notchers of the season. The way they have been selling would indicate that our notion comes pretty close to being the right notion.
We will sell you any, or all of them at the rate of

	Each	10	100
Panama x, Orange red variegated	$0.75	$6.00	$50.00
Loveliness, Pink	.50	4.00	35.00
Olympic x, Red	.75	6.00	50.00
Kate F. Deemer, Yellow or Orange	...	4.00	25.00
Meteor, Red	...	4.00	25.00
Mrs. A. F. Conard, Pink	...	3.00	20.00

x Plants only now.

Your order will be filled **direct from our storage shelves** where the clumps are kept under most favorable conditions. We do not box any cannas and store them. We box them as we ship them direct from our storage shelves.
You can easily see the advantage of this method. Send along your orders. No one can fill them any more promptly. Our prices are right, considering the superior stock we have the reputation of selling. In the Canna Book is a complete list of Swastika Cannas. If you haven't this book—send for it.

THE CONARD & JONES CO.
Swastika Brand Cannas
WEST GROVE, PA.

BOTA
GA

Care of Allamandas

In order to have these plants in a nice compact form they will need tying and staking from time to time. As they grow they will become crowded and should be spaced quite often to let the sun and air around them. When their pots are full of active roots they will need lots of water. Give them plenty of syringing until well filled with bloom and about twice a week give liquid manure water. They should never be allowed to go below 65 degrees at night and with sun they can be allowed to run up 15 to 20 degrees more. Keep the atmosphere moist by wetting down the paths and under the benches two or three times a day. To increase stock place soft-wooded cuttings in the warmest propagating bed you have, as they should have at least 75 degrees bottom heat to root well.

Ferns

The best way to grow fern spores is to sow them in pans. A soil for small ferns should be a mixture of sandy peat or turfy loam and leaf mold. The temperature is right if held at the point of 60 degrees, as near as possible, the whole year through. Air is necessary to counteract stagnation, but strong drafts are death to tender, young fern-growth. A light shading during the brightest hours of cloudless days from about now until the end of October is good for all ferns.

Ramblers for Easter 1915

In order to have Rambler roses form good bushy plants, start now and get some one year old plants. They should be cut back so they will have three or four strong eyes to break from. I think it is better to pot them into their flowering size now. Do not overlook the fact that they should have a well prepared compost to make fine flowering wood, say a fibrous sod that has been mixed with manure at the rate of three to one and to every barrow load add a 5-inch pot of bone meal, and another of wood ashes. Always see that pots are given good drainage. These can be started in a house that stands at about 50 degrees at night. Syringe them every good day, but give water carefully until root action has started good. They can be grown underglass until July or August.

Planting Gladioli

Have a good piece of ground and see that the soil is worked deep and that there is plenty of well-decayed manure worked into it. It would be well to sort the corms over and plant all the small ones at the first planting leaving the largest for the last planting. You can make a succession of plantings from the middle of April until the end of June. Plant them from 2 to 3 feet apart in the rows, leaving about 3 to 4 inches between the bulbs in the rows. They should be planted at least four inches deep. When they show above the ground keep the cultivator going every week until they have reached a height of about 8 inches. Just before the last cultivation give some quick acting fertilizer between the rows—it can be put on at the rate of three or four hundred pounds per acre.

Sowing Campanulas

Campanulas can be brought into bloom from the middle of April and up to Memorial Day when they are seen in perfection. Canterbury bell, cup-and-saucer (calycanthema) has proved itself indispensable. Other varieties have been tried, but they do not respond to culture under glass as this one does. Get some seed of the white and pink varieties and sow now in flats or pans in equal parts of loam and leaf-mold with a little sand. On this sow the seed, cover and press firmly. Give them a warm house until they show signs of coming up, when they should be placed in a light and cool house that runs from 45 to 50 degrees at night. When large enough prick out or pot off. When May comes they can be planted out in the field, giving them about 15 inches between the plants and with proper cultivation you can grow fine strong clumps by October.

Ripening up Freesias

By giving these little bulblets a little care while they are ripening up they will finish up their growth so as to leave good strong bulbs for future use. Withhold water gradually until the tops are all ripened up, when they can be shaken out, sorted and stored away until they are wanted again.

Mr. Farrell's next notes will be on the following: Asters; Begonia incarnata; Cyclamen; Gloxinias; Orchids; Winter Geraniums.

As an Advertising Medium Horticulture has NO superior. Because they ALL read it. And they read it ALL.

To the credit of New York

The New York Flower Show promoters, individually and as organizations, are entitled to sincere congratulations on their success in at last demonstrating that New York can pull off a big exhibition and make it a financial as well as artistic and instructive success. The project to attempt this, without outside help other than exhibits, was undertaken with considerable misgiving and the full realization that failure would sound the death-knell of popular floral exhibitions in the metropolis for years to come and a deplorable loss to the cause of horticulture. The result was better than its sponsors dared to hope, knowing well the many discomfitures of the past. Undoubtedly the dominant element in the success achieved was the wide, personal interest displayed, the harmony and accord which prevailed between the many contributing factors—amateur, professional, and every commercial element. The potency of co-operation and the invincible strength of united determination was given a splendid practical demonstration in this well-conducted enterprise.

A gain for the Easter cut flower

Valuable lessons may be learned from a careful perusal and study of the various Easter reports from leading trade centres as presented in this issue. It will be noticed that while the stories of the demand in different localities are widely variant in many respects yet in a broad aspect they have much in common. In the newer communities we have invariably found the experiences to parallel those which the more advanced places have gone through a number of years previous. The most significant feature of the Easter business of the past few years in those centres which, in a measure, set the pace in floral fashions for the rest, has been the drift of preference for pot plant material over cut flowers, which in each succeeding year seemed to grow apace, the cut flower becoming less and less of a factor. But now it would appear that the current has at last been arrested and in some important places the cut flower demand has apparently given the plant trade advance a serious check. We noticed this tendency last year not only at Easter but at Christmas and it certainly has made emphatic headway in the interim. In those sections where the turn in the tide is not yet felt the cut flower people should be able, in our humble opinion, to extract considerable comfort from a study of the returns and what they probably indicate.

Vicissitudes of the Easter lily

The Easter cut flower industry has had to go through some tough experiences in recent years. The lessons thus learned should prove valuable and must be heeded if the revival now evidently started is to be really permanent and the holiday flower business to enjoy its fair proportion of the popular favor. There is no need to discuss further now the suicidal policies of the past. They are well known. Returning to our consideration of the developments of this year's Easter we must say that when we expressed the opinion a few weeks ago that the lily crop in the leading eastern markets would be fully adequate for all requirements, we had no idea of the enormous excess of adequateness in the supply of this great Easter specialty which was in prospect. Naturally there are varying explanations for this unprecedented and very unwelcome redundance of lilies but it may reasonably be assumed that the abundance of these flowers continuously all the year round, as has come to be the case, has had more or less effect in depreciating their standing as a distinctively Easter specialty. With the rivalry of new and beautiful roses, hydrangeas and other bright and irresistible claimants for public favor, a full restoration of the longiflorum lily to its former Easter glory and pre-eminence would seem a far-off proposition, although its symbolic character will always bring it a certain prestige. Its value at Easter or any other time is likely to depend more on quality hereafter than was the case in the past when, too often, any lily was a lily.

"THE GARDENERS' PROBLEM."

Editor HORTICULTURE:—

The communication headed "The Gardeners' Problem," appearing in last week's issue of HORTICULTURE, signed by George C. Watson, in which he comments on the executive meeting of the National Association of Gardeners, held in Philadelphia recently, would lead one, not familiar with the facts, to infer that the meeting was primarily devoted, and excitedly so, to an attempt to solve the gardeners' wage problem. In reality reference to it was only made incidental with the report submitted of the good work which is being done by the association's service bureau. In connection with it some existing conditions were brought to light indicating that men within the gardening profession are as much responsible for the poor compensation that comes to some of them as are the owners of the estates on whom Mr. Watson chooses to place the entire blame.

As an instance I will cite a case which was brought to our notice during the past few weeks. An owner of a rather extensive estate not far from New York sought a superintendent, offering $125 in salary with cottage and usual privileges. A competent gardener was recommended, but he would not consider the position at a salary less than $150. After several days' consideration the owner finally decided to engage the gardener at the figure he asked. In the meantime it became noised about the vacancy existed and the day after the gardener referred to, was engaged, applications for the position commenced to pour into the owner. Some sixty odd applications were received in which "salary expected" was specified and the highest asked to manage this estate was $75 and from that down to $50. One applicant offered to take the position for $40 and if "hired" he would show the owner how to make the place pay. It took quite some "educating" to convince that owner that there had not been a slump in superintendent salaries and that he had not made a serious mistake in accepting a man who had even demanded more than what he was inclined to give.

On the other hand the receipt of applications of a similar nature as those just described resulted in a position of manager of an estate of over a thousand acres being filled at $75 per month. The former manager is reported to have received $175 a month. No doubt the man who now fills the position considers himself well paid and would be, on a place where he could probably make good, placed in charge of a few acres of lawn, flower, and vegetable gardens.

Many more instances of like nature could be related that occurred this spring and the standard of the profession of gardening is not raised by the men professing it as their calling who will apply for a position of manager or superintendent (and for which they are in every way unfitted), simply because they are looking for a job and don't care where they land so long as they land at any salary without regard as to the responsibilities they undertake to assume. Their action can only serve to spoil good opportunities for capable men who would fill the positions with credit to their profession. And the owners of estates who will employ these men at salaries entirely inadequate to the services expected to be rendered, usually get what is coming to them; the despoliation of their estates through inexperienced management, and sometimes worse, the incurring of heavy expenditures, often unnecessary, through irregular practices.

Our friend Watson, in making the suggestions he does reminds me of the fellow on the outside looking in, but who has not had the insight on what is going on, that the insider possesses. For his suggested campaign of education among estate owners is something that has been practiced through one of the departments of our organization with most encouraging results for more than a year past. Through its efforts superintendents, gardeners and assistants have already benefited, and through the proposed co-operation with local societies this campaign of education is to be spread broadcast to bring to the notice of those who require the services of gardeners, that the profession of gardening is no different than any other profession—that in it are to be found men who are most efficient in their calling, and men who are quite inefficient—that when the services of a gardener are required judgment should be exercised in the selection of the gardener and proper consideration should be given to the compensation offered for the services to be rendered — that remuneration should be in full proportion to the responsibilities of the position. The owners who recognize that "every man is worthy of his hire" will have little difficulty in securing gardeners who will not only manage their estates capably, but who will also make them a genuine pleasure to maintain.

The sagacious advice that the legitimate work of the N. A. G., really is in educating the employers what a minimum wage ought to be, will not be accepted. The members of the executive board possess sufficient wisdom to avoid everything that may pertain to politics, religion or the regulation of labor.

The National Association of Gardeners recognize gardening solely as a profession, and its aim is to elevate this profession, not by regulation, but through education. No better means or methods can be found to accomplish this than through co-operation between the various organizations interested in the welfare of the profession and in those who follow its calling.

M. C. EBEL, Secy.

National Association of Gardeners.

EASTER CHAPEL DECORATION AT WELLESLEY COLLEGE, MASS.

The accompanying picture shows only the central group of the decoration at Houghton Chapel, Wellesley College on Easter Sunday, this having been flanked with groups of palms and lilies on either side of the platform. The arrangement is most commendable for the simplicity and good taste displayed by the college gardener T. T. Watt in its make-up.

CLUBS AND SOCIETIES

NEW YORK FLORISTS' CLUB.

The meeting of the New York Florists' Club on Monday evening, April 13, was exceptionally well attended, one reason therefor being the interest of the members in the promised report of the Flower Show Committee on the recent Spring Exhibition. The report as presented by Chairman F. R. Pierson was certainly a gratifying one. It showed gross receipts from all sources of $27,310, of which $11,000 came from sale of admission tickets. Treasurer F. H. Traendly gave his report in detail, showing a balance of $1185 to divide between the club and the Horticultural Society of New York as net profit after paying out nearly $10,000 in premiums and $10,000 to the Exposition Company on account of rental and other expenses. The guarantors had not been called upon for any assessment.

After some congratulatory remarks by several members, a motion was adopted for the appointment of a committee with power to act in conjunction with a similar committee of the Horticultural Society of New York to make arrangements to hold a similar show in the spring of 1915. Unanimous votes of thanks were passed for the Flower Show Committee, in recognition of its splendid work; to Julius Roehrs Co., for the loan of palms, etc., for decoration of the exhibition hall; to Jos. A. Manda, for his efficiency as superintendent, and to A. H. Hews Co., for the loan of 5,000 flower pot saucers. The action in extending the duration of the show beyond the time originally specified was declared by Manager Jos. A. Manda to have been a mistake. Wallace R. Pierson took the same ground, saying that it was a serious matter to ask people to pay to see dead flowers. The outcome of the discussion was a vote that it was the sense of the meeting that seven days should be the maximum limit of future exhibitions.

Doctor Headley, State Entomologist, of New Jersey had been announced to give an illustrated lecture on insect pests and their control. The lecturer was on hand and gave an interesting and useful address, but the stereopticon annex failed to appear and so the illustrations were unfortunately missed.

The sum of $50 was voted for the American Sweet Pea Society, which is to hold its summer exhibition this year in New York. Fourteen new members were accepted and ten more were proposed.

WESTCHESTER AND FAIRFIELD HORTICULTURAL SOCIETY.

A well attended meeting of this society was held in Doran's Hall, Greenwich, Conn., Friday evening, April 10th. The Summer Show committee reported that the show will be held June 19th-20th on the hospital grounds at Portchester, N. Y. The Fall Show committee reported that this show will be held at New Rochelle, N. Y., the date to be announced later. A number of letters were read from business firms and others offering cash and other prizes to be added to the premium list. John Shore, who was a visitor, spoke of the advancement of horticulture in America, he having over fifty years' experience as a gardener, knows whereof he speaks. Maurice Fuld spoke of the benefits the horticultural societies could derive by cooperation with the Garden Club movement. John M. Brown congratulated the society as a body for the excellent showing made at the big Spring Show in New York, its members having been successful in carrying off eighteen first prizes, eight second prizes, two certificates of merit and two silver medals. It was announced that John K. M. L. Farquhar of Boston would give a lecture on "Gardens" shortly. Due notice will be given as to the exact date.

The exhibition tables were loaded down with a choice and varied display, the judges report was as follows: Cultural certificate to Owen A. Hunwick, antirrhinums, 6 ft. stems; cultural certificate to Thos. Aitchison for Dendrobium chrysotoxem; specimen marguerite from Oscar Addor, highly commended; honorable mention to A. Kirkpatrick for Silver Pink snapdragon; vote of thanks for carnation Northport and Alma Ward, from Jas. Limane; White Enchantress from A. Kirkpatrick; Salmon Beauty from W. H. Watermoneki; tulips El Toreador, from P. W. Popp. Oscar Addor entertained the members by reading a very clever paper replete with humor and satire that was greatly enjoyed. A hearty vote of thanks was accorded him. The next meeting of the society will be held May 8th. P. W. Popp

NEWPORT HORTICULTURAL SOCIETY.

The first gathering of this society at Music Hall, its new meeting place, was well attended by members, their families and friends, on April 14th. Arrangements had previously been made for a social evening with vocal and instrumental music, dancing and refreshments, all proving to be a great success. Appropriate remarks of welcome by President MacKay and an address by Treasurer A. K. McMahon at the opening were also features of the gathering.

Besides some decorations to the stage with well flowered primula plants, a vase of superb antirrhinum stood in the centre of the hall, each spike being over six feet in length, and some over seven feet, with over fifty flowers on each. The colors varied from pure white to dark crimson. A committee was appointed by the president to examine and report on this exhibit and a silver medal, the highest award of the society, was given. John B. Urquhart, gardener for Mr. R. L. Beekman was the exhibitor. J. Robertson.

The Premium List is out for the June Exhibition by the Newport Garden Association in conjunction with the Newport Horticultural Society. The exhibition will take place June 24th-26th, on the grounds of Senator Wetmore on Bellevue Ave., Newport. Copies of the premium list can be obtained from William Gray, Bellevue Ave., Newport, R. I.

NATIONAL ASSOCIATION OF GARDENERS.

Meeting of Executive Board.

The spring meeting of the Executive Board of the National Association of Gardeners was held in Horticultural Hall, Philadelphia, on Tuesday, April 7th. There were present John W. Everitt, Glen Cove, N. Y.; James MacMachan, Tuxedo Park, N. Y.; Robert Bottomley, New Canaan, Conn.; Arthur Smith, Reading, Pa.; M. C. Ebel, Madison, N. J.; Thomas Logan, Jenkintown, Pa.; William Kleinheinz, Ogontz, Pa.; John Dodds, Wyncote, Pa. In the absence of President Waite, Vice-President Everitt occupied the chair.

The following resolution was adopted:

"The response to the communication on cooperation recently addressed to the local horticultural societies by the National Association of Gardeners has been so favorable, it is the sense of the members of the executive board present, that definite action should be taken to inaugurate the cooperative movement between the national association and the various local horticultural societies, who may desire to unite with it to advance the interest of horticulture and the profession of gardening.

"Be it resolved, therefore, that the secretary be instructed to address the various local societies, inviting those interested in our endeavor, to appoint committees of three to be known as the cooperative committee of the local society of which they are appointed. These committees will act with the cooperative committee of the National Association of Gardeners to be composed of the president, vice-president, treasurer and secretary of the National Association and to be known as the National Cooperative Committee.

"The National Committee shall inform itself through the local cooperative committee of the workings and doings of the different local organizations and gather such information as may be of interest and value to local horticultural bodies in their operations, and shall disseminate such information as it may acquire among the societies cooperating with it. Through such an interchange of views and experiences, the successful efforts of local societies in their various undertakings will be imparted to sister societies by which they can benefit and their scope of effective work be increased.

"The National Committee is further empowered to enter into cooperation with local horticultural societies, in the broadest sense that the word "cooperation" may imply, to spread the interest in horticulture. And to devise ways and means by which the various local societies shall have actual representation at the annual conventions of the National Association of Gardeners, where they may come together and work out the problems which confront the profession of gardening."

It was decided to continue the campaign to exploit the association's Service Bureau to make known to estate owners and others requiring the service of capable gardeners that they can obtain efficient men engaged in the profession through the Bureau. By continuing this campaign the association hopes to gradually eliminate the class of so-called gardeners entirely unqualified by experience or knowledge to manage positions they apply for, and which class is proving so detrimental to the profession as a whole.

In order that members of the Executive Board who, owing to distance, cannot always attend the meetings may have an opportunity to participate in them and to make suggestions in connections with, and offer opinions upon the policy of, the association, a resolution was adopted that an invita-

TWO STERLING TULIPS.

In the opinion of a keen, close and experienced observer, two of the finest tulips in existence today are the new varieties President Cleveland, pink, and Rising Sun, yellow. Both won first in their class at the spring flower show in Philadelphia for the Waterer prizes, the exhibitor being Wm. Kleinheinz.

We are indebted to the Philadelphia Record for the two cuts representing the tulips mentioned. For daily newspaper use a much coarser "screen" is necessary in making engravings than is used in HORTICULTURE and similar publications.

tion be extended to members of the board, that when they cannot attend a meeting they submit any suggestion they may have to offer in writing, and and that it shall be given the same consideration as though the member offering it were present in person.

The secretary's financial report showed the association to be in fine financial condition with a substantial surplus in the bank.

Messrs. T. A. Havemeyer and F. R. Newbold, of New York, were elected to honorary membership in recognition of their valuable services rendered in the management of the recent successful New York Flower Show.

Following a general discussion, the board adjourned to meet in Boston during the month of August. Before adjournment a vote of thanks was tendered the Pennsylvania Horticultural Society for the use of its offices. The visiting members later became the guests of the local members of the board at one of the hotels where, while enjoying a wholesome repast, they were entertained by the relating of reminiscences of bothy experiences.

PITTSBURGH FLORISTS' AND GARDENERS' CLUB.

The meeting of the club on the 7th inst. was largely attended. The various instructive entertainments which have been lavishly supplied at the meetings have resulted in greatly swelling the attendance.

The matter of affiliation with the S. A. F. was discussed, and while the sentiment was favorable towards the S. A. F., yet there seemed no enthusiasm over the idea of the club, as a club, affiliating. A letter was read from Richard Vincent, Jr., proposing that the Pittsburgh club join with the Baltimore and Washington clubs in making the trip to Boston from Baltimore by steamer at the time of the S. A. F. convention in August. The matter was taken under consideration, but it was felt that it was yet too early for any decided action.

The New York Spring Flower Show was most favorably discussed, the display of orchids being termed magnificent. Notice was taken of the appointment of Wm. Plumb, of New York, as superintendent of floriculture of the Panama-Pacific Exposition, and the secretary was instructed to write to Mr. Plumb expressing the good wishes of the club, and also to the Exposition management congratulating them on their good fortune in securing the services of Mr. Plumb.

Jno. Rigg, gardener for Capt. Shields of Sewickley, showed samples of a cheap fertilizer prepared by the Captain. The theory on which Capt. Shields worked in preparing his fertilizer was to try to reproduce the wonderfully fertile soil which gave the luxuriant vegetation of the coal age. Samples of the fertilizer were taken by different members for trial.

There was a varied collection of blooms, which received recognition as follows:

Cultural certificate to M. J. Harris, gardener for Dr. Shafer, of Pittsburgh, for laelias and cypripediums; certificate of merit to T. Tyler, gardener for Mr. Armstrong, of Pittsburgh, for collection of orchids; cultural certificates to Fred Bartsch, of Glenshaw, Pa., for group of cinerarias; P. S. Randolph & Sons, Verona, Pa., for French hydrangeas; Bureau of Parks, N. S. Pittsburgh, for spiraeas and hydrangeas; Bureau of Parks, Schenley Park, Pittsburgh, for lilies and daffodils. In this collection of daffodils, Van Waveren's Giant was remarkable for size and vigor.

H. P. JOSLIN, Sec'y.

PROPOSED TEXAS STATE ORGANIZATION.

The idea of having a State organization of florists originated with Tom Wolfe of Waco and R. C. Kerr of Houston. Both are very enthusiastic as to the outcome, and they believe the new organization will enter the field with a large membership. It is intended to have branches in all the cities of importance in Texas, each to submit a report of the State organization at the annual meeting.

Mr. Kerr, acting as chairman of the State Committee on Organization, has been doing some active campaigning, with the result that in San Antonio, Fort Worth, Houston and Dallas, local florists' clubs have already been formed, with the enthusiastic support of the leading growers and retailers, nurserymen and others in each place.

The first State meeting will be held at Waco, Texas, on May 4 and 5, and a strong representation from all parts of the State is expected.

CLUB AND SOCIETY NOTES.

A movement has been started to organize a florists' association in Nashville, Tenn.

W. N. Craig, of Brookline, Mass., addressed the members of the Salem Women's Club on Wednesday afternoon, April 8, his subject being "Practical Floriculture." A large audience enjoyed the lecture.

The Eighth Annual Show of the North Shore Horticultural Society of Lake Forest, Ill., will take place at Durand Art Institute, third week in July, 1914. Copies of the preliminary premium list may be had by applying to E. Bollinger, Sec'y, Lake Forest, Ill.

The Terre Haute Florists' Association held a meeting at the Chamber of Commerce building on the evening of April 2. Election of officers resulted in the choice of F. Heinl, president; Henry Graham, vice-president; N. B. Stover, secretary; Fred Walker, treasurer; all re-elected.

At the meeting of the Elberon (N. J.), Horticultural Society held on Monday evening, April 6, a cultural certificate was awarded to Robert Allen for a trained specimen of Rose Hiawatha, also a cultural certificate to John Clunas for a specimen cattleya. The schedule of the chrysanthemum show to be held November 3, 4 and 5 at Asbury Park, was adopted and ordered sent to the printer for early distribution. WM. BRYAN, Asst. Sec.

Officers were elected at a meeting of the Florists' Club of Dayton, Ohio, Thursday night, April 2. The result of the balloting was that George Bartholomew was chosen president, Arthur Schmidt was re-elected vice-president and Horace Frank again chosen for the office of secretary and treasurer. Plans for the annual banquet were discussed and it was decided to hold it some time after Easter, the time and place to be decided upon later.

At the regular monthly meeting of the New Jersey Floricultural Society held in Orange, N. J., on April 6, it was decided to hold the annual fruit, vegetable, dahlia and gladiolus show in October and to make same the event of the season. The society will also hold a sweet pea show in July.

A prize was awarded to Sidney and A. M. Colgate for Tricopelia suavis. Also to Mrs. Henry Graves for Cattleya Schroederae and to Peter Hauck, Jr., for a specimen genista.

The society wishes to thank the various seed houses that so kindly donated to the October Show, 1914.

GEO. W. STRANGE, Secy.

New Haven, Conn.—Transfers in the towns of Orange and Milford to the Elm City Nursery company have been recorded of several valuable tracts of land immediately adjoining the Woodmont railroad station. The Elm City Nursery company will start to develop this property right away, establishing as fast as possible one of the largest and best equipped nurseries in the country. Business headquarters will remain for the present at Edgewood, Westville.

Obituary

Mrs. Charles E. Keith.

Mrs. Charles E. Keith, widow of the late superintendent of the parks of Bridgeport, Conn., died on March 15. She leaves two sons and one daughter.

William E. Wise.

William E. Wise, 67 years of age, who for many years has been employed at the Propagating Gardens, Washington, D. C., died last week at his late home, 1013 Fourteenth Street. Funeral services were held at St. Vincent de Paul's Church. He leaves two children, Arthur Wise and Mrs. Grace Johnson.

Charles Koelker.

Charles Koelker, head of the firm of Charles Koelker & Sons, florists, a resident of Toledo, Ohio, 46 years, died Friday morning, April 3, at his home, 1702 Cherry street, aged 65. Mr. Koelker was born in Muhlhausen, Westphalia, Germany. In 1874, with two brothers, he came to Toledo. They engaged in the merchants tailoring business, but on account of failing health, Charles withdrew from the firm 10 years ago, and with his two sons, engaged in the florist business, with greenhouses in West Toledo and salesroom on St. Clair street.

Theodore L. Ewoldt.

Theodore L. Ewoldt, one of the best known florists of the Tri-Cities, died at the home of his brother, Frank in Davenport, Ia., after an illness of several months duration, aged 36 years. The cause of death was Bright's disease. A few days ago, Mr. Ewoldt showed much improvement and there were hopes of his recovery, but he became worse and died at 2:30 o'clock on the morning of April 8th. Mr. Ewoldt's father had died only the previous Saturday, April 4th, and was buried on Monday, April 6th.

Mr. Ewoldt was a charter member of the Tri-City Florists' Club and has at various times held the office of president, secretary, and some of the minor offices. He was one of those members who put life and activity in the club and will be greatly missed by its members. The funeral was held from the Elks' Club rooms, Friday, April 10th, with interment at Pine Hill cemetery. WM. GOOS,

Sec. T. C. F. Club.

BOTANICAL GARDENS FOR UNIVERSITY OF CHICAGO.

The largest botanical gardens maintained by any institution in the United States will be established in the near future in connection with the University of Chicago campus, if plans as announced are carried out. Laboratories and accommodations for the transplanting of rare flora will be maintained. The gardens will contain a large fernery and hidden grottoes, dells and sloping terraces. Many apartment houses and cottages on the site of the new garden will be razed within a few weeks. The gardens will be in charge of the botany department and the school of science of the university.

MASSACHUSETTS AGRICULTURAL COLLEGE.

A party of seven from the Massachusetts Agricultural College made a trip to New York to visit the Flower Show on Wednesday and Thursday. The party consisted of Professor A. H. Nehrling, the head of the Floricultural Department, C. L. Thayer, graduate assistant, and several of the Seniors majoring in Floriculture,—G. A. Reid, H. W. Levine, S. L. Freedman, R. Cushman and A. S. Thurston.

The trip was purely for educational purposes, to give the students an opportunity to become acquainted with a larger number of plants, to study the methods of staging the exhibits, to become familiar with the important firms in the profession, and also to meet personally some of the prominent men. This is one of the many advantages which the students taking Floriculture at the Massachusetts Agricultural College have, since the college is located in the horticultural section of the United States. The students enjoyed many courtesies, being addressed by such men as Benjamin Hammond, Secretary of the American Rose Society, John Young, Secretary of the Society of American Florists, Fred Lautenschlager, of the Kroeschell Boiler Company, Chicago, I. S. Hendrickson of John Lewis Childs, who gave them information on many of the new varieties of gladioli, and W. R. Pierson of Cromwell, Conn.

ARBORETUM FIELD CLASS.

Mr. J. G. Jack will conduct a field class at the Arnold Arboretum on Saturdays during the spring and early summer, to assist those who wish to gain a more intimate knowledge of the native and foreign trees and shrubs which grow in New England. The instruction will be given in informal outdoor talks and examination of the plants. Different botanical groups will be examined at each meeting, although any trees or shrubs found may form subjects for study. The aim is to assist in showing the difference and the means of identification of the trees and shrubs, and to give information regarding their ornamental and useful properties, habits of growth, and other features which members of the class may desire to know. Unless otherwise notified the class will meet promptly at 10 o'clock in the morning on Saturdays in the Arboretum, at the Forest Hills entrance. Upon days too stormy for good field work the class will meet in the lecture room of the Bussey Institution, near the Forest Hills entrance to the Arboretum, where a talk upon trees, with illustrations, will be given. The class will open Saturday, April 18, and close June 27. Two hours will be devoted to each meeting. The course is open to both men and women.

BUSINESS TROUBLES.

Sigmund Kaufman, florist, Milwaukee, Wis., filed a voluntary petition in bankruptcy April 6, scheduling his liabilities at $3,687.09 and his assets at $2,332. He claims exemption on $1,800.

A petition in bankruptcy was filed in the United States District Court on April 4 by A. H. Bucharach, a nurseryman, with debts of $26,751 and assets of $50,978.

FLOWERFIELD, L. I., N. Y.

SWEET PEA YARRAWA.

Since published the illustrations and descriptions of the sensational sweet pea Yarrawa, last week, we have learned more about its origin. We assumed it to be one of Burpee's introductions, that gentleman having kindly sent us the photographs, but we find it to have originated in Australia. The following extract from "The Garden," London, England, may interest our readers:

A New Race of Winter or Early Flowering Sweet Peas.

More than eighteen months ago, I was told by Mr. Arthur Yates, of Sydney, Australia, that a very precocious sport had recently appeared there among some ordinary Spencers. The seed had been saved, and a wonderfully early flowering strain had resulted. This is known in Australia as the Yarrawa Spencer, and has been a decided acquisition in such warm climates as that of Sydney, for if seed be sown in late summer or early autumn, the plants will begin to bloom in two months from the time of sowing, and continue in flower for some two or three months longer; in fact, until the hot weather begins. This strain has now been crossed with the older winter-flowering varieties, with the result that a large and vigorous race has been obtained, which is further distinguished by well-formed blooms of much substance. The name "Concord Hybrids" has been given to it, and it is said by the raiser to be superior to the Algerian one of Arkwright, the American of Zvolanek, or of the British of Engelmann. I am going to try these Australian seeds this spring, and I hope to send an account of them later on in the year. It seems to me that a public trial of these various early flowering strains that are now before the public would be most useful. Why should not the Royal Horticultural Society be asked to find room for a small representative collection of each of them, and grow some in pots under glass and some in the open? I find these early sweet peas so very useful, and I would like to know which is the best. JOSEPH JACOB.

PRIMULA MALACOIDES.

In the brief time since its introduction this dainty primrose has rapidly acquired widespread popularity among the florist trade. The fine specimen which is depicted on our cover page this week was grown by E. Yeandle, superintendent of "The Oaks," Morris Plains, N. J. It was grown from Bod dington seed and to that firm we are indebted for the photograph which we have reproduced.

Newport, R. I.—The large flower show, to be held in Newport in August, will be terminated with a brilliant illumination of the grounds and a ball at the home of a prominent society woman, whose identity is not yet disclosed. Plans for the show are being made by Francis L. V. Hoppin of New York, who has arranged previous out-of-door events in Newport.

Bedding Plants and Roses

"GET THEM AT DREER'S"

The New French Hydrangeas

For Memorial Day

We can still furnish plants, now stored in cold frames and which, if given geranium house conditions, will flower fine for Decoration Day. At the prices we quote you will find them a profitable investment. We particularly recommend the 6-inch and 7-inch pot stock.

AVALANCHE. A splendid, large, white with a well established reputation; an easy variety to force.

BOTANISTE PELTEREAU. Enormous flowers of a pretty mauve rose.

BOUQUET ROSE. Large trusses of rosy amber, turning to bright pink; a favorite with all growers.

DENTELLE. Entirely distinct, deeply fringed flower of a creamy-white color; it is not suited for forcing; but for Decoration Day and later flowering it is very valuable.

E. G. HILL. This is by far the best pink variety for early forcing that we have yet tried. Trusses of immense size; color a most pleasing shade of pink which does not fade; growth vigorous, foliage of a pea-green color large and attractive. It is one of the easiest to force, coming into flower as early as Mme. Emile Mouillere.

FRAICHEUR. Very large, regularly shaped flowers, white, delicately suffused with rose; very free flowering.

GENERAL DE VIBRAYE. A favorite wherever seen; very large heads of bright rose-colored flowers; a splendid early forcing variety.

LA LORRAINE. Very large flowers, pale rose, turning to bright pink; has become a general favorite.

MME. A. RIVERAIN. Superb bright rose color; very vigorous and floriferous.

MME. E. MOUILLERE. Probably the most popular white variety on the market to day; an early, easy variety to force.

MME. MAURICE HAMAR. A delicate flesh-rose color. A vigorous grower, the individual flowers as well as the trusses being very large. One of the easist to force early.

MME. RAYMOND. Large trusses of perfectly round flowers of a transparent white, passing to a tender rose.

MLLE. AGNES BARILLET. A splendid white; flowers large and very freely produced.

MLLE. DE TREMAULT. As the result of our own trials, we are convinced that this variety is the best very large-flowered white yet introduced. As free flowering as any, of splendid, erect habit, producing flower heads as large as the old popular Otaksa.

MLLE. RENEE GAILLARD. Very large panicles of milky white, irregularly dentated flowers.

MOUSSELINE. A beautiful mauve rose, with cream-colored center; the flower heads are large and held erect; a fine acquisition.

MONT ROSE. Immense panicles of clear flesh rose, entirely distinct. One of the best very early-flowering varieties.

MONS. G. RENAULT. Very large flowers of a bright rose, with carmine reflex; very free and easily forced.

ORNEMENT. Large, pretty mauve-pink flowers; very free flowering.

RADIANT. At the International Show in New York last spring, Radiant was the one variety which attracted much attention. It is an easy variety to force, of a splendid, rich, live rose carmine, entirely distinct from all others.

RONSARD. Flowers and trusses very large, of a beautiful rose tint.

SOUVENIR DE MME. E. CHAUTARD. One of the very best, of splendid, erect habit, very robust, medium-sized heads, of bright rose-colored flowers; one of the very best of the Bouquet Rose type.

SENATEUR HENRI DAVID. Another splendid rose-colored variety, with red reflections, flowers produced in immense large heads; on the style of La Lorraine, but an earlier bloomer.

SEED TRADE

AMERICAN SEED TRADE ASSOCIATION

Officers—President, Chas. C. Massie, Minneapolis, Minn.; 1st vice-president, J. M. Lupton, Mattituck, N. Y.; 2nd vice-president, W. F. Therkildson, Painesville, O.; secretary, C. E. Kendel; assistant secretary, S. F. Willard, Jr., both of Cleveland, O.

New Ideas in Seed Advertising.

Mr. Pettitt, the brilliant young advertising manager of the Michell Co., has been referred to several times in these columns recently in regard to his new ideas and general efficiency. His latest success is the Boy Scout campaign. This, in brief, is an outfit for the Boy Scouts whereby they can easily take orders in their neighborhoods in the campaign for the "Town Beautiful." They get paid a commission on orders and it is nothing unusual for these boys to earn $10, $15 or $25 a week in commissions. The idea has "caught on" amazingly, very much to the glory and profit of the House of Michell. Personally, I don't believe in training boys in bloodshed, as this scout business would seem to indicate. But they tell me these boys are on the lifesaving, heroic, courteous and town-clean-and-beautiful side—so that makes a difference. A very good article on seed advertising appears in last week's "Printer's Ink," from the pen of Mr. Pettitt. G. C. WATSON.

Notes.

J. B. Deamud has succeeded to the management of Vaughan's Seed Store, New York, in place of Mr. Slimon, who became incapacitated by ill health.

The Chicago retail seed stores all report a good business this week. The Easter spirit of flower giving and the bright sunshine have acted as a stimulus to trade, and quantities of seed packets, garden implements and nursery stock are changing hands.

Chairman W. F. Therkildson of the Postal Laws Committee of the American Seed Trade Association, informs us that every effort is being made to have Senate Bill 4980 taken up by unanimous consent in the House prior to the date set which was April 20. This is the Pomerene Bill to restore the old postage rate of two ounces for one cent, up to and including eight ounces.

At a meeting of the Executive Committee of the Ancient and Honorable Mechanical Company of Baltimore, held March 27, 1914, Charles J. Bolgiano, of the old established seed firm of J. Bolgiano & Son, was elected a member of the company. The Ancient and Honorable Mechanical Company of Baltimore is the oldest civic organization in the United States. It was organized Sept. 22, 1763. At the time the company was founded Baltimore, with a population of only 2,500, was threatened with many dangers and the purpose of the new organization was declared to be for the purpose of protection, "Not only from the frontier savages, but freebooters and pirates from the eastward." The first six mayors of the city were selected from among its members.

Joseph Breck & Sons Corp.

Seedsmen

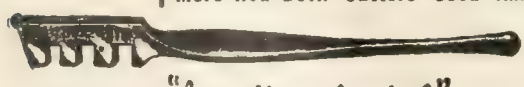
47-54 No Market St., BOSTON, MASS.

CATALOGUES RECEIVED.

Thomas J. Gray Co., Boston, Mass.—Everything for the Golf Course. Well carries out its purpose and will be found very useful and practical.

Good & Reese Co., Springfield, O.—Spring Trade List for Florists, Nurserymen and Dealers Only. A comprehensive collection of seasonable planting material, hardy and tender.

Kelway & Son, Longport, England.—Gardens of Delight. While intended for catalogue purposes and serving as a supplement to their annual Manual of Horticulture. Messrs. Kelway have in this beautiful publication departed from customary catalogue style and have kept price lists and similar features well in the background. There are many original articles on garden topics and quotations on pertinent subjects from many authors. The illustrations are very fine, several of them in colors. This is the sort of literature which develops garden lovers.



PUBLICATIONS RECEIVED.

The Modern Gladiolus Grower is a very practical little monthly periodical for both amateurs and professionals and No. 4 of Vol. 1, has just come to hand. It is published by Madison Cooper, Calcium, N. Y., and is a very creditable production.

Proceedings of the Western New York Horticultural Society at its 59th Annual Meeting held at Rochester, N. Y., on Jan. 28-30, 1914. A 250-page book, comprising an unusual amount of useful and practical information and reflecting much credit on the painstaking secretary John Hall. The interests of the great fruit industry of the State of New York, of which this Society is the leading exponent, are well cared for in this publication.

The Proceedings of the American Carnation Society at its 23rd annual meeting, held in Cleveland, Ohio, January 28-29, 1914, has been received from the secretary. In addition to a stenographic report of the discussions it contains much that will be of interest to all carnation growers, including a list of new varieties registered in this country and England during the past year, list of the members of the society, etc. A portrait of President Brown forms the frontispiece.

New York, N. Y.—Baltimore Cut Flower Co., capital stock, $25,000. Irving Jaffee, T. F. MacMahon, W. R. Siebrecht, 114 West 28th street.

Washington—To Miss Eleanor Wilson, daughter of President Wilson, who is soon to marry William G. McAdoo, Secretary of the Treasury, is attributed a new style of wearing corsage bouquets. Miss Wilson appeared on the street and at a dance wearing a bouquet of flowers at her right shoulder, out of danger when the wearer is tangoing. These bouquets are now known as "tango bouquets."

THE SURPLUS DEVIL.

A Reverie by George C. Watson.

One is inclined at times to take a rather pessimistic view of things.

One talks to a retailer and finds he has little regard for anybody but himself.

One talks to a grower and usually finds that he thinks he is always getting the worst of the deal.

One talks to a commission man and learns that he gets no sympathy from either side—and thinks himself lucky if he breaks even.

Isn't all this enough to make anyone, even an optimist like the writer, a little bit pessimistic? Wouldn't preaching a little about cultivating the spirit of give and take on both sides help some? We believe it would, if it wasn't for that surplus! That pestiferous surplus brings every bit of latent selfishness out from the producing end. If there are more flowers in any one day than the market can absorb or, in other words, than the retailer cares to buy, what happens? The surplus is shoved aside from day to day, from Monday to Friday. On Friday it is offered at bargain figures to the retailer or the fakir, and then the howl begins. But in that case the retailer has his protection. "Those are not fresh flowers." He has that slogan and can hold his customers easily. So he is really not greatly harmed, if he would only calm down and consider that every cheap posy is a missionary for him.

But with Easter or Christmas plants it is different. In that case devil surplus is a genuine devil. The grower sells all he can at good prices to the retailer, and if he has grown too many—they go to the department stores and the street—with no stipulation as to prices—and take back any unsold. This is no fairy tale. It's a fact, and here's where the retailer has a real grievance. He does not have an equal chance as with cut flowers. The plants are not stale. They are just as good as he is selling. He is stung and there is no redress. We cannot see any reason why a department store is entitled to any better terms on plants or on anything else than a regular retail florist.

The surplus devil often blinds the fair-mindedness of the grower just as shortsightedness and narrow-mindedness often blind the retailer. If both sides would cultivate the spirit of toleration, of reciprocity, of justice, of square dealing, and not let a penny now kill a future dollar, one would be more optimistic. Let us all try to be a little more decent to each other from now on.

CHICAGO NOTES.

Easter Plants.

Plant sales predominated as in former years and plant growers were mostly sold out a week or more before Easter. There was nothing strikingly new among the offerings, but the arrangements were more artistic than ever before and prices did not run quite so high as has sometimes happened. More pains were taken with the small offerings and it is safe to say that the number of plants sold was larger than ever, although the total may not reach a larger figure than in former years.

Rain fell on Good Friday but Saturday was clear and bright and trade quickly responded. Repeat orders began to come in but were often turned away because of lack of stock and retailers turned to cut flowers. There seem to have been fewer plants from the East this year. Azaleas, as was predicted, were not equal to the demand and were hardly up to their usual degree of excellence owing to their poor condition when imported. A bright Saturday was followed by an Easter Sunday of ideal weather and the florists generally are pleased with their Easter business.

(For Easter flower report, see usual market columns.)

Trade Notes.

The department stores are again offering trees to the school children at one cent each, for Arbor Day, April 17. Three hundred thousand white birch trees, approved by the official forester J. H. Prost are included.

The Foley Greenhouse Manuf. Co. is this week shipping some of their malleable iron specialties for greenhouse construction, to A. N. Pierson, Cromwell, Conn. Mr. Foley says business is starting out very nicely in the new factory this spring.

Harry Rowe made a record hard to beat. The large store on the northwest corner of Wabash avenue and Washington street was vacant and Mr. Rowe secured the key on Thursday morning, had his stock in place and was doing business in the afternoon. Monday the store is empty again and a neat sum is the result of three days' efforts.

At Wm. J. Smyth's, corner of Michigan avenue and 31st street, a very satisfactory business is reported. Something is lacking, however, when an automobile fails to crash through a window, as has happened twice before, or the wind to blow in one of the big sheets of plate glass. The employees say they miss something when no accident occurs at Easter time.

At Wietor Bros. this week, a house of 8000 Sunburst and another of Killarney Brilliant are being planted, the former having proved a good commercial variety and the latter, Mr. Wietor believes will do so. Carnation Bonfire is now seen here and is fine in color and form, while the three whites, Perfection, Wonder and Enchantress would be hard to excell, as grown at this place.

The annual Easter sale for the benefit of the Home of Destitute Crippled Children, given at the Congress Hotel, netted an enormous sum of money. Many of the florists who have donated to this worthy object in the past, felt it unwise to do so longer, as the amount of money taken in by the society annually has now reached proportions that make deep inroads into the florists' Easter sales.

Personal.

Christ. Blaumeiser of Niles Center, Ill., has the sympathy of the trade in the loss of his father.

Fred Strail leaves Friday for Twin Lakes, Mich., where Mrs. Strail will soon follow him. They will spend the summer on a fruit and poultry farm.

A CORDIAL INVITATION
Is extended to the trade to visit and inspect our new establishment, Fifth Avenue at 46th Street, New York City.

Don't Fail to Write for Illustrated List

H. BAYERSDORFER & CO., 1129 Arch Street, PHILADELPHIA, PA.

IN VERMONT.

Reports from Bellows Falls, Vt., show that George Halladay had a record Easter in both pot plants and cut flowers, pot lilies naturally taking the precedence, with primroses, azaleas and daffodils following. The Misses Baker of Springfield, Vt., also report an increased business, although some complaint is made by the legitimate florist that the "corner drug store" or other stores are harming them by selling carnations imported from Boston, and in one store some lilies quite four inches high, also from near Boston, were to be seen marked at 7 cents a bud or bloom. Another element which has entered into the trouble of the country florist is undertakers' competition. Whatever the pros and cons in regard to this practise of the undertakers, it does not appear to be exactly fair for the florist to be deprived of what may be termed the cream of his trade, and is doubly hard on a man who has to educate the public before he gets their custom, only to find that they are patronizing a cheap-jack. SHERWOOD.

NEWS NOTES.

Escondido, Cal.—The first flower show ever held here will take place on Friday, April 24, under the auspices of the Floral Society.

Gloversville, N. Y.—The workshop of William J. Larcombe, Prindle and Jansen avenues, and greenhouses adjoining, were badly damaged by fire last week, and about $600 worth of spring bedding stock was destroyed.

Dallas, Texas.—Selling trees to citizens of Dallas at cost to beautify sidewalk parkings is a new industry in which the city will engage. A city nursery has been established at White Rock reservoir under the direction of Park Superintendent Robert Tietze, and Mayor Holland says that he expects the city will be able to dispose of trees at cost within 18 months or two years. What is the matter with the Texas nursery interests?

WINDOW DISPLAY ADVERTISING FOR TELEGRAPH DELIVERY BUSINESS.

The illustration represents a window display made by Holm & Olson, Inc. (The Home of Flowers), St. Paul, Minn., to show the public how flowers may be delivered in any part of the world via wire.

The large telegraph poles seen in the back ground are six feet high and the cross arms are three feet long. These poles are set eight feet apart and the wires are stretched in the regulation way. Between these poles and below the wires are seen a number of cards. Looking closely you will find the United States reproduced with the cards representing the principal cities, also the principal cities of Canada are shown. The cards on the right of the picture represent the principal cities of Europe. On the left of the picture the cards represent the principal Asiatic cities.

To the right is an oil painting of a White star liner; to this picture also a card is attached. A total of 72 cards are used and to each card is attached a ribbon. The ribbons all run to a box of Holm & Olson Flowers and are centered. The box of flowers is seen in the center of the foreground. This is to convey the idea that the box of flowers can be delivered to any of the cards which indicate cities and also on board departing steamships. To the left in the foreground is a miniature telegraph line, the poles eight inches high and on each end is connected a telegraph instrument. One instrument bears a card "The Home of Flowers" and the other bears a card "To all parts of the world."

The telephone is also used and by combining telephone and telegraph the wire idea is complete. Two of the Florists' Telegraph Delivery posters are shown. Throughout the window are scattered the labels and tags of florists throughout the United States and Canada. A number of these tags are addressed as "To My Sweetheart," "To Dear Mother," "Congratulations," "Best Wishes," etc. Holm & Olson received from a circular letter sent out to the various florists about 400 tags and labels, this alone making an unique display. The canvas in the background was put up to enable the photographer to obtain a better picture.

This window display created a great deal of comment and a crowd of people hovered before it constantly and all were impressed with the idea. A number of orders for out of the city delivery were also received which was directly due to the display.

Edward H. Roehrs, of Rutherford, N. J., and Miss Edith Marshall were married on Thursday, April 16, at St. Andrew's church, New York City.

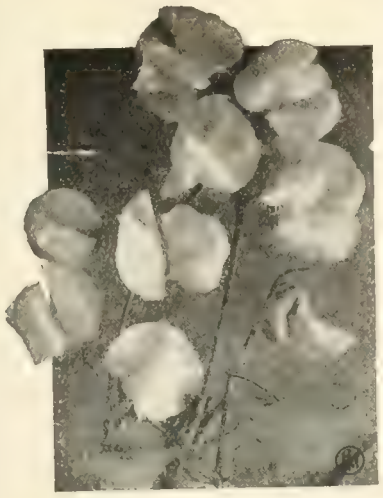
Flower Market Reports

BOSTON

A very satisfactory Easter business kept everybody busy for the latter half of last week, but there was an overwhelming influx of flowers of all kinds and no scarcity was experienced on any line, although the cut flower department of many stores far exceeded the plant department in interest and sales. Flowers sold better than plants—the first time in many Easters. Carnations dragged somewhat and lilies were badly congested, there being veritable forests of them, of which only a proportion were sold, the rest remaining to overload the present week. Lily plants were grown in too large a quantity for the normal outlets of this market and many found their way to dry goods stores and provision markets, where they were offered at retail much below the regular wholesale quotations. Violets and sweet peas had a grand sale, as was also true of Cardinal, Richmond and all deep-colored roses. American Beauty enjoyed a good sale. So also did single daffodils and cattleyas. Snapdragon did fairly well. Many azaleas, rambler roses and other plants are left over in retailers' hands. The wholesale markets are loaded down with flowers of all kinds, the present week being the deadest experienced here this season. The public evidently exhausted either their pocketbooks or their flower fancy last week and things look very blue at present writing. Such a change!

BUFFALO



The great so-called Easter rush is over and all are satisfied. The ending was good and much better than was expected considering what the florists-at-large had to contend with. From Monday till Saturday snow was most plentiful and the temperature was freezing. Friday was the mildest day of the week and a large volume of business was done, especially in the plant line. The supply of plants was the largest ever handled during any Easter, though this does not apply to the wholesaler alone, but the growers who have retail stores connected and those that cater to the public market, where the bulk of the ordinary quality of stuff is disposed of. The retail merchants made excellent displays, the stores utilizing every inch of space, and the quality of the stock was never seen better than at this Easter, which was largely due to the two weeks of cold weather previous to Easter. Azaleas were plentiful in all grades and sizes, prices, etc., to meet any purchaser; also rhododendrons, hydrangeas, lilacs and pans of tulips, daffodils and other bulbous stock. Lilies were plentiful, though again too many short plants.

There was practically nothing doing in the cut flower line until Thursday. Advance orders were coming in lightly, there was no spectacular buying and it was keeping the retailer as well as the wholesaler guessing as to what the end of the week would bring forth. Carnations were good and cleaned up quite satisfactorily. There was a good supply of roses, violets, sweet peas, lily of the valley, cut lilies, Beauties (only of the long grades), and all corsage flowers, all of which shared in the demand. Snapdragon was in good supply, but did not take well. Bulbous stock was too plentiful and very little sale.

CHICAGO

Chicago florists, footing up Easter sales, almost unanimously declare it to be one of the best on record. Predictions in most case were verified regarding stock and roses proved plentiful and carnations in short supply while lilies proved to be in just about sufficient quantity to go around. Prices generally were maintained close to quotations except in extremely large orders. Killarney, Richmond and Sunburst were all in enormous quantity and after shipping orders were filled, the end of the week found no lack of good stock for local trade. Carnations generally were off crop, and there is no question but many more could have been disposed of had the cut been larger. Lilies appeared to be in excess of demand at first, but after the potted lilies ran out, purchasers fell back on cut ones, and with a few exceptions, wholesalers sold the bulk of their stock. American Beauties, never in heavy Easter demand, were sufficient for customers and at this writing there are plenty coming in. Sweet peas were cut so close for Easter that they are short now. Iris meets a fair demand. Lily of the valley is needed, as the wedding season has already begun. There is still an abundance of bulbous stock.

Flower Market Reports

(Continued from page 613)

CINCINNATI Easter business was very good. The supply was large and sufficient for all requirements. The demand was even better than expectations. On Saturday a miserable rain set in, but in spite of that orders came in at a merry rate and nearly every one reports a good Easter. The supply of all flowers was fully adequate, except in carnations and sweet peas. The American Beauty cut, too, was rather limited.

Prospects for the immediate future are very bright. The rose cut is large and steady and the flowers are of a very good quality. A good cut of Beauties is promised for the immediate future. The carnation cut will probably continue somewhat under normal for a few weeks. Easter lilies are in a good supply. The same is true of all the market staples.

NEW YORK New York's Easter may be told in few words. It was a big Easter in every sense—big for plants and for flowers; big for grower, wholesaler and retailer. The weather man was kindly disposed, especially on Sunday, which was a beautiful day and more flowers were worn in the great Easter parade than ever before. Almost every second lady was adorned with cattleyas, violets, sweet peas or lily of the valley. The sale of roses and carnations was surprisingly good, as was that of daffodils, but the great bulk of the rush was on the four things above enumerated. Gardenias were seen on Fifth avenue in superabundance, but—mainly on the trays of the street sellers and "thereby hangs a tale." If you want to maintain the respect of the public for any flower, exercise some caution as to how it is presented to them. Lilies met a very sad fate. Such an avalanche never before landed on any market. Every out-of-town locality was seemingly supplied locally and it was impossible to ship any. Prices asked for lilies in large lots were one-half and one-third of normal Easter figures, and at the close the only thought was to unload, at any price. It was estimated that not less than 50,000 lily flowers, cut or on plants were left over in wholesalers' hands. These are still in evidence and are considered well-sold this week at $1.50 per 100. The flower that got the worst rebuff, however, was the snapdragon. It was absolutely unsalable, no matter what its color, or to whose "true strain," it traced its lineage. Bulbous stock made an unexpectedly good record, the only draggy exception being the white tulips. The plant trade did not seem to increase any in volume over recent years, the demand being almost entirely for the smaller and less expensive stock. Large specimens moved with difficulty. The best sale was had on the mixed baskets, tin lined and ribbon adorned. These were beautifully gotten up by the retail dealers, with small dainty flowered and foliage plants, and their sale was legion. The supply men placed in the hands of the florists the most artistic and appropriate examples of baskets and other plant receptacles ever offered and these contributed not a little to whatever prosperity the Easter plant business enjoyed.

PHILADELPHIA Cut flowers of all kinds were plentiful and good for Easter week, with the possible exception of violets and lily of the valley. The former are reaching the end and were scarce and not of the highest quality, especially the singles. Lily of the valley was scarce, probably because the growers did not plant enough. The big supply, at reasonable prices, of such things as roses, carnations, orchids, gardenias, had a notable effect in switching buyers away from their usual purchases at Easter. Many of the retailers commented on this change in the Easter situation. The cut flower men are, therefore, distinctly to be congratulated. Of course they did not get famine prices, but they had quantity to make up for that, and the reasonable figures leaves a good taste in the buyer's mouth which will be remembered next year. There was a tremendous business in cut flowers, and it is certain the records have been broken as to quantity. Total receipts as to value are not figured out yet, but all look pretty cheerful. Daisies and other small flowers were in great demand for bunching. The weather all through was ideal, and corsages were "all the rage."

In Easter plants the business was also fine, but not such a good clean-up as usual. There were large lots of short-stem lilies and much of this stock remained unsold. There were also a good many large azaleas that did not find a market. All the lower-priced stock, like spiraeas, daffodils, hyacinths, etc., had a good clean-up.

ST. LOUIS St. Louis has just experienced one of the best Easters in many years. Plants of all descriptions sold as they never did before, and especially so with the large up-town florists who have show houses which were filled up the past week and are now empty. All agree that lily plants had the call over all others. The sale of these was enormous. Next came azaleas, hydrangeas and rhododendrons, followed by spiraeas and bulbous stock. The weather was all that could be expected, which made delivery easy. Cut flowers were scarce and high, which was least expected, as all stock just before Easter was very plentiful. Those who placed advance

20th Century Plant Food Co., Beverly, Mass.
For page see List of Advertisers.

CYCLAMENS

200,000 GIANT FLOWERING CYCLAMEN. For the last 16 years we have selected three-fourths of our seed-bearing cyclamen stock before Xmas, to assure early blooming plants, and claim the finest commercial strain in this country; no fizzle of many so-called English varieties. Our aim is strong growers that don't have to be petted to be grown into a choice salable plant—a well built, five-petaled flower (many of them at one time), with well marked foliage; every plant an ideal, a prize winner. Received first prize at the Cleveland show and first and second at Toledo, early November, when blooming cyclamen were scarce.

STRONG AUGUST SOWN SEEDLINGS, once transplanted, $3.50 per 100; $30.00 per 1000. Cash with order. Cultural directions with all orders. C. WINTERICH, Cyclamen Specialist, Defiance, O.

Thomas Roland, Nahant, Mass.
For page see List of Advertisers.

CYCLAMENS from 5 in. pots. Finest strain. Separate colors. JULIUS ROEHRS CO., Rutherford, N. J.

For List of Advertisers See Page 595

CYCLAMEN—Continued

Cyclamen giganteum, best strain to be had any where; pure white, white-pink eye, rose of Marienthal, Christmas Cheer, strong 2 in. pots ready to shift, $5.00 per 100; $40.00 per 1000; this offer holds good until April 25th, only. J. A. PETERSON & SONS, Wholesale Plant Growers, McHenry Ave., Westwood, Cincinnati, O.

DAHLIAS

Dahlias at greatly reduced prices for 1914. Send for wholesale list. Order early. J. L. MOORE, Northboro, Mass.

Dahlias. 800,000 Clumps to offer. Send your list of wants to the Largest Dahlia Grower in the World. J. K. ALEXANDER, "The Dahlia King," East Bridgewater, Mass.

Dahlias—2500 field clumps, latest varieties, cheap for cash; or what have you to exchange? GEO. H. WALKER, Dahlia Expert, North Dighton, Mass.

Dahlias—Clean, healthy stock, fully matured, novelties and standard varieties, true to name and at reasonable prices. Also Gladioli, field-grown Hollyhocks, Herbaceous plants, etc. Send business card for catalogue. W. W. WILMORE, Box 382, Denver, Colo.

Flower Market Reports

(Continued from page 615)

orders were in high glee but others who took chances on stock being plentiful got left, as the wholesale houses had all they could handle with advance orders for both local and shipping. Carnations that sold only a week before at 2 and 3 went up to 5 and 6, and fancy whites at 8 per 100. Roses were most reasonable.

WASHINGTON

The florists report a very satisfactory Easter business, although the volume was not sufficient to overcome the many dull weeks which preceded the rush. All were forced to put on additional help, Gude Bros. using the services of about sixty messengers in addition to a large force of men from the greenhouses and such clerks as they were enabled to pick up at short notice. In some degree this same condition existed in other places. The extra and inexperienced employees in such large numbers caused more or less confusion, but as a whole, things moved very smoothly. There were several surprises, incident to the business, the greatest of these being the lack of demand for snapdragon. This flower came with long stems and fine, full flowers, but no one seemed to want it. On the other hand, there was something of a rush for red roses which caused the price to jump considerably before Sunday. As a whole the prices were about the same as in previous years. Gardenias, however, were cheaper than they have been. The sale of these will not prove historic, for the street men peddled them about at ten cents each, killing their sale in the stores. The movement of pot plants about reached the limits of previous years, although in the cheaper grades only; the people did not seem to want the expensive stock. With the city full of tourists, a fair sale of flowers continued during the early part of the week, particularly of jonquils which seemed to be the favorite, while sweet peas, as usual, came a close second. Roses for this purpose are not much in demand.

COLUMBUS, O.

Easter trade was double over last year. Blooming plants of all kinds sold on sight. Sweet peas and violets for corsage work were in great demand. The weather turned in bad, (rain). The flower stores were rushed and all were satisfied. The markets were flooded with potted hyacinths and tulips which were sold very cheap. Good stock of blooming plants were in demand, as always.

WANTS, FOR SALE, ETC.

Advertisements in this column one cent a word. Initials count as words. Cash with order. All correspondence addressed "Care HORTICULTURE" should be sent to 11 Hamilton Place, Boson.

HELP WANTED

WANTED—Working foreman in commercial place, ten miles from Boston, to grow miscellaneous stock for retail trade. Good habits and sobriety essential. Address G. B., care HORTICULTURE.

WANTED On commercial place, a hustling man familiar with growing herbaceous perennials. State wages and experience in first letter. CHERRY HILL NURSERIES, West Newbury, Mass.

SITUATIONS WANTED

WANTED—Position as head gardener. Scotchman, age 31, married, thoroughly competent to take charge of private estate, desires position as above. Experienced in orchids, carnations, roses, etc. Fruit, inside and out, flower and vegetable gardens. Lawns, shrubs, farm stock and poultry. Address with full particulars, W. HAY, Box 273, Bernardsville, N. J.

SITUATION WANTED as gardener, inside or out, on private estate. Life experience—fruit, chrysanthemums, orchids, etc. First-class references. Age, 38; English. Address "P," care HORTICULTURE.

SITUATION WANTED by competent greenhouse man. Thoroughly experienced in all branches. Capable of acting as foreman. Central Massachusetts or Southern New Hampshire preferred. "C. J. H.," care HORTICULTURE.

FOR SALE

FOR SALE—Fresh from factory, new; 10 x 12, 16 x 18, 16 x 24, double thick. A and B qualities. Market dropped. Now is the time to buy and save money. PARSHELSKY BROS., INC., 215-217 Havemeyer St., Brooklyn, N. Y.

FOR SALE—A nice residence; 9 rooms; having all latest improvements—city water, steam heat, electricity; two wells; three greenhouses; across from a Cemetery. Very suitable for a florist. Address J. P. THEVE, Norwich, Conn.

NURSERY STOCK CANNOT BE MAILED TO CANADA.

The Canadian Department of Agriculture has served notice on Uncle Sam that nursery stock by mail from the United States is taboo in the dominion. The Second Assistant Postmaster General at Washington has sent out the following communication:

"The postal administration of Canada has informed this department under date of March 13, 1914, as follows.

" 'Under a regulation of the department of agriculture, which took effect on the first day of March, 1914, the importation into Canada of nursery stock, including trees, shrubs, vines, grafts, scions, cuttings, or buds, is prohibited through the mails, excepting greenhouse-grown florists' stock, cut flowers, herbaceous perennials and bedding plants, which will be admitted provided that a detailed statement of the contents is attached to the parcels containing such matter.' "

PLANT FOOD.

On page 552 you have an inquiry about feeding potted plants. The following combination is enough to make a barrelful of liquid fertilizer for use, either for house plants or for florists' stock. It is called "Wagner's Solution."

Ammonium phosphate	2 oz.
Sodium nitrate	1½ "
Potassium nitrate	1½ "
Ammonium sulphate	1½ "

To use this, dissolve the above in about five pints of water. This concentrated solution can be kept in a bottle, three or four ounces being used in three gallons of water to feed the plants. Feed palms, ferns and other foliage plants with it about once a week. The cost of the chemicals will not be over 25 cents. P. T. B.

Stamford, Ct.—G. L. Cannon has purchased the greenhouse stock of the A. L. Butler Estate at Coscob and transferred them to his establishment on Atlantic street.

LEMON OIL CO'S STANDARD SOLUBLE IN WATER INSECTICIDE NO ODOR NO POISON

Guaranteed under the Insecticide Act. 1910. Serial No. 321

Save your plants and trees. Just the thing for Greenhouse and outdoor use. Destroys Mealy Bug, Brown and White Scale, Thrip, Red Spider, Black and Green Fly, Mites, Ants, Insects on Rose-bushes, Carnations, etc. without injury to plants and without odor. Used according to directions our standard Insecticide will prevent ravages on your crops by insects.

Non-poisonous and harmless to user and plant. Leading Seedsmen and Florists have used it with wonderful results.

Destroys Lice in Poultry Houses, Fleas on Dogs and all Domestic Pests. Excellent as a wash for dogs and other animals. Relieves mange.

Effective where others fail.

½ Pint - - 25c; Pint - - 40c; Quart - - 75c
½ Gallon, $1.25; Gallon, $2.00; 5 Gallon Can, $9
10 Gallon Can - - $17.00

Dilute with water 30 to 50 parts

WM. ELLIOTT & SONS
42 Vesey St., New York

Scotch Soot

Where there is a house that is just full of buds almost ready to show color, nothing will turn better color into the flowers than a little soot, that can be scattered over the benches before watering. The amount applied should not be excessive, as the soot is very strong and may damage some of the foliage somewhat. Apply just enough to blacken the surface of the soil in the benches, and let it go at that. Better a little oftener than too much all at once.

We offer the genuine in original cwt. Sacks, at:
$2.75 per 112 lbs.; $12.50 per 560 lbs.

Stumpp & Walter Co.
30-32 Barclay Street, NEW YORK

Sold by the Seed Dealers

Office of ALFRED GOLDRING, Florist, Cobleskill, N. Y., March 17, 1914

We use Hammond's **SLUG SHOT** on Currant Bushes in the Spring before the leaves are started. We put it on around the roots and have done it for two years, and find that the worms are killed before they get on the bush. For Potatoes we put on **Slug Shot** as soon as the bugs come, and we have good vines, plenty of tubers and no bugs. It is the best thing we have ever used. **For Sow Bugs in greenhouses it is sure death.** We had a lot of them before using Slug Shot, but they get out where it is used.

ALFRED GOLDRING.

Hammond's Paint & Slug Shot Works, BEACON, N. Y.

Aphine

The Insecticide that kills plant Lice of every species

The Recognized Standard Insecticide.

W. N. Craig writes in Florists' Review (March 5th, 1914): "Scale on greenhouse plants is not easy to get rid of, as doses which are sufficiently strong to kill the scale will usually disfigure the plants at the same time. I have found APHINE a first-class remedy for scale, and if you will apply it according to directions you will kill and loosen the scales, although they will not fall off, as will some other pests."

It will only require the hose to wash off dead scale.

A remedy that is efficient in destroying scale, will destroy green, black, white fly, red spider, thrips and mealy bug.

$1.00 per quart—$2.50 per gallon.

FUNGINE will destroy mildew, rust and bench fungi.

75c per quart—$2.00 per gallon.

VERMINE will destroy root maggots, eel, wire and cut worms in the soil.

$1.00 per quart—$3.00 per gallon.

SCALINE will destroy San Jose and all hard scale and red spider on fruit and ornamental trees and bushes.

$1.50 per Gal—10 Gals. $10.—50 Gals. $37.50

NIKOTIANA—a 12% nicotine for fumigating over small lamps or by painting on steam pipes.

$1.50 per quart—$4.50 per gallon.

PLANTLIFE

PLANTLIFE has several advantages over liquid insecticides on the market. Containing refined tobacco dust it can be used to mix with the soil, acting as an excellent fertilizer, at the same time destroying worms and insects in the ground before they have a chance to reach the plant.

PLANTLIFE has been found very effective in ridding greenhouses of insects by dusting on plants. When dry, use for dusting about once a week.

Put up in bulk for greenhouse men; in packages for retail trade.

Bag of 100 lbs. $3.50.

Let us quote you prices in quantity.

For particulars address
John G. Esler, Sec'y Saddle River, N.J.

IF YOU ONLY KNEW what a good eave the **METROPOLITAN PATENTED** is, you would use no other. It is made of cast iron and will not rust. That part of your greenhouse which in other constructions is the weakest becomes the strongest. Not this alone, it is ice-clearing and carries all the water of condensation from the inside, and it is so constructed that almost the entire end of the bar is exposed to the air, thereby preventing decay. Only one screw, about two inches from the end, is all that is necessary to secure the bars. For side stationary glass, wood headers are absolutely unnecessary, thereby causing no shade. Zinc glass stops are not necessary—the eave is made with a lug to prevent the glass from slipping. Let your next house be built with a **Metropolitan Patented Iron Wall Construction.** You will never regret it. Our price and service are right.

A North Carolina Nursery Company Builds L. & B. Houses

YESTERDAY, we were going over our list of Southern customers and found that 5 or 6 years ago we had only a few houses in Dixie Land, in comparison with the quantities of them now dotted here and there all the way from Mason-Dixon to Jacksonville and from Atlanta to Dallas, Texas.

One of our best customers has been the J. Van Lindley Nursery Company of Pomona, North Carolina. The ridge and furrow houses you see are each 30 x 100 feet. Their largest L. & B. house is 42' 6" x 500'. It is one of the largest, if not the largest single house in Dixie.

The satisfactory thing about the Van Lindley business is; it has been so satisfactory to them that we keep on selling them year after year. In fact it's quite so with pretty nearly all our Southern friends.

When you are ready to build we want to build for you.

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

LIBRARY NEW YORK BOTANICAL GARDEN

Asters

There is no doubt that the finest asters are raised on light, sandy soils, deeply plowed or dug and quite heavily fertilized with rough barnyard manure the year previous. I like to have the land well plowed, manured and thoroughly prepared in October or November. In the spring the ground is then nice and mellow, needing nothing but a good raking over to have it ready for planting. Aster growers should not be in too great a haste to plant out. Raw cold winds, I believe, are the principal cause of turning vigorous little asters into a lot of yellow, blighted or stunted plants. Indoor-grown plants should first be well weaned to open-air conditions. The ground on which asters are to be grown should be fresh when stirred, but not wet or deficient in spring's natural warmth. Potted plants or those once transplanted, may be set out on the sunniest day, but for the planting of those coming directly from the seed bed a warm, but somewhat cloudy day should be chosen.

Begonia incarnata

For a fine winter flowering begonia there is nothing better than Begonia incarnata. The only thing that keeps it from becoming a rival of B. Gloire de Lorraine or Glory of Cincinnati is that it cannot be grown into a salable plant as quickly as they. Old plants can be cut back and kept on the dry side for a few weeks and when they show signs of breaking they can be given water at the roots. Give them a temperature of about 60 degrees at night and they will soon produce fine cutting. A propagating bed that will root roses will root this begonia fine. When they are rooted pot them into 2½ inch pots using a compost of fibrous soil three parts, leaf mold two parts and one part of sand. As they become well rooted they can be shifted into 4-inch pots using a compost richer than the former.

Cyclamens

Cyclamens started late last fall or in midwinter are among the readiest to resent any slight in cultural care at just this time of the year. Cyclamens will do fine in the house where your best geraniums are. In fact, that is, to my mind, the proper place for them for the present, but don't stick the stock in some out of the way corner because they like a little shade. The little plants don't need any shade. For the next six weeks they want light, sun, and good circulation of fresh air; then, only, will they do their best. A good potting soil for well advanced cyclamens is a rather stiff mixture of turfy loam and thoroughly decomposed cow manure lightened by the addition of some sharp sand and a small portion of good leaf mold, all well broken up, but not sifted. Rightly placed drainage in the larger sized pots is essential.

Gloxinias

In watering gloxinias care must be taken not to wet the foliage any more than is absolutely necessary. The earlier started gloxinias are now coming into bloom. These are given a well shaded house, with a night temperature of 60 degrees, the plants being kept quite close to the glass. As the pots fill with roots, an occasional weak dose of liquid manure will be found helpful. Elevate the best plants on inverted pots. When well opened, gloxinias can be placed in a house 10 degrees cooler, in which they will get more substance and keep much longer, but they must always be shaded from the sun and cold drafts must never strike them. There is still time in which to start tubers for late summer blooming. Place them in flats covered lightly with leaf-mold and sand in a warm moist house. Gloxinias enjoy a light but moderate rich compost and it is better not to use chemical fertilizers if flowers with substance are desired. Seedlings started in January are now of a good size in flats and will soon go into 3½ inch pots with a later shift into 5-inch pots, in which they will be allowed to bloom.

Orchids

There is at present an abundance of cattleya flowers. Move plants in flower into a cool, airy and well-shaded house. In order to keep down the temperature, rolling lath-blinds are preferable to whitewash on the glass. It is not necessary to remove them from flowering plants as they admit a good amount of light, but when used on other houses where plants are making their growth it is better to use them only to protect the plants from the sun and it is surely a great advantage to have all possible light during spells of dark, rainy weather. As the various summer cattleyas pass out of flower keep them fairly cool and drier at the root. Necessary potting or rebasketing should be done before the growths are too much started. In regard to temperatures, no hard and fast rule is possible during the summer months but 60 to 65 degrees at night is ample. It is preferable to give some air rather than to close up tightly on colder nights.

Winter Geraniums

Now is the time to select plants of the most popular varieties of geraniums. Any of the scarlet ones sell well at Christmas. Plants that you intend for Christmas flowering should now be sufficiently advanced to require a four-inch pot. Grow on in a good light and well-aired house.

Mr Farrell's next notes will be on the following: Primulas; Chrysanthemums; Hydrangeas for Memorial Day; Marguerites; Lily of the Valley for June Forcing; Grevillea robusta.

On the Border of Vast Possibilities

Tremendous strides have been made in recent years in the floral world. When Prof. Dahl found that single flower which now bears his name growing in Mexico he little thought of the marvelous developments of the present. Of course there were several native varieties of this flower, but the skill of the florist has produced such wonderful variations that their own mother could not recognize them, and they seem now all ready for new developments. They have so far advanced that any one can push the work along.

It seems a law of nature that the further a plant is grown from its mother the more liable is it to break out in a free rollicking display of new charms. Take the phlox—at first a quiet demure Indian maiden, modestly displaying her graces. She is taken to Europe and transformed into a royal princess. This plant is an exemplification of that universal law that the farther removed from the parent the more apt it is to develop entirely new characteristics. Let the bees do the crossing, you save the seeds of the best, plant in the fall, and the next year you will have a garden of delight, full of surprises of loveliness. Some varieties have a strong prepotency; that is, they impress themselves on their progeny. The Crepuscule is remarkable for this. Plant a group in the center, and others of the finest kinds around them, and next year from the seed you will have most cheering results—far surpassing most European varieties.

I need not say much of the peonies, for so much attention is being paid to their development. There are so many at work on them and they are rewarded with such satisfactory returns, that there are great rewards to be achieved along this line. Only do not name and put on the market any but the very best.

Columbines offer a wide field for development. There is a Columbine society which is endeavoring to make this the national flower. The beautiful coerulea of the Rockies—the State flower of Colorado—which is a photograph of the intense blue of the skies, and the fleecy clouds, is so prone to cross with others, that its identity is lost and seeds must always be secured from its mountain home. But this self abnegation goes to build up beautiful new varieties.

C. S. Harrison.

York, Neb.

Angraecum sesquipedale

The genus Angræcum contains some very interesting and useful species. The illustration on title page of this number of HORTICULTURE represents one of the best known. A. sesquipedale with its waxy white star-shaped flowers, with long spurs, always attracts attention when in bloom and the plants are quite ornamental when not in bloom.

All the larger growing species will be best grown in common flower pots, filling the pots within 2 inches of the rim. With the exception of A. falcatum all the angræcums require warm treatment and as they are nearly always growing they should not be allowed to remain dry for any length of time. In summer, when they are in full growth, they will enjoy a high temperature and a good supply of water at the root and a good buoyant atmosphere.

M. J. Pope

Naugatuck, Conn.

Wake Up! The Horticultural World is Aroused

Yes! the whole country is alive with a new and awakening interest in Horticulture and Floriculture. New societies are being formed and talked about; Garden Clubs and School Garden Associations are in the making. The leading newspapers and magazines are devoting pages to the garden and kindred interests. Universities, Colleges and Schools are talking Horticulture and the Flower Shows throughout the land are educating thousands. Also permanent Country Life expositions and outdoor floral exhibits are helping the game along. At this time, too, we must not overlook the trade press where new phases of horticulture, novelties, methods, construction, etc., are ably discussed. The whole trade should benefit by this appetite and love of gardening, which is still in its infancy. The United States is foreordained to lead the horticultural world as in all the arts.

Question? Are we alive to this obvious evolution? Are we taking full advantage of the opportunities that are forcing themselves under our very noses? Are we aware of what is being consummated for us? And what are we doing ourselves? And for ourselves? *Harry A. Bunyard.*

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur Ruzicka

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to the office of HORTICULTURE.

Planting Time

Planting time will be here before we know it, and all the necessary implements, bonemeal, sod and all are on hand and ready for the rush. The sod heap seems to be the most important item, and if this is in good shape things are bound to run along nice and smooth. Better have the sod cut down at the earliest convenience and then let it lie where it will be in excellent shape when the time comes for it to be wheeled into the houses. As suggested before in these columns a little real coarse bone can be added to the soil. This will take quite a while to dissolve and it will be about right when the plants get to it. If the sod heaps are not put up yet put them up without delay so that the sod has a chance to decay. Many will insist on using a shovel when the soil is being loaded on wagons in the field. This is a bad practise for only sod should be taken, for the good of the roses and the field itself as well. If too much loose soil is taken off the field it will be years before anything will grow there again, and the loose soil is not wanted in a sod heap. Pick up the sod with a fork, after the field has been plowed shallow. Then leave the rest for the grass that is to grow there another season. If the land is your own, lose no time to plow it up, and give it a coat of bonemeal if manure is not to be had, and then plant it to cow peas or anything that can be plowed under and help enrich the soil so that it will come back to its former state of fertility.

Idle Ground

If you have any field around the greenhouses that would be idle all the time, have it plowed and if you do not want to grow anything on the ground sow it to some crop that will be plowed under and thus the soil will be enriched and ready for you when you do want to plant something there. These prepared patches of soil come in real handy, and as it sometimes happens, there may be a shortage of potting soil, and then this will be an ideal place to go and get it. At any rate allow no ground to lie idle and producing nothing but weeds. Get some timothy seed and mix a little clover with it and sow that. Good hay is always in demand, and where horses are kept on the place it will be well utilized. Some of the old soil can be spread over the plot each fall and this will help to grow the next season's hay crop.

Among the Plants

Many of the plants that are in four-inch pots will be growing quite tall and may be spreading a little as well. See that these have all the room they need, and as soon as they begin to crowd give them a little more space but not too much for then the pots would have to be sunk into the benches to keep them from drying out too much which would happen to them if they were spaced too far apart. On sunny days it would be almost impossible to keep these wet. Watch the Beauties especially, and see that no black spot creeps in unnoticed. The taller plants will have to be tied staked to small stakes to keep them from lieing all over when they are syringed. See that all plants are disbudded when the buds begin to show. Do not wait until the buds develop and then cut them off. This only takes a good deal of the energy away from the plants, and they certainly will need every ounce of this that they can muster up. Then, too, they will start growing almost at once if the buds are removed when they are barely visible, whereas if they are allowed to grow on until they open up, and are then cut off, the plants will remain in one place for a good while. At least three weeks are lost by allowing the buds to develop on the young plants.

Liquid Manure for the Young Plants

Where the young plants are well rooted, and are turning yellow, with no show of a shift into larger pots, there is nothing better than a light dose of liquid manure applied either with a hose or with a can. Use cow manure only for making this, as if chemicals were used there would be some danger in overfeeding the plants or else burning the roots. Before applying the liquid manure make sure that the plants are wet enough. Better water them with clear water first and then follow with the liquid afterwards, using it as strong as it can be made with cow manure alone. If it cannot be applied without getting some of it on the foliage, syringe the plants lightly with clear water to remove all traces of it. If this is not done some of the leaves are liable to get scorched and thus disfigure the looks of the plants if the damage is not serious enough to hurt them otherwise.

Ventilation

See that your men have the houses up early enough in the morning so that they do not run up too high before the air is put on. Better keep a little air on all night long, even though it does take a little coal to make up the difference. It will be money well spent, for the returns will be there in the end, even though there is no sign of an immediate increase. Just note that all the places that are paying well burn coal almost all the year round, except in the extremely hot weather. Then note that the places which are always struggling never burn coal unless it is freezing outside. There is a limit to burning coal, too, but when common sense tells us to give the plants heat we should let them have it instead of letting them go without, and feel that we have gained. Give them what they must have, for if they do not get it they will not produce the cut flowers.

Dissuading the buyer

For many years the receptive newspaper reporter has been the "easy mark" for the vain and stupid brand of florist, a character not so plentiful now as formerly but still to be found here and there, ever ready to unload panicky nonsense on anyone ready to swallow it. Listen to an Ohio newspaper for example—a publication undoubtedly ready and willing to help along the custom of Easter flower buying, if wisely coached—in its issue a few days before Easter.

"'Order your Easter flowers early—or you won't get any at all,' is the word that florists are passing out to customers. Yesterday marked the beginning of the Easter floral rush. The dearth of flowers is attributed to the long run of dark weather during the spring."

Many dollars are cut out of the aggregate income of the florist business by such injudicious and usually untrue stuff, which is read by thousands upon thousands of readers whose trade the florist needs and would have if they were coaxed rather than discouraged.

The previous question

The many reports of excess Easter plants and flowers left over after the big event to clog and burden the week following, emphasize the fact that it is often harder to sell stock than it is to grow it. The depression which has trod so provokingly on the heels of a good Easter is greatly to be regretted and is difficult to explain other than that the surplus left over was given the right of way in such small business as came to the retail dealers and the normal outlet for the fresh product was thus cut off. The Easter surplus, which in some districts embraced both plants and flowers and in others was chiefly composed of one or the other, was, of course due, in a broad sense, either to an excessive production or restricted distribution. We are not ready to believe that the production of plants and flowers has yet reached the limit of legitimate consumption in this country—far from it. So our distribution methods must bear the responsibility for these relapses which bring dismay to the grower and put the dealer into a perplexing dilemma. The solution of the distribution problem is still far off, apparently.

California's credentials

The selection of location for the 1915 convention of the Society of American Florists and Ornamental Horticulturists assumes unusual importance this year because the Society is asked to cross the continent—from Boston on the Atlantic to San Francisco on the Pacific—in that year. There are many members who profess to believe that such a project cannot possibly be carried through in an extreme eastern city where the attendance will be overwhelmingly eastern and that a strong invitation from a city more centrally located would carry the day against the California metropolis even with the great inducement of the Panama-Pacific Exposition thrown in. Considering the dozen other reasons that are advanced against the tremendous journey to the Golden Gate in August which the majority of the regular S. A. F. attendants would have to face, it is evident that the Panama-Pacific advocates have an up-hill struggle before them. But there are some elements of fairness that should not be lost sight of. Although so remote from the scenes of the S. A. F. activities that participation in convention work or convention pleasures was practically out of the question, California has usually been creditably represented on the S. A. F. membership list as compared with states more fortunately situated. At the present time California has more members in that organization than Maryland; twice as many as Connecticut and District of Columbia together; more than all New England, outside of Massachusetts. Other comparisons might be made, showing a slowness of growth and apparent lukewarmness of S. A. F. support in sections floriculturally strong and favorably located to take an active part in the affairs of the national society as compared with places far remote, but the above will suffice.

CLUBS AND SOCIETIES

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

The chief feature of the April meeting of this organization was a talk on Orcharding by Prof. R. C. Rees of the Massachusetts Agricultural College. It was an intelligent and exceedingly interesting and practical presentation in concise language of the fundamental principles of apple growing. The outlook for the apple grower in New England was shown to be promising and good reasons were advanced in proof that there is no danger of the business being overdone. Better methods must be adopted to meet the more critical demand. Sites for orchard purposes, the necessity of protection from high winds, soils, drainage, etc., were all touched upon. The lecturer warned against too much faith in untried new candidates, naming several which are not making good in New England as compared with the old staples. The kind and size of trees to plant, (one-year-old being favored) methods of culture, pruning, spraying, (the most important single operation in the orchard), insect and fungus pests, harvesting and grading were successively considered and then the speaker was plied with a score or more of queries, all of which he answered convincingly.

Prof. A. H. Nehrling, successor to Prof. White at Amherst, being called upon, spoke briefly on his plans to make the department more helpful to the florists of the state and made a favorable impression.

Secretary Craig told of the recent visit of the club to the W. W. Edgar place and of the trip of the landscape class to Brookline where the members were hospitably entertained by F. E. Palmer. Communications were read from M. C. Ebel on "cooperation," from John Young on "affiliation," from Theodore Wirth on the "Convention Garden," and several others. Thomas Roland asked that the matter of S. A. F. affiliation which had been announced for discussion be laid on the table, pending the consideration of the matter by the special committee appointed by the S. A. F. Executive Board at its recent session in Boston and after a brief expression by Mr. Palmer of his ideals for the future unity for the mutual good of all interests, private or commercial, in explanation of his zeal and eagerness in the affiliation campaign, Mr. Roland's motion was unanimously carried.

Notice was given of the Greater New England Agricultural and Industrial Exposition to be opened in Springfield shortly and Secretary Craig was confirmed as a representative on the Advisory Board of that project.

The sum of $500 was appropriated from the club's treasury towards the entertainment fund for the S. A. F. Convention next August.

The display of flowers on the platform was unusually beautiful. F. E. Palmer showed a pair of standard Dorothy Perkins roses in bloom in 8-inch pots. Secretary Craig was represented by some vases of magnificent antirrhinums cut from plants which he said had been blooming continuously since October 1. He also showed some fine trumpet narcissi. Spanish irises from H. Waldecker & Bros. and hydrangea from Duncan Finlayson, a specimen plant of a rare Cyrtopodium from Chas. Sander and two vases of very fine antirrhinums with heavy dark foliage, from Peter Fisher completes the list.

WILLIAM R. NICHOLSON

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

Department of Plant Registration.

Public Notice is hereby given that Charles L. Baum of Knoxville, Tenn., offers for registration the carnation described below. Any person objecting to the registration or to the use of the proposed name is requested to communicate with the secretary at once. Failing to receive objection to the registration the same will be made three weeks from this date.

Growers Description—A Pure Carnation Parentage. Boston Market X Lady Bountiful. Fuller than Bountiful and larger—2½ to 3 inches. Well high-built flowers. Very fragrant. Extra good substance and a long keeper. Bushy growth. No surplus grass. Every shoot gives a bloom. Height is 18 to 24 inches. Healthy grower. Easy propagater. Color pure snow white at all times. Full round flower with perfect calyx. Never splits. Will bloom 10 months in the year. The most prolific variety we have ever grown.

Name: "Dr. Sam."

JOHN YOUNG, Secretary.

LANCASTER COUNTY FLORISTS' CLUB.

April 16th seemed to be a busy day in Lancaster as we only mustered about 15 for our visiting trip. The first stop was at Ira Landis, Paradise, Pa., and a floral paradise at that with yellow dasies, Mme. Perret pansies, snapdragons, lupins, mignonette, myosotis and calendula as well as a number of houses to carnations, Scarlet Wonder and Eureka being especially fine. At Elmer and Chas. B. Weaver's sweet peas and carnations are found here by the thousands, Chas. B. makes a specialty of peas, and he has a light blue and a light pink that will make a sensation if he ever allows them to get on the market. He also has a seedling of the Spencer type that is an improvement and a beauty. A house of Comfort here reversed the opinion of a good many on this variety, for it certainly was right up to the mark. Elmer Weaver tried out a house of White Wonder as a second year proposition and had a wonderful crop of flowers with the quality about as good as from the younger plants. At this place we found about 200,000 astor plants in paper pots for their own planting.

At H. D. Rohrer's his own introduction, Scarlet Wonder, was in evidence, fulfiling the full promise of its name. Orchid-flowering sweet peas were here in quantity. They grow a few side lines in calceolarias, pelargoniums, etc., and every thing is just a little better than any one else has it. Mr. Rohrer is fortunate in having his two sons, Harry and Abraham, with him and to this fact is due part of the quality always found here.

The meeting was given over to the co-operative buying question and the flower show, with a side line of exhibits of orchid-flowering peas from H. D. Rohrer, a specimen light blue hydrangea, from B. F. Barr, some new geraniums from J. P. Siebold and some Enchantress Supreme carnations from Carl Brackbill.

The co-operative buying committee called for a short experience meeting and found that quite a bit of money had been saved by the members, one saving on a single purchase enough, as he said, to pay his dues in the club for the next ten years.

The flower show committee consisting of A. M. Herr, Rudolph Nagle, Harry Rohrer and Chas. Edgar reported having gone as far as they could with arrangements until a date was fixed. The club decided on Nov. 5th, 6th and 7th as the best time. The committee reported having secured the co-operation of the various Civic Associations of the city and also having the amateurs in line for a large exhibit in this class.

Frank Kohr, Elmer Weaver and H. M. Moore were appointed a committee to arrange for our summer outing and the meeting adjourned to meet May 21st.

ALBERT M. HERR.

NASSAU COUNTY HORTICULTURAL SOCIETY.

The monthly meeting of the Nassau County Horticultural Society was held April 8th, at Pembroke Hall, Glen Cove, N. Y. Special prizes for the fall shows were received from Burnett Bros., Stumpp & Walker, Peter Henderson & Co., A. T. Boddington, W. E. Marshall & Co., Vaughan's Seed Store, F. E. Conine, Julius Roehrs Co., and M. Stapelton.

A letter was read from the National Association of Gardeners, inviting the appointment of a committee of three on co-operation to work with the similar committee of the N. A. G. Mr. Wilkinson, of N. Y. State Dept. of Agriculture gave an instructive address on Home Gardens. F. E. Conine also addressed the meeting by request. Afterwards Mr. Duthie spoke of the vegetables shown at some of the N. Y. State Fairs which are usually a collection of monstrosities of the vegetable kingdom, dumped on a table, instead of a vegetable exhibit such as are staged by the average private gardener, and the secretary was instructed to write to Mr. Wilkinson to see what could be done to better conditions. "Let quality and not size prevail." Judges' awards were made as follows:

Trumpet Narcissus—J. W. Everitt, 1st; tulips—H. Gaut, 1st; hyacinths—F. Honeyman, 1st. Certificates of culture were awarded to H. Gaut for a collection of greenhouse-grown vegetables and herbs; F. Honeyman, for specimen Schizanthus, and H. Gaut for new Holland tris. Honorable mention to Jas. McCarthy for carnations and Jas. Macdonald for tulips.

After the meeting a social and smoker was held and refreshments were served. J. J. Levesson of the Brooklyn Parks will give an illustrated lecture on Long Island Trees on Thursday afternoon, May 7th, at the Glen Theatre, Glen Cove. Dates for this society's shows are as follows: Rose show, June 9th; Dahlia show, Oct. 6th; chrysanthemum show, Oct. 29th and 30th. Exhibits for next meeting, Wednesday, May 13th, 7 P. M., Dawin tulips, flowering shrubs and lettuce.

HARRY JONES, Cor. Secy.

AMERICAN CARNATION SOCIETY.

Cottage Gardens Co., Queens, N. Y., register Carnation Cottage Maid; a sport from Mrs. C. W. Ward. Deep flesh pink. Size 3½ to 4 inches. Habit identical with that of Mrs. Ward. Flower of slightly superior form.

Chas. L. Baum, Knoxville, Tenn., registers Dr. Sam; Lady Bountiful X Boston Market. Color white. Size 2½ to 3 inches. Fuller flower than Bountiful and well built up in centre. Very fragrant. Extra good substance, making it a fine keeper and shipper.

A. F. J. BAUR, Secy.

ANTIRRHINUMS AT THEIR BEST.

The accompanying picture depicts the vase of antirrhinum shown by John B. Urquhart before the Newport Horticultural Society last week and described in HORTICULTURE.

The picture does not do the subject justice, but an idea of the quality of the flowers may be had when it is considered that the spikes were six to over seven feet tall and some carried over fifty blooms each. The colors varied from pure white to dark crimson.

COOK COUNTY FLORISTS' ASSOCIATION.

The regular monthly meeting of the Cook Co. Florists' Association was held April 16th at The Tavern, Chicago. A communication from John Young, secretary of Society of American Florists, and another from W. J. Keimel, vice-president for Northern Illinois, relating to the proposed affiliation with the S. A. F., were read and discussed. No action was taken. A letter from J. F. Ammann, Edwardsville, Ill., secretary of the Illinois State Florists' Association, in reply to a communication regarding the increased express rates on short hauls, was listened to with interest.

CORNELL UNIVERSITY.

New Appointments in the Department of Floriculture.

At a recent meeting of the Agricultural Council of Cornell University two appointments to the staff in the Department of Floriculture were made. These were the appointment of David Lumsden of the New Hampshire College of Agriculture, as assistant professor of floriculture, and Clark L. Thayer of the Massachusetts Agricultural College as assistant in investigation. Mr. Lumsden comes to the University splendidly fitted for the work. He is a man of wide experience, of pleasing personality and speaks easily and clearly. He is a graduate of the Sleaford Collegiate School of London, England, and also of the Veitchian School of Horticulture where he specialized in floriculture. For a number of years he was employed in glass houses on private estates in England, and for two years before coming to America was in charge of the glass-house department for growing flowers and fruits and also in charge of the room and table decorations of the Duke of Westminster, from whom he holds a testimonial of high efficiency. Since coming to this country nineteen years ago, Mr. Lumsden has spent thirteen years in practical work on commercial places and six years at the New Hampshire Agricultural College where he has been in charge of the work in floriculture. He has been very active in grange and extension work in New Hampshire, and for several years has had the management of the horticultural exhibit at the state fair.

Mr. Lumsden comes to the University highly recommended for his strong moral character, his efficiency as a grower of cut flowers and potted plants, also as a designer. President Fairchild of the New Hampshire Agricultural College, Director Kendall of the Experiment Station, W. N. Craig, secretary of the Boston Gardeners' and Florists' Club; Wilfrid Wheeler, secretary of agriculture of Massachusetts; Peter Fisher, W. H. Elliott, Thomas F. Galvin and the W. W. Edgar Company are among the many who have given Mr. Lumsden strong recommendations for the position at Cornell. Mr. Lumsden is a member of the Royal Horticultural Society of London and of many American horticultural societies. His work at Cornell will consist mainly of teaching, extension lecturing, and the greenhouses will be under his direct supervision.

Mr. Thayer is a native of Enfield, Mass., and a graduate of the Massachusetts Agricultural College in the class of 1913. During the past year he has been doing graduate work at the Massachusetts Agricultural College and has assisted in teaching. The short courses during the past winter were under his direct supervision. Mr. Thayer will study for an advanced degree at Cornell and assist in investigational work.

The staff of the Department of Floriculture at Cornell is now the largest of any in the United States. It consists of the following:

Professor Edward A. White, head of the department; Dr. Alvin C. Beal, professor of investigation; David Lumsden, assistant professor; Roland H. Patch, instructor; Alfred C. Hottes, instructor in investigation; Miss Lua A. Minns, instructor; Clark L. Thayer, assistant in investigation; Miss Julia Z. Kelly, secretary and curator; Arthur B. Cornelius, gardener; David Murray, assistant gardener.

LEAF-TYERS AND LEAF-MINERS.

Parker Thayer Barnes, of the Pennsylvania State Department of Horticulture writes that he has found considerable damage in two establishments in the vicinity of Pittsburgh, from a small gray moth known as the greenhouse leaf-tyer. It seems to be most fond of chrysanthemums, but infests other stock. The larvae, a green worm about one-half an inch long feeds on the under side of the leaf, eating up through to the skin or epidermis of the leaf, but not through it. Most of these feeding places are about three-eighth of an inch long and half as wide.

Mr. Barnes says: "I understand that the pest is generally distributed among growers of chrysanthemums. One place complained very bitterly because it was introduced from a big chrysanthemum specialist.

"The leaf-tyer is very easily held in check or entirely destroyed by spraying infested plants with arsenate of lead—one ounce of the paste to a gallon of water. If the dry arsenate of lead is used, one-half that quantity is sufficient. Personally, I prefer to use the dry, or powdered form of the poison. When spraying, hit the under sides of the leaves. It is of no use on the upper sides of the leaves because the larvæ do not feed there.

"Apparently a new pest has shown up to bother the Indian azaleas. One large importation last fall contained some small white cocoons. Samples submitted to the office did not bring a reply and I have since found that they proved to be leaf miners, and Prof. Chittenden has been unable as yet to locate just what the little beggar is. But it has seriously damaged the looks of the azaleas by making small brown spots in the leaves. I would advise anyone importing azaleas this fall to carefully examine the plants and if these little white cocoons are present, either pick off leaves having them and destroy them, or fumigate the plants with hydrocyanic acid gas."

Danbury, Conn.—Fire caused from an overheated chimney caused damages of $1,500 to the office building and boiler room of E. E. Mathewson's greenhouse on North street April 14.

"GET THEM AT DREER'S"

EVERYTHING IN HARDY PERENNIALS

We note here only a partial list of the leading sorts; for complete lists, refer to our current Wholesale Catalogue, which offers everything worth growing.

The bulk of this stock is pot grown; there are but few planters who have not tried and been convinced of the superiority of these Dreer Pot-grown Perennials; they give immediate results, there is no loss. This is not often the case with stock dug from the field, particularly so when weather conditions are at all unfavorable.

Gypsophila Paniculata Fl. Pl.

	Per doz.	Per 100

SEED TRADE

AMERICAN SEED TRADE ASSOCIATION

Officers—President, Chas. C. Massie, Minneapolis, Minn.; 1st vice-president, J. M. Lupton, Mattituck, N. Y.; 2nd vice-president, W. F. Therkildson, Painesville, O.; secretary, C. E. Kendel; assistant secretary, S. F. Willard, Jr., both of Cleveland, O.

Lack of Funds Retards Seed Inspection.

East Lansing, Mich.—As a result of the refusal of the last Legislature to appropriate more than $2,000 to meet the expense of seed inspection under the new pure seed law, the seed inspection department at the Michigan Agricultural College is practically tied up. An average of 100 requests for seed inspections are pouring in at the college daily, although the appropriation for the work is sufficient to foot the bills for less than 20. The seed inspection department is located at the college merely as a matter of convenience and is in no way connected with the institution itself.

Incidentally the tying up of inspections has developed a unique situation. If seed sellers do not submit their seeds to analysis they are liable to prosecution and if they do submit them they will be compelled to wait indefinitely for a report. The only alternative for the sellers, according to college officials, is to sell their produce without a license and take the chance that the state inspectors will not find it out.

In view of the present tangle in the seed inspection department it is altogether likely that an effort will be made during the next session of the Legislature to secure an increased appropriation for the work. Last year an appropriation of $5,000 was asked for but this was cut down to $2,000.

Warning Regarding Maine Seed Potatoes.

Washington, D. C.—On account of the recent discovery of violations of the Maine quarantine regulations, all purchasers of Maine seed potatoes are warned to have their stock examined by the State expert, if possible, before planting. Unscrupulous shippers, it is learned, have been sending diseased potatoes to New York, Boston and other points, where certificates of inspection have been fraudulently attached to the bags. While in general the Maine authorities have endeavored to see that none but sound potatoes left the State, certain inspectors have been negligent and have certified diseased stock. The U. S. Department of Agriculture has, therefore, advised buyers to disregard all certificates issued hitherto.

Notes.

Cleveland, Ohio—Recent callers here were Theo. Cobb of D. M. Ferry & Co., C. L. Hagle of A. J. Brown Seed Co.

Hotel Raleigh has been selected headquarters for the 32nd annual convention of the American Seed Trade Association at Washington.

CATALOGUES RECEIVED.

J. G. Harrison & Sons, Berlin, Md.—Special Apple List.

Frans Van Der Bom, Oudenbosch, Holland—Price List of Roses, Budded on Briar and other nursery stock.

Fraser Nursery Co., Rochester, N. Y.—April 11th List of Boxed Lots of Nursery Stock in Cold Storage in Rochester.

Cherry Hill Nurseries, West Newbury, Mass.—Spring Catalogue of Ornamental Trees, Shrubs and Plants. A very neat, well printed and well illustrated price-list of choice garden material.

J. Woodward Manning, North Wilmington, Mass.—Sixtieth Annual Price List of Hardy Trees, Shrubs, Fruits and Flowers. A "multum in parvo" catalogue, pocket width and strictly up-to-date on choice things.

Bobbink & Atkins, Rutherford, N. J.—Illustrated General Catalogue. A very handsome catalogue in every detail, comprehensive, finely illustrated and a model of good arrangement. Covers the entire horticultural field, 148 pages. Cover decoration rich and appropriate.

King Construction Co., No. Tonawanda, N. Y.—A Description of the Company Its Manufacturing Facilities and its Product. This is Bulletin No. 47 of the King Construction Co., and is "all to the good" as an enlightener on the scope and facilities of the company and the quality of its product. Profusely illustrated.

Beverly, Mass. — In a campaign against the tent caterpillars, Beverly Farms schoolboys have gathered up 49,380 nests. The campaign was under the direction of the Beverly Improvement Society and proved decidedly successful. Figuring 50 caterpillars to a nest, the boys stopped the ravages of nearly 2,500,000 despoilers of the foliage. The city is looking after the brown tail and the gypsy moth.

Cold Storage Valley

Of finest quality for Early and Late forcing in cases of 1000, 500 and 250 pips at $16 per 1000. All expenses paid.

NEWS NOTES.

Fulton, Ill.—John Dykeman, of Clinton, has purchased land north of the St Paul depot and, in partnership with Albert Wiersema, will erect greenhouses.

The three able lieutenants of H. Bayersdorfer & Co., Messrs. S. H. Bayersdorfer, Martin Reukauf and Sidney Green, camped at the Quincy House, Boston, during the past week with a display of Memorial Day specialties filling three large show rooms and were the centre of interest for a large number of florists from New England points, to whom Memorial Day means one of the busiest and most profitable holidays of the year. Those who failed to get to town to see this gorgeous array will do well to send to the Philadelphia headquarters for a copy of the Silent Salesman which tells all about them.

WASHINGTON NOTES.

The condition of Fred H. Kramer, who for a number of days has been confined to his home by illness, is said to be greatly improved. Mr. Kramer was threatened with pneumonia and his many friends are expressing gratification over his recovery.

The commissioners of the District of Columbia have instructed the police officials to give particular attention to the matter of licenses. It is said that there has been a marked dropping off of applications for pedlars' licenses this year. From the number of street vendors, this hardly seems possible. One month prior to the time of expiration of the present licenses, the police will distribute blank applications for renewals thereof and will shortly after investigate to see to what extent the law providing for licenses is being obeyed.

Gude Bros. Co., handled the church decorations and those at the Pan American Building last week on the occasion of the Floyd-Portner wedding. The color scheme was carried out in pink and white. The edifice was banked forty feet high with palms and ferns and there was an arch fourteen feet high from which was suspended a cluster of wedding bells, trailed with Lady Gay roses. Along the sides and on the balconies in the rear, at intervals of eight feet, were wall pockets filled with huge clusters of Easter lilies and snapdragon. Pewmarkers and standards at alternate pews were surmounted with clusters of these tied with pink ribbon. The balconies were festooned with smilax. At the Pan American Building, the decorations were mainly of American Beauty roses, palms and ferns. This building is so very beautiful of itself, both as to architecture and interior fittings, that it needs but little in the way of flowers to add to its attractiveness. However, the American Beauties stood out in bold relief against the rich mahogany with which the rooms are fitted. The bride's bouquet was of white orchids and lily of the valley, while those of the nine bridesmaids were arm showers of Radiance roses together with Lady Gay roses.

PHILADELPHIA NOTES.

Yellow primroses bunched like violets are a feature of the Battles display this week. This is an old-fashioned Boston notion seldom seen here.

Mr. and Mrs. John N. May of Summit, N. J., have been on a visit to Robert Craig and many old friends, including Commodore Westcott, had the pleasure of greeting them.

Howard M. Hoffman has been appointed superintendent of the poultry supply department in the Michell seed store, succeeding Dr. Riegler in that connection. Mr. Hoffman has made a fine record as a salesman since coming from Norwich, N. Y., to Michells, and he is now occupying that deserved promotion which comes to all young men with brains and hustle.

John Clark, late of Mt. Desert Nurseries and well known among the fraternity in New England, has been appointed superintendent of the county residence of William L. Austin, Rosemont. We welcome Mr. Clark to our midst and feel sure that all in the trade around Philadelphia will be glad to make his acquaintance and extend friendly greetings as befits the City of Brotherly Love.

William Robertson was presented with a gold watch trophy at the monthly meeting of the Pennsylvania Horticultural Society. Secretary Rust explained in making the presentation that the watch had been given by the Lord & Burnham Co. for the best group of foliage and flowering plants at the spring show. He added that it gave him great pleasure to hand this distinctive and beautiful trophy to Mr. Robertson, whose skill as a grower and worth as a man were known far beyond local confines. What time Mr. Robertson got home that night we do not know, but we hear that he caught the last train all right—thanks to the watch. The Lord & Burnham Co. did a fine thing. It will bear good fruit—Greenwich time.

Visitors:—B. Delaney, rep. J. Chas. McCullough, Cincinnati, O.; W. C. Langbridge, rep. Jerome B. Rice Co., Cambridge, N. Y.; M. C. Ebel, Madison, N. J.; Prof. Nissley, State College, Pa.; Ed. Welch, Boston, Mass.; Edward Towill, Hillside, Pa.

CHICAGO NOTES.

Heating Demonstration.

The John C. Moninger Co. have set up one of their cast-iron section boilers, at their factory this week for like purpose of testing the capacity or potential energy of steam and hot water. They expect to demonstrate by this test, the ability of their boilers to produce the greatest amount of heat from the coal consumed and invitations have been extended to all florists to witness the test. Mr. McKee had provided lunch for all visitors at a nearby restaurant on Tuesday. The demonstration covers three days.

Personal.

Clifford Pruner, one of the best known traveling salesmen in the trade, is home for a few days. He says the Dickinson embezzlement case will be taken up again as soon as opportunity offers.

Mr. and Mrs. E. F. Kurowski left April 17th for an extended European trip. They sail from New York, April 23rd, on the Amerika of the Hamburg American line. Mr. Kurowski is president of the John C. Moninger Co.

Following the Easter rush at the Alpha Floral Co.'s retail store, the proprietor, George Economopolus, had an attack of appendicitis. His condition was so serious, on Wednesday, that he was taken to the University Hospital, where an operation was performed April 16th. At this writing his condition is reported favorable. His partner, August Papas, of the Alpha Floral Co. of Des Moines, Ia., came immediately to Chicago, where he is now ill with grippe at the Palmer House.

Trade Notes.

Poehlmann Bros. are sending out a very neat reminder of Mothers' Day to their patrons, the work of T. Waters.

The spring exhibit at Garfield Park Conservatories has had an encouraging number of visitors each day since the opening, when over fourteen thousand were counted on that day.

A CORDIAL INVITATION

Is extended to the trade to visit and inspect our new establishment, Fifth Avenue at 46th Street, New York City.

Don't Fail to Write for Illustrated List

H. BAYERSDORFER & CO., 1129 Arch Street, PHILADELPHIA, PA.

BUSINESS TROUBLES.

Mrs. Olivia F. Zinn, treasurer of Zinn's Flower Shop, Inc., 34 West street, Boston, has filed a voluntary bankruptcy petition in the U. S. District Court in behalf of the company.

The liabilities amount to $9350.37. The assets amount to $1,500, and consist of debts due the firm. Of the liabilities, $8,427.87 represents the claims of more than 50 unsecured creditors. The principal unsecured claims are held by C. J. Brink, Inc., South Boston, $121; William Bowditch, Roxbury, $18; N. E. Boyle, Malden, $62.70; Boston Rose Co., Boston, $121.90; A. G. Cartwright, Waltham, $80.50; F. J. Dolansky, Lynn, $67.05; Flower Growers Sales Co., Boston, $57.20; Emery B. Gibbs, Boston, $157.10; Morrill, Atwood Ice Co., Charlestown, $124.01; Nicholson the Florist, Framingham, $113.25; Paine Bros., Randolph, $136.60; H. M. Robinson, Boston, $120.60; Thomas Roland, Nahant, $158.10; A. Leuthy & Co., Roslindale, $137.50; Olivia F. Zinn, Medford, $5,114.75. There is one secured claim for $922.50 held by Susan E. Marshall of West Medford. The company owes Julius A. Zinn, Jr., of Medford, $288 for wages.

The above should not be confused with Julius A. Zinn, Park street, Boston, which is a sound concern, financially and otherwise.

Gustave Thommen, who has charge of the carnation houses at Billerica, Mass., is enthusiastic over the results obtained by the use of Davidge's Special Phosphorus, advertised in Horticulture by the Hudson Carbon Company of Ballston Spa, N. Y. Mr. Thommen says that it brings out the color on leaf and flower better than anything he ever used and that the stems and flowers are larger and stronger in every way than he could ever get them before using this fertilizer. This is saying much for Mr. Thommen's carnations have always been in the front rank in the Boston market.

A DAFFODIL SPECIALIST.

Amongst the best known British specialists in daffodil culture is Herbert Chapman, of Rye, Sussex, who has raised several meritorious hybrids. Mr. Chapman cultivates his favorite flower at the base of a steep cliff in southern England. He believes in liberal manuring, and usually prepares the plot by taking a potato or other vegetable crop from it. Double digging is always carried out, a good dose of bone manure and of sea sand being worked in. Mr. Chapman nearly always leaves the plants for two years before lifting them, the exception being King Alfred and other uncertain ones, which are usually lifted and replanted annually. He has paid attention to hybridising doing the past eleven years, having worked with nearly all sections of the daffodil. His favorite seedlings are the Triandrus hybrids—the crosses he has made between the Trumpets and Triandrus, and the Leedsii and Triandrus—and his hybrid Poeticus. Amongst the latter is Rhapsody, obtained from a cross between Herrick and Virgil. Spindrift, one of the Triandrus hybrids, was raised from a cross between White Lady and Triandrus.

W. H. Adsett.

OBITUARY.

Ira P. Hersey.

Ira P. Hersey, employed in various florists' establishments in and about Boston for many years and well-known in the wholesale flower market, was found dead in his bed last Tuesday morning in Woburn, Mass., and circumstances indicate that he committed suicide.

Flower Market Reports

BOSTON Last week's market comments would suffice to tell the story for this week, for there has been no improvement in conditions thus far and no encouragement in sight to give any assurance of immediate revival. The whole question with the wholesale people and growers is how to move the goods out and leave room for the oncrowding succession but it is a struggle against odds, somewhat like that of the old lady who tried to sweep back the incoming tide on the seashore. All market staples are in practically the same predicament. Violets and tulips are fast going off the stage. The retail windows are interesting and attractive with the display of things a little out of the ordinary such as lovely Spanish irises, big yellow daisies, sweet English primroses, brown-hearted calendulas, nasturtiums and cornflowers. The flower fanciers like these things but such trade is little help to the growers of standard goods, whose product finds its most active outlet just now through the street and hole-in-the-wall merchants.

BUFFALO The past week has been a quiet one for all; practically nothing doing throughout except on Saturday which was unloading day and then only a portion of the heavy receipts could be moved. Roses are in extra heavy supply also carnations, sweet peas and every thing else. Lilies are carried along from day to day, with no demand; the same with tulips, daffodils and snapdragons.

CHICAGO The effects of an unusually busy Easter are wearing away and trade has now resumed its normal spring pace. There was not the complete falling off of business that often follows a holiday and few retailers had enough stock left on hand to carry them more than a day or two. The prompt occurence of the after Easter weddings, some of which were quite elaborate affairs, helped to prevent any accumulation of stock and gave an outlet for the quantity of American Beauties that are now being cut, and served to move the lily of the valley. Violet season is regarded as about closed though very good singles are still in the market. Sweet peas are equal to the demand and the quality is usually good. The older common varieties are hard to sell when placed beside the butterflies, but this condition has prevailed all the season. All kinds of roses are inclined to be a little ahead of the demand. Carnations are not nearly so plentiful as roses; all good stock is used up each day. There is still a fair supply of daffodils, tulips and miscellaneous flowers; lilies are in excess of the demand. Ferns continue scarce with no prospect of a change.

CINCINNATI The market seems to be about due for its first real glut of 1914. The extra heavy cut of lilies is the direct cause. Following Easter the florists were all overstocked with them, while more were still arriving. The result is that buyers' prices govern in this line, while the prices in other lines have also dropped. Carnations are about the only flower selling up with any fair degree of regularity. Roses of every kind including even American Beauties are plentiful. The current week is the first time we have had a really adequate supply of good Beauties for quite a long time. The cut of callas continues large and they have at the best only a fair market. Sweet peas are good, but are not selling very fast. Lily of the valley and snapdragons sell poorly. Outdoor daffodils and Poeticus are in. Taking the market as a whole we have a very large supply. Prices are rather low, but the sales are many and cause a fair market condition.

NEW YORK The cut flower market here at the present time is in a deplorable condition. There is an overwhelming abundance of flowers coming into the wholesale district and the demand through established channels has fallen off to almost nothing. This cannot last long as growers will not want to keep their houses running along on unremunerative crops and doubtless many will soon throw out and replant. It is true that the quality of carnations and that of many of the roses is very fine. Either one, however, can be bought in bulk, all grades included, from $5.00 to $10.00 per 1,000. Lily of the valley is not much overstocked and is about the only really bright spot in the market. Bulb stock, usually at the bottom of the list at this season, is doing fairly well at present. Smilax is scarce and price high.

PHILADELPHIA There was a good volume of business for week after Easter but far too many flowers. The start was made Monday with clean ice boxes but two days later they were loaded up. Of course prices broke badly, and sales were soon being made at half or quarter or any old price. Everything is in the redundant list except perhaps lily of the valley and orchids. Roses are tremendously plentiful, the clear weather bringing them along with a rush. Carnations have also suffered in the general slump but not quite so badly as roses. There is

Flower Market Reports

(*Continued from page 645*)

a big glut of Easter lilies and callas. The daffodil market also very bad. Large supplies of southern stock have been coming in for which there was little sale at any price. Also lots of greenhouse daffodils. Growers are very unwise to bring these in so late when they must butt up against the southern stock. They should have been all past by this time. Snapdragon also took a big slump. But why continue the doleful tale. The outlook promises better, as the buyers will have got over their Easter surfeit and should be around again in normal force.

ST. LOUIS During the week following Easter, the business in retail and wholesale circles was good, from a retail standpoint. There were a number of fashionable weddings and other social work and the market was easy with plenty of first-class stock. Local growers have been off crop for quite a while, and are now coming in full crop, and the chances are before the end of the week prices will suffer greatly. Stock of all kind sold cheap all last week. Carnations are beginning to come in large lots. Roses are also more than the demand can consume at present. Bulb stock is quite heavy now and cheap prices prevail in order to dispose of them.

WASHINGTON There is a plentiful supply of all kinds of flowers in the market at present, far more than the demand will take care of, as following the Easter business trade has been rather slack. While satisfactory to a certain extent, the Easter business of 1914 was not just what it should have been. The call was mostly for the less expensive plants and for corsage bouquets, etc., customers did not feel like paying any more than they absolutely had to. Few of the growers or dealers cleaned up in other than fair shape and the great majority have been using lilac blossoms, Rambler roses and other flowers, cut from numerous left-over plants, in decorations.

PERSONAL.

Miss Mae Carroll of Cincinnati is taking an extended business trip through the East.

Thos. Windram of Cincinnati leaves this week for another trip to the Lake Shore Ferneries, at Leesburg, Fla.

PROPOSED RHODE ISLAND STATE RESERVATION.

The State of Rhode Island is considering a proposition to purchase Mt. Hope for a State reservation. A provisional measure will be introduced in the General Assembly within a few days.

The tract of land to the State contains about 400 acres, a great deal of which borders on the shores of Mt. Hope Bay. The purchase price, it is said, will be in the vicinity of $150,000.

Outside of the natural beauty of the place, historical events have made Mt. Hope one of the most noted sections connected with the earliest Colonial days. It was the home of Massasoit, sachem of the Wampanoags, whose treaty of peace with the Plymouth colony existed for more than 40 years and whose friendliness prevented a famine among the colonists when Massasoit carried 30 bushels of corn, raised on Mt. Hope, to Plymouth.

Many of the original features of Mt. Hope still remain. Historical societies have marked the place where King Philip was shot and killed at the close of the campaign against the Indians by Capt. Church, and also the spot on the top of Mt. Hope, 200 feet above the bay, where Philip had his lookout. King Philip's seat, from which the great Indian chieftain is said to have delivered his famous address to John Borden, is one of the picturesque spots on the grounds.

The plan in mind is to make Mt. Hope the terminus of the metropolitan park system. Mt. Hope is southwest of Bristol and across the bay from Fall River and Tiverton.

Macon, Mo.—Robert R. Shoush has leased the Still-Hildreth Sanatarium greenhouses for three years.

CYCLAMENS

200,000 GIANT FLOWERING CYCLAMEN. For the last 16 years we have selected three-fourths of our seed-bearing cyclamen stock before Xmas, to assure early blooming plants, and claim the finest commercial strain in this country; no fizzle of many so-called English varieties. Our aim is strong growers that don't have to be petted to be grown into a choice salable plant—a well built, five-petaled flower (many of them at one time), with well marked foliage; every plant an ideal, a prize winner. Received first prize at the Cleveland show and first and second at Toledo, early November, when blooming cyclamen were scarce.

STRONG AUGUST SOWN SEEDLINGS, once transplanted, $3.50 per 100; $30.00 per 1000. Cash with order. Cultural directions with all orders. C. WINTERICH, Cyclamen Specialist, Defiance, O.

CYCLAMENS from 5 in. pots. Finest strain. Separate colors. JULIUS ROEHRS CO., Rutherford, N. J.

Thomas Roland, Nahant, Mass.

For page see List of Advertisers.

Waltham, Mass.—James T. Silman and Matthew F. Ruane, the Moody street florists, fell victims to a check swindler last Friday, and lost eight dollars apiece.

The man went to the stores and said that he was a member of a certain patrotic organization in Waltham and wanted to have a floral piece sent to the funeral of a man who was a member of the organization. The man said he wanted to buy a piece worth seven dollars and would pay cash. He tendered a check for $15 and received $8 in change at both stores. That evening Mr. Silman made inquiries of the officers of the society whom the man said he represented and learned that nobody had been delegated to buy flowers in the name of the association.

THE PULVERIZED MANURE CO.
31 Union Stock Yards, Chicago

Scotch Soot

Where there is a house that is just full of buds almost ready to show color, nothing will turn better color into the flowers than a little soot, that can be scattered over the benches before watering. The amount applied should not be excessive, as the soot is very strong and may damage some of the foliage somewhat. Apply just enough to blacken the surface of the soil in the benches, and let it go at that. Better a little oftener than too much all at once.

We offer the genuine in original cwt. Sacks, at:

$2.75 per 112 lbs.; $12.50 per 560 lbs.

HAMMOND'S SLUG-SHOT — I SLAY BUGS — 1880 — 1880 — KILLS INSECTS, SAVES FOLIAGE — TRADE MARK REGISTERED IN U.S. PAT. OFFICE

We use Hammond's **SLUG SHOT** on Currant Bushes in the Spring before the leaves are started. We put it on around the roots and have done it for two years, and find that the worms are killed before they get on the bush. For Potatoes we put on **Slug Shot** as soon as the bugs come, and we have good vines, plenty of tubers and no bugs. It is the best thing we have ever used. **For Sow Bugs in greenhouses it is sure death.** We had a lot of them before using Slug Shot, but they get out where it is used.

ALFRED GOLDRING.

Hammond's Paint & Slug Shot Works, BEACON, N. Y.

PINO-LYP-TOL

THE VERY NEWEST AND QUICKEST METHOD OF DESTROYING WEEDS, GRASS AND OTHER GROWTH IN GARDEN WALKS, GUTTERS TENNIS COURTS, DRIVEWAYS, ETC.

This fluid absolutely destroys all weeds and other growth wherever applied, and its effect on the ground prevents the growth of fresh ones for a year and thus saves a great deal of time and labor, as no cutting, hoeing or hauling away of the weeds is required.

We manufacture the strongest line of DISINFECTANTS on the market.

PLANTLIFE

PLANTLIFE has several advantages over liquid insecticides on the market. Containing refined tobacco dust it can be used to mix with the soil, acting as an excellent fertilizer, at the same time destroying worms and insects in the ground before they have a chance to reach the plant

PLANTLIFE has been found very effective in ridding greenhouses of insects by dusting on plants. When dry, use for dusting about once a week.

Put up in bulk for greenhouse men; in packages for retail trade.

Bag of 100 lbs. $3.50

Let us quote you prices in quantity.

Aphine

The Insecticide that kills plant Lice of every species

The Recognized Standard Insecticide.

W. N. Craig writes in Florists' Review (March 5th, 1914): "Scale on greenhouse plants is not easy to get rid of, as doses which are sufficiently strong to kill the scale will usually disfigure the plants at the same time. I have found APHINE a first-class remedy for scale, and if you will apply it according to directions you will kill and loosen the scales, although they will not fall off, as will some other pests."

It will only require the hose to wash off dead scale.

A remedy that is efficient in destroying scale, will destroy green, black, white fly, red spider, thrips and mealy bug.

$1.00 per quart—$2.50 per gallon.

FUNGINE will destroy mildew, rust and bench fungi.

75c per quart—$2.00 per gallon.

VERMINE will destroy root maggots, eel, wire and cut worms in the soil.

$1.00 per quart—$3.00 per gallon.

SCALINE will destroy San Jose and all hard scale and red spider on fruit and ornamental trees and bushes.

$1.50 per Gal—10 Gals. $10.—50 Gals. $37.50

NIKOTIANA—a 12% nicotine for fumigating over small lamps or by painting on steam pipes.

$1.50 per quart—$4.50 per gallon.

For Sale by Seedsmen.

ANOTHER ADVANCED IDEA BY THE ADVANCE CO., OF RICHMOND, IND.

An Arm for operating Ventilator Sash with many merits has been designed by the above company. It is all-steel construction and is non-breakable. One bolt firmly attaches it to Shaft line. Much time in erection will be saved by using this Arm.

The accompanying illustration shows the Arm very clearly. Take a good long look at it, so you will become acquainted with the many points of convenience and merit.

The Arm has been thoroughly tested and has given perfect satisfaction. Thousands are in use right now. This announcement was delayed, to be absolutely correct.

Poehlmann Bros. Co., of Morton Grove, Ill., are using this new Arm throughout the new range they are building.

It is just as good as the ADVANCE Ventilating apparatus, which has an established reputation that is unequaled. The same concern that placed the IRONCLAD GUARANTEE on Ventilators placed a like guarantee on these Arms.

You can't go wrong if you will consult the ADVANCE CO. concerning your requirements for Ventilating apparatus or Greenhouse Fittings.

Mention Horticulture when you write.

Some of the Parts Listed in Our Supply Book.

About the Cost of Greenhouses

IN figuring the cost of a greenhouse, too many growers put too much emphasis on *what the materials cost* and too little on what the erection costs.

In fact, some simply don't know what it actually costs to erect their houses. They put them up during the slack season when their men can work at it at odd times. No careful record is kept of the time the men really are working on it.

Whether its slack time or busy times, your men have to be paid just the same, and you can't dodge erection costs that way.

It has been proven over and over again that the best Iron Frame house we build, can be put up by either your men or our men in less time than it takes to erect either an all cypress or Half Iron Frame house.

Your glass costs you the same no matter what construction you buy. So does your masonry. Your painting. Your benching. Your heating. Your ventilating apparatus.

Then why not put the cost of all those things into a Hitchings house of everlasting lastingness? This comparative cost of construction is a thing we would like to sit right down and talk over with you from a to z. We have some facts and figures that will prove mighty interesting. Lets get together, we two.

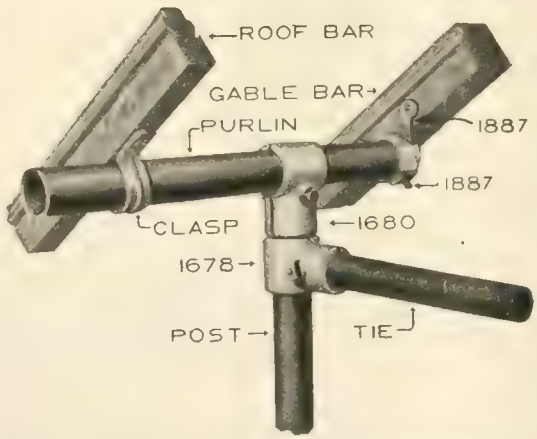
The Ease of Erection of Our Pipe Frame House

GETTING started is always the hard part, but it is simple enough with this construction. Set your Wrought Iron Posts in concrete, and then bolt on Galvanized Angle Iron Eave Plate with the roof bars clasps all accurately spaced and in place. When once you get the plate lined up, the rest comes along easy enough. The Giant Arch follows next, and then you have a scaffolding for the putting up of roof bars and the ridge. The bars are fastened to the eave plate by the Bar Clasps, making their spacing absolutely accurate, so you will have no trouble at that point. The Wrought Iron Ridge Brackets come all secured to the ridge, and each bar can quickly be screwed to the bracket, insuring accurate spacings from one end to the other.



With the Gable Rafters bolted to the iron posts—which extend to the height of the eaves all around—this rigid gable framing is greatly simplified. Now practically all that remains to be done are the sides and glazing.

So, you see, this Pipe Frame house of ours is a construction with its strongest structural points so worked out that its erection is exceedingly simple.

Next to our Sectional Iron Frame Construction, it is certainly the best house to buy and the easiest to build.

As to its cost, there is no house on the market today (excepting of course the Iron Frame one) that can beat it in price providing it has the same structural strength and endurance combined with accuracy and materials of high-grade workmanship. Saying it another way, we don't know of any one else who can build the same house for the same money and make any money.

Let us get right down to a bed rock talk with you. Say when and where, and we'll be there.

GIANT ARCH CLASPS: A single bolted split clasp secures the column to the purlin. A double bolted split clasp grips together the column and cross tie. The purlin is firmly secured to the gable rafter by a special fitting bolted (not screwed) to the rafter.

Miscellaneous Stock

A few items every florist needs. For complete list send for catalog No. 5. Send us your list of wants.

CALADIUM ESCULENTUM—Good bulbs with sound centers: 5 to 7 in. circumference, $2.00 per 100; 7 to 9 in. circumference, $3.00 per 100; 9 to 11 in. circumference, $6.00 per 100.

BEGONIA, TUBEROUS ROOTED—Bulbs large from one of Belgium's best growers: Single Separate colors, $2.50 per 100, $22.50 per 1000; Single Mixed colors, $2.25 per 100, $20.00 per 1000; Double Separate colors, $4.50 per 100, $40.00 per 1000; Double Mixed colors, $4.00 per 100, $35.00 per 1000.

GLOXINIAS—Fine sound bulbs in separate colors, $4.00 per 100, $35.00 per 1000.

RHODODENDRONS—A fine lot of hardy sorts, in plants full of buds and with good foliage, 18 in. high, 8 to 12 buds, $9.00 per doz.; 24 in. high, 12 to 14 buds, $12.00 per doz.

AZALEA MOLLIS—Bushy, well budded plants, 15 to 18 in. high, $35.00 per dozen.

DUTCHMAN'S PIPE—Aristolochia Sipho, tops 4 ft. long, a grand vine for shade and cold exposure, $3.50 per dozen, $25.00 per 100.

MAGNOLIA—Fine well budded plants, with ball of earth, burlapped; all varieties, White, Pink and Red, 4 to 5 ft. high, $1.50 each. Stellata or Halleana, early star shaped white, 2½ to 3 ft. high, at $1.50 each.

ENGLISH IVY—Two or more shoots, 3 ft. long, $12.00 per 100.

The Storrs & Harrison Co.
Painesville, O.

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

LIBRARY NEW YORK BOTANICAL GARDEN

Primulas

Primulas should be grown cool. Fifty degrees at night is ample. The young plants want to be kept near the light, but need a little shade from the direct sun. Sowing primula seed is still seasonable. You will not get as fine Christmas plants as from the earlier sowings, but they can be grown into nice little stock in 5-inch pots which is a convenient size for marketing. Primula seed wants a brisk moist heat to germinate, but the plants themselves should never be subjected to any forcing conditions. The earliest sowing should now be in 2½-inch or 3-inch pots. The compost should be light, equal parts of leaf-mold not too much decayed, and loam with a little sand. After the middle of May they should be grown in a cold frame and if they are partially plunged in fine coal ashes all the better. A spraying overhead each afternoon will be beneficial.

Chrysanthemums

The chief trouble now is to keep the plants watered. Dry winds, small pots and a rapid growth combine to make the chrysanthemum a very thirsty plant these days, and if stock is allowed to dry out a few times the black fly comes, and comes to stay. Give syringings every good day as evaporation is so rapid that not the least harm will result but on the contrary a whole lot of good. A vigorous spray all over the house several times a day lowers the temperature many degrees and makes life more endurable for the chrysanthemums, to which the intense heat of a modern greenhouse is a very unnatural condition.

Hydrangeas for Memorial Day

The hydrangea sells better around the end of May than at any other time of the year. Plants that were started soon after the middle of March in a cool house should be in fine shape for Memorial Day trade. At this time they should have plenty of light. To be right for Memorial Day the buds should now be well exposed and by the second week in May they should show their rosy pink tint. To have fine foliage and large flower heads give them manure water twice a week until they show color, when it should stop. With the long sunny days they will want plenty of water at the roots. Give good syringing on all bright days; this can be continued until they show plenty of color. A week before they are needed they should be gradually hardened up in cooler quarters. This will help to intensify their coloring.

Marguerites

Marguerites will now require several waterings daily. One good drying out means the loss of many flowers. Marguerites grown for cutting should now have the pots or boxes stood on the beds or benches so that they can root through. They will want frequent feeding or the stems will not have the length or the flowers the size we would like to see. Late-rooted stock should not be left in the cutting bench or in small pots too long. These will sell well at the bedding out season, and even if all are not sold then they can be planted outdoors and will make fine bushy plants for lifting in the fall. Take advantage of every good day and ventilate, as marguerites require plenty of fresh air.

Lily of the Valley for June Forcing

Blooms of fine quality can be produced in frames after the early part of May. All that is necessary is a well built, close frame. Put six inches of sand over the manure and plant the pips as you would in a frame in the greenhouse. The frame can be partitioned so that two or more batches can be kept coming on. Don't overdo the heat or you will get leggy stalks. For June cutting when the demand is quite heavy a frame should be prepared at once. It takes about three to four weeks to flower lily of the valley, provided the proper bottom heat and top temperature can be given it. Keep close and dark until the stalks are half grown. Then gradually increase the light. Use no water overhead after the flowers are expanding for fear of spotting them. At this season there is less danger from this cause than in winter.

Sowing Grevillea robusta

Now is a good time to make a sowing of Grevillea robusta. These will make fine plants for next year's use. Sow the seed in flats, using any good light soil, and give them a good hot house which will bring seed up quicker. When they are large enough pot into small pots in rich compost.

Mr. Farrell's next notes will be on the following: **Bedding Plants; Cinerarias; Memorial Day Trade; Orchids; Planting Dahlias; Sowing Annuals Outside.**

Boston Convention Garden

The Convention Garden, notwithstanding the inclement weather, has so far advanced that ornamental trees, shrubs and herbaceous perennials may be sent now. Tender plants, such as cannas, geraniums and other bedding plants can be shipped after May 20th. All such plants should be addressed to Boston Park Department, Back Bay Fens, Boston, Mass., and marked "Convention Garden," care of James B. Shea.

Angraecums

Besides the beautiful Angræcum sesquipedale illustrated in last week's issue of HORTICULTURE there are a number of very interesting and useful species. A. eburneum, shown in the accompanying picture, is a noble species and the flowers last a long time either cut or on the plant. This species might well be called the giant of the family, but the genus contains some very dwarf species also; for instance, A. distichum and A. falcatum. A. distichum has very short, imbricate leaves and minute pure white flowers which are produced singly from the axils of the older leaves and last about eight or ten days. This species is best grown on a small block of wood with a little fern root or live sphagnum to root into. Angræcum falcatum is a native of northern China and Japan and succeeds best in the cool house or the cool end of the intermediate house. It is a very neat little species, producing its white sweet-scented flowers at different times of the year. It is best grown in a small pan or basket, with a little osmunda fibre and live sphagnum for a compost.

ANGRAECUM EBURNEUM

With the exception of A. falcatum all the angræcums require warm treatment and as they are nearly always growing they should not be allowed to remain dry for any length of time. In summer, when they are in full growth, they will enjoy a high temperature and a good supply of water at the root and a good buoyant atmosphere, but much less water will be required during the dull, short days of fall and early winter. A night temperature of 65 degrees to 70 degrees will be about right in winter, with 10 degrees to 15 degrees more during the day according to outside weather conditions.

All the larger growing species will be best grown in common flower pots, filling the pots within 2 inches of the rim with broken potsherds, surfacing the remainder either with live sphagnum or osmunda fibre or both. Should the compost become sour at any time it should be removed at once and fresh material applied after washing out the remaining drainage with a good force from the hose. Shading from now on will be in order on all bright days until the first or middle of October; after which time the sun will have lost its burning power and the plants will enjoy all the light they can get.

M. J. Pope

The Proper Basis for Affiliation

The Society of American Florists and Ornamental Horticulturists has grown to be a rich, powerful organization. Organized to advance the love of horticulture and floriculture and to hold exhibitions of horticultural products, this Society has benefited by the labors and endeavors of its offspring. The specialty societies have done a part of the work belonging to the parent organization and should be recognized. These offsprings have grown to maturity and the Society of American Florists and Ornamental Horticulturists should subsidize these societies from its treasury to aid them in carrying out the work and not ask overburdened specialty societies to affiliate with it on a basis that will make their financial burden greater and help to swell an unneeded surplus.

Let us have co-operation with common sense. The work is being done and the laborer worthy of his hire.

Wallace R. Pierson.

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur Ruzicka

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to the office of HORTICULTURE.

Blackspot on the Young Plants

If you have a bunch of Beauties in four-inch pots or smaller that are beginning to crowd one another, keep a sharp lookout for blackspot for it will creep in before you are aware and then there will be a good piece of work for some one. These foggy days that we have once in a while during the spring seem to be an ideal time for it to start. Look the plants over carefully, and then take a little time and just reset them, picking off all the yellow leaves that may be at the bottom, and setting the tall plants to the north of the bench. All the green scum that may appear here and there may be removed, too, and thus the plants will be given a good overhauling. If blackspot appears it is advisable to spray at once with the ammoniacal copper carbonate mixture. This will not cure the disease but will go a good ways towards keeping it from spreading. Use every possible precaution in watering, and if the plants are well free from red spider do not syringe them for a while. Keep them on the dry side, being careful, however, not to allow them to become too dry, for this would lead to more of the spot. After watering take a little lime and blow it all through the house in the evening. It does not have to be blown under the plants or even over them; merely blow it around above the walks, so that the dust goes through the house. This will dry the air out a good deal, and will be a great help to prevent the spot from spreading. We are seldom troubled with spot on the other varieties of roses; in fact we do not even look for it, but with Beauties we like to be on the lookout all the time.

Outside Roses

Now is the very best time to get all the weeds out of the roses that are planted outside for summer blooming. The ground is nice and soft, being wet and if a hold is secured on the top of the weed all the roots will come up with it, thus doing away with it altogether. If this is let go until the ground dries out a little bit, the weeds will be difficult to pull, and it will be almost impossible to get them out. Get them out now, or there will be trouble with them all summer long.

Trimming

If the outside roses have not been pruned and trimmed it is high time this was attended to, for they will be growing soon, and that means just so much energy saved, if they are pruned in time. Mulching should be seen to at once, too, for delay will mean broken branches or buds, for the most careful man will break a few now and then.

Tying

Do not neglect to keep the plants tied up in nice shape all along. There may be a good deal of other work rushing but the old houses if given any care at all will produce a wonderful lot of cut flowers, and these, even if they do not bring as much as they did during the winter, will help pay the coal bill just the same, for the expense in getting them is next to nothing compared with the expense that they put us to in the fall or in winter. For tying material we find nothing better than the cheap one-ply jute that can be bought quite reasonable by the pound in barrel lots. There are several grades of this and it certainly does not pay to get the very cheapest. This is usually so poor that a lot of it is wasted, and then it is likely to be very uneven in thickness, thus causing delay in tying. Raffia is nice but too expensive for commercial use, and then a good deal of time is wasted splitting it, and wetting, etc. We do not advise using white grocery twine for tying as it will shrink and later choke the plants, wherever it circles around the shoots. Needless to say the growth should be well spread out when tying and not bunched up in the least, especially on the staked teas. Some will insist on running a string all around the plant, drawing in all the growth at the one tying. This method may well be called the lazy man's way, for there is nothing that looks worse than a job half done. Well-done is done twice, and good work will pay better in the long run.

Cleaning Up

The annual house cleaning which come around every spring should be carried to the greenhouses as well, and all the old leaves that have been brushed under the benches by careful (?) workers should be brushed out and taken away to be plowed in the cornfields or some other place where they will help produce something useful instead of breeding bugs and germs in the greenhouse. The potting shed will stand it, too, and there may be some boilers that are no longer in use that should be cleaned and oiled, and note made of all the parts that may be giving out within a short time. Take the smoke pipes down and clean them, for the soot will eat them up if they are allowed to remain half full of soot. This will get damp and then it will work. If you wish to test its strength put a little of it into a tin can or galvanized pail, and then see how long it will be without holes in the bottom. Boilers are affected the same way, but they are thick, and will not rust through in a little while.

Ill-advised zeal

Judging from some of the florist literature now circulating it would appear that up to the present time people have been very unmindful of the veneration due to their respective mothers. To remedy this lamentable neglect certain philanthropically inclined florists and trade publications have now undertaken to instruct the public in giving proper expression to this most commendable virtue. As a first step we are informed that it becomes necessary that each and every one having a mother living or a mother dead should don a flower on just one day in the year and of such a color that the rest of the world may make no mistake as to where the wearer stands. We note that there has developed quite a rivalry between certain of our esteemed contemporaries as to which one is entitled to the credit of having discovered the commercial possibilities in exploiting a "Mothers' Day" based upon the new inspiration. A year ago, in commenting upon the innovation, we ventured to question whether the public would "fall" for this somewhat precarious campaign, and, contemplating its possible ultimate effect on the standing and dignity of the florist business, we suggest now that some time may be wisely given to questioning whether the "credit" for its introduction shall carry with it the award of a gold medal of honor or be dismissed with a vote of censure. Florists who respect themselves and their profession are presumed to deprecate "crepe chasing," so-called, but this annual extolling of the virtue of filial affection and entreating people to honor their mother on a specified date by purchasing flowers appears not so very different, only in degree, and comes with ill grace from the man who wants to sell the goods wherewith to honor. "The voice is Jacob's voice but the hands are the hands of Esau."

Outgrown methods

We all profess to take pride in the onward and upward progress of the flower industry towards a position of dignity and stability among the various lines of business which have a place in every well-ordered community. But what would be the impression upon any business man accustomed to generally accepted methods of merchandizing who would look into the wholesale prices as quoted for the trade papers from various flower markets not even widely separated from each other? After noting a variation of from fifty to one hundred percent for goods presumably identical he would be justified in coming to the conclusion that the florist business is yet in a very primitive and chaotic state. Referring to the need of a wider market and more stable values for the cut flower product, we suggested a year ago, in these columns, that the public-spirited gentlemen who were giving time and thought to the solution of the problem might wisely consider ways and means whereby an approximate estimate might be made of the prospective supply of certain leading flowers in the producing sections in advance of any occasion when an augmented demand might be expected, thus gaining information on which some fairly accurate prospectus of the available crops might be based for the benefit of the trade and a reasonable standard of values established. Had such a canvas been made of the lilies, for example, with a fair degree of thoroughness, previous to the past Easter, we doubt if the fact of these flowers hanging fire at 3 to 6 cents in one market while they were being cleaned up at 10 or 12 or even more, in other markets, would have been possible. We believe the time will come when accurate advance knowledge of this sort will be recognized as indispensable, for the benefit in common of grower, wholesaler, retailer and public.

NOTES FROM THE PANAMA-PACIFIC EXPOSITION.

More than two hundred and twenty conventions, at which more than 500,000 accredited delegates are expected to assemble, will meet at San Francisco in 1915. Among these are 21 agricultural societies, 20 business, 22 educational, 35 fraternal, 7 genealogical, 23 Greek letter fraternities, 15 governmental and civic societies, 5 historical and literary, 15 industrial, 9 labor, 13 professional, 8 religious, 19 scientific and 7 social service.

The National Potato Association of the United States will organize an international potato congress to deal with the production, distribution and marketing of potatoes, and to convene at the Exposition. There will be a similar gathering in regard to alfalfa.

No flowering plant not in full bloom will be allowed to remain upon the grounds at any time throughout the Exposition year, but, according to plans by Director of Landscaping McLaren will be removed in the decline of its blossoming to make way for another in full bloom. The temperate climate of San Francisco will make this continuous procession of blooming flowers throughout the grounds for the entire ten months.

The greatest tulip exhibit ever possible anywhere outside Holland, will be a part of the national exhibit of The Netherlands. Two acres will be devoted these gorgeous flowers.

The twelve main exposition palaces which are now either completed or in course of construction upon the grounds are: The Palace of Machinery, the Palace of Education, the Palace of Food Products, the Palace of Agriculture, the palace of Mines and Metallurgy, the Palace of Varied Industries, the Palace of Liberal Arts, the Palace of Manufactures, the Palace of Transportation, the Palace of Horticulture, the Palace of Fine Arts and Festival Hall.

The Panama-Pacific International Exposition authorities have set aside $1,065,000 for the building of a huge auditorium of permanent fire-proof construction. The main hall will seat 10,000 and several lesser halls from 600 to 1000.

The color scheme of the Exposition will, under the direction of Jules Guerin, the famous artist, be so well developed, that the very tones of pavement and roadway and the color of flowers in the beds of the great exposition gardens will be made to conform.

RHODODENDRONS.

RHODODENDRONS AGAINST BACKGROUND OF CONIFERS

Our cover illustration shows a rhododendron corner at Holm Lea, Professor Sargent's home in Brookline, Mass. The other picture, shown on this page was made, if we are not mistaken, at the H. H. Hunnewell estate, Wellesley, Mass., several years ago. Both places, above mentioned are famed for their rhododendrons. The scene, when they are in bloom, is magnificent in the extreme. The past winter has been one of the severest in a generation and in the wide-spread destruction of spring flowering material it might reasonably be expected that the hybrid rhododendrons would be among the worst sufferers. But it appears that they are not; in fact, they appear as well, perhaps as in any recent year. The foliage is uninjured and flower buds give promise of a full crop. We write only of local conditions on the north side of Boston, having had no opportunity yet to investigate farther, but with a midwinter test of many consecutive days with the mercury at zero or far below, this is cumulative evidence that low temperatures alone have no terrors for rhododendrons of the type of Caractacus, Everestianum, Charles Bagley, Album Elegans, and a score of other equally well-known varieties.

NINE MEMBERS OF THE FLORICULTURAL CLUB OF THE UNIVERSITY OF ILLINOIS

A FLORICULTURAL CLUB AT THE UNIVERSITY OF ILLINOIS.

The eleven students now registered in floriculture at the University of Illinois, at a recent meeting, organized a club to be known as the Floricultural Club of the University of Illinois. The object of the club is "to advance floricultural knowledge and interests by means of papers, talks and discussions, and to promote good fellowship." Mr. August Hecht, a senior, was elected president, Mr. E. G. Lauterbach, vice-president and Mr. Horace Ingalls, secretary-treasurer.

PERSONAL.

Friday, April 24, was Prof. C. S. Sargent's 73rd birthday anniversary.

R. M. Ward of New York left for a visit to Japan last week in the interest of his lily bulb business.

Miss Winnifred Dallachie daughter of A. G. Dallachie, florist, has been appointed supervisor of the work of the home and community gardens of the public schools of Millbury, Mass.

CLUB AND SOCIETY NOTES.

The Van Wert Civic Club has selected Rosa rugosa as the official city flower of Van Wert, Ohio.

The May meeting of the Kansas City Florists' Club will be held at T. J. Noll & Company's store, 1109 Grand Ave.

CLUBS AND SOCIETIES

FLORISTS' CLUB OF WASHINGTON.

The April meeting of the Florists' Club of Washington, was one of the best attended and most interesting of the season. The discussions covered a multitude of subjects, the present Mexican unpleasantness taking up a considerable portion of the time and President Bauer found it quite hard to get the members to come to order to tackle the dry business, which is always to be found at the opening of a meeting.

The regular order of business was hurried through and when this had been taken care of, William F. Gude took the floor and after a short speech presented to Mr. Bauer, on his retirement as president, a handsome cut glass water pitcher ornamented with sterling silver and bearing an Old English "B." The gift came as a great surprise to Mr. Bauer and to many of the members for the whole thing was done very quietly by the committee. Mr. Bauer thanked the members for their kindness and begged to be excused from making a long speech, asking them to accept his thoughts instead of words.

Mr. Gude having taken upon himself the office of toastmaster, proceeded to install the officers and George H. Cooke, the incoming president was called upon for an inauguration speech. He, too, begged off, but made a few statements straight from the shoulder. He promises to spare no efforts to make the ensuing year a most prosperous one for the club, and asked the active support of all the officers and the members and for suggestions as how to advance the club's interests. He stated that from time to time, well known members of the trade from other cities would appear before the club and give short talks and the first of these visitors will be Richard Vincent, Jr., of White Marsh, Md., who will visit Washington in May.

R. L. Jenkins, who was elected to the office of vice-president at the last meeting stated that he would merely "second" the remarks of Mr. Cooke, but that he would always be found on the firing line when there was anything to be done for the betterment of the club. Others among those present had a few words to say and F. J. Michell, of Philadelphia, complimented the members on their selection of officers.

Mr. Gude rendered a report of his recent trip to Boston where he conferred with members of the executive committee of the S. A. F. and O. H. regarding the coming convention. Upon suggestion, Mr. Cooke appointed a committe of five to take up the matter of transportation for there is a possibility of the local club and that of Baltimore and perhaps Philadelphia, and individuals located nearby, joining forces and making the trip to the convention via. the Merchants' and Miners' Transportation Company's boats from Baltimore. The return trip would be made by rail. Quite a number have already signified their intention of attending and it is hoped that a large party will represent the National Capital at Boston in August.

Following the regular business of the evening the success of Mr. Cooke's administration was oft proposed during the serving of the buffet luncheon.

AMERICAN ASSOCIATION OF NURSERYMEN.

The meetings and exhibition of the 39th Annual Convention of the American Association of Nurserymen will be held at The Hollenden, which has been selected as headquarters at Cleveland, on June 24 to 26. A forecast of the business program is given in Secretary Hall's advance bulletin. He says: "Great pains have been exercised to secure an attractive list of speakers on important topics, and members are urged to mark their appreciation of the kindness of these men by according them the courtesy of attendance at the various sessions. It seems almost superfluous to pen this injunction in the face of such an array of practical talent as has been secured, among which are ex-president John Dayton on "Competition;" J. R. Mayhew, president of the Southern Nurserymen's Association, on "Problems of Marketing our Products;" Jefferson Thomas, Jacksonville, Fla., will speak on "Where our Trees are Going;" W. C. Reed will tell of "Pecans for Profit;" the "old man eloquent," C. S. Harrison, of Nebraska, will arouse the enthusiasm of members to the "Mission of Beauty;" John Connon of Annin, Scotland, has agreed to address the Convention on "Trade Conditions on the Other Side;" F. Hogg, of Toronto, will speak for the Canadian nurserymen; Robert Pyle's subject will be "Roses;" Henry Hicks, of Isaac Hicks & Son, will discuss "Fitting Trees to Soil and Climate;" the witty Jim Parker, of Oklahoma, has selected "Water" as his subject, but furnishes no hint as to how he proposes to handle it. Ex-president J. W. Hill of Iowa, and George C. Roeding of California, will also have places on the completed program, which will appear in the Badge Book."

AMERICAN ROSE SOCIETY.

At the last meeting of the Executive Committee of the American Rose Society there was referred to the committee on new roses, application for registration for the following; and which have been now submitted for the purpose of publicity. If there are no objections to the names as received they will be formally entered upon the list of registered roses:

George Burton, Wyndmoor, Pa., presents for registration the Rose "Thora." Sport of My Maryland. A fragrant double, free flowering fairly deep salmon pink, and a very strong grower.

Edward Kress, Baltimore, Md., offers for registration the Rose "Defiance." A cross between Gruss an Teplitz and Etoile de France. Flowers very fragrant, dark velvet red, perfectly double and 5 to 6 inches across. Dark green foliage. Hardy and free ever-bloomer. Introducer has never seen it mildew.

BENJAMIN HAMMOND, Secy.

MASSACHUSETTS HORTICULTURAL SOCIETY.

The Annual May Exhibition of the Massachusetts Horticultural Society will be held in Horticultural Hall, Boston, on Saturday and Sunday, May 16 and 17, afternoons only. Admission free. Liberal prizes are offered for Calceolarias and Pelargoniums, and for cut blooms of Spanish Iris, Darwin Tulips, Narcissi and Pansies. Prizes are also offered for Fruit, Vegetables and Native Plants.

WOMAN'S NATIONAL AGRICULTURAL AND HORTICULTURAL ASSOCIATION

A conference will be held at the Pennsylvania School of Horticulture for Women, Ambler, Penna., on May 16, 1914.

The list of speakers is as follows:

Mrs. Francis King, Alma, Mich. Subject: "The True Role of the Horticultural Society."

David Fairchild, Washington, D. C. Subject: "Foreign Food Plants."

Miss Martha Van Resselaer, Ithaca, N. Y. Subject: "Farm Housekeeping."

W. P. Hartman, Medford, Long Island. Subject: "The Grange's Market Bureau."

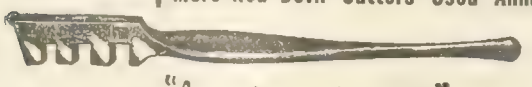
George T. Powell, New York City. Subject: "Small Fruit Culture for Women."

Walter P. Stokes, Philadelphia, Pa. Subject: "Seed Growing for Women."

Mrs. J. Willis Martin, Philadelphia, Pa. Subject: "The co-operation of the Garden Club of America and the W. N. A. and H. A.

Prof. David F. Warner, State College, Pa. Subject: "Broilers for Profit."

Miss Elsie McFate, Turtle Creek, Pa. Subject: "Hardy Flower Culture."



Bertrand H. Farr, Wyomissing, Pa. Subject: "Raising Rainbows."

Transportation—Trains leave Reading Terminal, Philadelphia, for Ambler at 10:15 a. m.; 12:02 and 1.02 p. m. Returning leave Ambler at 1:58, 4:53 and 6.00 p. m. Conveyances will meet trains; transportation to and from school, 50c.

Luncheon will be served at the School, 50c.

Kindly notify Miss Jessie T. Morgan, Director of the School, Ambler, Pa., as soon as possible, if luncheon and conveyance are desired.

Obituary

Mrs. J. L. Miller.

Mrs. J. L. Miller, for many years in the retail florist business in Newark, Ohio, passed away April 19, after a few hours' illness. She is survived by her son, George L., who was associated with her in business.

Peter Ross.

Peter Ross, a florist of Flushing, L. I., for thirty-three years, died at his home, No. 659 Sanford avenue, Flushing, on April 27. He was born in Balmagown, Scotland, and five years before going to Flushing resided in Great Neck. He was sixty-three years old. He leaves his wife and two daughters.

Arnold Burgers.

Word has just reached this side of the water of the passing away of a distinguished member of the seed trade, Mr. Arnold Burgers, of Barenbrug, Burgers & Co., Arnheim, Holland, who died in the latter part of March, aged 75. While Mr. Burgers was nominally what we know here as a silent partner in the house, he was really much more and his wise counsels and wide experience were always actively at work in building up the great business in natural or fancy grasses for which the firm has a world-wide reputation. His son, Mr. Bernard Burgers, is the junior member of the house of which Mr. Joseph Theodore Barenbrug is the head. Mr. Barenbrug has never visited America, but is

Arnold Burgers

well known to the trade here as the author of "Barenbrug on Grasses" which was published in 1908 and which is very highly regarded by the expert seedsmen and farmers on this side.

Richard Lynex.

A well-known figure in the flower trade of Philadelphia passed away on the 21st ulto. Richard Lynex was familiar to the older generation, having been the original wire-worker in floral designs. He was 92 years of age and since his retirement from business a good many years ago, made his home at Atlantic City. Everybody liked Richard Lynex. He was a whole-souled, companionable man and straight in all his doings. The old-time meetings of the Florists' Club, their outings and their banquets; the Commodore's parties at Waretown, and similar festivities, were never complete without him and to the last he would delight us by singing "Sweet

Richard Lynex
30 Years Ago.

Violets." The interment took place on the 24th at Mt. Peace Cemetery, Philadelphia, and was attended by many old friends. Commodore Wescott did the decorating with loving hands.

Mr. Lynex was a native of Birmingham, England, and came to this country when very young. He proved a credit to us all and leaves a joyful memory behind him. G. C. W.

Lawrence Davenport.

Lawrence Davenport, a retired florist of Lynn, Mass., one of the pioneer residents of that city, well-known and highly respected by people in all walks of life, died at the family home at 58 Butler street early Saturday morning, April 25, following an accident sustained three weeks ago. He was descending the stairs in the rear of his home when he was taken with a fainting spell and fell to the ground. He was picked up unconscious. Since the accident he had slowly declined although after regaining consciousness he had retained his faculties until the end. He was born in Chorley, Lancashire, Eng., Dec. 28, 1836. He came to Lynn with his family in 1864. He secured a position in the Pacific mill. He followed that work for 17 years, when his health declined. He then entered the florist business at 71 Warren street near his present home. He started in the florist business on a small scale when at work in the mill but his business grew to such an extent that when he left the mill he had a very flourishing business.

Those who survive him are a wife and three daughters, eleven grandchildren and two great grandchildren.

Paris, April 29—Philippe-Edouard-Leon Van Tieghem, the French botanist, is dead. He was born in 1836.

"GET THEM AT DREER'S"

EVERYTHING IN HARDY PERENNIALS

We note here only a partial list of the leading sorts; for complete lists, refer to our current Wholesale Catalogue, which offers everything worth growing.

The bulk of this stock is pot grown; there are but few planters who have not tried and been convinced of the superiority of these Dreer Pot-grown Perennials; they give immediate results, there is no loss. This is not often the case with stock dug from the field, particularly so when weather conditions are at all unfavorable.

SEED TRADE

AMERICAN SEED TRADE ASSOCIATION

Officers—President, Chas. C. Massie, Minneapolis, Minn.; 1st vice-president, J. M. Lupton, Mattituck, N. Y.; 2nd vice-president, W. F. Therkildson, Painesville, O.; secretary, C. E. Kendel; assistant secretary, S. F. Willard, Jr., both of Cleveland, O.

Federal Quarantine Against Maine Potatoes.

Washington, D. C.—A quarantine against Maine potatoes, effective August 1, 1914, has been declared by the U. S. Department of Agriculture on account of the prevalence of powdery scab in that State, particularly in Aroostook county. After August 1, no common or Irish potatoes can be moved out of Maine except under regulations which the Department of Agriculture will publish shortly. Powdery scab has been prevalent for some time among Maine potatoes, but hitherto the State authorities have been responsible for preventing the spread of the disease. With the enforcement of the new quarantine, the Federal Government will take charge of the work. There will be, it is said, no radical change in the existing restrictions.

Chicago Seed Notes.

Arnold Ringier, manager for W. W. Barnard, regards the retail season as just at its height this week. The wholesale trade is still of much importance, though drawing near the close of a season, which he considers to be two weeks late. For this reason the sale of field seeds is not up to the average, especially field grass seeds. Sales of lawn grass seed, on the contrary are very brisk.

This store has just taken on four extra salesmen in the retail section.

Onion sets are cleaning up, very few being left on this market.

Recent seed trade visitors in Cleveland, O., were Tom Hill of Peninsula Seed Co., Port Huron, Mich., and Wm. Emerson of Western Seed and Irrigation Co., Fremont, Neb.

CATALOGUES RECEIVED.

Colprit's Arlington Nurseries, Arlington, Mass.—Price List of Roses, Rhododendrons, Hardy Border Plants, etc.

Marygold Farm, Onondaga Valley, N. Y.—"Some Plants for the Hardy Garden." A pocket pamphlet by Mrs. W. L. Lyman.

V. Lemoine & Fils, Nancy, France—Catalogue and Price List for Spring, 1914. A very complete list of the specialties and novelties offered by this well-known firm.

Elm City Nursery Co., New Haven, Conn.—General Nursery Catalogue for 1914. A fine list of the good things in deciduous and evergreen material for ornamental planting.

J. K. Alexander, East Bridgewater, Mass.—Dahlia catalogue and Cultural Guide for 1914. A carefully arranged and tabulated catalogue, fully up-to-date in new varieties. Contains useful cultural information.

H. E. Meader, Dover, N. H.—"Do You Love Flowers? Look Within," is the motto under which H. E. Meader sends out his gladiolus list for spring 1914. It is a very tasty little catalogue and guide book for the gladiolus lover.

Jacs Smits & Co., Naarden, Holland—Wholesale Nursery Catalogue for season of 1914-1915. This is the "American Edition." A very useful publication and with tabular index of unique and handy form. A colored plate of Spiraea (Astilbe) Naarden is inserted, a beautiful reproduction of a beautiful plant.

Little Tree Farms, South Framingham, Mass.—Price List for Spring, 1914. This is the annual spring catalogue of the American Forestry Company, Boston. White Pine for forest planting is a big specialty with this company and anyone interested should send for this catalogue which quotes these and other coniferous trees in any quantity.

Chester Jay Hunt, Montclair, N. J.—The Blue Book of Bulbs, 1914. This is a very "swell" little annual publication, 100 pages of carefully elaborated descriptive notes of spring flowering bulbs, much attention being given to true color definitions. The lists of 1914 introductions in Cottage, Darwin and Breeder tulips and in narcissi are of especial interest and value.

MASSACHUSETTS AGRICULTURAL COLLEGE NOTES.

Professor A. H. Nehrling, head of the department of floriculture at the Massachusetts Agricultural College, has inaugurated there one of his many new ideas, which he has brought with him from the breezy west; namely a weekly informal round table discussion by the seniors in floriculture. Different points which cannot be brought out in the classroom are discussed, such as a review of the trade papers, and other phases of floriculture. In addition, each senior selects a particular phase of floriculture in which he is most interested, and after several months of original investigation, he discusses it at the seminar, and finally writes a thesis. The subjects are—The Nomenclature and Classification of Roses, by S. L. Freedman; Herbaceous Perennials, by A. S. Thurston; The non-commercial Phases of Floriculture, by Miss A. J. Strange; The Commercial Side of Floriculture, by G. A. Reid; The Retail Side of Floriculture, by H. W. Levine. A few perhaps of the best at some future time, will be published in the trade papers.

Professor James S. Pray, chairman of the school of landscape architecture, Harvard University, will address the landscape students in the near future, on some phase of civic design.

WM. H. HATFIELD.

PATENTS GRANTED.

LEADING FLORISTS OF THE NORTHWEST

WASHINGTON NOTES.

During the recent convention of the Daughters of the American Revolution, Gude Bros. Company conducted a flower booth in the society's handsome building on Seventeenth Street, Northwest. This firm reports that considerable business was done here especially in gardenias, orchids, American Beauty roses and other high-priced stock. The booth was in charge of Fred Calloway.

An effort is to be made with a view to eliminating vendors of flowers from the streets of Washington. It has been reported that but few pedlars' licenses have been taken out this year and that the police will get busy rounding up those who do business without such permission. Fred H. Kramer states that he will take an active part in the crusade to clean these men up. Nearly all the florists are complaining of this competition especially those who have had the experience of having these men stand almost in front of their display windows and offer their wares to people who would otherwise patronize the stores. This matter has been before the florists for some time although but little has been done to relieve this condition.

A large number of the important society events have been postponed owing to the Mexican unpleasantness and this has been felt to no little extent in the stores. Army, Navy and State Department officials find it impossible to attend or to act as host at any of these functions due to present conditions. Should mediation prove unsuccessful, the flower business in this city will fall off to even a greater extent for a large number of officers of both the land and sea forces will be ordered from Washington to the front. Little can be expected from the coming White House wedding for this is to be a family affair. This will cause another disappointment to the trade unless things change a great deal in the course of a few days.

CHICAGO NOTES.

A largely increasing demand for perennials is reported.

Philip J. Foley, of the Foley Greenhouse Manufacturing Co., is serving his city as juryman.

The John C. Moninger Co. has opened an eastern office in the Marbridge Bldg., Broadway and 34th street, New York.

A. L. Vaughan & Co. have just taken out a new five-years' lease at their present location, which settles the report that the building is to be torn down.

The lack of blooming pansy plants is noticeable this spring, large numbers having been winter killed, leaving the market with a very scanty supply of these favorites.

Harry Rowe is moving from the corner of Washington street and Wabash avenue to room 205 Atlas block. The building which he is leaving is about to be torn down and Mr. Rowe expects to occupy a store in the handsome new structure to be erected.

The McNeff-Swenson Co. are moving into the Insurance Exchange building where they will have more room. Their artistic folders are proving successful business catchers to the florists using them. But one firm in a town is allowed to handle them.

Mother's Day is again a vexation to the wholesalers who are now receiving inquiries for an impossible number of carnations. Last year many orders were diverted to roses and other flowers. Some of the large calendars are giving the wrong date for Mothers' Day, which is the second Sunday in May.

The boiler test at the Moninger Greenhouse Co.'s factory was in every way a success. Among the florists from out of the city were L. M. Mason, Streator, Ill.; J. F. Thornton of the Hill Floral Co., Streator, Ill.; John Frisz, Vincennes, Ind., and Andrew Peterson, Hoopestown, Ill. The testing of the capacity of the boiler was very satisfactory and showed an increase of 30 per cent. above the rating. Lectures were given daily by Mr. McIntire, practical boiler engineer of New York.

THE RETAILERS' FRIEND.

The best friend the retailer has is the customer of his own community.

As much as the retailer is inclined at times to cuss the people of his community for the various digressions and sins of omission and commission it still behooves him to look on them and treat them as the best business friends he has, says Trade Exhibit.

That means taking the people into your confidence. It means playing square with them in every particular. It means education instead of deceit. It means co-operation instead of antagonism. It means giving them the best deal you can instead of getting out of them all they will stand.

The express companies give a shining example. For years the express companies maintained expensive lobbies at the seats of government to forestall any laws that would hurt their business. They ignored their best friends, their patrons. They adopted a policy of secrecy instead of education and frank publicity. They dammed up the stream of public sentiment until it broke out and swept

H. BAYERSDORFER & CO., 1129 Arch Street PHILADELPHIA, PA.

them away. The telephone and telegraph companies, for instance, have seen the signs, and are taking an absolutely different course.

The retailers should follow the example of the telephone and telegraph companies and other public service corporations in this line; they should take the public into their confidence, state the facts as they are, get public sentiment for instead of against them, and then all this talk of eliminating the middleman will be as a passing breeze to the mountain.

Cut out the mystery, don't let people think you are making a hundred per cent profit when you really only make ten. Use tact and common sense, of course, but you have nothing to lose and everything to gain by taking the public into your confidence, by being frank and open and honest.—*The Southern Merchant.*

Milwaukee, Wis. — The Kummer Floral Co. had their first anniversary and formal opening of their new store at 1261-65 Hopkins street on Sunday, April 26. Connected with the store are two greenhouses and a propagating house and it is evident that this young firm is on the direct road to prosperity.

WIRE DESIGNS and FLORISTS SUPPLIES

1008 Vine St., PHILADELPHIA, PA.

PHILADELPHIA NOTES.

Frank M. Ross, one of the most enterprising of our retailers, reports better and bigger business every month this season. He devotes his time to hustling and leaves the Black Hand methods of killing competition to those who have little else to do.

L. W. C. Tuthill of New York City will be the speaker at the Florists' Club meeting May 5, and will give the growers all the latest wrinkles in how to build better, and increase their efficiency and economy in flower and plant production, so as to be able to make enough to retire on at a reasonable old age—say about 50—not to Oslerize it too much.

George H. Cooke was a recent visitor, having come through from Washington to Philadephia to procure supplies for a big event which a New York City family was holding in the National Capital. It was the ex-Senator's birthday, but the good lady said she could not celebrate in Manhattan, as she much preferred the more artistic way the floral decorations were handled by Cooke, in Washington. Hard on New York! Pennock Bros. had a big event in Washington last Saturday—a wedding. We asked if they had been cutting prices. No; got more than the Washington fellows asked. Hard on Washington! Next.

Commendation.

Mr. James Bray, San Jose, Cal., has written a letter of commendation, strongly complimenting the staff of HORTICULTURE all along the line and commenting especially on the high-grade of the horticultural articles—which he thinks away ahead of anything attempted so far in trade journalism. He also joins emphatically in the opinion of a recent article by our Philadelphia correspondent that the gardeners are but half paid, that the men rich enough to have a gardener should be educated up to the point of starting at the minimum of $100. Respectfully referred to M. C. Ebel who called the P. C. an outsider after 38 years active service. How long has M. C. E. been in the business?

THE EMPLOYEES' RESOLVE.

How will this do?

I, Ignatius, being of sound mind (of korse) do hereby and heron declare that during this Year, I will:

1st. Smile when the stenographer comes in.

2nd. Smile and look busy when the boss comes in.

3rd. Smile and get busy when a customer comes in.

4th. That I will serve the public so well that when a customer goes out he will say au revoir, but not good bye.

5th. That I will try to convince every last one of you that we want to do bizness with you and that you will save time, money and nerve force by doing bizness with us.

6th. That I will prove all this to you with your kind permission.—*The Southern Merchant.*

The Best Pocket Pruner for the Flower Store

As the illustration shows, this is a spring pruner with catch, and is a handy size for the pocket. Just the thing for trimming strong flower stems. Six inches in length. Best steel, nickel finish.

Per Pair 85c by Mail Postpaid

FOR MOTHERS' DAY We want to impress upon every florist to strongly recommend to his customers other flowers (of which we will have large supplies) than just white carnations. This will help the business far more than any other way, as the supply of white carnations cannot be increased enough to meet the demand.

EVERYTHING IN RIBBONS We carry one of the largest and most varied stocks of Ribbons pertaining to the florist business of any house in the country. If you have not received one of our new catalogues, advise us and we will mail you one at once.

P M QUALITY

Flower Market Reports

BOSTON While the situation still remains very unsatisfactory as a general proposition there are indications of a little improvement which, it is hoped, is the forerunner of a better state or affairs. Carnations are the first to feel the favoring breeze and have made a creditable advance in regular rates. This is due as much to the shortening up of the product as to any other cause; if a normal demand should come there would be a shortage. Roses are still very plentiful and quality excellent but prices are low. Lilies are sold for whatever they will bring—which is exceedingly low, less than the price of carnations as a rule but there are a few fancy blooms that bring a good figure in small orders. Cattleyas are up to a strong position but gardenias seem badly demoralized. Good sweet peas sell very well. Violets are about over, only a few Lady Campbells being in evidence.

BUFFALO Quietness has prevailed throughout the whole past week; in fact, stock had to be forced upon the buyers, as everything was too plentiful for the wholesalers' comfort. There is a heavy supply of carnations, also roses, the largest portion being white. Orchid had no outlet. There are plenty of good sweet peas, Beauties of all grades, lilies and snapdragons with very little sale. Violets continue good though sales do not warrant large shipments; lily of the valley is only in normal supply, but there are fine pansies, daisies, swainsona, mignonette, wallflowers and other stock which the merchant has to select from. A good quantity of tulips, daffodils and other bulbous stock helped to fill the market.

CHICAGO Unless something unforseen comes to use up the roses or to stop their present rate of production a glut seems likely to occur. The amount now coming into this market is larger than can be handled under ordinary circumstances and the price has declined perceptibly. Carnations, on the contrary, are being used up daily and the orders now in for Mothers' Day are many times the number likely to be available. There are plenty of American Beauties, and in all lengths and of excellent quality. Bulbous stock is thinning out. Easter lilies and Callas are far in advance of demand. Lily of the valley is coming in sufficient supply for the weddings and corsage bouquets, which seem a part of spring. Spanish iris and snapdragons are selling fairly well. Sweet peas have dropped to about one-half the price of a month ago and then do not move fast. Wild ferns are the only scarce article in the market.

CINCINNATI This market is in the throes of oversupply and consequent low prices. As far as the demand itself is concerned there is no possible ground for complaint for there is an active call for flowers. It is the superabundance of flowers that is causing the present condition. The retailers who have any kind of business at all are having a chance to reap a good harvest while it lasts. The crowding that began with the heavy receipts of lilies immediately after Easter is continuing because of the steady heavy production of this flower and a steady increase in the size of the cut of other flowers. Roses are more than able to take care of all calls for them. The American Beauty cut is also proportionately large. Out door bulbous stock is plentiful and includes many blooms of quality. Callas continue in a good supply. Carnations are, in comparison to other flowers, selling up better than any of them, because the cut is more or less limited

NEW YORK Things are progressing quite slowly in the direction of better conditions. The heavy production continues to encumber the market and the influx of lilacs and bulbous flowers from southern sources, where they are

Flower Market Reports

(*Continued from page 677*)

blooming outdoors has a depressing effect on any effort to bring conditions back to normal after the post-Easter dilemma. Two things are in better shape as a starter, carnations and cattleyas. In the case of each it is the result of a receding crop and not entirely due to any better demand. Lilies are still at the bottom of the ladder and they have plenty of company, among which may be classed roses of all varieties in the medium and lower grades. Sweet peas are doing satisfactorily if of standard quality but there are lots of the other kind and these fare badly. Gardenias are cheap and lack the element of popularity which they enjoyed in the past. Altogether the situation is very unsatisfactory from the wholesalers' angle, but the retailer has a chance to make good money provided he can scare up the buyers.

PHILADELPHIA Excessive supplies still rule, and we regret to be unable to report any improvement on general conditions. Roses, carnations, lilies and snapdragons are especially abundant. Orchids and gardenias sell fairly well as do also sweet peas. There is not such a powerful overplus in these. Greenhouse-grown gladioli of the popular varieties like America, Augusta, Brenchleyensis, etc., are coming in sparingly and are cleaning up nicely at good figures. Spanish iris are one of the few things that meet with ready sale at living prices. Lily of the valley is still a fair proposition although the supplies increased towards the end of the past week. There is a fair demand for daisies, but there are far too many of them. Outdoor narcissi liye poeticus, Langtry and Barri arrived in big lots, but with little demand—in many cases not enough to pay the expressage. Smilax strings are scarce—as is usual about this time. We do not seem to have been able to regulate that defect here yet, and P. Welch can still smile at us and point with pride to his superior generalship for the Boston market. Asparagus plumosus is much more plentiful than it was a few weeks ago.

WASHINGTON There is an unusually heavy supply of flowers in the market at the present time and it is said that not in many years has the glut been so heavy. Prices are asked but the dealers are often glad to take just about what is offered to them. While some American Beauty roses are bringing a fair price, the average run is moving at less than $3 per dozen while in quantity lots the price is almost that much per hundred. No quotations are being made on the average run of roses and these are being sold almost without count, but there is some little demand for good quality Richmond, Radiance and Killarney roses at a fair price. Cattleyas form the only scarcity and there are not enough of these to fill all demands with the result that the price has gone up. Carnations can be had at as low as $7.50 per thousand and the bottom has dropped out of the sweet pea market, this flower bringing as low as $2 per thousand. Violets are well off the market although they are being offered on the streets as usual.

NEW YORK QUOTATIONS PER 100. To Dealers Only

MISCELLANEOUS	Last Half of Week ending Apr. 25 1914	First Half of Week beginning Apr. 27 1914
Cattleyas	20.00 to 35.00	15.00 to 50.00

Sweet Peas (per 100 bunches)	6.00 to 8.00	4.00 to 8.00
Lilacs (per bunch) Southern	.. .. to .33	..... to .33
Gardenias	2.00 to 15.00	2.00 to 16.00
Adiantum	.50 to 1.00	.50 to .75
Smilax	16.00 to 25.00	15.00 to 25.00
Asparagus Plumosus, strings (per 100)	20.00 to 50.00	35.00 to 50.00
" " & Sprcn (100 bunches)	15.00 to 50.00	15.00 to 35.00

We were greatly surprised when John McKenzie, the well known plant and flower grower of North Cambridge, Mass., handed in the advertisement which appears in this issue offering his establishment for sale, for it is no secret that John has made money there and the place is exceptionally well located and in good order. But flower-growing is not big enough now for his ambitions and his successor there will get a rare bargain in consequence.

CYCLAMENS

200,000 GIANT FLOWERING CYCLAMEN.

For the last 16 years we have selected three-fourths of our seed-bearing cyclamen stock before Xmas. to assure early blooming plants, and claim the finest commercial strain in this country; no fizzle of many so-called English varieties. Our aim is strong growers that don't have to be petted to be grown into a choice salable plant—a well built, five-petaled flower (many of them at one time), with well marked foliage; every plant an ideal, a prize winner. Received first prize at the Cleveland show and first and second at Toledo, early November, when blooming cyclamen were scarce.

STRONG AUGUST SOWN SEEDLINGS, once transplanted, $3.50 per 100; $30.00 per 1000. Cash with order. Cultural directions with all orders. C. WINTERICH, Cyclamen Specialist, Defiance, O.

CYCLAMENS from 5 in. pots. Finest strain. Separate colors. JULIUS ROEHRS CO., Rutherford, N. J.

HILFINGER BROS. Pottery, Fort Edward, N.Y.
August Rolker & Sons, 51 Barclay St., N. Y. City, Agents
OUR SPECIALTY — Long Distance and TradeExport

E. Allan Peirce is enthusiastic over his business in paper flower pots, for which he credits his advertising in HORTICULTURE with its full share, which includes substantial orders from as far from home as Seattle, Wash., and several Montana towns. He has been at times ten days behind hand in filling orders but now has caught up and can furnish any quantity desired at short notice. The set-off in the bottom of his pots, leaving a rim to raise the pot from the bench is especially appreciated by bedding plant growers.

WANTS, FOR SALE, ETC.

Advertisements in this column one cent a word. Initials count as words. Cash with order. All correspondence addressed "Care HORTICULTURE" should be sent to 11 Hamilton Place, Boson.

HELP WANTED

WANTED—Assistant to gardener. Man who understands bedding out. State wages desired. Address South Shore Greenhouses, Cohasset, Mass.

SITUATIONS WANTED

SITUATION WANTED by practical florist and gardener; good grower; capable of taking full charge of private or commercial place. Age 32; 15 years' experience. References as to ability and character. Address W. R., care of HORTICULTURE.

NICOTINE MFG. CO. . . . . ST. LOUIS, MO.

Aphine

The Insecticide that Kills plant Lice of every species

The Recognized Standard Insecticide.

W. N. Craig writes in Florists' Review (March 5th, 1914): "Scale on greenhouse plants is not easy to get rid of, as doses which are sufficiently strong to kill the scale will usually disfigure the plants at the same time. I have found APHINE a first-class remedy for scale, and if you will apply it according to directions you will kill and loosen the scales, although they will not fall off, as will some other pests."

It will only require the hose to wash off dead scale.

A remedy that is efficient in destroying scale, will destroy green, black, white fly, red spider, thrips and mealy bug.

$1.00 per quart—$2.50 per gallon.

FUNGINE will destroy mildew, rust and bench fungi.

75c per quart—$2.00 per gallon.

VERMINE will destroy root maggots, eel, wire and cut worms in the soil.

$1.00 per quart—$3.00 per gallon.

SCALINE will destroy San Jose and all hard scale and red spider on fruit and ornamental trees and bushes.

$1.50 per Gal—10 Gals. $10.—50 Gals. $37.50

NIKOTIANA—a 12% nicotine for fumigating over small lamps or by painting on steam pipes.

$1.50 per quart—$4.50 per gallon.

For Sale by Seedsmen.

When writing to advertisers kindly mention HORTICULTURE.

Scotch Soot

Where there is a house that is just full of buds almost ready to show color, nothing will turn better color into the flowers than a little soot, that can be scattered over the benches before watering. The amount applied should not be excessive, as the soot is very strong and may damage some of the foliage somewhat. Apply just enough to blacken the surface of the soil in the benches, and let it go at that. Better a little oftener than too much all at once.

We offer the genuine in original cwt. Sacks, at:

$2.75 per 112 lbs.; $12.50 per 560 lbs.

Stumpp & Walter Co.

30-32 Barclay Street, NEW YORK

Any individual or firm who would be interested in handling manure from a dairy herd, dried to a 12% moisture basis, nothing of value lost from either the solid or liquid manure, the product analyzing as follows:

Nitrogen	3 to 3½%
Phosphoric Acid	.8 to 1%
Potassium Oxide	2.25 to 3%
Organic Matter	75 to 80%

PLANTLIFE

PLANTLIFE has several advantages over liquid insecticides on the market. Containing refined tobacco dust it can be used to mix with the soil, acting as an excellent fertilizer, at the same time destroying worms and insects in the ground before they have a chance to reach the plant.

PLANTLIFE has been found very effective in ridding greenhouses of insects by dusting on plants. When dry, use for dusting about once a week.

Put up in bulk for greenhouse men; in packages for retail trade.

Bag of 100 lbs. $3.50.

Let us quote you prices in quantity.

The Plantlife Company, 251 East 66th Street NEW YORK, N. Y.

BIG BLOOMS

and Strong Plants guaranteed. Mix DAVIDGE'S SPECIAL PHOSPHORUS with planting and potting soil. After roots are made, top dress little and often. $2.00 per 100 lbs. Cash with order.

HUDSON CARBON CO., Ballston Spa, N. Y.

Greenhouse Shading

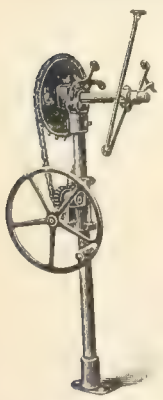
AFTER many years of experience in greenhouse work with Lord & Burnham Company, in the glazing and painting department, I am convinced that what is needed most is a good shading, and I am pleased to tell you that I have the real thing which you are all looking for.

My shading is beneficial to the painted wood, as it contains nothing but pure linseed oil; it is also beneficial to the glass. You will be surprised by the brilliancy left in the glass when the shading is removed. It is very easily applied by spray or a soft brush; I prefer the brush.

Made up in gallon cans. Colors; light green, blue and pure white. If you will give it a fair trial I am sure you will agree that it has proven its worth.

E. A. LIPPMAN, MORRISTOWN, N. J.

KING
Iron Frame Greenhouses



are the best growing houses and that's what you are looking for. The unanimous verdict of King Users is that the King is the best producer and the best value ever. Let us send you the names of King owners near you.

Those Who Use
THE BARRIE FORCING FRAME
Are Getting Rhubarb Now

These frames placed over rhubarb give a nice early cutting before the regular crop, without injury to the plants.

This is only one of the many uses of the Barrie Forcing Frame. They work for the gardener nine months out of the twelve.

GEORGE N. BARRIE, Brookline, Mass.

IF YOU ONLY KNEW what a good eave the **METROPOLITAN PATENTED** is, you would use no other. It is made of cast iron and will not rust. That part of your greenhouse which in other constructions is the weakest becomes the strongest. Not this alone, it is ice-clearing and carries all the water of condensation from the inside, and it is so constructed that almost the entire end of the bar is exposed to the air, thereby preventing decay. Only one screw, about two inches from the end, is all that is necessary to secure the bars. For side stationary glass, wood headers are absolutely unnecessary, thereby causing no shade. Zinc glass stops are not necessary—the eave is made with a lug to prevent the glass from slipping. Let your next house be built with a **Metropolitan Patented Iron Wall Construction.** You will never regret it. Our price and service are right.

IT'S THE REPEAT ORDERS THAT COUNT

ALONG last summer we wrote to our Chicago office, asking if there was anything of particular interest about the orders they had recently been booking.

The reply was so to the point that we will now hand it on to you.

"The most interesting order we have received this month is for three houses for Walter B. Davis Company, at Aurora, Ill.

"They will be 64 feet wide and 325 feet long. The eave line is 10 feet high and the rafters spaced about 11 feet to centers. They will be duplicates of the iron frame house we erected for Mr. Davis last year.

On the three houses 7,580 lbs. or 3¾ tons of putty were used on the 18 miles of bars—36 miles of glass held in place by 300,000 glazing brads—239 gallons of white paint or pretty close to a ton—90,600 screws, which, if placed end to end, would reach considerably over a mile.

"A repeat order like this, we believe, says more all by itself than any amount of anvil pounding we can do regarding the merits of our greenhouses."

These Davis houses were completed some time ago. Mr Davis's opinion is given in that four page ad. in the *Exchange and Review* of January 31st, 1914.

CHICAGO, Ill.

THE GREENHOUSE *with the* COBWEBBY FRAME

WHERE in all nature's handiwork is there a bit of building, so airy and almost invisible in its structural lines, as a cob web? Or one that is anything like as strong in proportion?

The lesson in building that we learn from these wonderful nature architects and builders is, that strength is not a question of how heavy you build but what you build of, and how you use your building materials.

In our first designing of the U-Bar house, we took the spider web as a basis.

First we looked about for a way to reduce the size of the necessary structural members and also do away entirely with others.

This meant we must have a frame of a strength never before produced.

The U-Bar was the answer. It made possible the combining of the roof bar and rafter in one; while still keeping the frame down to a cobwebby lightness.

It cut the shade way down, but kept the frame strength way up.

It was as graceful and airy as the cobweb.

It was as strong as the heavily framed houses.

The U-Bar does cost more than other constructions. Costs more, simply because it's worth more.

That's the basis on which you buy anything from fertilizers to automobiles.

Just why this U-Bar house with its cobwebby frame is worth more, is what we want the opportunity of proving to you.

We have a new catalog that is said to be convincing.

We will be very glad to have you send for it. Or send for us. Or both.

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

Bedding Plants

Geraniums, verbenas, fibrous begonias, fuchsias, ageratums, petunias, Drummondi phlox, salvias and other sorts will now be as well, or better, in frames as in the houses. If plunged a little, all the better, as they will then need less water. On hot days the sashes can be removed entirely, but it will be unwise to leave them uncovered over night or to expose them to soaking rains. All the more tender stock such as coleus, alternantheras, cannas, heliotropes and others will still be better off in the houses but should be gradually hardened. Late-sown seedlings grow faster now and the work of pricking out or potting will occupy a lot of time. Small pots dry out rapidly and it will be necessary on bright days to look after the water several times. Never allow plants to wilt if it can be avoided.

Cinerarias

Cinerarias for next Christmas should now be sown. Sow the seeds thinly in pans of light sandy soil, using more leaf-mold than loam. Water and cover the pans with a sheet of glass, over which lay some paper to keep out the sun. A north house or coldframe is suitable for germinating the seeds. They must not be coddled at any stage of their growth, although they can be kept fairly close until the seeds germinate. Watch carefully that the soil does not dry out; also avoid anything like a close atmosphere. As soon as the little plants have made their second leaves, pot off or prick singly and keep them in a shaded frame, moderately close for a few days. In selecting seedlings do not discard the weak ones, as these are usually the finest varieties. The more vigorous ones are likely to be principally blues. In shading cinerarias avoid placing anything of a heavy nature on the glass. This only makes the plant weaker. Movable shading is far the best.

Memorial Day Trade

About every florist has a host of orders for bouquets for this occasion and there is a large variety of flowers that can be used. Crops of ten-week stocks, double feverfews, snapdragons, gladioli, larkspurs, candytuft, astilbe and lilies all want careful watching. All of the more common greenhouse and bedding plants are in demand for the decoration of graves and cemetery lots; also pot grown flowering plants generally are in big demand as are hardy evergreen creeping and trailing plants such as English ivy, euonymus, etc. Large numbers of lobelias, phlox, verbenas, torenias and similar flowering plants of low growth are called for.

Orchids

It will soon be time to overhaul the phalaenopses. As these handsome orchids pass out of flower, rebasketing or repanning will need attention. I prefer deep, circular baskets. These will carry plants for several years, and an annual top-dressing of fresh sphagnum will be all that is needed. Phalaenopses grow well in a compost of sphagnum and fern fiber. If they are grown in deep, cylindrical baskets and the wood is much covered with active roots, it is unwise to attempt to clear these away as many roots are sure to be injured. A far better plan is to place the receptacles in larger ones, filling up any intervening space with crocks and charcoal and covering the surface with growing sphagnum. They want a warm, moist house and anything like direct air current must be avoided. Phalaenopses come from a much warmer part of the globe than cattleyas and enjoy a warm, moist atmosphere, but air, especially from the bottom, should always be afforded with the temperature over 72 degrees. Avoid a dry atmosphere and there will be practical freedom from the attacks of spider and thrips.

Planting Dahlia

The dahlia does well in any fertile soil, but its preference seems to be for a rich, deep, moist, sandy loam. It should be planted about the middle to the last of May. It requires warmth to start it into growth. Consequently there is nothing to be gained by early planting. The dahlia should be planted so as to permit of easy passage between the plants, as the bushes are very brittle and a touch often will cause great branches to break down. A single row will permit of as close planting as two feet in the row, but rows should be at least five or six feet apart. Planting depth should be about five inches. Frequent and shallow cultivation is essential and when the weather becomes dry you can give weekly waterings. It is always well to plant a batch where the water is handy as these can be forced in ahead of the others. If there is any one requirement for dahlia success, it is plenty of moisture from now on and through the blooming season.

Sowing Annuals for Outside

Now is the time to make a good sowing of annuals such as ageratum, sweet alyssum, calendulas, calliopsis, delphiniums, lupines, giant candytuft, schizanthus, shirley poppies, gypsophila, mignonette, etc. Before sowing make sure that the soil is well pulverized. When they are large enough they can be thinned out so as not to crowd one another.

Mr. Farrell's next notes will be on the following: Amaryllis; Growing Aquatics; Planting Gardenias; Sowing Perennials; Stocks for Winter Flowering; Stock Plants.

The show window

An attractive show window is one of the most valuable assets of a florists' store. The same is true of the show house, which should always be a part of the outfit of a florist retailing from his greenhouses without any store. It is not, however, enough that a window or a show house be effectively and artistically filled and dressed with fine things, if frequent rearrangements are not made. Passers very soon get used to the appearance of a window display when it is allowed to remain for any length of time and its power of attraction, which is its main purpose, quickly peters out. To change over a window display every day is something of an undertaking but it is one of the strongest cards to play for a winning game, and the more decided and radical the change from one day to another, the more effective the advertisement.

A practical campaign

Flower seeds have been distributed to over two thousand white and one thousand negro children of Houston, Texas, as the initial step in the "brighten up" crusade which is to follow the city-wide "clean-up" campaign. Much of the seed was donated by the Houston Florists' Association. This young organization has given many evidences of which this is one, that it is very much alive and full of the spirit which prompts activity on practical lines. We understand that a proposition is under consideration to invite the S. A. F. to hold its 1915 convention in Houston. An association which is public-spirited enough to start its activities by making itself a power for good in the community and striving to do its part towards the happiness and refinement of the people is already making a high bid for the attention of the national society and the regard of the horticultural interests everywhere.

The dump

The dump! Consigned to the dirt barrel! The very words carry a shivery chill to the heart of the flower grower. All will acknowledge we read them too often, as describing the final disposition of goods that were expected to be turned into ready money in the big city distributing marts. There are various reasons why flowers go to the dump. Inferior quality, bad handling and careless or unskilled packing and, oftener than otherwise, blind, unreasoning shipping to markets already congested with similar or better goods. Many heartburnings would be prevented if parties would first acquaint themselves with conditions at the point of destination before going to the trouble and expense of sending their product on speculation. If it is a surplus stock, then the chances are all against the shipper. But there are occasions when even the best material from regular shippers finds its fate in the rubbish barrel and this is often due to a well-meant but usually futile effort to maintain prices. The question as to which is the better policy—to adhere to a standard price and throw away the unsold remainder or to unload at whatever the goods will bring—is variously answered. Prices, once cut, are restored with difficulty, yet the throwing away of the product of many months of labor seems wicked. In the nature of things we can never hope to eliminate the dump but if its terrible drain on the lifeblood of the business can only be reduced, is not that an object worth trying for?

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur C. Ruzicka

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communication should invariably be addressed to the office of HORTICULTURE.

Red Spider

Watch out for the spider in the corners of the benches where it is not so very handy to get with the hose, also along the rear of the benches where the best grower is likely to syringe a little too lightly. It will not take very long for the spider to spread all over from these nests as they may safely be called. A good way to do is to get little pieces of cardboard and when tying or doing anything that brings you in close contact with the plants, just hang one up here and there wherever these nests are. This cardboard is very easy to see when you syringe again and these places can then receive an extra good syringing. If the cardboard is not used many of these nests will receive just the ordinary syringe given to the clean plants, this, however not being sufficient to eradicate the spider. If time permits it will be advisable to spray these places with some good insecticide that will go a good ways to kill the spider, too. At any rate put a quarantine tag wherever spider is, and then see that they do not spread.

Houses Too Warm

Although it seldom happens, there is a possibility of the houses being too warm at some part of the twenty-four hours. Whether it is at noon or at night the houses should never be allowed to get too warm as this would soften the growth so that a dose of mildew will follow almost positively. The nights are still too cool to let the fires out, but at the same time the houses should not be allowed to scorch because it may be a little cool outside. See that there is air on, for this will carry away a good part of the excessive moisture and will also render the houses safe in the morning between the time the night firemen leaves and the day men arrive. If the houses are closed up during this time the condensation on the glass will be great and all the air more or less stuffy and stale, just right to breed many of the diseases that the rose is subject to. An inch of air will be all that may be necessary, and will carry the houses very nicely. Then see that they are raised up in time in the morning and not allowed to run up too high before the needed air is put on. Begin at once as soon as the thermometer starts to rise and raise the ventilators as fast as needed. We would not like to see any houses up to 80 degrees unless there was plenty of air put on.

Tying Down The Beauties

Late as the season is, it will still pay to let all the tall Beauty shoots get their tying, and bring them down to where they ought to be without shading a good many of the others. By tying them all down, it will place them all on an equal footing and give all a chance to share the sunlight. When tying see that all the tops are kept in a straight line; not that it will help or make them set, but it will give a finished appearance to the job that will seem missing when this is not done. Further, if this is omitted, and the roses tied one lower than the other and if they are not spaced evenly along the wires, it will seem as if an amateur was at the job instead of a man who ought to know better. It does not take any longer; in fact, time will be saved in future tyings if the plants are tied right, the wood well distributed and the tops kept even. Another item which is hardly worth mentioning for the reason it seems so small and unimportant but will save a little string just the same, and make the whole job look neater, is to cut off the string as close to the knot as possible, instead of leaving the ends sticking out an inch or more, as many growers will do, which makes the wires very unsightly, and is a waste of string besides.

Pots

Now that nearly all the plants will be out of the small pots it may be well to touch on these a little, just enough to remind all that the sunny side of a greenhouse is no place for them. They were baked to the proper hardness at the time that they were made, and therefore they require no exposure to the sun to harden them still more. There is such a thing as a pot that is too hard, for a good pot should be porous and not water-tight by any means. If you must store your pots outside, take the trouble to make a floor so that they will all rest evenly, and thus the breakage will be reduced to a very small number. Then see if you have some old boards that can be made into a roof to keep the weather away from the pots. They will do much better, and the quality of the pot will remain unimpaired. Then when the pots have been washed and are used again you will not be wondering why the plants behave so strange, some drying out very unevenly, in spite of all the pains taken when watering. There are many little things—not for publishing—mistakes in typing for instance—that will gradually wind up in big problems if they are not handled at the proper time. Look after these and you will not have to worry so much.

Nematodes and Peonies

One of our leading peony growers has worked himself up into a considerable consternation on account of the nodules on his peony roots and a certain learned professor has pronounced them dangerous. Bosh! Give us facts and let theories go. I have watched this thing carefully for fifteen years and I find that my most robust and vigorous plants are often loaded with them. Our wise man says the plants should be destroyed and the ground should be sterilized; as well say that alfalfa should be destroyed because the roots have nodules on them. Peonies should not be allowed to stand too long and never should be replanted on the same ground, for no plant sooner exhausts the soil.

People often work themselves up into a needless panic. At the great Denver meeting of the National Society the question of the root knot was brought up. The wise ones claimed that it was an infectious disease and the trees should always be destroyed but some of our enterprising western growers were ready for them. One firm had planted years before a whole row infested with root knot and they had specimens with them. The neighboring trees were not affected and the root knot trees were as vigorous and productive as others. Fools have often had large quantities destroyed for fear of infection. Root knots are warts and you might as well kill a boy because he had warts on his fingers.

York, Neb.

CLUBS AND SOCIETIES

TEXAS FLORISTS ORGANIZE STATE ASSOCIATION.

The Texas Florists' Association held its first annual convention in Waco, Texas, the formal organization occuring on Monday, May 4, when constitution and by-laws were adopted and officers selected for the ensuing term as follows: President Robert C. Kerr, Houston; Vice-President, W. J. Baker, Fort Worth; Secretary-Treasurer, George M. Cosh, Houston; Press Representative L. J. Tackett, Fort Worth; Educational Director, E. J. Kyle, College Station. The following directors were elected three of whom will serve for one and the other three for two years, the long and short terms to be drawn for by members of the board: T. J. Wolfe, Waco; O. H. Hanna, Sherman; John McAdams, Fort Worth; E. P. Brown, Dallas; F. W. Suchy, San Antonio; Herman Kaden, Gainesville.

President Kerr named the following: Legislative Committee—Sam Dixon, of Houston; H. O. Hanna, of Sherman; J. B. Baker, of Fort Worth; H. B. Beck, of Austin. Committee on State Flower Show: T. J. Wolfe, Waco; George M. Cosh, Houston; Henry Greve, Dallas; L. J. Stubblefield, Fort Worth; Ed. Hall, Austin; W. Suchy, San Antonio; and E. E. Stone, Waxahachie. Finance Committee: Bird Forrest, of Waxahachie; J. E. McAdams, Fort Worth and Charles Alff, Jr., of Austin. Transportation Committee: J. F. Martin, Port Arthur; Charles Alff, Sr., Austin and J. D. Priessner, Galvaston.

It was unanimously decided to hold a state flower show annually, Houston capturing the first. Fort Worth was selected as the next annual meeting place.

During the course of the meeting the following program was carried out proving exceedingly interesting throughout.

Meeting called to order by Chairman organizing committee, Robert C. Kerr, Houston, Texas. Invocation, Rev. E. E. Ingram, Waco, Texas. Addresses of welcome, J. W. Riggins, Mayor of Waco; Mrs. Annie Wolfe Brigance, Waco. Response, L. J. Tackett, Fort Worth, Texas. Addresses of welcome in behalf of the florists of Waco, T. J. Wolfe, Waco, Texas.

Papers. The possibilities of an experimental range of glass for commercial cut flowers—E. J. Kyle, College Station, Texas. Co-operation of the Agricultural Department with the Florists' Association—Sam. Dixon, Houston, Texas. How the Texas State Horticultural Society can co-operate with the Texas Florists' Association, Elwood Pomeroy, Donna, Texas. How the Texas Nurserymen's Association and the Texas Florists' Association can co-operate and work together for the good of horticulture, J. S. Kerr, Sherman, Texas.

W. W. Seley, Mrs. Walter Reese, W. D. John, C. Ray, all of Waco, were elected honorary life members. Tom J. Wolfe, of Waco, was unanimously elected an honorary vice president. He and his sister, Mrs. Annie Wolfe Brigance, were shown great honors by the Convention in appreciation of their great efforts in causing the florists to become organized and in their magnificent entertainment.

The following were in attendence at the first annual convention:

Austin: Chas. Seff, Jr., E. Fredrich, Edgar Hall, Charles H. Alff, Sr., Charles H. Alff, Jr., Thomas J. Miller, H. B. Beck. Brenham: C. Dornberger. College Station: E. J. Kyle, C. M. Evans. Donna: Elwood Pomeroy. Dickinson: E. E. Stone. Dallas: Seth Miller, Robert Wehrli, Charles Benggeli, R. W. Ballantine, Otto Lang, Louis Oesch, J. C. Zell, Henry Holtkamp, Miss Holtkamp, E. P. Brown, H. F. Greve, John M. Dawson. Forth Worth: L. J. Stubblefield, W. B. Green, I. E. McAdams, L. J. Tackett, C. E. Papworth, W. J. Baker. Galveston: H. J. Condron, J. D. Pruenner. Greenville: Wise Adkisson. Hillsboro: Miss Martha M. Wood, W. E. Hunter. Houston: S. J. Mitchell, Hy. H. Kuhlmann, Sr., Hy. H. Kuhlmann, Jr., L. B. Schulte, Mrs. Schroeder, E. Paxton Davis, Jr.,

ROBERT C. KERR
President-Elect Texas Florists' Association

Charles Ehlers, Sam. B. Dixon, R. C. Kerr, George M. Cosh. Sherman: John S. Kerr, A. Y. Koehle, H. O. Hanna. San Antonio: F. C. Suchy, Wm. S. Herzogg, Walter Schumann, Chris. Hauser, Jr., Mrs. F. Bright. Waco: Tom J. Wolfe, Mrs. Annie Wolfe Brigance, W. W. Seley, Jack Ray, W. A. Poage, W. D. Rondthaler, M. B. Davis, J. C. Brown, Herman Hagedorn, Mel D. Webster, E. E. Ingram, J. W. Riggins, T. W. Reed, M. Falkner, R. C. Moler. Waxahachie: Bird Forrest. Wichita Falls: J. L. Downing. Wills Point: R. M. Womack. Tyler: Mrs. Sam. Brown. Temple: Hans Schroeder. El Campo: Mrs. J. E. Wheeler. New York City: Arthur T. Boddington. Denver, Colo.: Joseph Moler. Chicago, Ill.: Frank J. McCabe. Corsicana: William Clowe.

BOSTON CONVENTION NOTES.

Secretary Young has been busy on the floor plans for the Convention Trade Exhibition in Mechanics Building, Boston, next August and diagrams will be ready to mail to all S. A. F. members this week. Judging from the number of inquiries already coming in this exhibition will be the largest in the history of the society.

FINAL RESOLUTIONS OF S. A. F. EXECUTIVE BOARD AT BOSTON MEETING.

Whereas, at the meeting of the Board of Directors of the S. A. F. & O. H., held in Boston Mass., March 17 and 18, 1914, the members have been the recipients of many courtesies and unbounded hospitality at the hands of the florists of Boston:

Therefore, be it resolved that we express our thanks and appreciation to the members of the Florists' and Gardeners' Club and the Mass. Horticultural Society for their thoughtful generosity in providing for our meetings, entertainment and comfort, during our very pleasant sojourn in their hospitable city. We wish to particularly express our appreciation of all courtesies extended in the way of lunches, and as to dinners and banquets provided, all of which were much enjoyed.

We wish to particularly express our appreciation to His Honor Mayor James M. Curley for the cordial reception extended by him to our representatives in expressing his willingness to cooperate with us in the establishment of an outdoor garden in connection with our forthcoming convention.

Special thanks are due and hereby extended to the following named gentlemen for their untiring efforts and sacrifice of time and money in furthering the best interest of the society in behalf of the forthcoming convention of the S. A. F. & O. H.; J. K. M. L. Farquhar, Patrick Welch, E. Allan Peirce, Thos. Roland, Wm. R. Nicholson, Jackson Dawson and others. Also to the daily press for the publicity given to our deliberations.

Thanks are due and hereby extended to Chairman John H. Dillon, of the Boston Park Comission for the automobiles furnished for the splendid ride through the parks and boulevards of Boston. Thanks are also due Deputy Commissioner James B. Shea, of Boston Park System for interest manifested in our welfare in accompanying us on our pleasant and interesting ride and providing a bounteous luncheon and entertainment at his home for the edification and uplift of all present.

Respectfully submitted,

WM. F. GUDE, J. J. HESS, JOHN EVANS.
Committee on Final Resolution.

TORONTO GARDENERS' AND FLORISTS' ASSOCIATION.

It was a difficult task that beset the judges at the spring Flower Show of the Gardeners' and Florists' Association in St. George's Hall, Wednesday, April 29, for every one admitted that there were no poor ones amongst the display.

The prize winners were:

Cut blooms—Yellow roses, J. H. Dunlop; pink roses, J. H. Dunlop; red, W. J. Lawrence; white, Toronto Floral Company; American Beauty, Dale Estate.

Carnations, crimson, scarlet, white, pink and fancy—Miller & Sons.

Miscellaneous cut blooms — Sweet peas, J. H. Dunlop; lily of the valley,

A GROUP OF LENOX GARDENERS.

First Row, Sitting, Left to Right—Stewart Marsden, Thomas Procter, Edward J. Norman, John Hughes, Alexander McConnachie (President of the Lenox Horticultural Society), William Henry, John Baker, James Feeley, Charles Mattoon. Second Row—William Tirrell, John P. Krah, David Dunn, Frank H. Butler, Walter Jack, John P. Donohue, R. A. Schmid, Harry Heermanns. Third Row—George W. Ferguson, A. J. Loveless, A. McLoud, Fred Heermanns, A. H. Wingett, George Foulsham, Edwin Jenkins, S. W. Carlquist, Robert Purcell, George Thompson, Jr.

The superintendents of twenty-seven famous estates of Lenox, Mass., appear in the accompanying picture. Any one accustomed to read the reports of exhibitions given by the Lenox Horticultural Society, will recognize in this list the names of many renowned prize winners. Most of them have presided many years over the grounds and gardens of which they have charge and they constitute the active forces which stand behind the Lenox Horticultural Society, which is everywhere recognized as one of the most useful and prosperous local organizations, representative of the highest ideals in American horticulture.

Dale Estate; snapdragon, Miller & Sons; stocks, W. J. Lawrence.

Group of flowering and foliage plants—H. G. Dillemuth.

Sir Edmund Osler and Sir Henry Pellatt took first prizes for calceolaria and narcissus respectively.

CLUB AND SOCIETY NOTES.

The Cincinnati Florists' Society's regular meeting will be held at the Club Rooms in the Flower Market on Monday, May 11, at 8 p. m.

The next St. Louis Florist Club meeting will be held on Thursday, May 14th, at 2 o'clock, in Odd Fellows' Bldg. This will be a most important meeting and the officers expect a large attendance.

At the next meeting of the New York Florists' Club, which will be on Monday evening, May 11, R. A. Vincent of White Marsh, Md., will give a talk on Geraniums, illustrated with colored stereopticon slides.

The Dallas (Texas) Florists' Club at its meeting on April 22, elected the following officers:

H. F. Greve, president; Otto Lang, vice-president; E. P. Brown, secretary; Louis Oesch, treasurer.

The Boston Retail Florists' Club completed its organization at a meeting and dinner at Hotel Bellevue, Tuesday evening, May 5. Pres. T. F. Galvin, Jr., presided and about 40 sat down to dinner. By-laws were adopted, 25 new members elected and the following officers chosen: T. F. Galvin, Jr., president; Henry L. Comley, vice-president; B. H. Green, secretary; Julius A. Zinn, treasurer. There was a discussion on the use of flowers in the observance of Mothers' Day.

THE SPARK PLUG OF BUSINESS.

There was a good audience to hear the eloquent words of L. W. C. Tuthill at the Florists' Club meeting, Phila., May 5th. He spoke like a prophet and everybody was impressed. There is no doubt but all carried away a new impression about the "spark plug." When a young doctor hangs out his little shingle that's his spark plug, and he thinks the whole world will come rushing to that shingle. But they don't! And why? Far be it from me to pose as an authority. I don't know, myself. Some small items of philosophy I have absorbed, however. It takes the spark plug to start the engine. It takes telling the boys about it, to start the business engine. It's not so difficult if you would only go about it right. Tell your story straight, and then get the mediums that will carry the message. Above all—tell the truth. But there are many ways of telling the truth. There's where the amateur generally falls down. Did you ever hear the homely adage, "Don't sell your hen on a rainy day"? She looks so bedraggled, you would not give a button for her. That's part of the philosophy of advertising. Men who have studied it will tell you that telling it right is the ultimate in human wisdom. And yet the unthinking and the foolish say "Why advertise?" Why let them know what I have to sell? They claim the good goods sell themselves. We have seen the finest goods go to waste—they would not pay for the picking. That answers the good goods proposition. Then on that same point—why hang your sign out over your door, if the goods sell themeslves? Isn't that sign advertising? Nothing to it. And, as Rudyard Kipling would say: "How to do it—that's another story." I have been thirty-eight years at it and I'm still in doubt. But one thing is sure—*any advertising is better than none.*

GEORGE C. WATSON.

WOOD LICE.

Editor HORTICULTURE:

Can any reader give us a good receipt for getting rid of the common wood louse? They are in everything; carnations are being eaten up by them. I would like to hear from some one who has had this trouble and found a remedy for them.

GRANVILLE NURSERY CO.,
Granville, N. Y.

One of the most frequent causes of damage by the common wood louse is decay of the wood work in greenhouses. When this gets into a decayed state it affords them an ideal home and they increase very rapidly particularly in damp and dark surroundings. The most efficient way of getting rid of this pest is to remove all the plants from the structure, take out all rotten wood and fumigate with a very strong dose of hydrocyanic acid gas. General cleanliness at all times is also of great importance.

Personal

Matthew Macnair of Providence, R. I., contemplates taking his usual summer trip to his native place in Scotland and to Paris, this year.

On Friday evening, May 8, J. K. M. L. Farquhar lectured at Greenwich, R. I., presenting a series of instructive stereopticon slides on gardening topics.

W. D. Nickerson, gardener on the M. T. Jones estate, Houston, Texas, will take charge of the summer home of the Jones family at North Conway, N. H., this summer.

Charles Trepole, who was employed by Julius Wolff, 1617 N. 19th street, Philadelphia, at Easter, has been arrested, charged with having stolen ribbon and forged bank checks in Wolff's name.

John Meisem of Elmhurst, N. Y. celebrated his birthday on Friday, May 1, with a party of thirty friends at his home. One of the dainties served was speckled trout from John Donaldson's new domain at Patchogue.

J. K. M. L. Farquhar of Boston, lectured before the Albany Florists' Club at the new establishment of the Albany Cut Flower Exchange, on Thursday evening, May 7. Many beautiful stereopticon views were shown.

Frank Vennemann was married last week to Miss E. Wocher of Kirkwood, Mo. The happy couple are off on a wedding trip. Mr. Vennemann is president of the County Growers' Association and members are planning for a big surprise entertainment when they return home at the end of the month.

William Plumb has received official confirmation by the president of the Panama-Pacific Exposition of his appointment as Superintendent of Floriculture, Department of Horticulture, of the Exposition and entered upon his duties Friday, May 1. He is now calling upon growers and dealers with a view to securing representative exhibits from New York, Boston, Philadelphia and neighboring points. Other territory will be taken up in sequence.

THE ANTI-TRUST BILL.

Washington—The Clayton bill embodying the Administration's program of anti-trust legislation has been reported by the House Committee on Judiciary. Plans will be perfected early next week to pass the measure.

It is the purpose of the House leaders to put the bill through without delay. The Administration is anxious that the Clayton bill, which will be used as a basis for legislation further regulating the operations of interests of interstate corporations, shall be transferred to the Senate at the earliest practicable date.

The committee stood pat on section 7 of the bill relating to labor unions and voluntary associations of farmers. These organizations are not exempted from prosecution as demanded by labor leaders. Section 7 merely declares that labor unions and agricultural associations are legal entities and that the law does not prohibit them "from carrying out the legitimate objects thereof."

Here is the text of section 7:

> That nothing contained in the anti-trust laws shall be construed to forbid the existence and operation of fraternal labor, consumers, agricultural or horticultural organizations, orders or associations instituted for the purpose of mutual help and not having capital stock or conducted for profit, or to forbid or restrain individual members of such organizations, orders or associations from carrying out the legitimate objects thereof.

Section 8 of the bill, prohibiting a corporation from acquiring control of another corporation, originally provided that such merger should be unlawful if the effect was to eliminate or "substantially" lessen competition.

AN IMPORTATION OF PHALÆNOPSIS.

This interesting picture gives some idea of the extent to which orchid importing to this country is being carried on. This shipment was received by MacRorie and McLaren of San Francisco. It contained 10,000 phalænopsis plants which arrived on the steamer "China" on April 11th The shipment comprised Phalænopsis amabilis, Schilleriana and Sanderiana from the Philippine Islands. Among the plants are specimens containing leaves from 18 to 24 inches in length. This is said to be the biggest shipment ever made to America, and represents many years of collecting. A Filipino native of the islands was brought in with the goods to insure their proper care on the trip and also to look after the plants after arrival.

Useful notes on the culture of phalænopses will be found in Mr. Farrell's notes in this issue.

THE GARDENER QUESTION.

Editor HORTICULTURE:

Your Philadelphia correspondent is putting the question up to me so squarely—"How long has M. C. E. been in the business," that it is entitled to a frank reply. My answer is—Long enough to realize that there are still too many in it who do not yet recognize the fact that the entire business is undergoing a transformation, and that conditions that prevailed even a few years ago do not avail today.

As to my qualifications to pass an opinion on the subject which has provoked this question, I submit to him as my credentials, an editorial endorsement, which appeared in HORTICULTURE, Oct. 18, 1914, an authority which he will not question; and from which I quote as follows—"We wish to put on record a word of commendation, for the sentiment and tone of the excellent paper on the gardener and his field which Mr. Ebel read before the Gardeners' and Florists' Club of Boston. . . . ."

In alluding to your P. C., as he terms himself, as an "outsider," he knows that it referred only to his published criticism following his visit to a meeting of an association on the affairs of which he was but slightly informed, and that it in no wise reflected on his able business ability; for, is it not true that whenever I visit "the city of brotherly love," whether for work or play, my first act always is to seek George C. as my guiding star.

As to the burning issue, my position on the question of proper compensation to the gardener is already so well established that it stands in no danger of being misunderstood through any misconstruction that may be placed on it. And I am perfectly willing that all credit of promulgating the fallacy, that those who may require the services of gardeners can be educated that the gardeners' minimum wage scale must be $100 shall go to them that foster it.

Friend Watson, do you know of any profession that has ever been successfully unionized? M. C. EBEL.

Obituary

Mrs. W. S. Manning.

Mrs. Wm. S. Manning, wife of the Superintendent of Baltimore park system, died suddenly on Sunday, May 3. Interment was in Wildwood Cemetery, Winchester, Mass.

W. L. Fronfield.

W. L. Fronfield, Arlington, N. Y., a florist, died at the Bowne Memorial Hospital, Poughkeepsie, on April 20. He had been in failing health for some time, tuberculosis being the cause of death.

J. M. Vandervort.

J. M. Vandervort, founder of the New Antioch Nurseries, New Antioch, Ohio, died at his home April 17th, aged 80 years. He is survived by a son, who was associated with him in the nursery business, and a daughter.

Louis Puzzey.

Louis Puzzey, a retired florist, died on Thursday, April 30, at St. Joseph's Hospital, New York, after a brief illness. He was born in Paris thirty years ago, coming to Brooklyn about ten years of age he settled in the Hill section. He was the proprietor of several flower stands in the wholesale market in New York up to his last illness.

Wm. Hutchinson.

Wm. Hutchinson, one of the oldest florists in St. Louis County, Mo., died April 24 at his home in Kirkwood, where he conducted for many years a retail and growing establishment. Mr. Hutchinson was 71 years old and was suffering for years with cancer. The funeral took place Monday, April 27, and there was quite a large attendance of the local florists. There were many floral tributes expressive of sympathy and condolence to the bereaved family.

John Scott.

John Scott, father of the late John Scott who introduced the Scottii fern, died at Flatbush, Brooklyn, N. Y., on Saturday, May 2. Mr. Scott was an expert gardener of the old school. He was born in Haddington, East Lothian, Scotland. He was employed on the estate of the Earl of Dalkieth for over forty years. He has been a long time connected with his son's establishment and had many friends in Brooklyn. His death was due to the infirmities of old age. He leaves three sons and three daughters.

Clemens Wocker.

Clemens Wocker, for thirty-eight years a wholesale florist who specialized in the growing of carnations, died on Thursday, April 30, at his home, 502 Lenox road, Flatbush, N. Y., from cancer of the throat. For the last four years he had been in ill health and had practically retired, his son, John, carrying on the business. Mr. Wocker was born in Germany fifty-nine years ago, and came to Brooklyn at the age of seventeen years. He started as a florist's helper and then engaged in business for himself. He is survived by a widow, a daughter and a son. Interment was at Evergreen cemetery, Brooklyn.

POSSIBILITIES OF A WINDOW.

The artistic and effective business-bringing possibilities of a window display are but little understood. Everywhere we go, we see splendid chances going to waste. Then some wise one mentions the fact and what happens? A botch!

What is wanted is an artist who knows how. You can see this genius at work everywhere you go in the great business houses of the big cities but you never stop to give credit for the result.

It takes not only native ability and long study and practice to bring about the result. It takes genius to do it. It is an art that must be born with a person in the first place and then developed.

A good example is the lawn mower exhibit at Michell's this week, which the accompanying picture illustrates.

This display is circumscribed in space but in all its parts and dimensions is perfect and you would think it had just happened. "The very art itself is nature."

The artist was Phillip Freud, whom we have had occasion to mention many times in the same connection or similar, during the past twenty-five years. He is a past master.

G. C. Watson.

BRITISH HORTICULTURE.

A Narcissus Disease.

In a recent issue of the "Kew Bulletin," Prof. G. Massee gives some interesting information respecting a disease of an unusual kind, which was met with three years ago on narcissus bulbs. During last year the disease increased so alarmingly that entire plots of bulbs were completely destroyed. The injury is due to a parasitic fungus, called Fusarium bulbigenum. Usually the presence of the parasite is indicated by the appearance of small yellowish spots on the leaves. These spots gradually increase in size, become brown and dry, and more or less covered with pale salmon-colored specks, which are at first more or less gelatinous, but soon become dry when exposed to the air. The writer points out that the continuance of the disease may be due to two independent causes i. e. slightly diseased bulbs or infected soil. The disease is known in Holland.

Spring Rose Show.

There was a fine display of bloom at the spring rose show of the National Rose Society held at the Royal Horticultural Hall, London, on Thursday, April 23. A satisfactory list of entries was received for the 27 classes. About a dozen novelties were exhibited. Cards of commendation were allotted to Mrs. S. W. Wright, a salmon-edged pink Tea, from A. Dickson & Sons; Autumn Tints, a H. T. similar in tint to the Lyon, from B. Cant & Co., and Prince Charming, salmon-pink H. T. from Hugh Dickson. W. H. Adsett.

NEWS NOTES.

Superior Wis.—On May 1, G. Tjensvold and William Berg, proprietors of the Superior Floral Company moved from 1418 Tower avenue to larger quarters at 1410 Tower avenue, they having bought out the business hitherto conducted by J. J. LeBorious. LeBorious will go out of business in the city. Mr. Berg has up to the present time been assistant chief clerk at the general offices of the Great Northern railway. The Superior Floral Company has at Billings Park greenhouses with 12,000 square feet of glass. The retail business will be handled at the Tower avenue store and the wholesale trade at the greenhouses.

Bridgeport, Conn.—Stephen D. Horan appeared before the committee on claims last week with a petition for reimbursement for the damages he says he sustained by the construction of a curb, gutter and sidewalk on Cherry street last year, he alleging that the work is causing one of his greenhouses, one of the largest and best in the state, to fall down while many feet of his fence has already done so. It seems that last summer the common council ordered a curb, gutter and sidewalk laid on Cherry street. A portion of the street abuts on Mr. Horan's property and at this point there is a slight rise in the ground. Mr. Horan admits that he was notified to do this work but did not do it and that it was afterwards done by the city, the men cutting down the earth several feet in the rear of his greenhouses in order to do it.

ARNOLD ARBORETUM.

(Bulletin of Popular Information, No. 52.)

The winter of 1913-14 will be remembered in all parts of eastern North America as a winter of exceptional severity. The unusually low temperature accompanied by high gales of a day or two in January when there was no snow on the ground, and the severe cold and high winds of late February and early March caused much anxiety to the lovers of plants in eastern Massachusetts. So far as the Arboretum is concerned these fears have not been realized, for the losses from the winter here are few and unimportant. The plants of a small rhododendron, R. Gowenianum, chiefly interesting as one of the hybrids between an azalea and a rhododendron, have been killed; otherwise the rhododendrons are in remarkably good condition and their flowering promises to be the best that the Arboretum has seen. A few of the small, half hardy conifers, like some of the Torreyas and Cephalotaxus planted near the top of Hemlock Hill, have suffered but will probably recover, and here and there through the Arboretum the dead tips of small branches show how severe the winter has been. Even small plants of Buckeyes from Georgia and Texas, and several species of plums from Texas planted in the open ground, show no signs of injury.

The effects of the cold on the new plants from western China are of special interest for it would seem that any plant that could survive such a winter might be considered hardy. It is gratifying, therefore, to find that very few of the Chinese plants even when planted in the most exposed positions have suffered. The oaks, birches, poplars, willows, ashes, cherries, plums, yellowwoods, Davidias, eucommia, catalpas, berberis, cercidiphyllum, most of the cornels, viburnums, cotoneasters, honeysuckles, spiraeas, lilacs, several of the evodias and ehretia and many others are uninjured. Some of the Chinese roses, as might have been expected, are killed back nearly to the ground, while others are quite unhurt. Two of Wilson's conifers, Picea Watsoniana and Tsuga chinensis, have been growing for three years in the open ground without protection and are now as bright and fresh as any conifer in the collection. This is interesting for these two trees came from the region where Wilson later found the large number of new conifers, the introduction of which into cultivation was one of the important results of his travels, and the hardiness of this spruce and hemlock indicate that other species from the same region may perhaps be equally hardy in New England.

It is interesting to note that the flowers of the winter-flowering witch hazels from southern Missouri, Japan and western China were not affected by the severe cold. The Chinese species, Hamamelis mollis, produced its flowers for the first time in the Arboretum in February. These flowers are larger than those of the other species; the petals are bright yellow and remained for weeks in good condition. This promises to be a valuable plant for persons who can use winter-flowering shrubs.

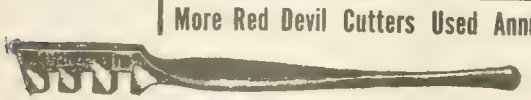
The spring is exceptionally late. The bluebirds did not arrive this year until March 25th; they have been known to some as early as the 21st of February, and the average date of their arrival for the last thirty years is March 9th. In the bulletin published last year on April 25th there was announced the flowering of several cherries, of the amelanchiers, of some of the forsythias, and of other plants which are now only just beginning to enlarge their buds. A week later the Japanese Euptelea polyandra was in flower, and the branches of the Chinese Prunus tomentosa were already covered with its handsome flowers.

In spite of the lateness of the season several trees and shrubs, however, are already in flower. The branches of the White Elm, Ulmus americana, the earliest of the elm trees to open its buds here, have been brown for several days with the clusters of its small flowers, and the Scarlet Maple (Acer rubrum) is gay with its crowded flowers which cover its otherwise naked branches and are on some individuals scarlet and on others pale red or yellow.

The earliest exotic tree to flower this year is the European Dogwood or Cornel, Cornus mas, often called the Cornelian Cherry. The small bright yellow flowers in dense clusters now cover the leafless branches and make the plants conspicuous in early spring. The leaves, which will unfold as the flowers fade, are abundant, of good size and pleasant color, and the bright scarlet lustrous fruits, which are the size of large cherries but oblong in shape, hang gracefully on slender stems and are very ornamental. This small tree is perfectly hardy and probably was better known and more generally planted fifty years ago than it is now. It is not flowering particularly well this year, but many specimens can be seen in the shrubberies of the Boston parks now in full flower; and there is an exceptionally large and shapely tree on the Boylston street side of the Boston Public Garden near the entrance to the subway.

Many of the alders are in flower and their delicate blossoms will well repay careful examination. The flowers of several willows in the collection planted along the eastern border of the great meadow are now open, and during the next two weeks others will appear in succession. It is at this period that these trees and shrubs are seen in their greatest beauty and are most interesting to the student.

The spice bush (Benzoin aestivale) is just opening its flowers. This is a native of the eastern United States and an inhabitant of the borders of swamps where it sometimes grows to the height of ten or fifteen feet. The flowers are small, bright yellow, and the male and female flowers are produced on different individuals, so that some of the plants only bear the small, scarlet, shining fruits which contrast so well with the bright yellow autumn foliage. The leaves are fragrant like those of its relative, the sassafras, and are not injured by insects. The Leatherwood group (Dirca palustris) is now covered with its beautiful small yellow flowers. This is one of the most successful groups in the Arboretum and should be visited by persons interested in early spring flowering shrubs of good habit and entire hardiness.



The earliest magnolias are just opening their flower-buds. These are two Japanese species, Magnolia stellata, M. kobus and its northern form var. borealis. These plants, like many other Asiatic species, open their flowers before the leaves appear. The former is a shrub which may in time be expected to grow to the height of ten or twelve feet and to spread to a diameter equal to its height. It is perfectly hardy and one of the bost beautiful of all early spring flowering shrubs but, like several of the other early flowering magnolias, it blooms too early and the flowers are often injured by late frosts. This is true, too, of Magnolia kobus and its variety. The latter is a larger and more vigorous tree than the typical Magnolia kobus, which in the Arboretum has remained shrubby in habit. These two plants, in their young state at least, do not produce large quantities of flowers and their flowers are less beautiful than those of many magnolias, but the northern tree grows rapidly, is very shapely and covers itself with dense, dark green, handsome foliage.

Other plants now in bloom are the European Daphne Mezereum and Erica carnea. The former is a small shrub sometimes growing to a height of eighteen inches or two feet, and is ornamental when it is covered with its small flowers, and later in the season when its red fruits are ripe. Erica carnea is one of the few heaths which are hardy in this climate and the first of the genus to flower here.

The interest in native birds is now so great, and fortunately so rapidly increasing, that it may be interesting to make known some of the resources of winter bird-food which can be found in the Arboretum.

In March a representative of the Department of Agriculture at Washington came to the Arboretum to study the plants found here which might furnish birds with winter food. His examination revealed the fact that fleshy fruits of the sort eaten by birds were still hanging on the branches, and in good condition, of one hundred and ten species of trees and shrubs, and that the fruit of fifteen other species, although dry, was still available as bird-food. These one hundred and twenty-five species belong to thirty genera. Of the species only forty-nine are natives of the United States and only thirty of New England. In the course of a few years, moreover, the number of plants producing winter food for birds will probably be largely increased in the Arboretum by recent introductions.

More Red Devil Cutters Used Annually Than All Others Combined

369 RIVER ST., CHICAGO.

NEW YORK NOTES.

Chas. Loechner of New York city is on a business trip through the west.

John Meisem of Elmhurst, N. Y., expects to sail for Europe about May 31.

The New York office of Peters & Reed of Zanesville, Ohio, has been removed to 23 West 23rd St.

A. T. Boddington of New York is in Texas this week in attendance on the State Florists' meeting at Waco.

Julius Roehrs of Rutherford, N. J., intends to start on a European trip early in June.

The Old Farm Nurseries (H. Den Ouden & Son), Boskoop, Holland, have appointed Otto Heinecken, 17 Battery Place, New York, as their American agent.

The New York Cut Flower Exchange and Charles Millang have both secured a new five-year lease on the premises they have been occupying in the Coogan building.

John Donaldson of Elmhurst, N. Y., has just returned from a pleasure trip to Richmond, Va., where he reports having had a very enjoyable time. Mr. Donaldson having recently disposed of his home and greenhouse property has purchased a place in Patchogue, and will move there this summer.

At the annual meeting of the Cut Flower Exchange on Saturday, May 2, John Donaldson handed in his resignation as president and John Schneider of Astoria was elected to fill his place. Alex Burns was chosen to succeed Mr. Donaldson on the board of directors. The balance of the officers were re-elected.

Quite a few of the wholesale florist establishments announce that hereafter their places will be closed all day Sunday. This is in line with the general trend of sentiment among the wholesale flower trade and the stringent laws governing the hours of labor will doubtless result in an entire cessation of Sunday work in the wholesale district.

John R. Weir has severed his connection with the James Weir Incorporated concern, Brooklyn, N. Y. "Johnnie" Weir, as he has been familiarly known to the flower trade of New York for thirty or forty years has an unimpeachable record for business integrity and in whatever new connection he may establish he will have the sincerest good wishes of the entire trade.

M. C. Ebel, of Madison, N. J., F. L. Atkins, of Rutherford, N. J., and W. H. Siebrecht, of Chappaqua, N. Y., have been added to the New York Flower Show Committee. The committee met and organized for the work of the next show, and elected F. R. Pierson, chairman, Theodore Havemeyer, vice-chairman, John Young, secretary and business manager, and F. R. Newbold, treasurer. The show will open at the Grand Central Palace on Wednesday, March 17, 1915, at 2 P. M., and close on the following Tuesday night. The next meeting of the committee will be held on Monday, May 11, for the purpose of preparing the preliminary schedule.

FREEMAN ORCHID CO.

FALL RIVER, MASS.

THE MIRACLE.

Unlovely things they were and cold
As Death itself, last fall—
The bulbs I planted in the mold
Beside my garden wall.
Yet here above each sodden husk
A bourgeoned beauty blows
And fills with hyacinthine musk
The little garden-close.

Ah! lovelier, dearer seed than mine,
Albeit cold as they,
I watched my widowed friend consign
To church-yard mold today.
Yet he, in darkness, questioning
The same Benignant Power,
Can neither see the distant spring
Nor visualize the flower.

Headquarters for HARDY PHLOX

One year old, field-grown plants now established in three inch pots. General Collection of Standard Varieties.

HARDY PHLOX

Albion (Medium). One of our own introductions; producing very large panicles of pure white flowers, with faint aniline-red eye.
Aglae Adanson (Medium). Large snow-white with violet-rose eye.
Antonin Mercie (Medium). Light ground color, upper half of each petal deeply suffused bluish-lilac, large white halo.
Bacchante (Tall). Tyrian rose, with crimson-carmine eye.
B. Comte (Medium). Brilliant French purple, with crimson-carmine shadings. 85 cts. per doz.; $6.00 per 100.
Bridesmaid (Tall). White, with large crimson-carmine centre.
Caran d'Ache (Medium). Geranium-red, with old-rose shadings and white eye; very effective.
Champs Elysee (Dwarf). A very bright rosy magenta.
Colibri (Tall). White, with crimson-carmine centre, very late.
Coquelicot (Dwarf). A fine pure scarlet, with crimson-red eye. 85 cts. per doz.; $6.00 per 100.
Danton (Medium). Scarlet, pure red eye.
De Miribel (Medium). White, suffused with bright rosy scarlet, red eye.
Diadem (Drawf). A fine dwarf, pure white.
Eugene Danzanvillier (Tall). Lilac, shading white toward the edges; large white centre.
Frau Dora Umgeller (Medium). Solferino red, shading to carmine-crimson at centre.
General Giovaninelli (Dwarf). Bright tyrian rose, with light shadings at the base of each petal, a pure red eye; very effective.
Goliath (Very tall). Rich carmine, shading to a deep centre.
Helena Vacerasco (Dwarf). Large pure white.
Henry Marcel (Medium). Pure red, with bright salmon shadings.
Henry Murger (Tall). White, crimson-carmine centre.
Henry Royer (Medium). Tyrian rose, with lighter shadings.
H. O. Wijers (Tall). White, with bright crimson-carmine eye.
Jeanne d'Arc (Tall). A good standard late white.
Jules Cambon (Medium). Bright rosy magenta, with large white centre and light halo.
Kucken (Medium). Bright carmine-rose shaded salmon.
La Vague (Medium). Pure mauve, with aniline-red eye.
Le Mahdi (Medium). Deep reddish-violet, with darker eye.
Le Prophete (Dwarf). Bright violet-rose, large light halo and bright rose eye; fine.
Louise Abbema (Dwarf). Very large dwarf, pure white, fine form.
Mme. Paul Dutrie (Tall). A delicate lilac-rose, reminding one of some of the beautiful soft pink Orchids.
Mozart (Tall). Ground color white, suffused salmon; aniline-red eye.
Mrs. Jenkins (Tall). The best tall early white for massing.
Obergartner Wittig (Medium). Bright magenta, with crimson-carmine eye; large flower and truss; one of the best.
Pacha (Dwarf). Deep rose pink, suffused with solferino-red and carmine-purple eye.
Pierre Bayle. Crimson-carmine, overlaid with orange scarlet.
Professor Virchow (Medium). Bright carmine, overlaid with orange scarlet.
Prosper Henri (Tall). Pure white, large decided rosy magenta eye.
Selma (Tall). Large flower, pale rose mauve, with claret-red eye.
Sunshine (Dwarf). Large, aniline-red with crimson-red eye and light halo.
Von Goethe (Medium). Tyrian rose suffused carmine-lake and bright carmine eye.
Von Lassburg (Medium). The purest white in cultivation, individual flowers larger than any other white.

Price. Any of the above varieties, except where noted otherwise, 75 cts. per dozen; $5.00 per 100; $40.00 per 1000.

New Varieties of Phlox

Asia. One of the most valuable recent introductions, a delicate shade of mauve, with a crimson-carmine eye.
Braga. Mauve-rose, more or less suffused with salmon; large white eye; a distinct and pleasing color combination.
Europa. A white variety with very decided crimson-carmine eye; the individual flowers as well as the trusses are very large, entirely distinct.
Manzelbrunner. A very large bright soft pink, with a large white eye.
Rynstrom. An improved form of the popular variety Pantheon; fine for massing, of a Paul Neyron Rose color.
Rosenberg. Bright reddish-violet, with blood-red eye, large truss and individual flowers as large as a silver dollar.
Rheinlander. A beautiful salmon-pink with flowers and trusses of immense size, the color of the flower is intensified by a very decided eye of a deep claret-red. 30 cts. each; $3.00 per doz.; $20.00 per 100.
Wanadis (Medium). Entirely distinct, a mottling of white and light violets, reminding one of Phlox Divaricata Canadensis. The color is intensified by a bright reddish-purple eye. 30 cts. each; $3.00 per dozen.
W. C. Egan. One of the best and largest flowering varieties in our collection, panicles of immense size, of a delicate pleasing soft shade of lilac which is illuminated by a large bright solferino-red eye. 30 cts. each; $3.00 per doz.; $20.00 per 100.
Widar. A splendid improvement on Edmond Rostand; in color a light reddish-violet, with very large white centre, which intensifies the color.
Tragedie. Deep brilliant carmine with blood-red eye. $1.50 per doz.; $10.00 per 100.

Price. Any of the above varieties, except where noted, $1.00 per doz.; $6.00 per 100; $50.00 per 1000.

The prices quoted above are intended for the trade only.

SEED TRADE

AMERICAN SEED TRADE ASSOCIATION

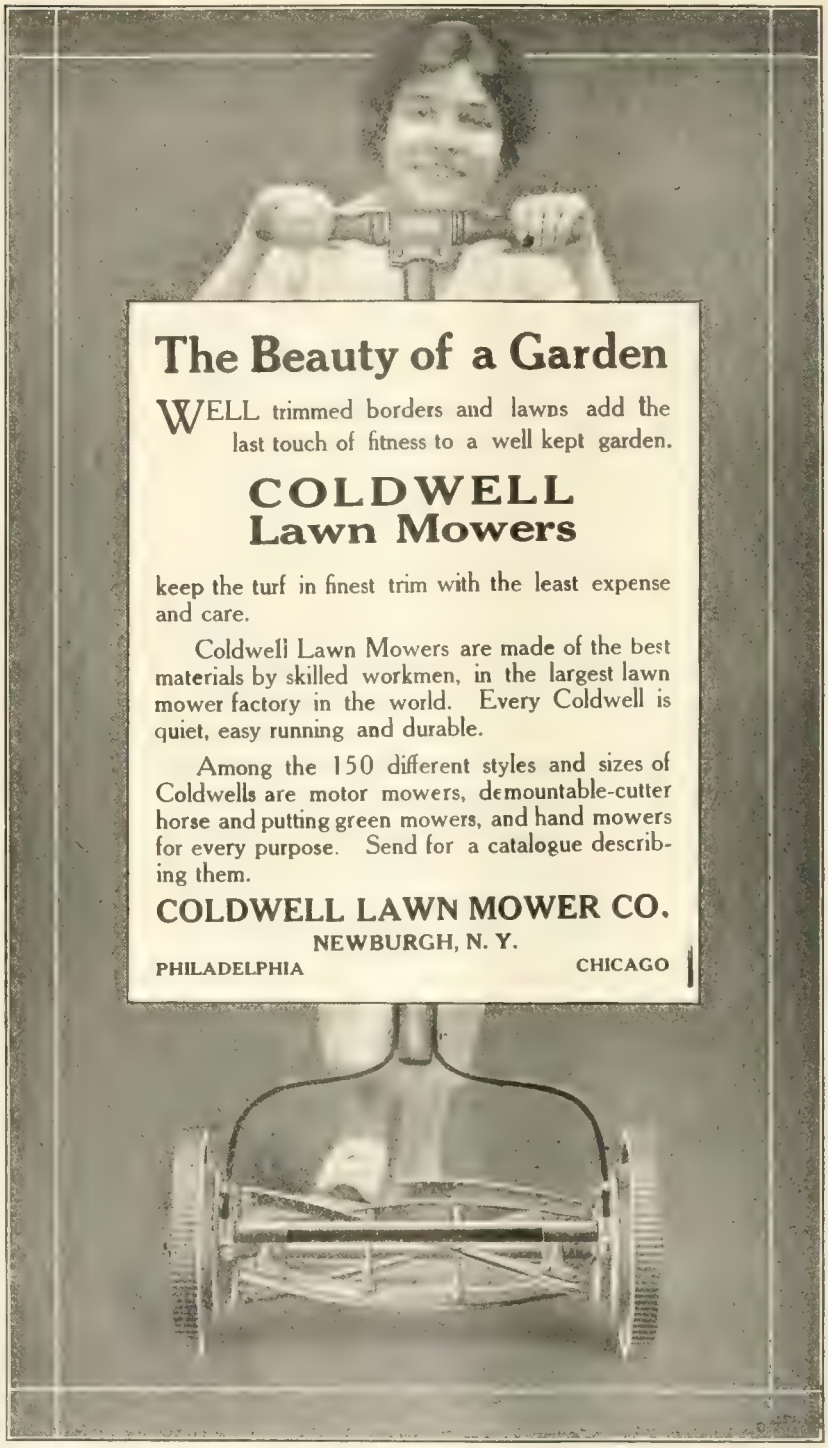
Officers—President, Chas. C. Massie, Minneapolis, Minn.; 1st vice-president, J. M. Lupton, Mattituck, N. Y.; 2nd vice-president, W. F. Therkildson, Painesville, O.; secretary, C. E. Kendel; assistant secretary, S. F. Willard, Jr., both of Cleveland, O.

Vicissitudes of the Weather.

It seems somewhat monotonous to be repeatedly commenting on the weather and the lateness of the spring, but the fact is that the weather has such a very important bearing on the seed trade in general and especially counter-trade, which is a very large factor with many of our seedsmen, that it is difficult to get by without reference to the subject. Old Father Neptune seems to be spilling rain abundantly on this part of the earth and whether this means that later in the season we shall suffer from the opposite condition is a question that only the future can solve, but if we may judge by past experience it looks very much that way. A few prophets are already predicting a cold wet summer and a very light, poor corn crop, which usually follows such a summer. We do not wish to be pessimistic and only refer to these prophecies, and our readers can take them at their own valuation.

Notwithstanding the unfavorable spring, it seems to be an established fact that the mail order houses have had a very good business, most of them expressing satisfaction and many claiming an increase over any previous year.

Maine Seed Potatoes.



More or less has been said about Maine seed potatoes being affected by disease, and it is charged that fraudulent certificates have been issued on diseased stock which has gone into the hands of farmers in different sections of the country. While there is doubtless some truth in these charges, we are inclined to think they are somewhat exaggerated; although the matter was considered serious enough to justify a warning from the Secretary of Agriculture himself. Prices of potatoes according to recent information, have advanced within the past ten days, though the reasons are not clear. Quite possibly those engaged in the business may understand, but no satisfactory explanations have reached us.

Beans and Peas.

We have been expecting to see beans of various varieties included in the surplus lists issued from time to time by numerous houses in the trade, but while some varieties have been listed, the sorts reputed to be scarce appear on but very few lists, showing conclusively that the shortage was a reality and not a dream. Many dealers early in the season expressed the opinion that there were more beans in the country than most of the trade believed, and that they would be coming out towards spring; for once these prophets must admit they were mistaken.

While doubtless there will be a considerable carry-over of peas, we have been advised by several dealers during the past week, that with the exception of two or three varieties they will be nearly cleaned up on peas by the end of the season. We should not be surprised if the surplus proved smaller than most persons believed possible a month or six weeks ago. The general line of seeds seems to be holding out well and with the exception of the Globe varieties of onion, stocks are plentiful and prices have not advanced over those ruling early in the season.

We have from time to time referred to certain houses in the trade which have attracted attention, and now have in mind Chas. F. Saul, of Syracuse, N. Y. Mr. Saul has been in business many years, and has established a reputation for quality and integrity which may be truly called "gilt edge." He does a big business, especially in

ARTHUR T. BODDINGTON, SEEDSMAN 342 WEST 14th STREET NEW YORK CITY

the line of field seeds, and says that with a larger capital, and if he were not a little tired after his many years of labor—he could very greatly increase the volume of business he does annually. The foundation he has laid is broad and strong enough to quadruple the very extensive business he now has, which we believe amounts to several hundred thousand dollars a year. Mr. Saul has no immediate successor in view, and as he will some day wish to retire, here seems to be an opportunity for an individual or corporation to secure one of the finest seed enterprises in the Empire State, but we hope Mr. Saul will continue for a long time yet.

New York Seed Notes.

Otto Heinecken has moved his office from the 28th to the 17th floor of the Whitehall Building, 17 Battery Place, New York. Room number is 1736.

Burnett Bros. report an extraordinarily large call for lawn grass seeds this spring. Sales of roses have been very large, also of rhubarb and other vegetable garden plants.

A very heavy mail and express trade has been experienced at Peter Henderson & Co.'s store but counter trade has been disappointing thus far. The tardy spring is undoubtedly responsible for the light counter trade reported by all the city seed houses.

STATEMENT OF OWNERSHIP, MANAGEMENT, ETC., OF HORTICULTURE.

As Required by the Act of Congress, August 24th, 1912.

Publisher—Horticulture Publishing Co., Boston. Editor and Business Manager—Wm. J. Stewart. List of stockholders holding one per cent. or more of total amount of stock—W. W. Castle, N. F. Perkins, Wm. J. Stewart, J. K. M. L. Farquhar, P. Welch, David Welch, of Boston, Mass.; Estate of F. R. Mathison, Waltham, Mass.; J. H. Morton, Mattapan, Mass.; Thos. Young, Jr., W. F. Sheridan, F. H. Traendly, Chas. Schenck, John I. Raynor, New York City; W. F. Kasting, Buffalo, N. Y.; A. S. Burns, Elmhurst, N. Y.; H. H. Battles, S. S. Pennock, Philadelphia, Pa.; John Burton, Chestnut Hill, Philadelphia, Pa.; Estate of Carl Jurgens, Newport, R. I.; Philip Breitmeyer, Detroit, Mich.; Fred Lautenschlager, Chicago, Ill. Bondholders, mortgagees and other security holders—none. Borrowed money none Notes—none.

Sworn to and subscribed before Notary Public by WM. J. STEWART, Business Manager.

Boston, May 9, 1914.

TWO NOTABLE WEDDING DECORATIONS.

MRS. FRANCES BROOKS' WEDDING, ST. THOMAS CHURCH, WASHINGTON

The photographs reproduced in the accompanying engravings show two recent church wedding decorations in Washington, D. C. They were the work of Gude Brothers Co., and both were magnificent.

MCKINLEY-BENNETT WEDDING, ST. JOHNS CHURCH, WASHINGTON

WASHINGTON NOTES.

Gude Bros. Co., furnished the decorations for the horse show held during the week. Here large quantities of scarlet geraniums, Rambler roses, rhododendrons and cedar trees were used, the whole present a very beautiful effect. Due to this event all the stores are receiving a share in the sale of corsage bouquets and cut flowers.

Announcement has been made that the Brookland Brotherhood and the Brookland Rose Guild of ladies will again hold the annual rose show in the Masonic Temple, at Brookland, D. C., on May 26 and 27. This is one of the events of the season and is largely patronized. Prizes and ribbons are bestowed upon winners in all classes.

The resignation of Beverly T. Galloway, as assistant secretary of Agriculture, is expected following the tendering to him of an offer to become dean of the agricultural college of Cornell University for it is believed that he will accept the offer. Dr. Galloway has

H. BAYERSDORFER & CO., 1129 Arch Street PHILADELPHIA, PA.

been connected with the Department of Agriculture for the past twenty-seven years, previous to which time he was at the University of Missouri. He joined the department to study the diseases of plants and when former Secretary of Agriculture Wilson took charge he commissioned him to organize the Bureau of Plant Industry. Mr Galloway is a member of the Florists' Club of Washington and during his long residence here he has made a host of friends.

PHILADELPHIA NOTES.

The annual outing of the Florists' Club will be held early in June. John C. Gracy is the chairman of the committee with an able staff of assistants and judging from the success of last year's outing under Mr. Gracey's superintendence we are all looking forward to another glorious good time this year.

James Brown, Coatesville, Pa., says he will give up his retail department shortly and devote himself entirely to the growing end. He says the reason for this is that it is too much of a strain on Mrs. Brown, who has been the power behind the throne. We suggested that he get another wife; but he pooh-poohed that and said that no "old bach" was competent to advise on such a subject. The idea! As Prof. Elson said: "He is so very gay and sporty, you'd hardly take him to be forty." We are no "tin can on the dump of life" yet.

W. Atlee Burpee and his son David will sail for Naples on May 16, from Boston on the S. S. Cedric. They will visit the chief continental seed growing centers and will be in London in time for the sweet pea show in July. Howard M. Earl, General Manager of Burpee's will make the Atlantic-Pacific inspection trip this year and will reach California probably about June 10. A. E. Brown, treasurer, sails on the S. S. Minnesota, June 27. Mrs. Burpee and W. Atlee, Jr., will sail on the George Washington, June 13. Bon voyage and safe return to one and all.

CHICAGO NOTES.

A new store, known as the Diversey Flower Shop, is at 2843 Diversey avenue with D. F. Hayes, proprietor.

Chas. McKellar is moving to his new home at Niles Center. Both Mr. and Mrs. McKellar have a longing for life in the country.

Chas. Maier has moved into a better store and more desirable location at 4106 Armitage avenue. He was formerly at 3262 Armitage avenue.

A severe electrical storm passed over the city Sunday night. It was accompanied by hail and rain, and as a consequence many greenhouses have cracked glass. No serious damage is reported.

The wedding of George Goebel and Miss Ella Schaeffer will take place in June. George is one of the best known men in the market and a general favorite, having the handling of a large part of the express shipments. Miss Schaeffer has resigned her position at Bassett & Washburn's office.

Mrs. I. Manusos, formerly of Chicago and now of Mason City, Iowa, arrived here on Saturday for a visit with friends and was immediately stricken with appendicitis and a successful operation was performed at University Hospital. Mr. Manusos, who was formerly in the retail florists' business here, arrived Sunday.

Mrs. H. C. Blewitt, of Desplaines, Ill., was attacked by a muscular difficulty of the knee, three weeks ago, and is still unable to walk. Mr. Blewitt, who makes a specialty of snapdragons and brings in as fine a quality as is found in the market, says it does not pay in the condition that the market has been in this spring.

Peter Reinberg and family are now occupying their new home at Sheridan Road and Hollywood Ave. It is more than likely that they will miss their old neighbors, the greenhouses, even though they would not want to return to them. Along with the other seven members of the Chicago School Board, Peter Reinberg was sentenced on May 4 to thirty days in jail for contempt of court.

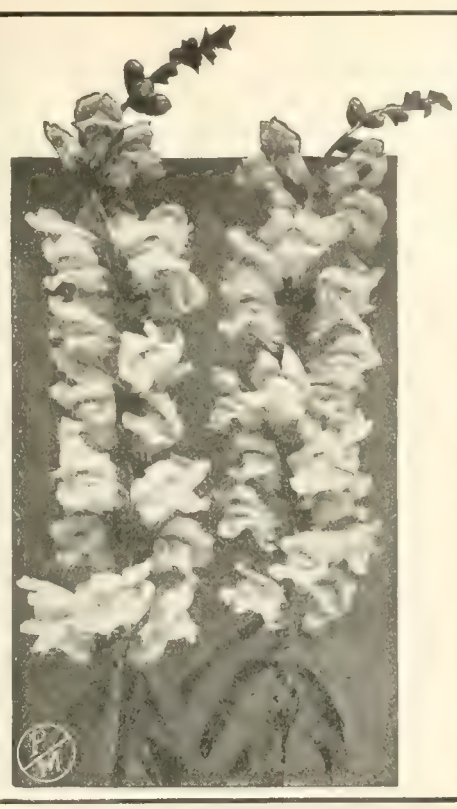
Flower Market Reports

BOSTON The general trend of activity in cut flower circles is upward and the situation has cleared considerably as compared with that recorded last week. The demand is somewhat sluggish still, but the supply is lighter and better prices are obtainable without protest on the part of the buyer. The surplus of lilies has disappeared. Roses are finding a pretty free outlet and no overstock is in evidence. Carnations are very strong and prices will undoubtedly be much higher at the end of the week, on white varieties, these seeming to have most of the call. Snapdragon moves very slowly and this is also true of sweet peas, which are heavily overstocked. Lily of the valley is doing first class. Yellow daisies, if large, are bringing the best price on record. Spanish iris enjoys a rapid sale at prices from $4 to $8 per 100.



BUFFALO The long looked for reaction finally came during last week and new life appeared in the market on Wednesday and continued throughout with a good ending on Saturday. The market was practically cleaned up on about everything. Carnation receipts have shortened up considerable, also the rose situation is better and they cleaned up on the short and medium grades. Other stock generally has shared in the demand. Heavy bookings of white carnations have already been taken for Mothers' Day.

CHICAGO The first days in May found an accumulation of not very good stock and sales slow. The flowers could not be moved fast enough at any price. But with the return of colder weather, on Thursday, the 30th, a change for the better came over the market. Quality showed improvement and quantity lessened and the week ended with ice boxes cleaned up. The shortage in carnations continues and the best ones are quickly bought up at top prices. Roses are coming into their own again and buyers paid the price of the wholesalers and not what they pleased on Saturday. Richmonds are scarce, as old stock is being thrown out, and the best ones sold for $12 Saturday. Killarneys are more plentiful. If the Easter lilies could have been kept indefinitely they would sell now, but those left from Easter are too far gone and there are not enough cut now to meet the demand. Snapdragon is seen in all lengths and size of bloom and a fair amount is moved each day. Sweet peas remain rather in excess of demand. Out-of-door tulips are now coming and they seem to be taking well with buyers. Advance orders for Mothers' Day are coming in rapidly and a heavy shipping trade is anticipated.

CINCINNATI At the close of last week the greenhouse flowers had to meet the competition of outdoor lilacs and bulbous stock. The lilacs are very pretty this year and have met with a very good call. Rain the early part of this week, however, will probably put them out of commission. Outdoor bulbous stock receipts, particularly of tulips, will probably continue for a fortnight or more. The general supply in the market continues abundant and prices are very low, but under the pressure of heavy buying on Monday of this week they advanced slightly. The call from out of town is good. The rose supply is good, and sufficient for requirements. The quantity of carnations coming in is about the same as at the last writing. Outdoor lily of the valley are added to the indoor stock and prove a very welcome addition this week, in particular when very many are being utilized in corsages for the fair patrons of the May Festival. Orchids are selling well. The glut of Easter lilies and callas continues. Antirrhinums sell slowly. Sweet pea receipts are not very large. Green goods business is good.

NEW YORK Trade conditions are somewhat better than they were last week, though the stormy Tuesday caused a cessation of advancing prices. Stock of all kinds is exceptionally good and it is expected there will now be good business until the close of the season. Carnations are especially fine, demand

Flower Market Reports

(Continued from page 713)

brisk, with the prospect of higher prices towards the end of the week. Lily of the valley is selling well and is more consistent as far as regular price is concerned. The hot spell has rushed in quantities of outdoor tulips and daffodils and the supply of these will soon be over. Lilies are once more getting in demand and the best are clearing out nicely at prices quoted in market report. There are still shipments of violets arriving, selling at $1.50 to $2.00 per 1000. Roses have shortened up in supply and $10 per 1000 is about the lowest quotation up to 6c. for the novelties and better grades of some of the standard varieties. Carnations arriving from Long Island, as a general rule, seem to be of better quality than those from other sections of the country. Quantities of cherry and peach blossoms have been used in recent decorations, which fact does not help the wholesale flower markets so you'd notice it. There are some fine gladioli. Sweet peas are received in enormous quantities and all grades of quality.

PHILADELPHIA The tone of the market last week was considerably improved over the previous two weeks and while there was no great advance in quotations the final results were better. There was a large supply of everything and prices ruled low. The excess of shipments to demand, however, was not so great and with the fine weather, the week end business was better, so that there were no such enormous sacrifices as we have been having. American Beauty roses are not so plentiful and if anything the demand has been better. Other roses are very plentiful. Russells are fine now and sell well. This newcomer has all the earmarks of taking rank as a great warm weather rose in addition to its other good qualities. In the orchid market cattleya Mossiae now rules—the Schroederae crop being entirely cut out. There are also some nice Dendrobiums to be had in both the pink and the white forms of nobile. The gardenia demand is rather half-hearted, while snapdragon is very plentiful. The retailers are pushing it as they can make such a good showing for little money. Lilies are still far too plentiful and below normal as to price. The first shipment of peonies came in on Monday and were quickly picked up. Outdoor lilac is to be had in quantity, especially the lavender—there is very little white to be seen. The big wholesalers have been at pains to advise customers to keep off white carnations for Mothers' Day. We trust it will bear good fruit, but it is hard to stop a big wheel after it has been started in a wrong direction.

NEW YORK QUOTATIONS PER 100. To Dealers Only

MISCELLANEOUS	Last Half of Week ending May 2 1914	First Half of Week beginning May 4 1914

" & Spren (100 bunches)	15.00 to 50.00	15.00 to 25.00

WASHINGTON There are far more flowers on the market at the present time than the demand can possibly take care of and prices have dropped clear out of sight. Business has been comparatively good, but almost without profit for the wholesalers and growers are practically accepting the retailers' bids for the stock and the latter find it hard to get anything like a price from the consumers. The supply of roses and carnations is so great that it is said that tens of thousands of these are being thrown away daily. The call is almost entirely for spring blossoms at the present time and lilacs and dogwood are very popular. These are supplanting all greenhouse stock. As previously reported, the present Mexican uncertainty continues to have a marked ill effect on business in general, more especially on that of flowers, for society folks are cancelling a number of entertainments of various sorts. A decrease in the number of street vendors of flowers was very gratifying to the store men who hope that some day this sort of competition will be entirely done away with. During the past week a large number of arrests were made of florists doing business without licenses, many of these men being of the street vending type and all unknown to the HORTICULTURE correspondent. The police are proving unusually vigilant along this score, orders having been given them to see that all so required are properly supplied with licenses.

ST. LOUIS The market is dull and very much overcrowded with everything in season. There is a big glut of sweet peas, carnations, callas and roses, prices suffering greatly in all classes. Even prime stock is selling lower than ever before. Weather conditions are favorable to bringing out blooms of all kinds of out-door stock. Smilax and all other green sell well, ferns are scarce and up in price.

VISITORS' REGISTER.

Chicago—Mr. and Mrs. J. Manusos, Mason City, Ia.; Wm. Jaap, of the Lester Park Greenhouses, Duluth, Minn.; Arthur Schutz, Hammond, Ind.; E. Everett, Madison, Wis.

St. Louis: Guy Reyburn, of Henderson & Co., and Fred Lembke, of Barnard Co., Chicago; J. J. Karins, of Dreer's, and F. J. Farney, of Rice Co., Philadelphia; Charles Ford and Sam Seligman, New York.

Boston—H. C. Neubrand, representing A. N. Pierson, Inc., Cromwell, Conn.; A. E. Thatcher, Bar Harbor, Me.; F. R. Pierson, Tarrytown, N. Y.; L. J. Reuter, Westerly, R. I.; Wm. Plumb, New York, Superintendent Floriculture, Panama-Pacific Exposition; H. Langeler and W. A. Philippo, representing M. Van Waveren & Son, Hilegom, Holland; G. L. Freeman, Fall River, Mass.

Cincinnati—Peter Weiland, New Castle, Ind.; Martin Reukauf, representing H. Bayersdorfer & Co., Philadelphia, Pa.; Sam Seligman, New York, and Wm. Sanders, representing Poehlmann Bros. Co., Chicago. Heavy buyers in this market last week from nearby points were J. F. Herdegen, Aurora, Ind.; Walter Gray, Hamilton, Ohio; Lodder's Sons, Hamilton, Ohio and Fred Ruff, Lawrenceburg, Ind.

Springfield, Mass.—Two acres of ground in Forest Park are being prepared for a rose garden.

PUBLICATIONS RECEIVED.

The Transactions of the Massachusetts Horticultural Society for the year 1913, Part II, is a record of the meetings of the Board of Trustees, reports of judges and awards at the various exhibitions of the year, also of the various officers and regular committees for 1913. There is a full page portrait of Hydrangea Sargentiana, one of E. H. Wilson's Chinese collections.

Report of the Board of Park Commissioners of Seattle, Washington—This is the 10th annual report of the Seattle Park System. Its date and statistics are good evidence that Seattle is alive to the importance of public reservations, when a city is young. An expenditure account of $364,060 for improvements and maintenance indicates a liberality most commendable and the details of this report shows that the money has been wisely expended. J. W. Thompson is superintendent of the Seattle Park system.

The Fiddling Girl: The Story of Virginia Hammond. By Daisy Rhodes Campbell, and illustrated by John Goss. This is a charming story, published by The Page Company, Boston, and, like all the literature sent out by this house, draws its interest and fascination for the reader from the clean sentiment and sunshiny human characters it portrays. It is dedicated by the author "To the Memory of My Best Friend, My Mother." It will be a most acceptable "Mother's Day" gift and cannot fail to engross and delight the lady who is so fortunate as to be thus remembered by a friend.

Botany, by E. Brucker. Another addition to the useful "Threshold of Science" series published by Double-Day, Page & Co., to meet the need for a better popular knowledge of the elementary laws of science, not only by the child who lives in a wonderland of discovery, but of people of more mature years, is the aim of this series of monographs on the various branches of science. "Botany" is a book of 186 pages profusely illustrated with woodcuts and admirably adapted to its purpose and the best in its class we have seen. There are 42 chapters illustrated with 235 cuts.

The 60th Annual Report of the Massachusetts State Board of Agriculture and 25th Annual Report of the Massachusetts State Experiment Station has come to hand rather late, but is a volume well worth the waiting for. It is a book of 660 pages well filled with useful matter presented in practical form. Particularly so are the chapters on poultry and egg production, small fruits and berries, market gardening, report of state ornithologist, report of state forester, the influence of light on plant development and shade tree troubles. There are many fine full page plates illustrative of the text matter and, as a whole, the document impresses us as an advance over its predecessors in many respects.

On Old World Highways. A Book of Motor Rambles in France, Germany and Britain, by Thomas D. Murphy. Published by The Page Company, Boston. A superb product of the best combined effort of author and publisher. There are 40 duogravures from photographs and 16 reproductions in colors from original paintings by eminent artists, also maps showing the routes of the author, the latter particularly valuable to the reader in following the text. To particularize the interesting features of this volume would be practically to repeat it entire, for every one of its 400 pages is alive with interest, and the author's style of narrative is most felicitous. The greater bulk of the volume deals with historic and picturesque England, Wales and Scotland and the record of the pilgrimage from Land's End to John O'Groat's fills the reader with a wistful longing to go and do likewise.

Zurich, Switzerland—Doctor Kleiber, a chemist in the service of the Swiss government, analyzed during a recent visit to Pompeii and Herculaneum the Vesuvian ashes and debris, and found that they contain large percentages of potash, suitable for the manufacture of fertilizer. The potash syndicate, established by the German government, has almost a monopoly of potash. The Italian government, learning of Doctor Kleiber's discoveries, has communicated with him upon the possibility of developing potash mines in the vicinity of Vesuvius. He is looking into the matter The largest market outside Germany for potash fertilizer is the United States.

LEMON OIL CO'S STANDARD INSECTICIDE

SOLUBLE IN WATER — NO ODOR — NO POISON

Guaranteed under the Insecticide Act, 1910. Serial No. 321

Save your plants and trees. Just the thing for Greenhouse and outdoor use. Destroys Mealy Bug, Brown and White Scale, Thrip, Red Spider, Black and Green Fly, Mites, Ants, Insects on Rose-bushes, Carnations, etc. without injury to plants and without odor. Used according to directions our standard Insecticide will prevent ravages on your crops by insects.

Non-poisonous and harmless to user and plant. Leading Seedsmen and Florists have used it with wonderful results.

Destroys Lice in Poultry Houses, Fleas on Dogs and all Domestic Pests. Excellent as a wash for dogs and other animals. Relieves mange.

Effective where others fail.

PINO-LYPTOL

THE VERY NEWEST AND QUICKEST METHOD OF DESTROYING WEEDS, GRASS AND OTHER GROWTH IN GARDEN WALKS, GUTTERS TENNIS COURTS, DRIVEWAYS, ETC.

This fluid absolutely destroys all weeds and other growth wherever applied, and its effect on the ground prevents the growth of fresh ones for a year and thus saves a great deal of time and labor, as no cutting, hoeing or hauling away of the weeds is required.

We manufacture the strongest line of DISINFECTANTS on the market.

THE PULVERIZED MANURE CO.

31 Union Stock Yards, Chicago

Scotch Soot

Where there is a house that is just full of buds almost ready to show color, nothing will turn better color into the flowers than a little soot, that can be scattered over the benches before watering. The amount applied should not be excessive, as the soot is very strong and may damage some of the foliage somewhat. Apply just enough to blacken the surface of the soil in the benches, and let it go at that. Better a little oftener than too much all at once.

We offer the genuine in original cwt. Sacks, at:

$2.75 per 112 lbs.; $12.50 per 560 lbs.

Stumpp & Walter Co.

30-32 Barclay Street, NEW YORK

Aphine

The Insecticide that kills plant Lice of every species

The Recognized Standard Insecticide.

W. N. Craig writes in Florists' Review (March 5th, 1914): "Scale on greenhouse plants is not easy to get rid of, as doses which are sufficiently strong to kill the scale will usually disfigure the plants at the same time. I have found APHINE a first-class remedy for scale, and if you will apply it according to directions you will kill and loosen the scales, although they will not fall off, as will some other pests."

It will only require the hose to wash off dead scale.

A remedy that is efficient in destroying scale, will destroy green, black, white fly, red spider, thrips and mealy bug.

$1.00 per quart—$2.50 per gallon.

FUNGINE will destroy mildew, rust and bench fungi.

75c per quart—$2.00 per gallon.

VERMINE will destroy root maggots, eel wire and cut worms in the soil.

$1.00 per quart—$3.00 per gallon.

SCALINE will destroy San Jose and all hard scale and red spider on fruit and ornamental trees and bushes.

$1.50 per Gal—10 Gals. $10.—50 Gals. $37.50

NIKOTIANA—a 12% nicotine for fumigating over small lamps or by painting on steam pipes.

$1.50 per quart—$4.50 per gallon.

For Sale by Seedsmen.

British Distributors: British and American Fertilizing Co., Liverpool, Eng.

PLANTLIFE

PLANTLIFE has several advantages over liquid insecticides on the market. Containing refined tobacco dust it can be used to mix with the soil, acting as an excellent fertilizer, at the same time destroying worms and insects in the ground before they have a chance to reach the plant.

PLANTLIFE has been found very effective in ridding greenhouses of insects by dusting on plants. When dry, use for dusting about once a week.

Put up in bulk for greenhouse men; in packages for retail trade.

Bag of 100 lbs. $3.50.

Let us quote you prices in quantity.

FIRES.

New Bedford, Mass.—Starting, it is believed, from an over-heated furnace in the basement, fire did at least $300 damage to the home and greenhouses of Richard Nofftz on Kempton street, on Saturday night, May 2. The loss is covered by insurance.

Lansdale, Pa.—Early Saturday morning, April 25, W. Sturzebecker discovered a fire in the outbuildings of his home which threatened to destroy all his buildings. Through prompt action of himself and help and also the Lansdale Fire Company, he was enabled to save a good share of his nursery buildings, but at the same time his loss is considerable, a conservative estimate placing the loss at $2000 and with only $800 insurance. Horse, barn and apple orchard were included in the destruction.

Lincoln, Neb.—That greenhouses contain merchandise, not growing crops, and are therefore assessable as such, is the ruling of Secretary Seymour of the state assessment board. Numerous assessors had complained to him that greenhouse proprietors had attempted to avoid assessment by claiming the same immunities as farmers, on growing crops.

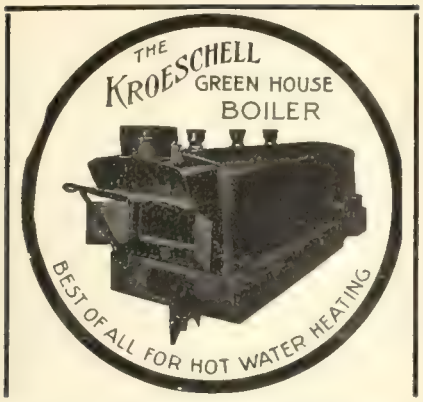
PEIRCE PAPER FLOWER POT
A waterproof paper pot.
Does not fold up or come apart.
Plants in transit retain moisture within the plant ball instead of its being absorbed by the packing, insuring their traveling long distances in perfect condition.
Received a Certificate of Merit from the Society of American Florists and Ornamental Horticulturists, Minneapolis, August, 1913.
Only paper pot ever so recognized.
Ask your seedsman or supply house. If they do not keep them, send direct.



Made in Standard sizes, 2 inch to 6 inch inclusive.
Samples furnished free.

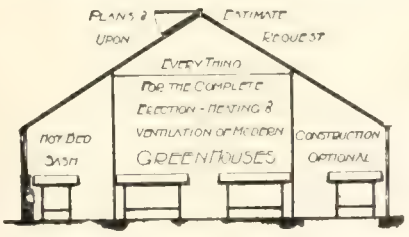
Greenhouse Shading



AFTER many years of experience in greenhouse work with Lord & Burnham Company, in the glazing and painting department, I am convinced that what is needed most is a good shading, and I am pleased to tell you that I have the real thing which you are all looking for.

My shading is beneficial to the painted wood, as it contains nothing but pure linseed oil; it is also beneficial to the glass. You will be surprised by the brilliancy left in the glass when the shading is removed. It is very easily applied by spray or a soft brush; I prefer the brush.

Made up in gallon cans. Colors; light green, blue and pure white. If you will give it a fair trial I am sure you will agree that it has proven its worth.

Concerning the Iron Frame Houses Erected for Mr. Dunlop, at Richmond Hill, Ont.

IT is generally conceded that Mr. Dunlop is one of the most progressive growers in the Dominion. On deciding to sell his property in Toronto, he purchased a tract of land at Richmond Hill, and then began a most exhaustive investigation of the various firms manufacturing greenhouses. He went to the States and visited many of the leading ranges. He compared constructions, repairs, and both quality and quantity of crops produced by each. He left no stone unturned in his investigations. He put us through a cross examination of a most searching nature. It was a pleasure to have him do it, because we know that if any construction would stand being pulled to pieces, ours would. And it did. And Mr. Dunlop gave us the order for these two Sectional Iron Frame houses each 61 feet by 400 feet, placed 25 feet apart.

If you know Mr. Dunlop, you are well aware of the fact that what he buys, he really sells to himself.

No amount of clever salesmanship will accomplish anything, if the goods themselves can't talk convincingly for themselves.

More and more, careful conservative growers are buying their houses by Mr. Dunlop's method. More and more growers are appreciating that our houses are permanent, dividend yielding investments that make them worth every cent they cost.

If you are thinking of building, we would greatly appreciate the opportunity of showing you some of our houses. Being our guest it would be no expense to you, and it might be instrumental in saving you many, many dollars. We shall be glad to hear from you.

Lord & Burnham Co.

The President Trots Out Our Family Skeleton For Your Benefit

THE iron frame is to a greenhouse what the skeleton is to our bodies. If more greenhouses were built with the strength where needed, as with our bones—fewer houses would have gone down in last Winter's big snow and blow.

There's no sense in building a house as light as a cobweb or as heavy as a bridge. Between the two, however, there's lots of chance for difference of opinion. But one thing certain, you can't get back of the laws of cause and effect. Long before greenhouses were ever built the laws of stress and strain were worked out and established. It's nothing new with engineers. But it is new with some greenhouse builders. When houses were 25 or 30 feet wide, one could safely approximate the strength the members should have, with simple figuring. But when you get beyond, say 40 feet, you are rapidly multiplying the strains on your frame and pressure on your roof, way out of proportion to the increase in width. It's not a thing any man can figure offhand. It often takes our best engineers days to do it. It involves not only much figuring, but the making of many diagrams and stress and strain lines.

Never yet have one of our Iron Frame houses gone down by snow or blow.

One thing certain, the brain power of a factory is a lot more important than its horsepower.

You can depend on depending on Hitchings' and "we go anywhere for business."

Headquarters for HARDY PHLOX

One year old, field-grown plants now established in three inch pots. General Collection of Standard Varieties.

HARDY PHLOX

Albion (Medium). One of our own introductions; producing very large panicles of pure white flowers, with faint aniline-red eye.
Aglae Adanson (Medium). Large snow-white with violet-rose eye.
Antonin Mercie (Medium). Light ground color, upper half of each petal deeply suffused bluish-lilac, large white halo.
Bacchante (Tall). Tyrian rose, with crimson-carmine eye.
B. Comte (Medium). Brilliant French purple, with crimson-carmine shadings. 85 cts. per doz.; $6.00 per 100.
Bridesmaid (Tall). White, with large crimson-carmine centre.
Caran d'Ache (Medium). Geranium-red, with old-rose shadings and white eye; very effective.
Champs Elysee (Dwarf). A very bright rosy magenta.
Colibri (Tall). White, with crimson-carmine centre, very late.
Coquelicot (Dwarf). A fine pure scarlet, with crimson-red eye. 85 cts. per doz.; $6.00 per 100.
Danton (Medium). Scarlet, pure red eye.
De Miribel (Medium). White, suffused with bright rosy scarlet, red eye.
Diadem (Drawf). A fine dwarf, pure white.
Eugene Danzanvillier (Tall). Lilac, shading white toward the edges; large white centre.
Frau Dora Umgeller (Medium). Solferino red, shading to carmine-crimson at centre.
General Giovaninelli (Dwarf). Bright tyrian rose, with light shadings at the base of each petal, a pure red eye; very effective.
Goliath (Very tall). Rich carmine, shading to a deep centre.
Helena Vacerasco (Dwarf). Large pure white.
Henry Marcel (Medium). Pure red, with bright salmon shadings.
Henry Murger (Tall). White, crimson-carmine centre.
Henry Royer (Medium). Tyrian rose, with lighter shadings.
H. O. Wijers (Tall). White, with bright crimson-carmine eye.
Jeanne d'Arc (Tall). A good standard late white.
Jules Cambon (Medium). Bright rosy magenta, with large white centre and light halo.
Kucken (Medium). Bright carmine-rose shaded salmon.
La Vague (Medium). Pure mauve, with aniline-red eye.
Le Mahdi (Medium). Deep reddish-violet, with darker eye.
Le Prophete (Dwarf). Bright violet-rose, large light halo and bright rose eye; fine.
Louise Abbema (Dwarf). Very large dwarf, pure white, fine form.
Mme. Paul Dutrie (Tall). A delicate lilac-rose, reminding one of some of the beautiful soft pink Orchids.
Mozart (Tall). Ground color white, suffused salmon; aniline-red eye.
Mrs. Jenkins (Tall). The best tall early white for massing.
Obergartner Wittig (Medium). Bright magenta, with crimson-carmine eye; large flower and truss; one of the best.
Pacha (Dwarf). Deep rose pink, suffused with solferino-red and carmine-purple eye.
Pierre Bayle. Crimson-carmine, overlaid with orange scarlet.
Professor Virchow (Medium). Bright carmine, overlaid with orange scarlet.
Prosper Henri (Tall). Pure white, large decided rosy magenta eye.
Selma (Tall). Large flower, pale rose mauve, with claret-red eye.
Sunshine (Dwarf). Large, aniline-red with crimson-red eye and light halo.
Von Goethe (Medium). Tyrian rose suffused carmine-lake and bright carmine eye.
Von Lassburg (Medium). The purest white in cultivation, individual flowers larger than any other white.

Price. Any of the above varieties, except where noted otherwise, 75 cts. per dozen; $5.00 per 100; $40.00 per 1000.

New Varieties of Phlox

Asia. One of the most valuable recent introductions, a delicate shade of mauve, with a crimson-carmine eye.
Braga. Mauve-rose, more or less suffused with salmon; large white eye; a distinct and pleasing color combination.
Europa. A white variety with very decided crimson-carmine eye; the individual flowers as well as the trusses are very large, entirely distinct.
Manzelbrunner. A very large bright soft pink, with a large white eye.
Rynstrom. An improved form of the popular variety Pantheon; fine for massing, of a Paul Neyron Rose color.
Rosenberg. Bright reddish-violet, with blood-red eye, large truss and individual flowers as large as a silver dollar.
Rheinlander. A beautiful salmon-pink with flowers and trusses of immense size, the color of the flower is intensified by a very decided eye of a deep claret-red. 30 cts. each; $3.00 per doz.; $20.00 per 100.
Wanadis (Medium). Entirely distinct, a mottling of white and light violets, reminding one of Phlox Divaricata Canadensis. The color is intensified by a bright reddish-purple eye. 30 cts. each; $3.00 per dozen.
W. C. Egan. One of the best and largest flowering varieties in our collection, panicles of immense size, of a delicate pleasing soft shade of lilac which is illuminated by a large bright solferino-red eye. 30 cts. each; $3.00 per doz.; $20.00 per 100.
Widar. A splendid improvement on Edmond Rostand; in color a light reddish-violet, with very large white centre, which intensifies the color.
Tragedie. Deep brilliant carmine with blood-red eye. $1.50 per doz.; $10.00 per 100.

Price. Any of the above varieties, except where noted, $1.00 per doz.; $6.00 per 100; $50.00 per 1000.

The prices quoted above are intended for the trade only.

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

Amaryllis

Now that the flowering season of hybrid amaryllis is passed they can be got together and placed in a frame. It would be well to plunge the pots up to their rims. Where the drainage is good they will not require any repotting, but should have liquid manure once a week, and as the roots become active they can have it twice a week. Some labor under the opinion that the amaryllis under any kind of care will flower all right. This is utterly absurd. See that they are not stinted for water at the roots while they are making their growth. Give them a good syringing every day as this helps the bulbs to regain their strength. If you do not help to strengthen them as prescribed you will have a failure when their flowering time comes around. A little time and care spent with these splendid plants will always pay.

Growing Aquatics

If a pond, stream or small pool should not be available, nymphæas can be successfully grown in tanks, vats or a hogshead sunk into the ground. The best way to start nymphæas is to plant the dormant rhizomes of the hardy and tender sorts now in boxes about 10 inches deep and from 3 to 4 feet square, using a compost of three parts fibrous loam and one part of cow manure. Fill to within two inches of the top, then plant two or three rhizomes in the box, so that they are just covered. After planting place a layer of coarse sand over the surface. These boxes should be placed where they are to remain and sunk so that they will be covered with about three inches of water until the first leaf floats on the water, when they should be gradually lowered until they are covered with water 12 to 14 inches deep. Do not place these boxes too close together. They will need from 60 to 70 square feet for each box if they are wanted to do well. The hardy nymphæas when in natural ponds and tanks must have sufficient water above the crowns in winter so that the ice does not reach them.

Planting Gardenias

It is always better to get started early with gardenia planting. After removing all the plants and old soil make sure to wash out every corner of the benches thoroughly, then give a heavy coating of hot lime. What is essentially necessary to be successful with gardenias is to make use of a good porous soil. This should be of fibrous loam, two-thirds, and a third of old cow manure. Add to this some coarse sand and charcoal, so as to permit the water to pass off readily. Good drainage is very important in their culture so it is a good plan to place a layer of broken crocks on the bottom of the benches. The plants can be set from 18 to 20 inches apart between the rows and about 16 inches apart in the rows. After planting, soak the whole bench, after which water only the ball of the plant as necessary. Give them a syringing every good day for it helps to keep them free of insects, especially mealy bug. Do not let your house become cold at any time as these plants like plenty of heat. A night temperature of about 70 degrees will suit them.

Sowing Perennials

By making a sowing now of the most desirable perennials they can be grown into nice stock by next fall when they can be planted out. The best place to start the seeds is a cold frame where they will be convenient to water. For the first couple of inches of soil it is well to make a light mixture, say leaf mold and soil in equal parts with a little sand. Do not sow too thickly. Keep shaded and moist until they begin to germinate when they should have full light and sun. When they have grown so they can be nicely handled, they should be pricked out into other frames allowing enough room for their proper development. If placed about 8 to 10 inches between the rows and about 4 to 5 inches apart in the rows they have plenty. Keep them watered and clear of weeds.

Stocks for Winter Flowering

When these plants are handled right they make fine material to cut from during the winter months. If sown now they will come in early and with another sowing in about four weeks you will have flowers all winter. They should be sown now in pans or shallow flats of light soil with plenty of sand in it as there is then less liability of the seedlings damping off. When they are large enough to handle they can be potted off into small pots and placed in frames under elevated sashes to afford a free circulation of air. When the plants have filled these pots with roots they should be shifted into 4 or 5 inch pots and kept in frames until late fall. The double ones can be identified by the point of the buds being stubby, while the singles will be slender. There are a number of special forcing varieties, but I like Princess Alice, and Beauty of Nice best. They can be grown in any house where the night temperature can be kept from 45 to 50 degrees. Anything higher will give poor flowers.

Stock Plants

Every good grower makes a practice to select some of the best plants for next winter's stock. Ageratum, coleus, heliotrope, fuchsias, lobelias and many others should be shifted into larger pots—say 5 or 6 inch pots—and plunged outside up to the rims where they will be handy for water.

Mr. Farrell's next notes will be on the following: Bedding Out; Single Stemmed Chrysanthemums; Orchids, Sweet [illegible] Grass, The Compost Heap; Resting Callas.

Very welcome

One of the best booms that has come to the Boston florists for many a day presented itself on May 2nd and the days immediately preceding and following, on the occasion of the big demonstrations of the suffragists and their rivals—the "antis." Yellow and red roses were the badges, respectively, of the adherents of the opposing forces and such a clean-up on roses has rarely been experienced. Much to be preferred as implements of warfare than bombs or stones. Happily the crop was on in full tilt and the rose men got a thrill as pleasing as it was unexpected. This was a genuine case of the business seeking the florist and fortunately he was right there with the goods. Come again, ladies.

Convention plans maturing

We are pleased to be able to present in this issue of HORTICULTURE a complete diagram of the trade exhibition space at Mechanics' Building as laid out by Secretary Young for the Boston S. A. F. Convention; also a list of all the committees selected for local work on convention matters and a quantity of other data that will prove acceptable and useful in connection with that important event. Those gentlemen on whose shoulders rest the responsibilities of preparatory work have been assiduously busy for months on the preliminaries, the uncertainties of the situation due to the change in administration of the city's affairs making the work somewhat difficult and often delicate to handle but "all's well that ends well," and when the S. A. F. visitors arrive in Boston they will find the State and City officials, the park department, the horticultural interests of the City and the public generally all in enthusiastic accord to welcome and entertain.

Wisdom made to order

By the way, reverting to the recent "Mothers' Day" and the burning questions involved in its fitting observance, as between Miss Jarvis with her white carnation and the florists' advocacy of "any flower," one of the Boston newspapers had its profound say as follows:

"The white carnation is the emblem of mother love. France could not use the rose, for that is an English emblem, and the Germans could not use the fleur-de-lys, because it is the French national flower. All nations, however, can unite on the white carnation as the international memory flower of home and country."

Facts count for but little sometimes when they obstruct the reasoning out of a pet theory. We horticultural people have had it in our heads that France stood in the front rank as a rose-loving and rose producing country and it is "news" to us that they cannot wear roses in honor of mother in that country, while we all know that the German iris and its numerous hybrids are recognized the world over as the most gorgeous and beautiful section of the great iris family. But—"wots the use?"

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur C. Ruzicka

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to the office of HORTICULTURE.

Early Planting

With some houses almost all cut off and prices not very high, a bench of nice potted plants getting potbound will often lead us to change the planting program, and plant some of the houses early. This is not a bad idea at all, especially on a good sized place where roses are wanted nearly all the year round. In planting Beauties early there is one thing that should be borne in mind and that is if the plants produce a good deal of flowers in the summer and early fall they may not flower as freely in the winter as they might when planted later. A good deal depends on the weather, however, and that is something beyond our control.

Selection of Plants

In selecting for planting get good stocky plants as nearly alike in size and amount of growth. If you have to use two sizes or various sizes, put the smaller plants to the front of the benches and the larger and stronger plants to the rear. This will give the smaller plants a better show, for they will be where there will be very little danger of getting them too wet, and the stronger plants will be where they will have a little more moisture which they require. Sometimes we plant the front row with three-inch stock, and get good results, but of course the plants will naturally take a little longer to come up. Do not make the mistake and set one small plant and then one large one. This would ruin the whole house unless you had an expert at the hose and the growing part. Keep the small plants by themselves and they will do better.

The First Watering

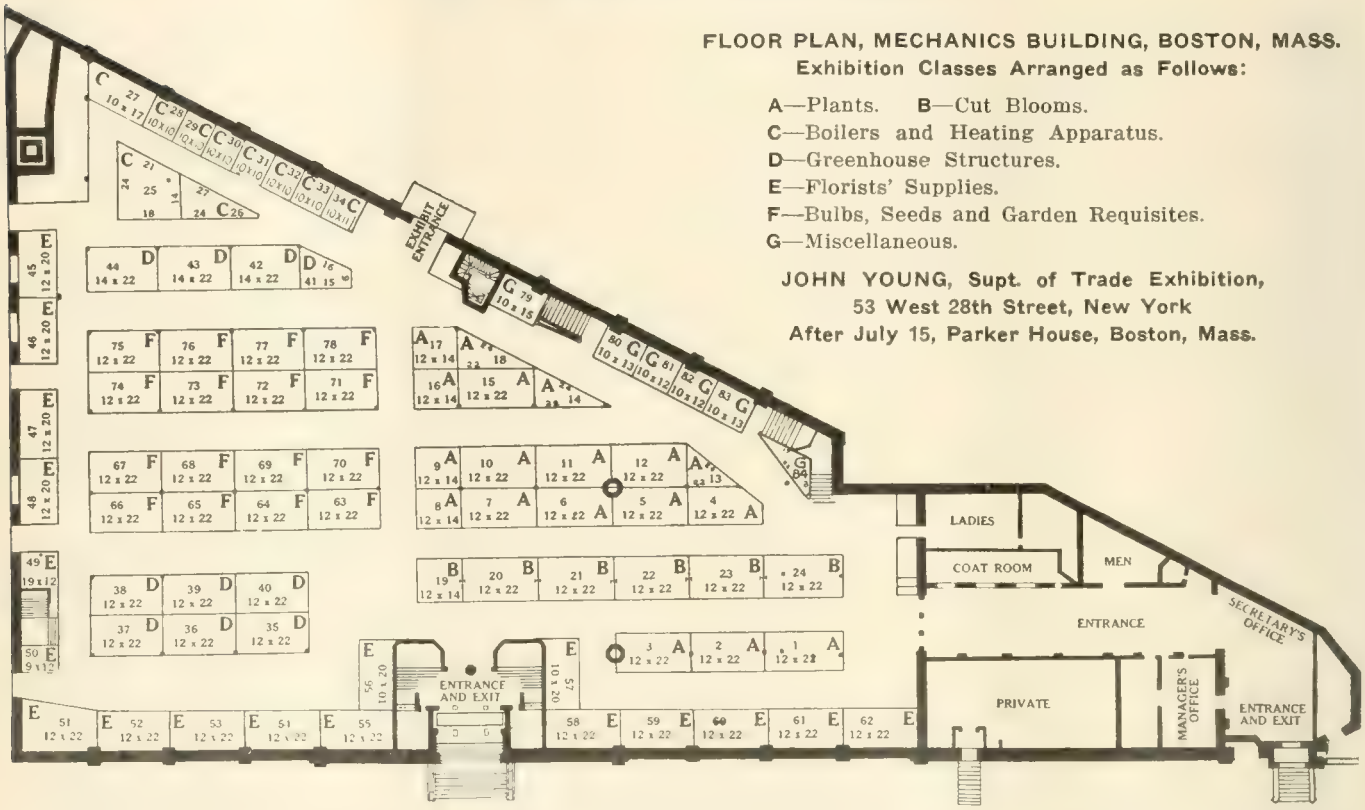
The first watering after planting should be given the whole bench, so as to settle the soil all over. Water thoroughly so that it will drip right through the benches, thus making sure there are no dry spots. After that only the ball of the plants should be watered until after they start, and then the circle watered can be increased as fast as the plant grows. Make sure that they are plenty wet enough when they are planted, as, if they are planted dry, the center of the balls would remain quite dry in spite of the soaking that the rest of the soil may receive.

Cleaning Before Filling the Benches

Before the benches are refilled see that they have been washed out with the hose at a good pressure, and then given a good coat of hot lime to which a little copper sulphate has been added. This will help kill many of the fungi that may be loitering around waiting for a chance to get at the roots or do some damage of that kind. Do not try to dissolve the sulphate in any tin or galvanized iron pail, for such would quickly get filled with holes as the sulphate is very corrosive and will eat its way right through if it is strong in solution.

Whitewashing

This may seem so simple an operation that giving a space to a few lines on the subject seems pure waste, and yet there are several little things about it that are very important, the first being good fresh lime, hot if possible, and the second being a good brush, and then a wet bench, or whatever is to be whitewashed. See that it is soaked with the hose so that the water wets all the boards and enters all the cracks and crevices. Then have your lime quite thick, and you will be surprised at the amount of work that one man can do when compared to the man working on a dry bench. The wear on the brushes will be quite a saving, for a brush used carefully on a bench well sprinkled will last several seasons, and that is good compared to having a man wear out a brush for each house. See that the lime is put well into all the corners, and that there are no places left uncovered on the sides of the bench. Last of all, see that a good coat is put on as this will not only cleanse the bench but will help to preserve it.



Preparing the Soil

Sod heaps that have already been turned over will be in excellent condition to turn over once more, mixing a little bonemeal all through, and then filling the benches with this. If the manure in the sod is not very plentiful it will be a good idea to mix in a little more. This must be well decayed and short, free from straw and other coarse material. We like to have plenty of manure in the soil, more so for the early houses as the plants then will have something to take hold of, and turn into stems and buds. We seldom bother going over the benches with a trowel as the old ways called for, although this method can be uesd to advantage at certain times.

SOCIETY OF AMERICAN FLORISTS' AND ORNAMENTAL HORTICULTURISTS

FLOOR PLAN, MECHANICS BUILDING, BOSTON, MASS.
Exhibition Classes Arranged as Follows:

A—Plants. B—Cut Blooms.
C—Boilers and Heating Apparatus.
D—Greenhouse Structures.
E—Florists' Supplies.
F—Bulbs, Seeds and Garden Requisites.
G—Miscellaneous.

JOHN YOUNG, Supt. of Trade Exhibition,
53 West 28th Street, New York
After July 15, Parker House, Boston, Mass.

CONVENTION ARRANGEMENTS.

The arrangements for the Convention meetings, and Trade Exhibition at Boston, are very advantageous and convenient. The Trade Exhibition will all be held on one floor, the main floor of the Mechanics Building. Meetings will be held on the floor above, in the Paul Revere Hall. Adjoining Paul Revere Hall are large committee rooms, which have been set aside by the Advisory Committee for the use of the Ladies' S. A. F., The Florists' Telegraph Delivery, Florists' Hail Association and meetings of the American Rose Society and the American Carnation Society, and for the use of committees which may desire to use the same.

Floor plans, as submitted by the Advisory Committee, have been mailed to the members. Anyone desiring an extra copy will have same sent immediately upon notification to this office. The inquiries received thus far, would indicate that the Trade Exhibition in Boston will excel any other similar showing made in the history of the Society. All spaces on the main floor of the Mechanics Building are favorable for any trade exhibit. The entrance and exit marked on the diagram between blocks 56 and 57 will not be used. There will be only one entrance and exit, that adjoining the Secretary's office.

The official sign, including the rental of upright or stand in which to place same, will not exceed the price of $1.25 or $1.50 each. Exhibitors are requested to send in their order for signs, if possible, the same time they reserve space, so that they will be ready for the exhibitor upon his arrival at the Hall. The lettering permitted on these signs, is, one line for the firm name, one line for the business and one line for the address, a total of three lines.

Selling of goods by persons not having engaged space will not be permitted unless such persons or firm shall have secured a permit or license from the Secretary, same not to cost less than $20.00. When more than one exhibitor joins in the same space, there will be an additional charge of $20.00 for each additional exhibitor. Twenty-five per cent of the total cost of space must be paid on signing the contract and the balance before the exhibitor takes possession. The flat rate per square foot for space is $.40. Minimum charge for space is $20.00.

—

The Secretary wishes to announce that the 1914 button has been mailed to all members in good standing in the Society. If any member has not received same, it may be that he has over-looked paying the assessment for 1914. Upon receipt of the 1914 assessment, this button will be returned promptly. There are still a few life membership buttons on hand, which will be sent to any life member upon receipt of request, which should include $.75.

JOHN YOUNG, Secretary and
Superintendent Trade Exhibition

—

THE CONVENTION GARDEN.

Deputy Park Commissioner J. B. Shea of Boston has sent out the following circular letter to presumtive exhibitors.

"The Out Door Convention Garden to be held in connection with the 1914 Society of American Florists' Convention is now ready to plant, and will be under the direct supervision of the Park Department of Boston. The garden is to be located in one of the beauty spots of Boston, bordering on the Fens Pond and within a few minutes walk from Horticultural Hall.

"This will be one of the greatest events for floriculture and horticulture ever held in the East and will attract enormous crowds of the right people. We cannot see how you can afford to miss this opportunity of display in your specialties, more especially as the cost will be very small and will require no care on your part.

"There will be no charge for spaces as the land is owned by the City of Boston, and its ordinances forbid this; but for preparation, care and maintenance a small charge will be made to cover cost of preparation and care throughout the summer. This will be 10c. per square foot for spaces up to and including 2500 square feet. From 2500 square feet to 5,000 square feet at 8c. per square foot, and over 5,000 square feet at 6c. per square foot.

"We are enclosing a diagram of the lay-out and your preference for position will have every consideration. As the time is very short now, an early decision is necessary for best results. The garden is all ready for trees, shrubs, vines, conifers and hardy herbaceous plants.

"For tender plants it will be safer to defer planting until May 20th. Let us hear from you at once and we will be very glad to do everything in our power for your success. All plants should be addressed, express prepaid, to Boston Park Department, Back Bay Fens, Boston, Mass., and marked

'Convention Garden,' care James B. Shea, and advise us of shipment through the mail.

"Do not waste time on this but help make the 1914 Convention the greatest in history, and also reap the benefit of the large amount of advertising and sales that will come to you.

"Checks for the full amount of space must accompany the order and be drawn to James B. Shea, Chairman."

DEPARTMENT OF PLANT REGISTRATION.

Public notice is hereby given that Mrs. B. B. Tuttle of Naugatuck, Conn., submits for registration the Orchid described below. Any person objecting to the registration or to the use of the proposed name is requested to communicate with the Secretary at once. Failing to receive objection to the registration the same will be made three weeks from this date.

Name—Laelio-Cattleya Tuttleæ.

Description—Derived by crossing Cattleya Thayeriana with the pollen of Laelia Perrinii; habit of growth much like Laelia Perrinii; leaf and pseudo-bulbs dark green, suffused with reddish purple; flowers intermediate between the two parents; sepals and petals light rose; lip nearly intire; in shape like that of C. Thayeriana, nearly white, with the apex of the front lobe deep crimson; flowers 4½ inches across.

May 8th, 1914.

Public notice is hereby given that as no objection has been filed to the registration of the Carnation, Dr. Sam, by Charles L. Baum, of Knoxville, Tenn., or the Antirrhinum "Janesville" by Charles Rathjen, 813 Centre Street, Janesville, Wis., same becomes complete.

JOHN YOUNG, Secy.

May 5, 1914.

Obituary

Brian P. Critchell.

Brian P. Critchell, one of the oldest and most renouned florists in Cincinnati died Monday morning, May 11, in his seventy-second year. He was born in England on August 8, 1842, and came to this country when a lad of four. After having seen service in sixteen battles in the Civil War he embarked in the florist business in Cincinnati and followed this business in some way or other until within a couple of years of the time of his decease. While he was in the retail business in the olden days he was one of the most widly known florists in this part of the state. Later he made a very good record as Superintendent of public parks. Then up to the last few years of his life he followed landscape and horticultural work. Surviving him are Frances J. Critchell his widow and eight children, among whom is C. E. Critchell, the popular wholesale florist. He was a member of the various Masonic bodies, the G. A. R. and was one of the trustees of the Jabey Elliot Flower Market. Mr. Critchell had a most charming personality and charming manner, brimful of merry humor and always ready with a fund of good stories, which made him an ever-welcome companion. At the first S. A. F. Convention in Cincinnati he was one of the leading spirits and contributed not a little to the success of that memorable event.

Frank G. Yingling.

Frank G. Yingling, a resident of Reisterstown, Md. for many years, died very suddenly on Friday morning, April 24, at his residence near the Hannah More Academy, of hardening of the arteries of the heart. He is well known as a florist in which business he has been active for almost his liftetime. He is survived by his widow, who was a Miss Fox, and three daughters and four sons.

J. F. Slimon.

J. F. Slimon, late manager of the Vaughan's Seed Store, New York, died on Friday, May 8. Mr. Slimon, previous to his assuming charge of the Vaughan store was for many years with J. M. Thorburn Co., and was widely known and highly respected in the seed trade. He was obliged to discontinue work a few months ago on account of failing health.

CLUBS AND SOCIETIES

NEW YORK FLORISTS' CLUB.

The monthly meeting of this club, held on Monday evening, May 11, met with very inclement weather and the result was a light attendance of members. Eleven new names were added to the membership list and one more was proposed for action at the next meeting.

Wm. E. Marshall on behalf of the Outing Committee, reported that everything looked promising for the picnic to Glen Island on July 1. After various reports by John B. Nugent on behalf of the Annual Dinner committee, F. H. Traendly for the Financial Department of the recent Spring Flower Show and F. R. Pierson on the plans for the 1915 Flower Show, it was decided to secure a guarantee fund of $10,000 towards the 1915 show. Notwithstanding the light attendance, nearly $2,000 was immediately subscribed. Advance schedules are now in preparation. F. H. Traendly, Joseph A. Manda, C. H. Totty, Anton Schultheis, Jr. and Robert Koehne were appointed Transportation Committee to make arrangements for the Convention trip to Boston. J. Austin Shaw, A. F. Faulkner and W. C. Rickards, Jr., were appointed a committee to prepare resolutions on the death of J. F. Slimon, which occurred Friday, May 8th.

Richard A. Vincent of White Marsh, Md., was then introduced and presented a very fine and much enjoyed illustrated lecture on the subject of Geraniums, for which a hearty vote of thanks was returned. R. Vincent, Jr., also addressed the meeting mainly on the subject of Affiliation.

W. A. Manda, Inc., made a display of Calceolaria Stewartii, for which a certificate of merit was awarded. R. Vincent, Jr., & Sons Company also received a certificate for Geranium My Maryland. W. A. Manda, Inc., were given a vote of thanks for cut flowers of a new seedling geranium.

The meeting adjourned at the unusually early hour of 10 p. m.

FLORISTS' CLUB OF WASHINGTON.

Richard Vincent, Jr., was the guest of the Florists' Club of Washington, at its regular monthly meeting. Mr. Vincent gave a very enjoyable talk on organization and its value and spoke of what could be accomplished by a thorough get-together spirit. He also told of the plans being made by the Florists' and Gardeners' Club of Baltimore for attending the Boston convention in August. It is the hope of this club that enough members can be assembled in Baltimore to warrant the chartering of a boat of the Merchants' and Miners' Transportation Company. He stated that he was already in receipt of communications from florists who are located in Richmond, Ind.; Chicago, Ill.; St. Louis, Mo.; Pittsburgh, Pa.; and other places, stating that they would like to join with Baltimore in making the trip by water. A committee of the local club was appointed at a recent meeting to make plans and it is believed that a large number of Washingtonians will be in the party. As Mr. Vincent explained, the cost of the trip, including meals, after leaving Norfolk, and the stateroom will be $15. Mr. Vincent also exhibited a new red geranium which have not as yet been disseminated, which he has named My Maryland.

The real excitement of the evening took place when President Cooke went after the florists of not only this, but all other cities who raise their prices on white carnations for sale on Mothers' Day. He stated that the majority of the florists were absolutely devoid of sentiment whereas the business was full of the little niceties of life. He severely criticized the growers who held the white carnations up to $10 per hundred during that period when before that time it is a hard matter to get $2 for them. He stated that he would sell all the white carnations necessary to supply his trade at 25 cents per dozen and claimed that all florists should be willing to pocket a small loss in the same manner. The majority of the members present could not seem to take the same view of the subject and he had but little support, they believing in the proverb "There is no sentiment in business."

Fred H. Kramer made the longest speech of his life when he made the mere suggestion that the club hold a show in the fall. That brief remark stirred up more enthusiasm than anything that has been brought before the club in some time and it was hard for President Cooke to obtain order while the motion to hold the show could be properly discussed. Needless to say all the votes were "ayes" and a committee with Fred H. Kramer as chairman and William F. Gude and R. L. Jenkins as associates was appointed to look into its feasibility.

AMERICAN ROSE SOCIETY.

At the Executive Committee meeting of the American Rose Society held in New York City on Monday May 11th, a resolution was passed that the members of the American Rose Society would meet in Hartford, Conn., on June 19, 1914, at the Hartford Union Station for the purpose of going over the Hartford Rose Garden, and as many of the members of the Rose Society as can attend are requested to be present on that day. The day that was spent there last year was a source of much pleasure and interest.

Concerning the two roses of which notices of registration have been sent out, so far there has been no objection to the names received, same being "Thora" by Geo. Burton and "Defiance" by Edward Kress.

The Syracuse Rose Society with 216 members has joined the American Rose Society as an affiliated association.

The special prizes offered for the spring show have been received and turned over to the treasurer of the New York Flower Show committee.

BENJAMIN HAMMOND, Secy.

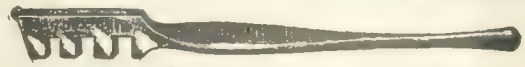
CLUB AND SOCIETY NOTES.

The St. Louis Retail Florists' Association will hold its regular monthly meeting Monday night, May 18, at the Washington Hotel.

State Vice-President for Missouri Robert J. Windler, of the S. A. F., will as usual have charge of the arrangements for the trip to the Boston Convention. Robert is out hustling for a large delegation and new members for the society.

Displays of Darwin tulips, narcissi and pansies will feature the annual May exhibition of the Massachusetts Horticultural Society, to be held at Horticultural Hall, Saturday and Sunday, May 16 and 17. Exhibits of native wildflowers, fruits and vegetables will also be shown. The exhibition is free and will be open from 12 to 6 P. M., Saturday, and from 2 to 6 P. M., Sunday.

The Lancaster County, Pa., Florists' Club presented enough packets of flower seeds to the Children's Garden Association to brighten up the whole of Lancaster, and the gratitude of the Association and the eagerness with which the children received them more than paid the bill incurred from a Philadelphia seed house from which they were procured.



The next meeting of this Club is May 21st, and bedding plants the subject.

ALBERT M. HERR.

At the meeting of the St. Louis County Growers' Association, which is now one year old, on Wednesday, May 5th, the election of officers resulted in the re-election of Frank Vennemann, president; C. E. Cerney, vice-president; Joe Deutchman, secretary, and W. J. Pilcher, treasurer. Board of trustees: A. H. Ahner, Hugo Gross and F. W. Ude, Jr. The reports of the secretary and treasurer showed that the Association had made good headway during the past year, both financially and in attendance of its members.

The Elberon Horticultural Society held its regular monthly meeting on May 4, with a large attendance present. A cultural certificate was awarded to Mr. Charles Hurn for an excellent vase of Radiance roses, also to George Masson for a beautiful vase of antirrhinum. At the next regular meeting on June 1, William Sperling of Stumpp & Walter Company has promised to give an address on tulips. The schedule of the fall show to be held in

At the monthly meeting of the New Jersey Floricultural Society held in Orange, May 4, the society decided to hold a Rose Night on Monday June 1, and an exhibition of sweet peas, on Monday July 6. Schedules are being drawn up for the Ninth Annual Dahlia, Gladiolus and Vegetable Show to be held Oct. 5, 1914. Schedules may be had from the secretary on application any time after June 1, 1914. Awards for the evening: 1st, Seedling Antirrhinum, Sidney and A. M. Colgate; 2nd, Calceolaria hybrida, Peter Hauck, Jr.; 3rd, Hydrangea, Mrs. H. Graves.

GEO. W STRANGE, Cor. Secy.

The florists of San Antonio formed a permanent organization at a meeting held Monday night, April 27, at the Chamber of Commerce. The following officers were elected for the ensuing year; Chris Hauser, Jr., president; Frank Suchy, vice-president; F. Breeborough, secretary, and Mrs. Charles Albrecht, treasurer. The following executive committee was named: Chris Hauser, ex-officio; Frank Hauser and Mesdames Ed. Green, F. Bright and Pauline Jung. Meetings are to be held each month and the membership will include most of the San Antonio florists. Plans were made for a flower show to be given each fall.

The regular meeting of the Tri City Florists' Club was held at the residence of Wm. Knees.

President John Staack called the meeting to order and the following resolutions were adopted.

Resolved, whereas our former fellow member, Theo. Ewoldt on the 8th day of April, 1914, paid the last great debt of nature and passed into the beyond:

Therefore, be it resolved; that the Tri City Florists' Club, in his death are called upon to mourn one of its most valued and useful members, one where professional knowledge was ever at the command of any fellow worker, where cheery good nature and jovial disposition added pleasure to our meetings and whose merits and value as a citizen will not be easily replaced in his community.

Be it further resolved; that these resolutions be spread upon the minutes of the Society and a copy furnished to the family and to the trade papers.

NEMATODES AND PAEONIES.

I am probably the pæony grower who C. S. Harrison has reference to about being very needlessly exercised over my pæony stock. Fourteen years ago I started in the business with clean hands, seventeen acres of virgin soil and an ideal to furnish the best the world afforded. Naturally I took advice about the growing from men old in the business, and, when I saw nodules on the roots, I consulted them. The oldest grower of all made light of them and said he had seen them on pæony roots for 25 years. This lulled me into a quiet about them. When I consulted another old grower about using my ground over again for replanting, he replied that he had used the same ground over and over again for 20 years, saying he had to—or he would not have a bloom left for his own use. Now I bought stock from both of these gentlemen, in one case, very much more than the other, so that some years it ran into the 100 plants of a variety. I also sold to both in a small way. But last fall the one from whom I had bought the most, threw me down hard. He returned an order of $250. The reason was nodules on the fibrous roots. He charged me with a "very serious thing" in sending out such stuff.

This made me think I had better find out for myself, and in order to go at it I had to change these old growers as my advisers and look about for new ones. I applied to the government at Washington as to what department of the plant industry I should submit roots of pæonies that were infested, for their inspection. Upon receiving a reply I forwarded some roots, the original stock of which came from Lemoine of France, and also another variety of which the original stock had come from one of these former advisers. The letter below was the reply.

UNITED STATES DEPARTMENT OF AGRICULTURE.
Bureau of Plant Industry.
Pathological Collections and Inspection Work.
Mycological Exchange.

Washington, D. C., April 11th, 1914.

Mr. E. J. Shaylor, Auburndale, Mass.

Dear Sir: The pæony roots referred to in your letter of April 7th have been received and carefully examined.

The enlargements on the fibrous roots are caused by nematodes (Eelworms) but no evidence of nematode infection can be found in the large root. The latter had somewhat the appearance of having suffered from insect attacks, but no insects were present and the material had to be so mutilated by the examinations in this office that sufficient did not remain to be transmitted to the Bureau of Entomology.

You no doubt know that plants infested by eelworms should be destroyed and also that the soil in which the plants have been grown is unfit for use for the same kind of plants or others susceptible to nematode attacks until it has been sterilized. The most efficient agent to be used for this purpose in case of greenhouse soil is steam, although certain chemical treatments are sometimes recommended. We are sending you Circular No. 91 of this Bureau, which you may find of interest as bearing upon your problem.

It will be well for you to send some of the large root material to the chief of the Bureau of Entomology. If you were not a commercial grower, I should also suggest that you write to the Horticulturist of this Department in regard to the methods of cultivation followed with the plants that have not blossomed for ten years.

(Mrs.) FLORA W. PATTERSON,
Mycologist in Charge.

Pursuant to the advice in the above letter I sent some plants to the Bureau of Entomology and asked particularly as to whether the disease that caused the nodules was the same as that which affected the large roots.

The reply to this last request is below:

United States Department of Agriculture,
Bureau of Entomology,
Washington, D. C., April 30, 1914.

Truck Crop and Stored Product Insect Investigations.

Dear Sir: Answering your recent letter transmitting a root of paeony I regret to inform you that your idea in regard to the large abnormal growth on the roots of the plants is correct. Both the smaller nodule and the large growth are caused by the attack of one of the nematodes. In connection with the control it is necessary to rotate crops in order to insure the destruction of the nematodes in ground already infested, as no application has as yet been discovered by this Department which is capable of ridding the ground after once becoming badly infected by nematodes. It is better in this connection not to risk planting infected roots in any new plat of ground used for this purpose, as it will only be again infected and the plants will not thrive. The roots should be thoroughly assorted and all roots attacked by nematodes eliminated before planting.

Yours truly,
F. H. CHITTENDEN,
In charge Truck Crop and Stored Product Insect Investigations.

Mr. E. J. Shaylor,
Wellesley Farms, Mass.

Let me say here that I forwarded to the Bureau of Entomology a large root of stock, the original of which had come from Lemoine, same as in the first samples sent, and besides some fibrous roots with nodules, of which original stock had come from the other old grower spoken of above, and the one who threw me down so hard. Let me also say that I have never set the same ground over again. Now, Mr. Harrison, these are some of the new advisers I have thought best to go to, rather than to continue with the advice of the old growers. I am still seeking advice.

E. J. SHAYLOR.

NEWS NOTES.

Portland, Ore.—A. Zittewitz has taken a five-year lease on the greenhouses of W. T. Woods at Lents.

Newport, R. I.—William Allan, who recently resigned his position as gardener for Dr. Jacobs, is now installed as gardener for Mrs. George D. Widener. The Widener place formerly belonged to the late Dr. C. M. Bell, and is being remodeled in a very expensive way. Besides a new house and garage, the grounds are being changed very much, and when finished it should be one of the show places of Newport.

SEED TRADE

AMERICAN SEED TRADE ASSOCIATION

Officers—President, Chas. C. Massie, Minneapolis, Minn.; 1st vice-president, J. M. Lupton, Mattituck, N. Y.; 2nd vice-president, W. F. Therkildson, Palmesville, O.; secretary, C. E. Kendel; assistant secretary, S. F. Willard, Jr., both of Cleveland, O.

Influence of the Weather on the Pea Crop.

Gentle spring is here at last and we trust she will bide-a-wee. So much has been said of the effect of the late spring on counter trade at the seed stores that nothing further is necessary along those lines. However, one effect of the late spring has not received very much attention so far as we have noticed and that is its influence on planting. Nearly all crops have gone into the ground from two to four weeks late with the exception of a few favored spots where the character of the soil was such that it quickly dried off. We have ascertained that peas for instance, have been planted many weeks later than usual and up to the first of May in the State of New York the canners had not succeeded in getting 10 per cent of their seed peas in the ground. No matter how favorable the weather may be from now until harvest, the crop will inevitably be late. It is customary for most of the New York State packers to begin operations anywhere from the 15th to the 22nd of June, but few of them expect to start this year much before the 1st of July. We refer to the matter simply because it will bring the peas into blossom at what is usually one of the hottest periods of the summer; and if dry at the time and the heat is protracted, it will mean inevitably a short crop. This of course necessarily affects peas grown for seed the same as for canning, but as only a very small percentage is grown for seed in the East the effect on the seed crop will be immaterial.

So far as we are able to learn the opposite conditions prevail in the West where planting has been unusually early. We are referring now to peas grown for seed purposes in the far Northwest, Montana and Idaho. While this early start is distinctly favorable there is a great fear that the water supply is liable to run short before midsummer in which event there will be undoubtedly a very short crop of seed. It is known generally, we assume, that most of the farming done in these states is by irrigation. Most of the streams that are depended upon to furnish water are fed by the snows which fall in the mountains during the winter. From all reports the snow fall of the past winter has been the lighest in many years, and as the spring opened unusually early the snow will probably disappear at an early period, and without rains to supplement the snow there may be dry times ahead for farmers in the northwest. These facts we believe will be interesting to the trade in general for a short crop of peas the coming summer may not prove an unmixed evil. We do not of course mean a crop failure. But a considerable shortage might in the end mean a blessing both to the seed grower and the consumer.

General Crop Comments.

While we have been referring to the pea crop, we may incidentally say that nearly all crops which are usually planted early will suffer from the handicap of late planting this year, spring grains among the other items. The recent Government report showing the very high and very satisfactory condition of winter grain, especially wheat, is most gratifying to the farmers and the public in general, but it is quite a distance from harvest and many ills may befall the crop before that time is reached, however, we do not desire to be pessimistic; on the contrary we should be pleased to see, like most other interested persons, a general good crop of all staples the coming summer. Good crops generally make for prosperous conditions, and as there is much criticism of business conditions and many idle men at the present time, any causes that would tend to improve matters would be welcome.

It is needless to say that the seed trade is busy. Probably the trade as a whole was never more busy at this period of the year. Much of the business that is being done now should have been transacted in April and two months will be crowded into one. Because of the lateness of the season many items will not be used this year that would have been had we had a normal spring.

Canners Will Not Go to San Francisco.

An important meeting of the officers of the National Canners' Association together with those of the Canning Machinery and Supplies' Association and the Canned Foods and Dried Fruit Brokers' Association is in progress in Washington to determine where the next annual Canners' Convention shall be held. A meeting for this purpose was held some weeks ago in Chicago, but many obstacles which arose at that time prevented a decision being reached. We are advised that San Francisco has been eliminated as a convention point for 1915. No other place has been decided on, but we understand some city of the middle west will be chosen. We will furnish full information as soon as definite action is taken. San Francisco is favored for 1916.

Seed Legislation Sidetracked.

Editor HORTICULTURE:

I am pleased to advise you that Senator Gronna's bill (S. 480) to regulate interstate commerce in seeds, has received an adverse report from the Senate Committee on Agriculture and Forestry, to which this bill was referred. It is not likely that this report will be reversed by the Senate.

The other interstate seed bill before Congress, being Mr. Howard's Bill (H. B. 11170), has not been considered by the House Committee on Agriculture, and as their program for the remainder of the session is now made up and does include this bill, no action will be taken upon it.

From the above you will perceive that there is little likihood that any action will be taken on seed legislation in this session of Congress.

PHILADELPHIA NOTES.

Scare heads in the Saturday Evening papers had it that Mothers' Day had been spoiled because the commission men had manipulated the price of flowers to such an extent that many thousands were unable to pay the reverent tribute. This sad tale probably emanated from some retailer and the cub reporter took it all as gospel and now the commission man is "the goat.'

There is considerable meat and novelty in a little brochure issued from Michell's, edited by the advertising manager, E. M. Pettit, entitled "Grow." The chapter on salesmanship is especially good. An example is given of how a first-class salesman goes about it. While everyone cannot attain such perfection at once, it is good to have a star to aim at, and maybe the time might come when the little wagon would be securely hitched to that star. Aim high and "Grow."

John C. Gracey, chairman of the Florists' Club Outing Committee announces that he has appointed the following as the rest of his committee; Arthur Niessen, (treasurer), Fred Michell, Jr., Fred Copperwait, John Kuen, Adolph Farenwald, Charles E. Meehan. The affair will take place on June 10, in Schuetzen Park on the Old York Road and can be reached by trolley or by the Reading (Tabor Station.) There will be a fine program and the enthusiasm is already beginning to bubble.

Fine as were Mr. Tuthill's remarks on the "spark plug" at the last meeting of the Florists' Club, he is on the wrong track when he endorses "let the grower do it." That is, let the growers get together like the master builders and assess themselves for a boost to the business in general. Can't be done in the flower business. Too varied. Too complicated. Too unorganized. A close guild like the brickmakers might do something as they all make bricks and little else. All the retailers are much in favor of the idea. They seem to feel that they would get a lot of advertising they would not have to pay for and they would exact all the extra profit from the public and they think they are quite able to deal with the grower should he have the temerity to ask any more for his product. Advertising is a personal or corporation or trust proposition. The latter does not apply to the flower business and never will. So this idea of co-operative advertising for everybody in general and let the "easy marks" pay the bill is "chasing a rainbow."

A correspondent asks "did your P. C. ever hear of a profession being successfully unionized." Sure! Lots of them. What is a Bar Association but a union? He also persists in repeating that the P. C.'s notion of educating the employer from his $50. a month standard to at least a minimum of $100. is a fallacy. In other words, it is impossible to educate the employer that $50. is far too low for an experienced gardener who has served his apprenticeship and is thoroughly qualified. Why, even a common laborer can get $2.50 and $3 a day and a bricklayer can get 62½c. an hour. As for my knowledge of the gardeners' society I am a member of it and I never understood before that there was anything in it that was secret, or anything that the members in general "knew very little about." Come, come Mr. Ebel. Have another think! The transformation in the past few years which you have seen in the gardening business is largely, I suspect, what Mrs. Mary Baker G. Eddy would have called "a condition of mind" on your part and not on the part of the business. Because you have had a complete transformation of your views during the few years that you have been among us does not make a transformation of the trade by any means. You "imagine a vain thing."

This is not written to get back at Mr. Ebel. Far be it from me to have any such feeling. I speak with every courtesy towards Mr. Ebel who is a gentlemen and scholar. The object I have in discussing the thing is to thresh the matter out in a friendly way and see if we can't find some way of reaching that $100 minimum.

Visitors:—Adolphus Gude and William F. Gude, Washington, D. C.; H. L. Holmes, Harrisburg, Pa.; M. Boks, Ghent, Belgium; J. F. Shader, Dorrancetown, Pa.; E. Howard Smith, rancetown, Pa.; E. Howard Smith, Hazleton, Pa.; Chas. L. Schmidt and Miss Elsie Schmidt, Harrisburg, Pa.; W. R. Thoms, Atlantic City, N. J.; James Brown, Coatesville, Pa.; W. C. Langbridge, Albany, N. Y.; W. Maschmann, Hamburg, Germany.

WASHINGTON NOTES.

Gude Bros. Company last week exhibited some yellow dahlias which proved to be quite a novelty. Although attracting considerable attention, they were not in any demand.

According to an announcement made by officials of the Brookland Citizens' Association, the third annual rose show to be given by that and associated organizations will be one of the largest affairs of the kind ever held in this city. Dr. Walter Van Fleet, rosarian of the Department of Agriculture; George W. Hess, superintendent of the Botanic Gardens, and Mrs. Edwin F. Sweet, have been selected as judges and the show will be held on May 26 and 27.

Considerable interest is being manifested in the coming annual shad bake of the Washington Board of Trade in which many of the florists are among the most prominent members. The outing is to be held at a nearby resort and the day is to be enlivened with many athletic contests to the winners of which substantial prizes are to be awarded. Among the contributing florists are Fred H. Kramer and Gude Bros. Co., each of whom have donated a $5 box of cut flowers, J. H. Small & Sons will give a $5 palm, and O. A. C. Oehmler, a $3 box of cut flowers.

St. Louis—Quite a lot of damage was done around here by the wind, hail and rain storm of Tuesday, May 5. Those who suffered loss of glass were John Held, Schray & Sons, Meier Bros., Chas. Beyer and Frank J. Fillmore. The heaviest loss fell upon John Held, who lost in all 300 lights of glass. The heavy wind and lightning caused some damage to trees in parks in the south end.

A CORDIAL INVITATION

Is extended to the trade to visit and inspect our new establishment, Fifth Avenue at 46th Street, New York City.

The Florists' Supply House of America, 1129 ARCH ST., PHILADELPHIA, PA.

THE WHITE HOUSE WEDDING.

The State apartments of the White House were a mass of color on the occasion of the fourteenth wedding ceremony performed in the Executive Mansion when Miss Eleanor Randolph Wilson, daughter of the President and Mrs. Woodrow Wilson, became the bride of William Gibbs McAdoo, Secretary of the Treasury. Large quantities of dogwood blooms, American Beauty and Killarney roses and lilies were used. The ceremony was performed in the blue room where lilies, palms and ferns formed the chief decoration. The priedieu was flanked by great palms which sloped toward the floor at either end. At either side of the chancel were large vases of lilies and between the windows were streamers of white satin ribbon. The mantels in this room, as in the east room, were decorated with huge clusters of lilies, and on tables in the latter room were large standards of dogwood blooms. Standards of American Beauty roses were used in the alcoves along the corridor, while vases of pink and white roses adorned the tables where the wedding supper was served. These flowers were also used on the mantels, and in the red room were clusters of American Beauty, pink Kilarney roses and dogwood, forming the decorations in the green room.

The bride carried a huge shower of white orchids and lily of the valley tied with white satin ribbon and gauze, on which was embroidered designs, with long streamers reaching almost to the hem of her gown, which were decorated with lily of the valley and orange blossoms. The flower girls, Miss Sallie McAdoo, and Miss Nancy Lane, wore hats trimmed with Japanese crab-apple blossoms, orchid flowering sweet peas and ferns, with large bows of white satin ribbon. Prince de Bulgarie roses were used to decorate the shepherds' crooks carried by the bridesmaids. The roses were tied with large bows of white satin ribbon and from these were long streamers similar to those used in the bridal bouquet, and trimmed with orange blossoms.

Unlike the wedding of her sister, that of the now Mrs. McAdoo brought very little business to the local florists for exceptionally few gifts of flowers were made. It was more of a family affair and not nearly so elaborate.

Flower Market Reports

BOSTON Trade is quiet as is easily seen by a tour through the wholesale flower markets at any hour of the day. Roses are moving very slowly. Carnations are down to bed rock again after soaring on Friday and Saturday morning preceding Mothers' Day. The break came on Saturday afternoon when stock which was held at $6.00 in the morning was freely offered at $3.00 and takers were very few. The counters and ice boxes are loaded down with cold-frame lily of the valley, narcissi, tulips, etc. Roses are holding their price fairly well but, as before said, they are disposed to accumulate. Hadley and Mrs. Russell command prices about equal to American Beauty according to grade. Lilies have become rather scarce again after the post-Easter deluge. Sweet peas are very plentiful and not extra good and they drag badly in the wholesale marts on account of the cold rainy weather which has put an embargo on the street fakers who are a big help in unloading these and other corsage flowers when pleasant weather brings out the saunterers and shoppers. Snapdragon is seen in all grades of quality, but all move very slowly.

BUFFALO The past week has been quite a satisfactory one. The receipts have been quite heavy on roses, but sales were better than for weeks previous. Beauties continue in good supply and there is a better outlet. Mothers' Day was a good helpout. The demand on carnations increased from Thursday on, especially on white, on which there was no oversupply, but good clean sales. Colored carnations, too, went well, also peas and other stock shared in the demand. Out-door material is coming in, but has not had any telling effect on the other stock. Good ferns are still on the scarce side.

CHICAGO A fair supply of stock and prices that were above rather than below a fair average, made the past week's business an unusually good one for May. It is not likely that one-half the carnations sought in this market were obtainable for Mothers' Day and there was less difficulty in turning orders to other stock than when it was first tried in earnest last year. So successfully was this done that roses, including American Beauties sold out on Sunday, and Monday morning found the market full of buyers. A cold rain reduced the supply of flowers and Tuesday found little to offer. Peonies are the newest offering, some pink and red varieties coming up from Carbondale, Ill., which, however, are not selling rapidly at $1 per dozen. Roses went up to $10 and $12 on Mothers' Day with no difference as to color. White brought the top price in carnations which was $10 though regular customers had their tickets made out at six. Lily of the valley is much in demand, the wedding season commencing early and the tendency being to use plenty of flowers. In cattleyas, Mossiae are most in evidence, but as a whole the demand is good and the supply small. Parrot and "snake" tulips are both offered in quantity. Snapdragon in excellent quality and beautiful colors, white and purple lilacs, baby gladioli, iris, snowballs, foxglove, calendulas and forget-me-not, all give variety for selection. Sweet peas are again shortening in supply and prices higher.

CINCINNATI The demand for Mothers' Day proved a great surprise. For the first time in many weeks did it

Flower Market Reports

(Continued from page 745)

the market clean up at all well. Carnations first and then roses, naturally had the strongest call, but all flowers came in for some of it. It apparently, for a time at least, marked the end of an overcrowded market. The Mothers' Day supply was rather short of requirements. This week the supply on Monday and Tuesday were rather meagre. Roses and carnations easily cleaned up at the prevailing good prices, but the other offerings did not fare as well. Roses continue in good supply. The carnation market for the past week has been very tight. The lily market is still glutted, but the supply is not so excessively large as it was. Good outdoor tulips are coming into the wholesale houses. The first peonies have made their appearance and so far have sold well. Both lily of the valley and orchids can be obtained in quantity, but they are meeting with only a very ordinary call.

NEW YORK

The flower trade is again back in the rut of inertness after the brief revival and the low vitality is accentuated in its effect by the influx of outdoor spring bloom from local sources or from southern points. Some things have shortened up in supply for the time being and these are exceptional to the general situation in the matter of prices which, in the case of roses and lilies, have stiffened up a little and these will no doubt hold their own so long as there is no great surplus in sight. The market is actually flooded with outdoor lily of the valley, tulips, lilacs, daffodils and similar material, which naturally has a depressing effect on the situation while this inundation lasts. Carnations are very plentiful, although of fine quality, and the figures they command seem low after the brief boost for Mothers' Day, but as compared with previous years' records, they are not far out of the way. Gardenias are scarce and command good prices, but orchids find a very discouraging market. Smilax continues scarce. Adiantums very plentiful and new season hardy fern stock has been arriving abundantly from the south.

PHILADELPHIA

While the influx of flowers has not been so great as before still there is an immense lot of everything, and only the good demand has kept the market steady. Very moderate prices have prevailed all through. The Mothers' Day demand made an impression toward the end of last week and carnations made the usual jump, white going to about eight, other colors showing only a slight increase. The out-of-town demand for this occassion was equally as good if not better than the local. Colored flowers are being gradually brought into play, but this desirable change is very slow indeed, despite the strenuous advice of the commission men to the retailers to use better salemanship. We said eight for white carnations, but there was some salted stock that brought much less. They were "fresh cut" all right but they were "salted" just the same. White roses fared well especially in the shorter grades. Sweet peas were also favorites, the ladies favoring these for corsages. Greenhouse sweet peas are nearly over; there will be outdoor stock in about ten days. Lily of the valley is sluggish for shipping on account of there being a good deal of the outdoor product at outside points. Mountains of outdoor lilac. You see it everywhere, but it will be gone in a week; also many other outdoor shrub subjects. Lilies and callas are still far too plentiful. Asparagus plumosus is the best seller in greens. Dagger ferns of good quality old crop are scarce. The new crop will be ready about May 20. The outlook for next week is very good for flowers generally; as much of the catch supplies will be over and the staples will begin to hold more like their normal sway.

WASHINGTON

The glut of indoor stock is rapidly nearing an end and prices in the wholesale market during the past week were somewhat better than they have been. However, the outdoor blossoms are more than taking the place of what was a surplus of roses, carnations, etc. Carnations will shortly be off crop, according to nearby growers. The florists on Sunday last experienced a rush as far as carnations were concerned. The prevailing prices at wholesale were from $4 to $8 per hundred for the best quality stock. The increase in price applied only to white carnations, colored stock advancing but slightly above normal. In many instances it was found necessary to substitute gardenias after the supply of carnations was exhausted, but in both flowers the ruling price was $1 per dozen at retail. George H. Cooke sold out his entire supply of white carnations at 25 cents per dozen at retail as he said he would do, when speaking on the subject of Mothers' Day before the Florists' Club. On Saturday the wholesale and retail stores moved thousands of red and pink roses, these being the emblems of both the suffragettes and the anti-suffragettes. In the first instance they were worn by the participants in the suffragette parade and by their friends, while in the case of the latter they were worn in protest of the movement. There is now some little friction between the two factions in the matter of who has the prior right to the emblem.

ST. LOUIS

The local wholesale market is in about the same condition as reported in the last issue. Every thing is plentiful and at very low prices, except on Saturday, May 9, when the wholesalers went up on price of carnations. From four to six cents was asked for white carnations and from three to four cents for colored stock, owing to the Mother's Day demand. The wholesalers are looking for another heavy week in receipts. Roses are coming in bad shape, due to the hot weather and all other stock suffers likewise. All flowers are in great abundance, also everything in the green line. The plant trade has been heavy right along.

NEW YORK QUOTATIONS PER 100. To Dealers Only

MISCELLANEOUS	Last Half of Week ending May 9 1914	First Half of Week beginning May 11 1914
Cattleyas	15.00 to 25.00	15.00 to 25.00

Philadelphia: Adolphus Gude and William F. Gude, Washington, D. C.; H. L. Holmes, Harrisburg, Pa.; M. Boks, Ghent, Belgium; J. F. Shader, Dorrancetown, Pa.; E. Howard Smith, Hazelton, Pa.; Chas. L. Schmidt and Miss Elsie Schmidt, Harrisburg, Pa. W. F. Thoms, Atlantic City, N. Y.; James Brown, Coatsville, Pa.; W. C. Langbridge, Albany, N. Y.; W. Maschmann, Hamburg, Germany.

A DAY WITH BURPEE.

As the old Irish toast has it:

"Come in the evening or come in the morning,
Come when you're looked for or come without warning;
Greetings and welcome you'll find here before you,
And the oftener you come the more we'll adore you!"

That's the feeling that everybody has when they're invited to Burpee's and that was the feeling of the members of the Poor Richard Club who turned out about one hundred strong for a day at Fordhook on the 7th inst. as the guests of W. Atlee Burpee The Poor Richards take their title from Benjamin Franklin's nom de plume. They are newspaper men mostly and it goes without saying that they are the salt of the earth in both brains and breeding, the flower of our civilization and always have the last word in a discussion. Thomas Martindale is one of the ruling spirit of the Club. The spacious acres of Fordhook were traversed and the horticultural operations carefully explained. Incidentally a visit was made to a neighboring institution—the National Farm School, presided over by Dr. John H. Washburn, where they each Jewish boys how to become farmers and gardeners.

The creature comforts were ably taken care of by Mrs. Burpee, the ideal hostess. She also made the best speech of the evening and even went so far as to help out Dr. Swartzlander when wits and roasters had him stampeded. Judge Yerkes proved one of the most entertaining speakers. Howard W. Earl, Burpee's first lieutenent was everywhere, quietly efficient as always. David Burpee was also a delightful feature of the festivities especially among the younger men. The popular advertising manager of the company W. F. Therkildson was also indefatigable in seeing that every guest was made at home and happy.

A rural band in big straws, red bandanas and long dustcoats were a source of much merriment between times. They also had three pipers in full highland costume who gave them marching tunes and dinner solos and break downs to their hearts' content. "The Cock O'the North" and "Bonnie Dundee," "Loch Lomond" and "Monymusk," "Macpherson's Farewell" and the "Marquis of Huntly," "Yankee Doodle" and "The Wearing of the Green" all came alike to them. They nearly blew their heads off and did'nt seem to mind it a bit. Heavenly music! Especially a little way off!

GEORGE C. WATSON.

CHICAGO NOTES.

T. Waters reports a brisk demand for cemetery wreaths of cycas and other prepared materials at Poehlmann Bros.

Frank Oeschlin returned Monday from a business trip to Philadelphia. He reports the season as much in advance of that here as was plainly shown in the condition of the shrubbery.

Michael Fink of the Flower Growers' Association, one of the standbys of the Chicago market, while working in his garden Sunday afternoon, fell, striking his head and cutting his face with his broken glasses. He was found in an unconscious condition by his wife and it was two hours before he regained consciousness.

LEMON OIL CO'S STANDARD INSECTICIDE

SOLUBLE IN WATER — NO ODOR — NO POISON

Guaranteed under the Insecticide Act, 1910. Serial No. 321

Save your plants and trees. Just the thing for Greenhouse and outdoor use Destroys Mealy Bug, Brown and White Scale, Thrip, Red Spider Black and Green Fly, Mites. Ants, Insects on Rose-bushes, Carnations, etc. without injury to plants and without odor. Used according to directions our standard Insecticide will prevent ravages on your crops by insects.

Non-poisonous and harmless to user and plant Leading Seedsmen and Florists have used it with wonderful results.

Destroys Lice in Poultry Houses, Fleas on Dogs and all Domestic Pests. Excellent as a wash for dogs and other animals. Relieves mange.

Effective where others fail.

½ Pint - - 25c; Pint - - 40c; Quart - - 75c
½ Gallon, $1.25; Gallon, $2.00; 5 Gallon Can, $9
10 Gallon Can - - $17.00

Dilute with water 30 to 50 parts

Most Effective Results.

1 GAL., $1.65 5 GAL. $6.50

Dilute with 24 to 40 parts water.

Ask your dealer or write

EASTERN CHEMICAL CO, BOSTON

The nursery season is being prolonged by the continued cold which averages about one week of winter to one day of spring. Heeled-in stock is all right but the enthusiasm of the customers is getting chilled. Though the season will be of greater length than the average, it is doubtful if the total sales will be larger or the net profits as large as in some other years.

The impression generally prevails that Mothers' Day is now on a permanent basis. With very little effort to push the sales of flowers and with an entire lack of large newspaper advertisements, the demand for flowers has increased till there is no question but that the day will now mean one to plan for, as for other florists' special days. Two causes, widely different, seem largely responsible for this change according to reports from both wholesalers and retailers. First, the inability of the growers to produce a greatly increased quantity of carnations for the one day and which was thought at one time to mean the doom of the day, but which really turned the demand into a broader channel. Second, the switching of the wearing of a flower "for mother's sake" to the use of bouquets, boxes or baskets in the observance of the day. Three years ago this day meant extra demand for carnations. This year it meant the sale at advanced prices of everything.

NICOTINE MFG. CO. . . . . ST. LOUIS, MO.

Aphine

The Insecticide that kills plant Lice of every species

The Recognized Standard Insecticide.

W. N. Craig writes in Florists' Review (March 5th, 1914): "Scale on greenhouse plants is not easy to get rid of, as doses which are sufficiently strong to kill the scale will usually disfigure the plants at the same time. I have found APHINE a first-class remedy for scale, and if you will apply it according to directions you will kill and loosen the scales, although they will not fall off, as will some other pests."

It will only require the hose to wash off dead scale.

A remedy that is efficient in destroying scale, will destroy green, black, white fly, red spider, thrips and mealy bug.

$1.00 per quart—$2.50 per gallon.

FUNGINE will destroy mildew, rust and bench fungi.

75c per quart—$2.00 per gallon.

VERMINE will destroy root maggots, eel wire and cut worms in the soil.

$1.00 per quart—$3.00 per gallon.

SCALINE will destroy San Jose and all hard scale and red spider on fruit and ornamental trees and bushes.

$1.50 per Gal—10 Gals. $10.—50 Gals. $37.50

NIKOTIANA—a 12% nicotine for fumigating over small lamps or by painting on steam pipes.

$1.50 per quart—$4.50 per gallon.

For Sale by Seedsmen.

PLANTLIFE

PLANTLIFE has several advantages over liquid insecticides on the market. Containing refined tobacco dust it can be used to mix with the soil, acting as an excellent fertilizer, at the same time destroying worms and insects in the ground before they have a chance to reach the plant.

PLANTLIFE has been found very effective in ridding greenhouses of insects by dusting on plants. When dry, use for dusting about once a week.

Put up in bulk for greenhouse men; in packages for retail trade.

Bag of 100 lbs. $3.50.

Let us quote you prices in quantity.

The Plantlife Company, 251 East 66th Street NEW YORK, N. Y.

42 Vesey St., New York

Any individual or firm who would be interested in handling manure from a dairy herd, dried to a 12% moisture basis—nothing of value lost from either the solid or liquid manure, the product analyzing as follows:—

Nitrogen	3 to 3½%
Phosphoric Acid	.8 to 1%
Potassium Oxide	2.25 to 3%
Organic Matter	75 to 80%

Please communicate with

"MILLWOOD" FARM

FRAMINGHAM - - - MASS.

Scotch Soot

Where there is a house that is just full of buds almost ready to show color, nothing will turn better color into the flowers than a little soot, that can be scattered over the benches before watering. The amount applied should not be excessive, as the soot is very strong and may damage some of the foliage somewhat. Apply just enough to blacken the surface of the soil in the benches, and let it go at that. Better a little oftener than too much all at once.

We offer the genuine in original cwt. Sacks, at:

$2.75 per 112 lbs.; $12.50 per 560 lbs.

Stumpp & Walter Co.

30-32 Barclay Street, NEW YORK

SHARP, PARTRIDGE & CO.
Are Leaders in
GREENHOUSE GLASS
OUR PRICES WILL PROVE THIS. CHICAGO, ILL.

IF YOU ONLY KNEW what a good eave the **METROPOLITAN PATENTED** is, you would use no other. It is made of cast iron and will not rust. That part of your greenhouse which in other constructions is the weakest becomes the strongest. Not this alone, it is ice-clearing and carries all the water of condensation from the inside, and it is so constructed that almost the entire end of the bar is exposed to the air, thereby preventing decay. Only one screw, about two inches from the end, is all that is necessary to secure the bars. For side stationary glass, wood headers are absolutely unnecessary, thereby causing no shade. Zinc glass stops are not necessary—the eave is made with a lug to prevent the glass from slipping. Let your next house be built with a **Metropolitan Patented Iron Wall Construction.** You will never regret it. Our price and service are right.

Greenhouse Shading

AFTER many years of experience in greenhouse work with Lord & Burnham Company, in the glazing and painting department, I am convinced that what is needed most is a good shading, and I am pleased to tell you that I have the real thing which you are all looking for.

My shading is beneficial to the painted wood, as it contains nothing but pure linseed oil; it is also beneficial to the glass. You will be surprised by the brilliancy left in the glass when the shading is removed. It is very easily applied by spray or a soft brush; I prefer the brush.

Made up in gallon cans. Colors; light green, blue and pure white. If you will give it a fair trial I am sure you will agree that it has proven its worth.

E. A. LIPPMAN, MORRISTOWN, N. J.

GLASS
for **GREENHOUSE** and **HOT BED SASHES.** Our prices can be had by mail, and it will pay you to get them. We carry the largest stock of **Specially Selected Glass in Greater New York** and can supply any quantity from **a box to a car load on a one day notice, and at Rock Bottom Prices.**

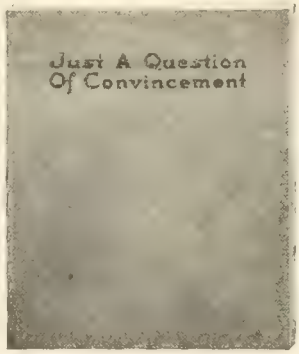
Reasons for Our Slow Deliveries on Early Spring Orders of Alphano Humus

A FRANK STATEMENT

LET us tell you exactly what the uncontrollable conditions were, under which we have been laboring; and then we will leave it entirely to your sense of fairness if we haven't done all possible, under the circumstances.



For ten years our salesmen, personally, have been selling large quantities of this Alphano, but last season was practically our first direct advertising of it. The way the responses came and orders followed, it was abundantly evident that we had a Plant Food and Soil Builder that was welcomed and wanted.

We sold bags, tons, carloads, and barge loads of it, as never before. Last winter we figured that this season a large number of these satisfied customers would come back for more, and that also many of their friends, learning of the results secured by using Alphano on lawns, shrubs, trees, and gardening in general, would likewise become customers; so based on this we spent many thousands of dollars increasing our facilities so that deliveries could be made promptly. As sanguine as we were, we frankly admit having underestimated the amount of the orders that developed.

To add to our embarrassment, the late snows and cold weather made people think Spring was never coming, and so they put off ordering three to four weeks later than usual. Then when the first warm days did come, in came the rush orders. As a result we but naturally became way behind on shipments. In the face of all this we received some pretty stiff letters and rather dynamic phone calls demanding explanations.

To show our absolute good faith, we voluntarily returned a good many dollars to those who, not knowing what we were struggling against, felt we were negligent.

Today (May first) our reports show that we have caught up on deliveries and although the plant is working full tilt, and overtime, our shipments from now will be prompt.

5 BAGS for 5

$12 a ton in bags—$8 by the carload, in bulk, F. O. B., Alphano, N. J.

Those of you who wanted the Alphano for gardening, and it came too late to spade directly in the soil, will find it works wonders when dug around the plants after they are up two or three inches.

As for shrubs, now is as good a time as any to use it. When it comes to lawns, any time is a good time. Put it on now and it will prevent the soil from baking, and the grass from burning this summer. It will induce a strong growth of fine, fibrous, dry weather-resisting roots. The Alphano absorbing and holding as it does such large quantities of moisture, further fortifies the grass against the coming hot sun and drying winds.

Being in powdered form the Alphano is easy to apply. Being ordorless it's at all times free from objection. To apply now, cut the grass, spread on the Alphano, rake it in, and in two weeks' time you will be surprised at the results.

Our records slows that during each month of June, July, August and September of last year, we sold more Alphano Humus for lawns than during any one of the Spring months. Let us know about how large your lawn is and we will advise how much you better order. If you have your Alphano, use it at once. If you haven't any left for your lawns, shrubs, and garden—order some.

If you have never had any, and are interested, but still unconvinced of its merits; send for our book of CONVINCEMENT. It tells what it will do for you, by both telling and showing what it has done for others.

Headquarters for HARDY PHLOX

One year old, field-grown plants now established in three inch pots.
General Collection of Standard Varieties.

HARDY PHLOX

Albion (Medium). One of our own introductions; producing very large panicles of pure white flowers, with faint aniline-red eye.
Aglae Adanson (Medium). Large snow-white with violet-rose eye.
Antonin Mercie (Medium). Light ground color, upper half of each petal deeply suffused bluish-lilac, large white halo.
Bacchante (Tall). Tyrian rose, with crimson-carmine eye.
B. Comte (Medium). Brilliant French purple, with crimson-carmine shadings. 85 cts. per doz.; $6.00 per 100.
Bridesmaid (Tall). White, with large crimson-carmine centre.
Caran d'Ache (Medium). Geranium-red, with old-rose shadings and white eye; very effective.
Champs Elysee (Dwarf). A very bright rosy magenta.
Colibri (Tall). White, with crimson-carmine centre, very late.
Coquelicot (Dwarf). A fine pure scarlet, with crimson-red eye. 85 cts. per doz.; $6.00 per 100.
Danton (Medium). Scarlet, pure red eye.
De Miribel (Medium). White, suffused with bright rosy scarlet, red eye.
Diadem (Drawf). A fine dwarf, pure white.
Eugene Danzanvillier (Tall). Lilac, shading white toward the edges; large white centre.
Frau Dora Umgeller (Medium). Solferino red, shading to carmine-crimson at centre.
General Giovaninelli (Dwarf). Bright tyrian rose, with light shadings at the base of each petal, a pure red eye; very effective.
Goliath (Very tall). Rich carmine, shading to a deep centre.
Helena Vacerasco (Dwarf). Large pure white.
Henry Marcel (Medium). Pure red, with bright salmon shadings.
Henry Murger (Tall). White, crimson-carmine centre.
Henry Royer (Medium). Tyrian rose, with lighter shadings.
H. O. Wijers (Tall). White, with bright crimson-carmine eye.
Jeanne d'Arc (Tall). A good standard late white.
Jules Cambon (Medium). Bright rosy magenta, with large white centre and light halo.
Kucken (Medium). Bright carmine-rose shaded salmon.
La Vague (Medium). Pure mauve, with aniline-red eye.
Le Mahdi (Medium). Deep reddish-violet, with darker eye.
Le Prophete (Dwarf). Bright violet-rose, large light halo and bright rose eye; fine.
Louise Abbema (Dwarf). Very large dwarf, pure white, fine form.
Mme. Paul Dutrie (Tall). A delicate lilac-rose, reminding one of some of the beautiful soft pink Orchids.
Mozart (Tall). Ground color white, suffused salmon; aniline-red eye.
Mrs. Jenkins (Tall). The best tall early white for massing.
Obergartner Wittig (Medium). Bright magenta, with crimson-carmine eye; large flower and truss; one of the best.
Pacha (Dwarf). Deep rose pink, suffused with solferino-red and carmine-purple eye.
Pierre Bayle. Crimson-carmine, overlaid with orange scarlet.
Professor Virchow (Medium). Bright carmine, overlaid with orange scarlet.
Prosper Henri (Tall). Pure white, large decided rosy magenta eye.
Selma (Tall). Large flower, pale rose mauve, with claret-red eye.
Sunshine (Dwarf). Large, aniline-red with crimson-red eye and light halo.
Von Goethe (Medium). Tyrian rose suffused carmine-lake and bright carmine eye.
Von Lassburg (Medium). The purest white in cultivation, individual flowers larger than any other white.

Price. Any of the above varieties, except where noted otherwise, 75 cts. per dozen; $5.00 per 100; $40.00 per 1000.

New Varieties of Phlox

Asia. One of the most valuable recent introductions, a delicate shade of mauve, with a crimson-carmine eye.
Braga. Mauve-rose, more or less suffused with salmon; large white eye; a distinct and pleasing color combination.
Europa. A white variety with very decided crimson-carmine eye; the individual flowers as well as the trusses are very large, entirely distinct.
Manzelbrunner. A very large bright soft pink, with a large white eye.
Rynstrom. An improved form of the popular variety Pantheon; fine for massing, of a Paul Neyron Rose color.
Rosenberg. Bright reddish-violet, with blood-red eye, large truss and individual flowers as large as a silver dollar.
Rheinlander. A beautiful salmon-pink with flowers and trusses of immense size, the color of the flower is intensified by a very decided eye of a deep claret-red. 30 cts. each; $3.00 per doz.; $20.00 per 100.
Wanadis (Medium). Entirely distinct, a mottling of white and light violets, reminding one of Phlox Divaricata Canadensis. The color is intensified by a bright reddish-purple eye. 30 cts. each; $3.00 per dozen.
W. C. Egan. One of the best and largest flowering varieties in our collection, panicles of immense size, of a delicate pleasing soft shade of lilac which is illuminated by a large bright solferino-red eye. 30 cts. each; $3.00 per doz.; $20.00 per 100.
Widar. A splendid improvement on Edmond Rostand; in color a light reddish-violet, with very large white centre, which intensifies the color.
Tragedie. Deep brilliant carmine with blood-red eye. $1.50 per doz.; $10.00 per 100.

Price. Any of the above varieties, except where noted, $1.00 per doz.; $6.00 per 100; $50.00 per 1000.

The prices quoted above are intended for the trade only.

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

Bedding Out

A great many customers want their flower beds filled as early as possible, also vases, boxes and grave lots planted before Memorial Day so every effort should be made to get this work done. It will probably mean long hours for all hands, but then Memorial Day comes but once a year and we can stand it. Geraniums continue the leaders among bedding plants, and no other plant approaches them in popularity. The planting of these should be completed as soon as possible. It is an advantage to have a spell of cool, moist weather in which to set out these and other bedding stock, as it gives the plants a nice start and there is less danger of them being dried out. About every florist has a host of orders for bouquets to fill and a large variety of flowers can be used for this purpose. Crops of ten-week stock, double feverfew, snapdragons, gladioli, larkspur, candytuft, Spiræa japonica and lilies want careful watching. As the stocks of bedding plants become thinned out, take advantage of any spare time to get the remnants bunched up so as not to spread over a needlessly large bench space.

Growing Single-Stemmed Chrysanthemums

From now and up to the middle of June is the best time to propagate this line of stock. Provide good new sand as they are not so easy to root at this time of the year. Give them plenty of room in the cuting bed and see that they are well firmed around. Keep them shaded and watered and they will soon root. When they have roots, from about a quarter to half an inch long they should go into 2½-inch pots. Give them good soil from the start and always shift before they become potbound. For the last shift make the compost good and rich, anywhere from one-half to one-third of the bulk should be well-rotted cow manure with a good sprinkling of bone meal. Grow in a house where they can have plenty of light and ventilation.

Orchids

Oncidium varicosum Rogersii is the most popular of the florists' oncidiums and its long-branched spikes of golden yellow flowers are a great decorative feature in store windows in the fall. Give this oncidium plenty of air at all times during the summer months and, to insure an abundance of atmospheric moisture, wet down the benches, paths and walls three or four times daily during very hot and dry days. These orchids from now on should have sufficient shade to help keep down the temperature, but without excluding the indirect sun influence, for always they like plenty of diffused sunlight. To bring the plants through the summer in good condition keep the temperature as low as the outside condition will permit. Allow the plants to dry out occasionally so as not to let them get sour but don't let them remain dry for any length of time. The safest plan is to give them a dip in a tub of water two or three times a week.

Sweet Peas Under Glass

An abundant water supply, free syringing and ample ventilation are necessities where a late indoor crop is desired. Red spider must be kept off at all hazards and the water from a hose well directed is the one thing needful for this purpose. It will pay to give the glass a light shade, in order to somewhat lower the temperature and keep ventilators and the end doors wide open night and day. The best time to pick the flowers is early in the morning. It will pay to soak the ground well with the hose. If the space between the rows is well mulched, the moisture will be held in the ground a long time. Late sweet peas under glass are usually profitable in most parts of the country. Give them a fumigation about every ten days to keep them clean of fly.

The Compost Heap

We shall soon be filling the benches for chrysanthemums, roses and carnations where they are grown under glass in summer. The compost in addition to being freed from weeds, should be chopped down and turned over. Barnyard manure, added to it when cut and piled up, in the proportion of one load of fresh manure to two loads of sod, will after five months of progressing decomposition, change the proportion to one-fourth of partially decayed manure. So where you want it richer you can add to it when turning it over. This compost, to be right for immediate use after five months' standing, requires to be turned several times during that period, each time to be piled up again into flat heaps. The latter part of May is a strenuous one for all florists and it is difficult to adequately keep abreast of all work demanding attention. So do not put off this very important work but start now and see that it is done in a thoroughly good manner.

Resting Callas

Callas are now coming to the end of their flowering season and will need a good rest. This is brought about by withholding water for the next five or six weeks. Those that are grown in benches can be dried out until they lose their tops when they can be lifted and placed in some cool and dry place until wanted. When grown in pots you can place the pots outside, laying them on their sides, for the same period.

Mr. Farrell's next Notes will be on the following: Antirrhinums for Winter Flowering, care of Adiantums, Chrysanthemums, Asparagus plumosus, Tuberous-Rooted Begonias, Outside Work.

Propagandists

Friends of horticulture who read the notes on the activities of the New Bedford Horticultural Society which appear in this issue will find much to approve and applaud in the practical work which this Society is doing so well. The New Bedford Horticultural Society is yet young, having been organized eleven years ago and it is particularly fortunate in its location among an intelligent and responsive community. All commercial florists, nurserymen, seedsmen and others whose prosperity is dependent upon the patronage of the flower and garden loving public should aid and support these local horticultural organizations with all their heart and soul for they are the best friends commercial horticulture has, fostering and developing the demand for every description of horticultural wares and products.

Convention Garden progress

Considerable space was devoted in our last week's issue to the preparations in progress in Boston to properly receive and entertain the Society of American Florists next August and we are now glad to be able to record rapid advancement within the past week in the work of laying out and planting the big Convention Garden which is destined to be so prominent a feature of the Boston meeting. A number of novel and imposing features have been decided upon in connection with this garden and entries for space have been coming in from many prominent nurserymen, seedsmen and plant dealers. It will be a constant hustle from now on until the planting has been completed and if there are any of our readers who have been thinking of entering exhibits of any kind but have not yet done so, they should realize that the time left for garden planting is now very brief. Every facility is now in working order for immediate and scrupulous attention to exhibitors' instructions.

Memorial Day

Another year has rolled by and once more we stand on the threshold of Memorial Day. The rapidly decreasing ranks of the veterans whose valor and patriotism this day was originally intended to commemorate remind us that it cannot now be very long before the inspiring and time-honored observance in which they are the central feature will have passed into history. Yet Memorial Day will remain, gathering new significance as one generation follows another on the scene and adds its record of willing self-sacrifice and loyalty to country, to home and fellowman. The occasion, however, apart from all its patriotic sentiment, comes at a time when the appeal of the flowers is irresistible and for this reason alone has an assured permanency. It has been the custom of all peoples from time immemorial to welcome the advent of spring and the floral outburst with some festival of rejoicing. The great cherry celebration in Japan is an impressive example which dates back to ancient times. With us the spring welcome finds expression in the lavish floral adornment of the last resting places of those we love and those we honor. In this great annual observance the florist must ever be a factor. No need to beseech and appeal to the public for support as has been thought advisable in the case of the stupidly managed Mothers' Day. Memorial Day will take care of itself and all the florist has to do is to be prepared. It is pleasant to read the reports from all sections that this year there is no scarcity of material and no incentive to advance prices on anything. Under such conditions any florist who takes advantage of his customers by attempting to exact an increased price for his goods or his work commits an act of business suicide.

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur C. Ruzicka

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to the office of HORTICULTURE.

Decoration Day

Growers that are situated on a good road where automobile traffic is quite heavy ought to get after some of the trade that goes past without stopping if they do not see any sign or other advertisement on the place. A neat sign costs very little when compared to the results that it will bring. The very first year ought to more than pay for it. There is no better time to start this than on or rather before Decoration Day as there are more people traveling on this day than any other day in the year. If you have never done business with the automobile traffic it will take a little time to work up the trade but it will not take very long. Give the people good stuff, and charge reasonable prices for it. Put it up in nice boxes and you will be surprised at the amount of business that you will be able to do. Make it a point never to sell bad or overblown roses to anyone, as people will remember that for years to come, especially tourists. You will forget the people, no doubt, as there are new people dealt with every day, but they will remember you, and remember you well. Have the place in good order, all clean, and that will impress the people a good deal. Any other business run slip-shod the way some florists' places are would last but a very short time. You will be surprised at the increased profits if you will spend a little time and money systematizing everything so that work can be done well and rapidly without the "fussing around" half a day to get to a job.

Use of Cracked Ice in the Boxes

Now the warm weather is here to stay see that there is a little cracked ice used in the flower boxes when they are shipped to the market in the morning. This will keep the roses fresh and nice and they will open hardly any. See that the ice does not come in contact with the buds as this would be very likely to spot them, and thus decrease their value.

Care of Wires and Stakes

When the houses are emptied, see that all the wires and stakes that are to be used again another season, are well cleaned and free from all pieces of old string and brush. These strings if allowed to remain on the wires will cause them to rust and they will then break very easily when they are stretched again in the fall of the year. Tie all the stakes in bundles of 50 and put them away where they will be handy to get when they are wanted and where they will not be ruined by having very heavy stuff piled over them. If there is a fairly dry place under the benches, better put them there, and then they will be right in the house where they were taken from. Use a machine to wind up the wires so that they will be free from kinks and will not be twisted and bent in all manner of shapes. A piece of cotton waste held in place by a nail, and soaked with oil will oil the wire as it runs to the winder if it is made to run right under this waste, and it will keep the wire from rusting, thus adding a few years more to its life. Stakes can be treated much the same way, and will repay well the extra amount of labor that is spent on this work.

The Center Braces

All the bench wire braces that are put up here and there should receive as much attention as the wires and the stakes. See that they are carefully put away so that they will be ready to be used again. The men will waste a good deal of time to make new ones next fall and there is no need of it as these will last a good long time yet, if they are cared for properly. Better put them somewhere in the shed, where they will not be disturbed until they are wanted again.

Washing the Houses

When all the earth is removed from the benches, and they are being washed out with the hose, it is a good time to wash off all the green scum that is bound to accumulate on the woodwork. This can be easily done now before it has a chance to dry on to the wood. If the houses are to be painted this summer, the paint will stick much better if all the dirt is removed. If all the wood and iron work will positively be painted, use a little caustic soda in the water that is used to wash off the wood work. This will loosen all the dirt, and make it easier to remove. It will also move some of the paint; that is why it should not be used if the houses are not to be painted the coming season.

Repair Work on the Benches

Do this well, unless you expect to tear out the benches to build new ones soon, and then of course they can be patched any way at all, to make them last the one season. It does not pay to patch up the benches with old half-decayed wood, and then have to patch it all over again. On good benches, put your repairs in so that they will stay for a while to come. Galvanized nails used will help to keep the bench from decaying, as you will find that the boards rot out around the nails first. Use nails sparingly, as they are not necessary, in the bottom of the bench, for the soil will hold the boards in their places. Use merely enough nails to tack the boards here and there so that they will not shift all over the bench when the soil is put in or is being taken out. Painting the ends of all boards, and also the cross-pieces will help to make them last. Do not think of using tar or creosote for that would be the end of your roses. No plants will thrive real well where there is tar around; even the smell of it will have a bad effect on them.

CLUBS AND SOCIETIES

WESTCHESTER AND FAIRFIELD HORTICULTURAL SOCIETY.

This Society held its regular monthly meeting in Greenwich, Conn., Friday, evening, May 8th. A large attendance of members were present and five new members were elected. Summer and Fall Show committees reported progress. Letters from business houses and other friends of the Society were read, offering prizes toward the premium lists of both exhibitions. A communication from the Secretary of the National Association of Gardeners was read, and as the time was limited the communication was tabled until the next meeting when the matter of co-operation could be more thoroughly discussed.

We had the pleasure of the company of John K. M. L. Farquhar of Boston, who delivered a very interesting lecture on "Gardens" illustrated by stereopticon views, mostly colored. Italian gardens of the past and present were mostly described and it was very interesting to note that the architectural features that were so prominent in the olden times have given way greatly to the present day ideas of more flowers. Views of many famous gardens of the Old World were shown, as well as several views of the manner of growing crops by the producing class. The speaker prefaced his lecture with an interesting talk to the gardeners present, giving statistics regarding importation of horticultural stock, which has become necessary owing to the advancement of horticulture in America, and expressed the wish that gardening would rank as highly among the professions as it did in the olden times. He also called attention to the scarcity of really good men to fill many of the important positions that this advancement in horticulture has created. The speaker was accorded a heary vote of thanks.

The exhibition tables were filled to overflowing. A feature was the marvelous Spencer sweet peas, shown by Adam Patterson and Thos. Ryan. Cultural certificates were awarded to each. Jas. Stuart had a grand pair of caleeolarias which also received a cultural certificate and the same honor was accorded to Wm. Graham for a vase of Mrs. Russell roses. John Conroy for antirrhinums, A. Kirkpatrick for cattleya Schroederae and Wm. Graham for antirrhinum, highly commended. The remainder of the exhibits received votes of thanks as follows: Paul Dwenger, night blooming cereus, Jas. Linane, Calceolarias and gloxinias; A. Whitelaw, tulips; P. W. Popp, Laelia purpurata; W. H. Watermoulpi, carnation Brooklyn; Thos. Ryan, gladioli; Mr. McAllister, hardy flowers.

The next meeting, June 12, has been set aside as "Assistants' Night." There will be a competition open to assistant gardeners only, on center piece for the table, composed of outdoor flowers and foliage, to be arranged in the hall. The Michell silver and bronze medals will be awarded to the winners of 1st and 2nd honors. The Summer Show will be held on the Hospital grounds, at Portchester, N. Y., June 19-20. Schedules will be issued shortly.

P. W. Popp, Cor. Sec'y.

NEW BEDFORD HORTICULTURAL SOCIETY.

The regular monthly meeting of the New Bedford, Mass., Horticultural Society was held in Library Hall on Monday evening, May 11, and, in the absence of President Roy, William Keith presided. The schedules for the exhibitions were presented and approved, and are now ready for distribution upon application to J. M. Taber, Secretary. A pleasing report of the "Tree Planting Movement" was submitted showing a growing interest in this branch. Although not now a part of this society's efforts toward a general improvement along horticultural lines, the movement was started and fostered by them until the formation of a local branch of the Massachusetts Forestry Association, when the whole enterprise was surrendered to them. This year about 1200 trees will be planted by the Forestry Association and between 300 and 400 by individuals. A nursery consisting of 35,000 young trees has been established on city property adjoining the Pumping Station.

Another pleasing report came from the committee in charge of distribution of seeds to school children. This movement has been growing steadily and gives lively testimony to the increased interest in matters horticultural among the young. Four years ago the children purchased 14,000 penny packets of seeds while this year's subscription called for 45,000, an increase of 11,000 over last year. Prizes are offered to the amateurs scoring the most points for flowers or plants exhibited at the regular monthly meetings between now and November. An informal and interesting discussion followed on spraying.

Wm. F. Turner.

CONNECTICUT HORTICULTURAL SOCIETY.

The regular meeting of the society was held in the County Building, Hartford, on the evening of May 8. The pansy was on the program for this meeting, and John C. Willard and Louis Chauvy showed about 200 blossoms each. President Huss made an excellent exhibit of hardy shrubs and spring flowering plants. John Gerard, an old pansy expert, Niel Nelson, and George B. Baker were appointed judges and each exhibit was awarded a first-class certificate. President Huss gave an instructive and interesting talk on his exhibit, followed by Mr. Gerard, who dilated on the beauty of the pansy and elucidated on the art of judging this marvelously colored gem of flowers. The secretary read an article in the Gardeners' Chronicle of America, entitled: "Recent Progress in Hardy Garden by Arthur Herrington." The meeting was well attended. The annual Dahlia Show will be held on Sept. 23 and 24 this year.

Alfred Dixon, Sec'y.

Wethersfield, Conn., May 11, 1914.

PITTSBURGH FLORISTS' AND GARDENERS' CLUB.

The regular business meeting of the Club for May was omitted, and in its stead was held on May 14 an entertainment in the English Room of the Fort Pitt Hotel, which the members of the club attended with their wives and lady friends to the number of about 150. The speaker of the evening was Prof. Coggeshall of Carnegie Institute who recounted a trip made by him to the seacoast towns of South America. His address was illustrated by lantern slides, and to many of the members it was a revelation to see the beautiful, clean, up-to-date South American cities and an incentive to try to make our cities like them, for it seemed as though we had something to learn from them in the way of City Beauty. After the address we went to the supper room where we divided up in congenial little groups at the different tables, and as the collation drew to its close were entertained by lady soloists and a violinist.

An agreeable little entertainment, and such affairs serve to strengthen the bonds of good-fellowship that draw together the members of a Florists' Club, and while flowers are beautiful and good to look at, they are not more so than the wives and daughters, the sisters and the "friends" of the florists and it is good for our pride sometimes to know that we are so good looking a "bunch."

The regular monthly meeting of the Club will be held in June as usual.

H. P. Joslin, Secy.

NEW LONDON HORTICULTURAL SOCIETY.

The regular monthly meeting of the above society was held on the 14th inst. The rooms were filled with a quantity of plants and cut flowers. Stanley Jordan, supt. Harkness Estate, had a fine group of gloxinias and ferns. The gloxinias were all in 4-inch pots, and averaged 10 to 12 flowers to a plant. There were other exhibits of carnations from E. Robinson of the Plant estate. Narcissi and mushrooms from Alfred Flowers, and French hydrangeas from E. W. Clark, florist. E. Robinson spoke on the treatment of bulbs when received in the fall and Mr. Clark spoke on French hydrangeas. Tree Warden Henry Fuller called attention to the mutilating of the trees that had just been set out on the city streets.

H. Lickman.

Waterford, Conn.

CLEVELAND FLORISTS' CLUB

The Cleveland Florists' Club has outgrown its old meeting place on Detroit street. On Monday eve., June 8, the first meeting will be held in the new quarters at The Hollenden Hotel. The new rooms are centrally located, modern in heating, lighting, and ventilation and are more in keeping with the programs of the club than the old rooms were. An increase in membership, also in attendance is sure to follow this new move.
